# LEARNING SHAPES AND COLORS <br> Designed by Katia Sherman 

Learning Shapes and Colors can be challenging for some kids. Start with basic shapes at first. Once your child masters them add I or 2 more. You will be amazed how fast they will learn ALL of them.

Before I knew it my 2 year old mastered all 18 shapes. We are now learning 18 colors.
With younger kids (age 2-3) I recommend to learn all 18 Shapes first. With older kids (age 4+) you can start learning complex colors. But again, all kids learn differently, so use "Shapes and Colors" the way that best fits your child.

## INSTRUCTIONS:

I. Print each shape on different color card stock paper. I use textured card stock paper from Hobby Lobby. They have $50 \%$ sale on all paper a lot and that is when I go stock up for projects like this.
2. Cut outside the line. I like it when the shape has black outline. Makes it look nicer.
3. Use them!

## THIS IS HOW I ASSIGNED COLOR TO A SHAPE:

I. Circle - Purple
2. Arrow - White
3. Diamond - Olive
4. Heart-Red
5. Star-Yellow
6. Arc - Fuchsia (hot pink)
7. Rectangle - Green
8. Oval-Orange
9. Square - Tan

1O. Cross - Blue
II. Triangle - Brown
12. Octagon - Lime
13. Pentagon - Burgundy
14. Crescent - Teal
15. Semi-Circle - Cyan (light blue)
16. Parallelogram - Gray
17. Trapezoid - Pink
18. Swirl-Black
