Spira is the name of the world as seen in Final Fantasy X (& Final Fantasy X-2). As befitting its name, Spira is characterized by cycles & repetition, such as the spiral of death that the world endures under the yoke of Sin, the many spheres found in Spira, the blitzball sphere pools, the prayer to Yevon, the Sphere Grid, & Spira’s cycle of life energy emerging from within the planet’s core, granting life to all its living inhabitants, & then returning to the core when a life form dies.

**Geography**

The main landmass of Spira is surrounded by small islands, including Besaid, Kilika, Bikanel, & the ruins of Baaj Temple. The mainland of Spira is where the bulk of Final Fantasy X takes place. The southernmost location, Luca, is a large city home to Spira’s pastime, Blitzball. North of Luca is the mountainous area of Djose, which features a Yevonite temple. Connecting Luca & Djose are several roads: the Mi’ihen Highroad, a historical path that features Chocobos for transportation; the Mushroom Rock Road, home of the failed operation to defeat Sin; & Djose Highroad, a rocky path that forks north into the Moonflow & east to Djose Temple.

The Moonflow is a large river running through the heart of Spira, featuring shoopuff rides, ancient ruins, & a high density of pyreflies. A path from the Moonflow leads to Guadosalam, home of the Guado race & the gateway to the Farplane. North of Guadosalam are the Thunder Plains, which are the site of a never-ending thunderstorm.
controlled by lighting rods calibrated by the Al Bhed. The Thunder Plains lead into Macalania, a sparkling forest complemented by a frozen lake & a Yevonite temple.

Bevelle, the spiritual center of the Yevon religion, lies on a thin strip of land slightly north of Macalania. The city is built as a series of layers, with the headquarters of Yevon located at the top. The Via Purifico, located beneath Bevelle, serves as a prison for outcasts. Further north are the Calm Lands, a series of cracked, blasted plains that have been the site of numerous battles in Spira’s history, mostly with Sin; the Cavern of the Stolen Fayth, an equally historical area; & Mt. Gagazet, home of the Ronso race. Lastly, the sacred city of Zanarkand is on the northern tip of the Spiran mainland, reduced to ruins by the Machina War 1,000 years before the events of *Final Fantasy X*. 
Fauna

Spira also features various animal species. Although most of these are analogues of terrestrial animals, such as cats, dogs, birds & butterflies, a few fictional species appear, such as the gigantic shoopuf & the chocobo. Both are used primarily for transport purposes. Most other unusual creatures encountered in Spira are fiends, monsters formed from the spiritual energy of the pyreflies (see Magic: Pyreflies, below) & motivated by the anger & fear of an Unsent soul.

Technology & Culture

This world has been plagued by an unstoppable destructive entity named Sin for the last 1,000 years. Every 10 years or so, Sin rises from the ocean & wreaks havoc on random coastal settlements (which, considering the geography of Spira, this included most of the available land). This destructive rampage continues until a Summoner can destroy it by summoning the Final Aeon, which battles Sin. After Sin is defeated, a time of peace & regrowth known as the Calm occurs, at least until Sin returns, as it always does.

Life in Spira is simple, as technological advancement has come to a halt in the thousand years since Sin’s first appearance & the rise of the Yevonite religion. For several hundred years, the population’s culture revolved around the temples of Yevon. A strict code of accepted social behaviors (such as distrust towards the Al Bhed & their use of “machina”, a perpetual fear of Sin, & atonement for past sins) were common characteristics of devout Yevonites.

Tensions between the various races exist, mainly with regards to the Al Bhed’s ostracism from the rest of Spira due to religious beliefs. However, other hostilities exist as well. Tensions exist between the Ronso & the Guado, & the Hypello are rarely seen on land, except around the Moonflow (although this may have more to do with their aquatic nature than any dislike of other Spiran races).

Blitzball, a worldwide sporting pastime in Spira, is one of the few ways that all the races in Spira can come together & find temporary escape from the hardships of the world.
Timeline
1,050 Years Ago
- The Bevelle-Zanarkand War is fought.
- The area now known as the Calm Lands is devastated by a machina battle.
- The Bevellians create Vegnagun, the ultimate machina.
- Shuyin & Lenne are killed by soldiers of Bevelle.
- The Summoner Yevon, with his daughter Yunalesca, summons the doomed Zanarkandites to form Sin, the ultimate Aeon.
- The dream-Zanarkand is formed from the fayth of the Zanarkandites.

1,017 YA
- Tidus is born in the dream-Zanarkand.

1,010 YA
- Jecht disappears from the dream-Zanarkand.

1,000 YA
- Sin destroys the dream-Zanarkand, taking Tidus & Auron forward in time.

800 YA
- Summoner Mi’ihen forms the Crimson Blades.
- The Yevonites accuse the Crimson Blades of heresy.
- Mi’ihen convinces the Yevonites that the Crimson Blades are a good group.
- The Crimson Blades become the Crusaders, an arm of Yevon.

700 YA
- A monk from Bevelle named Omega was exiled to the caverns later known as the Omega Ruins for defying the teachings of Yevon, eventually becoming a fiend.

??? YA
- Bilghen, an Al Bhed man, built the lightning towers across the Thunder Plains in order to protect travelers from the frequent lightning strikes.

400 YA
- Summoner Gandof defeated Sin in the Calm Lands, rending a great chasm in the earth (known later as the Scar) with their last clash.

35 YA
- Auron is born (most likely in Bevelle).
28 YA
Seymour Guado is born (most likely in Guadosalam).

25 YA
Kimahri Ronso is born on Mt. Gagazet.

23 YA
Wakka is born in Besaid.

22 YA
Lulu is born in Besaid.

20 YA
Jyscal has his wife & son exiled to the island of Baaj.
Seymour’s mother becomes the fayth of the aeon Anima.
Seymour rejects Anima, living alone in Baaj.

17 YA
Yuna is born in Bevelle to Braska.

15 YA
Rikku is born (most likely in Home, on Bikanel Island).

13 YA
Braska’s wife (an Al Bhed woman, sister of Cid) is killed by Sin, prompting him to become a summoner.

10 YA
Seymour is summoned back to Guadosalam by his father, Lord Jyscal.
Summoner Braska, with his guardians Auron & Jecht, defeat Sin.
Jecht becomes the next Sin, killing Braska.
Auron confronts Yunalesca, who kills him.
Yuna moves to Besaid with Kimahri.

2 YA
Seymour returns to Zanarkand to accept Anima.
Summoner Ginnem, while with her guardian Lulu, dies in the Cavern of the Stolen Fayth while attempting to reach the aeon Yojimbo.

1 YA
Summoner Zuke begins his pilgrimage, with Lulu & Wakka as his guardians.

6 Months Ago
Summoner Zuke gives up his pilgrimage at the Calm Lands.

PRESENT
Tidus arrives in Spira.
Yuna becomes a summoner & begins her pilgrimage.
Yuna & her guardians destroy Yu Yevon, beginning the Eternal Calm.
Jecht, Auron & Tidus are sent to the Farplane.

2 Years Later
Yuna begins her journey to combat Vegnagun.

Hume

Humes are by far the most common race among the peoples of Spira. They make up most of the population of Besaid, Kilika, Luca & Bevelle. Their lack of distinguishing physical features makes them highly adaptable, & possibly fuels their desire to augment their abilities with magic or technology.

Personality

There is no single trait that defines the Hume. They run the gamut of personas: warm & cold, manic & morose, serious & silly. If one were to nail down the most common traits of the Humes, though, they would probably settle upon curiosity, versatility, & ambition. Humes are naturally inquisitive, seeking to know & understand even that which they fear most. They are also quite adaptable, able to adjust to almost any situation. Lastly, Humes as a whole are ambitious, always seeking to bigger & better things.

Physical Description

Humes are a race of diverse & varying appearances. They average 5½’-6’ tall & typically weigh around 130-180 pounds, with the females being significantly shorter & lighter. Their hair can be black, brown, blonde, white, gray, or even red. Their skin can be blackish-brown, pale cream, or anything in between, although a light tannish hue is the most common tone. Their eyes also vary highly, with brown green & blue being the primary iris colors.

Relations

As the most widespread & numerous peoples of Spira, Humes have a competitive relationship with most other races, sometimes souring into outright conflict. The Al Bhed are frequently persecuted by Humes for religious reasons. The Ronso are believed to have fought the Humes in the years before the coming of Sin. The Humes have trade relations with the reclusive Guado, but are never fully trusted, as their motivations are largely unknown. Only the
Hypello enjoy a relaxed affiliation with the Humes, but this is mostly due to the fact that they occupy incompatible territory & do not compete for resources.

Alignment
Humes can be of any alignment. They can be a righteous Lawful Good priest of Yevon, a practically-minded True Neutral merchant, or a demonic Chaotic Evil black mage. If there is a philosophy, creed, or belief in Spira, chances are that a Hume is a devoted proponent of it.

Hume Lands
Even though Sin has repeatedly scourged the land over the last thousand years, Humes have still found many places to call home. In fact, they have more cities, towns & villages on Spira than all other races combined. Major Hume settlements include Besaid, Bevelle, Kilika, & Luca. They also are present on the Mi’hen Highroad, Mushroom Rock Road, the Djose Highroad, the Moonflow, the Thunder Plains & even the Calm Lands.

Religion
Most Humes are members of the Church of Yevon. This is the faith that sprang up a thousand years ago in response to the rise of Sin. Ever since, it has dominated Spiran beliefs, as well as its politics. The masters of Yevon effectively rule Hume society, & nearly all other creeds are denounced as heretical & sacrilegious. Although there are Yevonites of nearly all other races, Humes make up the bulk of the church’s ranks.

Language
The predominant language of the Humes (as well as Spira at large) is the Common Speech. Originally a racial tongue of the Humes, it has spread to all corners of Spira, so that most races in most places speak at least some Common. It is a language as versatile as the Humes themselves, able to be used well for a wide range of topics, although some claim that it isn’t as elegant as Guado or as technically-oriented as Al Bhed.
Male Names
Abus (Luca), Auron (Bevelle), Datto (Besaid), Jassu (Besaid), Kyou, Mep, Nizarut (Kilika), Vuroja (Kilika), Wakka (Besaid), Zalitz (Luca)

Female Names
Balgerda (Luca), Deim (Kilika), Donna (Kilika), Doram (Luca), Kulukan (Kilika), Lulu (Besaid), Mifurey, Shaami, Svanda, Vilucha (Besaid)

Adventurers
There are many reasons for a Hume to choose the life of an adventurer, but the most pressing is the desire to bring about the Calm. To do this, many Hume have become summoners in order to attain the Final Aeon, or become guardians escorting those who became summoners. These pilgrimages to defeat Sin provide the most opportunity for adventure, but expeditions to ruined settlements are also common. Many surviving peoples wish to hire those who are willing to risk encountering fiends in order to salvage valuables from the ruins.

Racial Traits
- **Medium**: As Medium creatures, Humes have no special bonuses or penalties due to their size
- **Humanoid traits; [Human] subtype**
- Hume base land speed is 30'
- 1 extra feat at 1st level
- 4 extra skill points at 1st level & 1 extra skill point at each additional level
- **Automatic Language**: Common
- **Bonus Languages**: Any (other than secret languages, such as Druidic)
- **Favored Class**: Any; when determining whether a multiclass Hume takes an experience point penalty, his or her highest-level class does not count

Al Bhed
Of all the races of Spira, the Al Bhed are most like the Hume. Characterized by their distinctive swirling green eyes & their affinity for mechanical devices, the Al Bhed the victims of a centuries-old discrimination campaign by the Church of Yevon.

Personality
Ruled by their passions, Al Bhed often have upbeat personalities, usually seeing the bright side of a situation, no matter how bleak. They also tend to be a bit mischievous, playing pranks or stealing minor effects from others for fun. They become grave, though, when they are seriously threatened, swiftly turning stern in the face of danger. Once the menace has passed, they are just as quick to cheer, returning to their sunny disposition. Even persecution from the Yevonites cannot repress the Al Bhed spirit.

Physical Description
Like Humes, the Al Bhed average 5½’-6’ tall & typically weigh around 130-180 pounds, with the females being significantly shorter & lighter. They almost always have blonde hair & green eyes, which have a strangely swirling iris, as if their pupils were in the shape of little spirals. Other than that, they can easily pass for Humes, & so they commonly disguise themselves as such by wearing goggles or some other device to cover their eyes.

Relations
The Al Bhed have poor relations with the other races of Spira, although it not through a lack of trying. Because of their affinity for machina, the Church of Yevon has singled out the Al Bhed as a heretical people, & so most others do not receive them well (50% chance for viewer’s attitude to be 1 step more hostile). Despite this, the Al Bhed have traveled the world, traded with others to fund their expeditious uncovering ancient machina, & even participated in Blitzball tournaments.

Alignment
Although they can be of any alignment, their positive attitudes grant the Al Bhed a slightly Good bent. They also strongly favor Chaos over Law by a ratio of about 2:1. Being an adaptable people, though, there are Al Bhed of all alignments, much like their more numerous cousins, the Humes.

Al Bhed Lands
For most of their history, the Al Bhed have not had a place to call their own. They had spread to every corner of Spira, plying the seas in their motorized ships & forming enclaves in Humes cities such as Luca & Kilika (but not Bevelle). A couple of decades ago, though, an Al Bhed man named Cid founded the city of Home on Bikanel Island, on
the edge of the Sanubia Desert. This place was so named because it was designed to be a refuge for all Al Bhed, in response to escalating harassment from the Yevonites.

Religion

Although the Al Bhed believe in the afterlife, they reject the doctrine of the Church of Yevon. They are the only group in Spira that openly opposes the ban on machina & the use of the Final Summoning to combat Sin. They also believe that the Farplane is not a place where the living should enter, & that the images of the deceased that people
see there are just memories & not communicable spirits. Because of these vast theological differences, the Yevonites have declared that all Al Bhed are heretics & have actively ostracized them.

Language
The Al Bhed language is distantly related to the Common speech, sharing the same alphabet, grammar & syntax, but the words themselves are very different. Because of this, as well as the social divides between the Al Bhed & the other Spiran races, the Al Bhed tongue is used almost exclusively among the Al Bhed, & many Al Bhed also speak Common. Their language is very useful when discussing technical topics, though, such as mechanics, engineering, & architecture.

Male Names
Berrik, Eigaar, Nimrook, Rin, Ropp

Female Names
Judda, Lakkam, Linna, Naida, Rikku

Adventurers
As the Al Bhed oppose the use of the Final Summoning, they almost never act as guardians for summoners on a pilgrimage. In fact, they often embark on missions to sabotage a summoner’s efforts to summon the Final Aeon, even up to kidnapping a summoner. They do this because they see the Final Summoning as a needless sacrifice of the summoner’s life. They also travel far across Spira many vast seas, seeking either to meet & trade with far-flung friends & relatives, or to search Sin-scorched ruins for broken machina to collect & repair.

Racial Traits
- **Medium:** As Medium creatures, Al Bhed have no special bonuses or penalties due to their size
- **Humanoid traits; [Al Bhed] subtype**
- **Al Bhed base land speed is 30’**
- **-2 Strength, +2 Dexterity**
- **+2 racial bonus on attack rolls against Constructs**
- **+2 racial bonus on Craft & Disable Device checks**
- **+4 racial bonus on Disguise checks when masquerading as a Hume**
- **+2 racial bonus on all saving throws versus mechanical traps**
- **Automatic Language:** Al Bhed
- **Bonus Languages:** Common
- **Favored Class:** Bandit

Half-Al Bhed
The product of a union between an Al Bhed & a Hume, a Half-Al Bhed is a rare hybrid due to the animosity felt between the Al Bhed & the Yevonites. Forever caught between two worlds, they must often forge their own path in life, & as such tend to be independent, possessing a quiet inner strength.

Personality
Much like their Hume & Al Bhed parents, Half-Al Bhed are mostly flexible & optimistic, despite the pressures of being sired by two races that have such poor relations. They do tend to grow quiet & reserved, though, preferring to wait until the right moment to speak their mind. This diplomatic streak affords them well, as does their gift for the medicinal arts, for they often make excellent healers, able to cure the ill & hopefully earn the respect of Hume & Al Bhed alike.

Physical Description
Like Humes & Al Bhed, the Half-Al Bhed average 5½’-6’ tall & typically weigh around 130-180 pounds, with the females being significantly shorter & lighter. They appear almost entirely like a Hume, usually only distinguished by their differently-colored eyes (a condition known as *heterochromia*), one of which is always green. Other than that, they have the same wide range of skin tone as Humes, although they often (but not always) have the blonde hair of the Al Bhed.

Relations
As the dealings between the Humes & the Al Bhed are tense at best, their combined offspring are often rejected by both parents as resembling the other’s race. Most other races would mistake them for Humes anyway, so a Half-Al Bhed is rarely inclined to correct them on the point. Masquerading as a full-blooded Hume can be seen as offending both parents, so some half-breeds go to lengths to cover their tracks or avoid the issue entirely.
Alignment

The few Half-Al Bhed on Spira are just as diverse in their disposition as their parent races, & so may be of any alignment. In fact, they have even less a leaning toward Chaos than the Al Bhed, although they do retain the slight inclination to Good. As they often wish to be apart of a group, they commonly adopt the average alignment of their peer group.
Half-Al Bhed Lands

These half-breed have even less of a homeland than the full-blooded Al Bhed, & so Home is no real home for them. With no place of their own, Half-Al Bhed fit into Spiran society where they can, mostly living in the Hume settlements, including Besaid & Bevelle. Because of this, as well as their extremely low numbers, they almost never meet another like themselves, & thus have no racial identity.

Religion

The beliefs of a Half-Al Bhed usually reflect the people among which they were raised. If they were reared in the midst of Humes, then they almost always end up being Yevonites. If they instead grow up with Al Bhed, then they tend heavily toward rejecting Yevon. As many of them wish to belong to some group or another, they only rarely (if ever) deny the religion of their peers.

Language

Half-Al Bhed almost invariably speak Common, although many of them although speak Al Bhed. Some of them use Al Bhed as their primary language, but they will almost always know Common, as well. Because of this propensity for languages, some of the Wittiest half-breeds speak Guado, Ronso, or even Hypello, too.

Names

Half-Al Bhed children are either given Hume names (if raised among Hume) or Al Bhed names (if raised among Al Bhed).

Adventurers

A Half-Al Bhed would go on an adventure for all the same reasons that a Hume or an Al Bhed would. They could join (or even start) a pilgrimage, they could work to oppose the Church of Yevon, or they could travel across Spira seeking ancient machina. Half-breeds seem to be drawn to adventure as a means of gaining the respect & independence that commonly elude them due to their heritage.

Racial Traits

- **Medium:** As Medium creatures, Half-Al Bhed have no special bonuses or penalties due to their size
- **Humanoid traits**
- **Al Bhed Blood:** For all effects related to race, a Half-Al Bhed is considered an Al Bhed
- **Half-Al Bhed base land speed is 30’**
- **-2 Strength, +2 Dexterity**
- **4 extra skill points at 1st level & 1 extra skill point at each additional level**
- **+2 racial bonus on Heal & Use Magic Device checks**
- **+8 racial bonus on Disguise checks when masquerading as a Hume**
- **Automatic Language:** Al Bhed
- **Bonus Languages:** Common
- **Favored Class:** Summoner

Ronso

The mighty Ronso are a hardy race of massive tribal feline humanoids. Their monstrous appearance & great strength make them formidable warriors, as well as ardent defenders of their territory & their faith. They mostly live around the base of the sacred Mt. Gagazet, in the frozen north of the main Spiran continent. The mountain affords them some protection from Sin, & so they are averse to leave it, despite their reputation for bravery & honor.

Personality

“Gruff.” “Terse.” “Stoic.” “Stern.” These are the most commonly heard words used to describe the Ronso, & they are largely based in fact. Ronso are not known for their subtlety or patience, & they have a reputation for settling disputes violently. This is not to say that they are evil or cruel; they simply have a culture oriented around honor, duty & combative rivalry, & so they tend to be curtly militant.

Physical Description

Ronso males average 7’-9’ tall & typically weigh 260-430 pounds. The females are shorter & lighter; they are only about 6’-8’ tall, weighing 210-380 pounds. They are imposing figures, with muscular builds, thick body fur (which is generally a dark grayish-blue, although other colors are possible), & most importantly, a foot-long horn growing from the center of their foreheads. They also sport a thick mane of silvery-gray hair on their heads, as well as tufts of the same hair on their shoulders & at the end of their tails. Their eyes are slit like a cat’s, & are usually yellow or green, although orange, brown, & blue are also sometimes seen. These features, along with their digitigrade feet, long black claws, long tail, & prominent fang-like teeth add to their feline appearance.
Relations

The Ronso have rather peaceful relations with the Humes & the Guado, as they are largely supportive of the Church of Yevon. Despite this, few Ronso ever stray far from the frigid base of Mt. Gagazet, so their dealings with other races are amicably limited. They have almost no contact with the Al Bhed or the Hypello, as they are divided by theology & climate, respectively.

Alignment

Due to their strict warrior ethic & their religion, Ronso are often Lawful in some respect. They have no bias towards good or evil, but regardless of their place on the morality axis, they tend to follow a rigid code of conduct. Those few chaotic individuals typically find themselves cast out of the tribal society of the Ronso, left to fend for themselves once they have left the relative safety of the sacred mountain.

Ronso Lands

Nearly all Ronso reside somewhere near their hallowed homeland, the great Mt. Gagazet. This lonely mountain rises high above the frozen wastelands of northernmost Spira; only the haunted ruins of Zanarkand are farther north than the holy mountain. Ronso are rarely found anywhere else than on Gagazet; these are usually Yevonite priests working for the church or exiles scratching out a life while dreaming of a return to their sacred home.

Religion

Hundreds of years ago, the Ronso were almost completely converted to the Church of Yevon, becoming devout followers & staunch opponents of Sin. Their old religion, now nearly forgotten, is believed to have been a pagan nature-worshipping cult, of which the only existing remnant is the reverence for Mt. Gagazet (which may have been a god in the old faith). Now mostly members of the Yevonite creed, the Ronso have become stalwart defenders of the pilgrimages, believe them to be the only way to achieve the Calm.

Language

The Ronso tongue is a harsh, guttural language, not nearly as lyrical as Guado, as mechanically-inclined as Al Bhed, or as versatile. It is also difficult for non-Ronso to pronounce, & so it is rarely heard by the other Spiran races, as the Ronso are perfectly capable of speaking the languages of the smaller peoples. Used among themselves though, the Ronso speech is well-suited for religious discourse, hunting topics, & ritual incantations.

Male Names
Argai, Basik, Gazna, Kimarhi, Yenke, Zev

Female Names
Irga, Nuvy

Adventurers
Despite their great size & power, Ronso do not often partake of the adventuring lifestyle, preferring instead to work for the Church of Yevon or merely remain on their sacred Mt. Gagazet. Sometimes though, adventures find them. Exiles are prone to embarking on quests to regain their honor. Young Ronso sometimes seek glory by leaving home to
participate in some conflict, putting their aggression & ferocity to use. Even members of the Yevonite clergy sometimes join a pilgrimage, either as a summoner, or more often in the role of a guardian.

**Racial Traits**
- **Large**: As a Large creature, a Ronso gains a -1 size penalty to Armor Class, a -1 size penalty on attack rolls, & a -4 size penalty on Hide checks, but he or she uses Medium-size weapons, gains a +4 size bonus on Grapple checks, & his or her lifting & carrying limits are 2x of those of a Medium character.
- **Monstrous Humanoid traits (in name only; characters progress by class, as if Humanoid)**
- **Ronso base land speed is 40’**
- **+4 Strength, -2 Dexterity, -2 Charisma**
- **Natural Weapon (Ex): Gore (1d4 + Str); Charge Attack (1d4 + Str) × 2**
- **Automatic Language: Ronso**
- **Bonus Languages: Common**
- **Favored Class: Lancer**
- **Level Adjustment: +1**

**Guado**
A race of arboreal recluses from the crystalline forest of Macalania, the Guado people are mysterious & exotic. They differ significantly from Humes in appearance, with their bizarre hair & gangly frame. Their capital city, Guadosalam, holds within it a portal to the Farplane, & as such, they hold a great deal of political power in their alliance with the Yevonites.

**Personality**
The Guado have a reputation for being aloof & distant, & this is well-deserved. They often seem to be distracted or lost in thought, sometimes even oblivious to their surroundings. They are also serene & placid, though, as well as centered & in control of their emotions, so most non-Guado don’t mind their preoccupied state.

**Physical Description**
Guado average about 5’ tall & typically weigh 100-140 pounds; this applies to both genders, which are similar in stature (although the females may be a tad lighter). They have long lanky arms, even longer claw-tipped fingers, tangled twisted hair, & prominent veins on their faces. Their hair can be of any shade that a Hume has, as well as blue or green. Their hazy eyes & languid stance make them look as if they were always walking through a dream.

**Relations**
The Guado generally get along well with most other races, & they would for the most part like to believe that they are above the petty concerns that tend to strain racial relations. However, as staunch supporters of the Church of Yevon, they participate in the discrimination against the Al Bhed, which usually includes any known Half-Al Bhed. They also take issue with Half-Guado, as full-blooded Guado believe in a strict division between the races & abhor the idea of diluting their race by including Hume blood.

**Alignment**
Like the Ronso, Guado are most often Lawful in some regard, as they have a conformist society, but they can be of any moral persuasion (Good, Neutral, or Evil). This is due to their ties to the Church of Yevon, as well as their emphasis on discipline & conformity. Chaotic Guado are often viewed as heretical aberrations, & are treated much the same as Al Bhed or half-breeds.

**Guado Lands**
The Guado occupy a city in central Spira called Guadosalam, nestled between the Moonflow & the Thunder Plains. This underground citadel has been the home of the Guado since time immemorial, & is highly valued by the Yevonites for its gate to the Farplane. This gate allows the living to see (& seemingly communicate with) spectral images of the deceased, which the Church of Yevon views as direct contact with those who have been Sent. Guado also are seen, albeit less frequently, in Luca, Bevelle, & the crystalline forests of Macalania.

**Religion**
The Guado are vocal followers of the Church of Yevon, & have been instrumental in spreading the faith across Spira. Nearly all Guado worship Yevon in some capacity, & it is unknown what (if any) spiritual beliefs they may have held before the rise of the Yevonites, although it probably revolved around the Farplane Gate, as that has existed for well over a thousand years. Those few Guado who do not follow Yevon are considered heretics & are typically exiled from Guado society.
Language

The poetic language of the Guado is one of grace & poise, a delicate & complex tongue full of flowery details & embellishments. It is meant to be spoken in a fast & flowing manner; that fact, combined with its many intricacies, make it a difficult speech for non-Guado to master. Therefore, most Guado speak Common in the presence of other races, & few non-Guado bother to learn it. It is complementary, though, to poetry, singing, & chanting.

Male Names

Giera, Jyscal, Navara, Zazi
Female Names
Auda, Pah, Yuma

Adventurers
Most Guado see little need to venture out of their regimented lives to explore the deadly unknown, so full of fiends & far from the perceived safety of their cloistered existences. For those who do have a streak of curiosity & daring (or those who have been exiled & therefore have no choice), Spira is full of opportunities to find adventure. There exist many ruins from Sin’s past rampages, as well as haunted regions overrun with fiends. There are also frequent pilgrimages to defeat Sin itself, & these appeal even to the normally detached Yevonites.

Racial Traits
- **Medium**: As Medium creatures, Guado have no special bonuses or penalties due to their size
- Monstrous Humanoid traits (in name only; characters progress by class, as if Humanoid)
- Guado base land speed is 40’
- +2 Dexterity, -2 Wisdom, +2 Charisma
- +2 racial bonus on Climb & Survival checks
- +2 racial bonus on Reflex saves
- Natural Weapon (Ex): Claw (1d4 + Str); Full Attack 2 Claws (1d4 + Str)
- Detect Undead (Su): a Guado can sense when undead are within 30’ (although they cannot pinpoint individual undead, merely noting the direction & number of undead within their radius) & can tell if a person is secretly an unsent, a fiend or an Aeon; sensing undead is a swift action that does not provoke attacks of opportunity
- **Automatic Language**: Guado
- **Bonus Languages**: Common
- **Favored Class**: Ronin
- **Level Adjustment**: +1

Half-Guado
The result of a rare union of Hume & Guado, a Half-Guado is caught between two very different worlds. Both parent races see the other as strange & incomprehensible, so they tend to view the crossbred offspring as either equivalent to the other parent or an unnatural abomination. This usually causes a crisis of identity in the Half-Guado that can lead to a dangerous instability if left unchecked.

Personality
Half-Guado are forever torn by their disparate heritages. On one hand, they are pulled by the ambition & diversity of the Hume world. On the other, they feel the call of impersonal spiritualism found in the world of the Guado. This leads many such half-breeds to suffer under the pressure of these two seemingly incompatible lives. To make things worse, both Humes & full-blooded Guado largely reject them, so they often wind up feeling bitter, depressed, & isolated.

Physical Description
Unsurprisingly, Half-Guado are a blended mix of Hume & Guado traits, attributes, & features. They average almost 5½’ tall & typically weigh 110-200 pounds; this applies to both genders, which are similar in stature (although the females may be a little lighter). Appearance wise, they are mostly like Humes, with only toned-down Guado features: longish arms, long fingers, wildly thick hair, & subtle-yet-visible facial veins. Their hair has the same range of color as the Guado, so blue or green hair is not unheard of.

Relations
The one thing that the Humes & the Guado may have in common, besides their religion, is their mutual dislike of the Half-Guado. Neither people are fully willing to accept them (despite statements to the contrary of unity & symbolic brotherhood), so the half-breeds are often left to fend for themselves in the dangerous world of Spira, a harrowing experience for even a seasoned warrior. Other races of Spira offer little better treatment, as they are even more alien to a Half-Guado looking for acceptance & solace.

Alignment
The variety of Hume ideologies affects their half-breed kin, so that Half-Guado can be of any alignment. They are as likely to reject the Guado’s condemnation & rigid conformity as they are to try & work with it, so they are not particularly biased toward either Law or Chaos, & like both of their parent races, they may lean towards Good, Neutrality, or Evil, depending on their disposition & upbringing.

Half-Guado Lands
More than perhaps any other Spiran race (except possibly the Half-Al Bhed), Half-Guado have no place to call their own. Guadosalam is not a tolerant or nurturing place for a half-breed to live, so most of them live within Hume settlements. Even there, though, they may find no real comfort, so some of Half-Guado are forced to find refuge in the unsettled parts of Spira, often within Sin-blasted ruins or fiend-infested wilds. As a result, Half-Guado are an even more rare people; they almost never meet another like themselves, & thus have no racial identity.

Religion
Because of the dominance of the Yevon church & its place of importance in the hearts & minds of both Humes & Guado alike, even Half-Guado are sometimes called into its service. Many half-breeds seek to gain the approval of their parent races by joining the Yevonite clergy. Others, though, reject the Church of Yevon as a means of getting back at those that persecuted them.

Language
The primary language of a Half-Guado is largely dependent on where they were raised. A half-breed that grew up in Guadosalam would speak the Guado tongue, whereas if they lived apart from the Guado, they would likely use the Hume speech. They sometimes know the other parent’s language, but not often, as they likely never got the proper experience to learn it.

Names
Half-Guado children are either given Hume names (if raised among Humes) or Guado names (if raised among Guado).

Adventurers
Half-Guado usually have a need to prove themselves to their peers. As they are not usually welcome by either Humes or Guado, & therefore are unlikely to be Yevonites, they do not often participate in pilgrimages. However, as common exiles, adventure often finds them, usually in the form of ruined settlements, haunted battlegrunds, or fiend-infested hinterlands.

Racial Traits
- **Medium:** As Medium creatures, Half-Guado have no special bonuses or penalties due to their size
- **Humanoid traits**
- **Guado Blood:** For all effects related to race, a Half-Guado is considered a Guado
- Half-Guado base land speed is 30’
- -2 Wisdom, +2 Charisma
- 1 extra feat at 1st level
- +2 racial bonus on Diplomacy & Spellcraft checks
- +2 racial bonus on Disguise checks when masquerading as a Hume
- +2 racial bonus on Reflex saves
- **Automatic Language:** Guado
- **Bonus Languages:** Common
- **Favored Class:** Black Mage
Hypello

The least common of the races of Spira (not counting the half-breed races), the Hypello are seldom seen above the surface of the water. Extremely even-tempered & lackadaisical, they tend to “go with the flow” & only rarely involve themselves with other people’s problems. Ironically, they are the only major race that has no professional blitzball team.

Personality

Hypello are rarely taken seriously, & for good reason. They are short, eccentric, & outlandish. However, they are very adaptable & optimistic, as well hard-working & creative. In large numbers, they are a force to be reckoned with, due to their propensity for cooperation & collaboration.

Physical Description

Hypello are small in stature, averaging about 4’ tall & typically weigh around 60-75 pounds. As amphibian creatures, the Hypello have smooth bluish-green skin, large yellow eyes, & webbed fingers & toes. They have no hair of any sort. They walk in a slow, languid waddle, swinging their arms & bobbing their heads in a disarming fashion.

Relations

The Hypello generally get along well with all other Spiran races, as they are easy-going & non-territorial. They have the most dealings with the Humes & the Guado, although they also have contact with the Al Bhed & the Ronso, albeit to a lesser extent. These transactions are usually mercantile in nature, although less formal connections are not unknown, even though they mostly keep to themselves.

Alignment

The Hypello have a loosely organized culture that promotes individualism & free will, so they are most often Chaotic to some extent. Lawful Hypello are a rare breed, although they suffer no real stigma from their community; it is, after all, their choice to do so. This social drive towards independence & freedom tends to make most Hypello either Good or Neutral, as there is no real incentive in their culture to act in an Evil manner, except in extraordinary circumstances.

Hypello Lands

The Hypello have almost real lands of their own; they mostly live underwater, & so they have no need for surface territory. They mainly live in ocean grottos or shallow trenches, although they can live in freshwater as well. The only surface region that they really occupy in any numbers is the Moonflow, where they run a ferry service across the wide river with shoopufs as transport, catering to travelers going between Guadosalam & Luca.

Religion

The religion of the Hypello is a well-kept secret, as they do not speak much on the topic of theology. Few of them are declared Yevonites, but they do not speak out against Yevon’s teachings either, as the Al Bhed do. It is assumed that they worship a god or pantheon of their own, but that they have reason not to share their beliefs with other peoples. Whatever the reason, the Hypello jovially plead ignorance or change the subject when asked about their faith.

Language

The Hypello tongue is a complex blend of gurgles, whistles, squeaks & clicks, some of which can only be uttered properly while underwater. For this reason, most Hypello use Common exclusively when on dry land, & few non-Hypello bother to learn their speech, let alone use it often. Hypello have a hard time pronouncing Common & other air-based languages, as they use many phonemes that are meant for vocal apparatuses of a different design than theirs.
Names

Hypello have names in their own language, but these are very difficult for non-Hypello to pronounce correctly. Because of this, they tend to adopt descriptive titles as their names when interacting with other races. Such designations include: Barkeep, Captain, Cook, Diver, Gurgler, Matron, Nurse, Rider, Surfer, Trader, Waddler, & Zipper. Most of these monikers can be applied to either sex, as few of them carry a gender bias to a Hypello.

Adventurers

The Hypello are a peaceful people, preferring to get along with everyone & offend no one. However, even this amiable nature & a relaxed attitude cannot keep adventure opportunities from arising from time to time. Sin is ever-present, rampaging randomly, & it travels most often via the oceans, so the Hypello often know where it is & where it is heading. They usually attempt to warn settlements when Sin is approaching, but sometimes there isn’t enough time to save people from its wrath. Hypello rarely participate in pilgrimages, but they do explore the oceans & report to the Al Bhed any machina wrecks that they encounter.

Racial Traits

• Small: As a Small creature, a Hypello gains a +1 size bonus to Armor Class, a +1 size bonus on attack rolls, & a +4 size bonus on Hide checks, but he or she uses smaller weapons than Humans use, gains a -4 size penalty on Grapple checks, & his or her lifting & carrying limits are ¾× of those of a Medium character.
• Monstrous Humanoid traits (in name only; characters progress by class, as if Humanoid)
• Aquatic subtype traits
• Hypello base land speed is 20’
• Hypello base swim speed is 40’
• -2 Strength, +2 Constitution
• Low-Light Vision
• Amphibious (Ex): Although aquatic, Hypello can survive indefinitely on land
• Natural Swimmer (Ex): A Hypello has a +8 racial bonus on any Swim check to perform some special action or avoid a hazard. It can always choose to take 10 on a Swim check, even if distracted or endangered. It can use the run action while swimming, provided it swims in a straight line.
• Shlurred Shpeech (Ex): A Hypello speaks with an impediment when out of water, taking a 10% chance of spell failure as a racial penalty, & a -2 racial penalty on Intimidate rolls
• Underwater, a Hypello has a +4 racial bonus on Hide, Listen, & Spot checks
• Automatic Language: Hypello
• Bonus Languages: Common
• Favored Class: Any; when determining whether a multiclass Hypello takes an experience point penalty, his or her highest-level class does not count

Chapter 3: Classes

NOTE: this section replaces the classes found within the Player’s Handbook (pages 24-58).

Pugilist (“Tidus”)

Natural fighters, Pugilists are masters of melee & hand-to-hand combat, specializing in hastening the actions of their allies while delaying the attacks of their enemies. Coming from a wide variety of backgrounds, Pugilists often serve as guardians for a Summoner, protecting them so that they may accomplish their mission of defeating Sin. Those that don’t become guardians usually become either soldiers, Crusaders (see below), or thugs.

Alignment: Any.

Hit Die: d8.

Class Skills: The Pugilist’s class skills (& the key ability for each skill) are Balance (Dex), Climb (Str), Craft (Int), Gather Information (Cha), Handle Animal (Cha), Jump (Str), Listen (Wis), Perform (Cha), Profession (Wis), Ride (Dex), Search (Int), Sense Motive (Wis), Spot (Wis), Swim (Str), & Tumble (Dex).

Skill Points at 1st Level: (4 + Intelligence modifier) × 4.

Skill Points at Each Additional Level: 4 + Intelligence modifier.

MP per Level: 1d6+4.

Hume Pugilist Starting Package

• Armor: chain shirt (+4AC, max. dex. +4, armor check penalty -2, 20% ASFC, 25lbs), 100gp; buckler (+1AC, armor check penalty -1, 5% ASFC, 5lbs), 15gp
• Weapons: long sword (1d8, 19-20×2, 4lbs, slashing), 15gp
• Skill Selection: pick a number of skills equal to 5 + Intelligence modifier
•Feat: Dodge
• **Bonus Feat:** Mobility
• **Gear:** backpack, waterskin, trail rations, bedroll, sack, hempen rope, flint & steel kit
• **Gold:** 4d4gp (10gp)

Class Features

All of the following are class features of the pugilist. See level progression on Table 1-1: The Pugilist for more information.

**Weapon & Armor Proficiency:** You are proficient with all simple & martial weapons, & with light armor & shields (except tower shields).

**Cheer (Su):** At 1st level, you can bolster the fighting spirit of your party; this ability grants all allies within 30’ (including yourself) a +2 morale bonus to Strength & Dexterity for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a *cursed* effect, or die (even if they are revived during the same encounter); this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP

**Uncanny Dodge (Ex):** At 2nd level, you retain your Dexterity bonus to AC (if any) even if you are caught flat-footed or struck by an invisible attacker; however, you still lose your Dexterity bonus to AC if immobilized; if you already have Uncanny Dodge from a different class, you automatically gain Improved Uncanny Dodge instead

**Flee (Su):** At 3rd level, you can grant all allies within 30’ (including yourself) an increase to their base land speed or swim speed of +30’, similar to an *expeditious retreat* spell; this increase is treated as an enhancement bonus; there is no effect on other modes of movement, such as burrow, climb, or fly speeds; as with any speed increase, this ability affects jumping distances; this can only be used to escape from the current encounter, & the entire party must travel in the same direction; this is a move action that does not provoke attacks of opportunity; against a group of opponents with an ECL higher than your party’s average level + 1, this ability will not work; this ability does not consume any MP to use

**Evasion (Ex):** At 4th level, you can avoid even magical & unusual attacks with great agility; if you make a successful Reflex saving throw against an attack that normally deals half damage on a successful save, you take no damage instead; Evasion can be used only if you are wearing light armor or no armor; you gain no benefit of Evasion while you are helpless

**Haste (Sp):** At 5th level, you can accelerate any 1 ally within 30’ (including yourself); anyone affected gains a +10 bonus to their Initiative for the rest of the encounter; in addition, those affected can perform an extra attack action, move action, or swift action each round for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a *slow* effect, a *cursed* effect, a *dispel* effect, or die (even if they are revived during the same encounter); multiple *haste* effects do not stack; this is a standard action that provokes attacks of opportunity; this ability costs 8MP to use

**Bonus Feat:** At 6th, 12th & 18th level, you gain a bonus feat; this feat must be a fighter feat; you must still meet all prerequisites for a bonus feat; these bonus feats are in addition to the feats that a character of any class gets from advancing levels

**Provoke (Sp):** At 7th level, you can aggravate your enemies, causing them to attack you instead; this affects all opponents within 30’, so for the next 3 rounds those enemies will attack you, to the exclusion of other viable targets,
including your allies; affected creatures must make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Improved Uncanny Dodge (Ex):** at 8th level, you can no longer be flanked; this defense denies an attacked creature the ability to sneak attack you by flanking you, unless the attacker has at least 4 more rogue or bandit levels than you have pugilist levels; if you already have Uncanny Dodge from another class, you automatically gain Improved Uncanny Dodge instead, & the levels from the classes that grant Uncanny Dodge stack to determine the minimum rogue level required to flank you.

**Delay Attack (Sp):** at 9th level, upon a successful melee attack, you can give your opponent a -5 Initiative penalty for the next round; affected creatures must make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that does not provoke attacks of opportunity; this ability costs 8MP to use.

**Improved Evasion (Ex):** at 10th level, this ability works like Evasion, except that while you still take no damage on a successful Reflex saving throw against attacks, henceforth you take only half damage on a failed save; you gain no benefit of Improved Evasion while you are helpless.

**Slow (Sp):** at 11th level, you can decelerate any 1 opponent within 30'; the creature gains a -10 penalty to their Initiative for 1d4+1 rounds; in addition, those affected can only move at ½ speed, & can only perform partial actions each round for the same amount of time; these effects are negated for an opponent if they are successfully hit with a haste effect or the effect expires; multiple slow effects do not stack, but overlap; affected creatures must make a Fortitude save (DC10 + ½ your class level + your Wisdom modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use.

**Slowga (Sp):** at 13th level, you can spend an extra 8MP (20MP total) in order to increase the decelerating power of Slow so that it affects all opponents within 30'; the creatures gain a -10 penalty to their Initiative for 1d4+1 rounds; in addition, those affected can only move at ½ speed, & can only perform partial actions each round for the same amount of time; these effects are negated for an opponent if they are successfully hit with a haste effect or the effect expires; multiple slowga effects do not stack, but overlap; affected creatures must make a Fortitude save (DC10 + ½ your class level + your Wisdom modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use.

**Delay Buster (Ex):** at 15th level, you can spend an extra 10MP (18MP total) in order to increase the delaying power of Delay Attack so that is confers a -20 Initiative penalty for the next round upon an opponent struck by a successful melee attack; affected creatures must make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that does not provoke attacks of opportunity.

**Defensive Roll (Ex):** at 16th level, you can roll with a potentially lethal blow to take less damage from it than you otherwise would; once per day, when you would be reduced to 0 or fewer HP by damage in combat (from a weapon or other blow, not a spell or special ability), you can attempt to roll with the damage; to use this ability, you must attempt a Reflex saving throw (DC = the damage dealt); if the save succeeds, you take only half damage from the blow; if it fails, you take full damage; you must be aware of the attack & be able to react to it in order to execute your defensive roll; if you are denied her Dexterity bonus to AC, you cannot use this ability; since this effect would not normally allow you to make a Reflex save for half damage, your Evasion ability does not apply to the Defensive Roll.

**Hastega (Sp):** at 17th level, you can spend an extra 22MP (30MP total) in order to increase the accelerating power of Haste so that it affects all allies within 30' (including yourself); anyone affected gains a +10 bonus to their Initiative for the rest of the encounter; in addition, those affected can perform an extra attack action, move action, or swift action each round for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a slow effect, a cursed effect, a dispel effect, or die (even if they are revived during the same encounter); multiple hastega effects do not stack; this is a standard action that provokes attacks of opportunity.

**Slippery Mind (Ex):** this ability represents your ability to wriggle free from magical effects that would otherwise control or compel you; at 19th level, if you are affected by an enchantment spell or effect & fail your saving throw, you can attempt it again 1 round later at the same DC; you get only this 1 extra chance to succeed on your saving throw.

**Quick Hit (Sp):** at 20th level, upon a successful melee attack against an opponent, you can give yourself a +20 Initiative bonus for the next round & perform an extra attack action, move action, or swift action during the next round as well; this is a standard action that does not provoke attacks of opportunity; this ability costs 12MP to use.

**Summoner (“Yuna”)**

The Summoners are the key to defeating Sin. Every ten years or so, a Summoner will successfully complete a worldwide pilgrimage, obtaining the Final Aeon & using it to destroy Sin, bringing about the Calm. Although temporary, the Calm is a time of peace & regrowth, much cherished by the people of Spira. Therefore, these masters of the healing arts are almost universally respected & admired.

**Alignment:** Any.

**Hit Die:** d4.
**Class Skills:** The Summoner’s class skills (& the key ability for each skill) are Appraise (Int), Concentration (Con), Craft (Int), Decipher Script (Int), Diplomacy (Cha), Gather Information (Cha), Handle Animal (Cha), Heal (Wis), Knowledge (religion) (Int), Knowledge (the planes) (Int), Perform (Cha), Profession (Wis), Spellcraft (Int), & Use Magical Device (Cha).

- **Skill Points at 1st Level:** (4 + Intelligence modifier) × 4.
- **Skill Points at Each Additional Level:** 4 + Intelligence modifier.
- **MP per Level:** 2d6+8.

**Half-Al Bhed Summoner Starting Package**

### Class Features

- **Weapon & Armor Proficiency:** you are proficient with all simple weapons; you are not proficient with any type of armor or shield; armor of any type interferes with a summoner’s gestures, which can cause your class features to fail (treat all spell-like class features as spells with somatic components for the purposes of spell failure rates); the only armor that a summoner can safely use are protective rings

- **Summon (Su):** once per day, at 1st level, you can call upon an Outsider with the [Aeon] subtype (see Aelons, below) to battle your enemies for you; the Aeon is instantly transported from the transdimensional pocket in which it normally resides to the nearest clear space within 30’ of you (if no such space exists, the summoning fails); you can (usually) command Aelons that you have summoned, but you must remain within 30’ of the Aeon at all times, & you must spend a standard action each round to maintain control of the Aeon (this does not provoke attacks of opportunity); an Aeon will remain on the battlefield until either the encounter ends, you dismiss it, you fail to maintain control, or it is reduced to 0HP; you can only summon Aelons that you have unlocked & that have at least 1HP; a summoned Aeon gets a fair share of the XP for encounters in which it participates; summoning is a full-round action that provokes attacks of opportunity; while your Aeon battles in your stead, all opponents must make a Will save (DC10 + ½ your
class level + your Wisdom modifier) to target you for an attack; this ability does not consume any MP to use; at 5th level, you can summon an Aeon 2 times per day; at 10th level, you can summon an Aeon 3 times per day; at 15th level, you can summon an Aeon 4 times per day; at 20th level, you can summon an Aeon 5 times per day.

**Cure (Sp):** at 2nd level, you can channel positive energy that cures 1d8 points of damage + 1 point per caster level (maximum +5) of any 1 ally within 30' (including yourself); since undead are powered by negative energy, this spell deals damage to them instead of curing their wounds, although an undead creature can apply spell resistance, & can attempt a Will save (DC10 + ½ your class level + your Wisdom modifier) to take half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use.

**Esuna (Sp):** at 3rd level you can remove most negative conditions from any 1 ally within 30' (including yourself); negative conditions include: Berserk, Blind, Confused, Mute, Petrified, Poison, Sleep, Slowed; this cannot remove Cursed, Doomed, Hasted, KO, or Zombie (see Status Effects, below); this is a standard action that provokes attacks of opportunity; this ability costs 5MP to use.

**Nul (Sp):** at 4th level, you can cast an aura of protection over of any 1 ally within 30' (including yourself) from one energy type (either acid, cold, electricity, fire, sonic, or water (force); choose 1 at the time of casting); this aura blocks the next energy-based attack of the chosen type that hits that ally, be it from a spell or a physical attack; the aura disappears after absorbing 1 attack, or after 1 minute per class level, whichever comes first; this is a standard action that provokes attacks of opportunity; this ability costs 2MP to use.

**Bonus Feat:** at 6th, 11th & 16th level, you gain a bonus feat; at each such opportunity, you can choose a spell feat (including a Universal SpellFeat, see below) or an item creation feat; you must still meet all prerequisites for a bonus feat, including caster level minimums; these bonus feats are in addition to the feats that a character of any class gets from advancing levels.

**Life (Sp):** at 7th level, you can raise one of your allies from the dead, as well as removing KO status; you can raise an ally that has been dead for no longer than one minute per caster level; in addition, the subject’s soul must be free & willing to return; if the subject’s soul is not willing to return, the spell does not work; therefore, a subject that wants to return receives no saving throw; a raised creature has a number of hit points equal to its current HD; any ability scores damaged to 0 are raised to 1; status effects are not undone by this (except of course Doom, KO, or
Zombie); while the spell closes mortal wounds & repairs lethal damage of most kinds, the body of the creature to be raised must be whole; otherwise, missing parts are still missing when the creature is brought back to life; none of the dead creature’s equipment or possessions are affected in any way by this spell; Constructs, Elementals, Outsiders, & Undead creatures cannot be raised; this ability cannot bring back a creature that has died of old age; you must touch the ally’s body to raise it; this is a full-round action that provokes attacks of opportunity; this ability costs 18MP to use

Pray (Su): at 8th level, you can make a divine request for the health of your party; this ability cures 1 point of damage per caster level to all allies within 30’ (including yourself); this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use

Cura (Sp): at 9th level, you can spend an extra 6MP (10MP total) in order to increase the healing power of Cure so that it restores 3d8 points of damage + 1 point per caster level (maximum +10); since undead are powered by negative energy, this spell deals damage to them instead of curing their wounds, although an undead creature can apply spell resistance, & can attempt a Will save (DC10 + ½ your class level + your Wisdom modifier) to take half damage; this is a standard action that provokes attacks of opportunity

Shell (Sp): at 12th level, you can strengthen your allies’ magic defense; this ability grants any 1 ally within 30’ (including yourself) Spell Resistance equal to 10 + your class level for the rest of the encounter; multiple shell effects do not stack, but overlap, although this effect does overlap with SR from other sources; this effect is negated for an ally if they are successfully hit with a cursed effect, a dispel effect, or die (even if they are revived during the same encounter); this is a standard action that provokes attacks of opportunity; this ability costs 10MP to use

Protect (Sp): at 13th level, you can strengthen your allies’ defense; this ability grants any 1 ally within 30’ (including yourself) Damage Reduction/- equal to 2 + ½ your class level for the rest of the encounter; multiple protect effects do not stack, but overlap; this effect is negated for an ally if they are successfully hit with a cursed effect, a dispel effect, or die (even if they are revived during the same encounter); this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

Reflect (Sp): at 14th level, you can cast a magical reflecting aura on any 1 creature within 30’ (including yourself); this aura reflects all spells (both helpful & harmful) that target that creature, causing the spell to bounce off & hit another random creature within 30’; area-effect spells still function properly on that creature, as do any spells that have already been reflected off of another creature; multiple reflect effects do not stack, but overlap; this effect lasts for the rest of the encounter; this effect is negated for an ally if they are successfully hit with a cursed effect, a dispel effect, or die (even if they are revived during the same encounter); this is a standard action that provokes attacks of opportunity; this ability costs 14MP to use

Dispel (Sp): at 17th level, you can remove any positive conditions from 1 opponent within 30’ (no saving throw); positive conditions include ability boosts from spells or spell-like effects, haste effects, haste effects, haste effects, null effects (including mighty guard), shell effects, protect effects, reflect effects, & regen effects; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

Curaga (Sp): at 18th level, you can spend an extra 10MP (20MP total) in order to increase the healing power of Cura so that it restores 6d8 points of damage + 1 point per caster level (maximum +20); since undead are powered by negative energy, this spell deals damage to them instead of curing their wounds, although an undead creature can apply spell resistance, & can attempt a Will save (DC10 + ½ your class level + your Wisdom modifier) to take half damage; this is a standard action that provokes attacks of opportunity

Regen (Sp): at 19th level, you can gradually heal your allies; this ability grants Fast Healing to any 1 ally within 30’ (including yourself); like the Regen status effect, the ally regains HP equal to ½ its HD; multiple regen effects do not stack, but overlap; this effect lasts for the rest of the encounter; this effect is negated for an ally if they are successfully hit with a cursed effect, a dispel effect, or die (even if they are revived during the same encounter); this effect does not restore HP in excess of the creature’s maximum HP; this is a standard action that provokes attacks of opportunity; this ability costs 40MP to use

Holy (Sp): at 20th level, you can attack an enemy within 30’ with potent divine energy; this attack inflicts 20d6+80 points of non-specificed damage to 1 opponent; Fortitude save (DC10 + ½ your class level + your Wisdom modifier) for half damage; this is a full-round action that provokes attacks of opportunity; this ability costs 85MP to use

Ronin (“Auron”)

Skilled warriors, dedicated to their beliefs & the art of the blade, the Ronin are a force to be reckoned with. A person may become a Ronin for a number of reasons: they may be a monk dissatisfied with their temple’s practices, or a swordsman with a desire to work magic with their weapons, or even a former priest who takes up a sword. Due to their form of piety, they tend to make dedicated guardians, & some Summoners seek Ronin out for just such a reason.

Alignment: Any non-chaotic.

Hit Die: d10.

Class Skills: The Ronin’s class skills (& the key ability for each skill) are Bluff (Cha), Craft (Int), Disguise (Cha), Intimidate (Cha), Jump (Str), Knowledge (dungeoneering) (Int), Knowledge (history) (Int), Knowledge (nobilility) (Int), Listen (Wis), Move Silently (Dex), Profession (Wis), Ride (Dex), Search (Int), Sense Motive (Wis), & Survival (Wis).

Skill Points at 1st Level: (2 + Intelligence modifier) × 4.
Skill Points at Each Additional Level: 2 + Intelligence modifier.
MP per Level: 1d6+4.

Hume Ronin Starting Package
- Armor: scale mail (+4AC, max. dex. +3, armor check penalty -4, 25 ASFC, 30lbs), 50gp; bracer (+1AC, armor check penalty -1, 5% ASFC, 3lbs), 12gp

Class Features

All of the following are class features of the ronin. See level progression on Table 1-3: The Ronin for more information.

Weapon & Armor Proficiency: you are proficient with all simple & martial weapons, & with all armor (heavy, medium, & light) & shields (including tower shields)

Power Break (Sp): at 1st level, you can weaken your opponent’s power with a melee attack; if your melee attack hits, then the opponent’s Strength bonus to attacks (if any) is negated for the rest of the encounter; your opponent must make a Fortitude save (DC10 + ½ your class level + your Wisdom modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 5MP to use

Bonus Feat: at 2nd, 6th, 10th, 14th & 18th level, you gain a bonus feat; this feat must be a fighter feat; you must still meet all prerequisites for a bonus feat; these bonus feats are in addition to the feats that a character of any class gets from advancing levels

Guard (Su): at 3rd level, you can block attacks aimed at other party members; you must designate an ally within 30’ of you, in line of sight (no cover or concealment between the 2 of you); you may then intercept any physical attacks intended for them for the next 3 rounds; intercepting attacks means that the attack must overcome your AC &/or DR instead of your ally’s, & that you take any damage that the attack would normally deal; such interceptions are considered free actions; you also gain a +2 circumstance bonus to prevent your ally from being grappled; this does not work for spells targeting your ally, nor does this protect against area effect damage; you must not be pinned, disabled,
or otherwise unable to act for this ability to work, & you must remain within 30' of your chosen ally; this ability does not consume any MP to use

**Damage Reduction (Ex):** at 4th level, you gain Damage Reduction/-; subtract 1 from the damage you take each time you are dealt damage from a weapon or a natural attack; at 8th, 12th, 16th, & 20th level, this Damage Reduction rises by 1 point; Damage Reduction can reduce damage to 0, but not below 0

**Magic Break (Sp):** at 5th level, you can weaken your opponent’s magic with a melee attack; if your melee attack hits, then all damage dealt by that opponent’s spells is reduced by ½ for the rest of the encounter; the opponent’s healing magic is only ½ as effective, as well; multiple break effects do not stack; your opponent must make a Will save
Threaten (Sp): at 7th level, you can paralyze an enemy with fear; this causes 1 opponent within 30’ to become dazed for 3 rounds; creatures that are immune to fear are also immune to this effect; your opponent must make a Will save (DC10 + ½ your class level + your Charisma/Strength modifier (whichever is higher)) to resist; this is a standard action that does not provoke attacks of opportunity; this ability costs 8MP to use

Armor Break (Sp): at 9th level, you can weaken your opponent’s defense with a melee attack; if your melee attack hits, then the opponent’s armor bonus for natural or worn armor is negated for the rest of the encounter; your opponent must make a Fortitude save (DC10 + ½ your class level + your Wisdom modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

Aura of Courage (Ex): at 11th level, you are immune to fear (magical or otherwise); in addition, each ally within 30’ of you gains a +4 morale bonus on saving throws against fear effects; this ability functions while you are conscious, but not if you are incapacitated (via Petrified, Sleep, or KO) or dead

Mental Break (Sp): at 13th level, you can weaken your opponent’s magic defense with a melee attack; if your melee attack hits, then the opponent’s SR is negated for the rest of the encounter; your opponent must make a Will save (DC10 + ½ your class level + your Wisdom modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

Zombie Attack (Sp): at 15th level, you can charge 1 melee attack with a zombifying magic; if this melee attack hits, then you inflict your opponent with Zombie status (see Status Effects: Zombie, below); your opponent must make a Fortitude save (DC10 + ½ your class level + your Wisdom modifier) to resist; charging your melee weapon is a swift action that does not provoke attacks of opportunity (although the melee attack does provoke as normal); a melee weapon remains charged for 1 round; this ability costs 10MP to use

Entrust (Sp): at 17th level, you can transfer all of your Overdrive Points (OP’s) to the OP pool of any 1 ally within 30`; your ally still cannot accrue more than 100 OP’s total, & you cannot transfer less than your full OP pool; this is a standard action that does not provoke attacks of opportunity; this ability costs 8MP to use

Sentinel (Su): at 19th level, you can increase your ability to use Guard to the point that your protection extends to 5 rounds at a time, & you only take ½ of the damage that the attack would normally deal; you also gain a +5 circumstance bonus to prevent your ally from being grappled, as well as a +5 circumstance bonus to both your AC & your DR; this does not work for spells or spell-like abilities targeting your ally, nor does this protect against area effect damage; you must not be pinned, disabled, or otherwise unable to act for this ability to work, & you must remain within 30’ of your chosen ally; this ability does not consume any MP to use

Lancer (“Kimahri Ronso”)

Masters of pole arm-based combat, Lancers are powerful & versatile warriors. Known for adopting the techniques of both enemies & allies alike, a Lancer often has a wide variety of maneuvers that they rely on. Named for the most common pole arm that they use, Lancers also employ glaives, halberds, naginata & spears with deadly accuracy.

Alignment: Any non-lawful.
Hit Die: d12.
Class Skills: The Lancer’s class skills (& the key ability for each skill) are Balance (Dex), Climb (Str), Concentration (Con), Craft (Int), Gather Information (Cha), Handle Animal (Cha), Heal (Wis), Intimidate (Cha), Jump (Str), Listen (Wis), Move Silently (Dex), Profession (Wis), Ride (Dex), Search (Int), Sense Motive (Wis), Spot (Wis), Survival (Wis), & Tumble (Dex).
Skill Points at 1st Level: (4 + Intelligence modifier) × 4.
Skill Points at Each Additional Level: 4 + Intelligence modifier.
MP per Level: 1d6+4.

Ronso Lancer Starting Package

- Armor: studded leather (+3AC, max. dex. +5, armor check penalty -1, 15% ASFC, 20lbs), 25gp; armlet (+1AC, armor check penalty -1, 5% ASFC, 3lbs), 12gp
- Weapons: longspear (1d8, 20/×3, reach weapon (15’), 9lbs, piercing), 5gp
- Skill Selection: pick a number of skills equal to 4 + Intelligence modifier

Lancet (Su): at 1st level, you can sap health & magic from your enemies; if you successfully hit an opponent with your pole arm, you transfer 10% of their current HP (minimum 1HP) & 10% of their current MP (minimum 1MP) to own respective pools; in addition, this attack allows you to make an Intelligence check (DC = 10 + opponent’s CR) to learn one of your Ronso Rage abilities (if you don’t have Ronso Rage as your overdrive, then this merely adds 1OP to your overdrive pool); you can use any feat you have except Combat Expertise, item creation feats, & spell feats; a fit spells or activate magic items that require a command word, a spell trigger (such as a wand), or spell completion (such as Intimidate, & Ride), the Concentration skill, or any abilities that require patience or concentration, nor can you cast Tireless Rage, at which point this limitation no longer applies; you can use your rage ability twice per day; at 4th level, you can use your rage ability twice per day; at 6th level, you can use your rage ability twice per day; at 8th level, you can use your rage ability twice per day; at 10th level, you can use your rage ability twice per day; at 12th level, you can use your rage ability twice per day; at 14th level, you can use your rage ability 3 times per day; at 16th level, you can use your rage ability 4 times per day; at 18th level, you can use your rage ability 5 times per day; at 20th level, you can use your rage ability 7 times per day; entering a rage is a swift action

Class Feature: at 3rd, 7th, 9th, 13th, 15th, 17th & 19th level, you gain 1 class feature from another class; this feature must already be accessible to an ally who has been in your party (defined as creatures that you willingly adventure with, & that willingly adventure with you) ever since the last time you gained a bonus class feature (or 1st level, in the case of your first feature); you must have seen this feature performed at least once & made a successful Intelligence check afterward (DC10 + the HD of the ally performing the feature); this feature cannot be used if it depends on knowing another class feature first (such as Mug being dependent on Steal, or Firaga being dependent on Fire & Fire); an ability must be one that is normally gained at a class level equal to your own + 1 or lower; extraordinary, supernatural, & spell-like abilities can be acquired & used; this feature has the same restrictions & costs
as the original class feature, & operates in all respects identically; spells, summoning abilities, skill ranks, feats, maneuvers, maneuvers readied & overdrives cannot be gained in this manner

**Scan (Sp):** at 5th level, you can scan a single opponent within 30', learning its various strengths & weaknesses; this ability allows you to view 1 opponent’s full current statistics; this is a swift action that does not provoke attacks of opportunity; this ability costs 1MP to use

**Greater Rage (Ex):** at 8th level, your bonuses to Strength & Constitution during your rage each increase to +6, & your morale bonus on Will saves increases to +3; the penalty to AC remains at -2

**Jinx (Su):** at 11th level, you can decrease the fortune of your enemies; this ability affects all opponents within 30’, inflicting a -2 luck penalty on all attack rolls, damage rolls, saving throws, & AC for 3 rounds; these effects are negated for an opponent if a luck effect is successfully used on them or the effect expires; multiple jinx effects do not stack; your opponent must make a Will save (DC10 + ½ your class level + your Wisdom modifier) to resist; this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use

**Tireless Rage (Ex):** at 14th level, you no longer become fatigued at the end of your rage

**Mighty Rage (Ex):** at 18th level, your bonuses to Strength & Constitution during your rage each increase to +8, & your morale bonus on Will saves increases to +4; the penalty to AC remains at -2
Blitzer (‘‘Wakka’’)  
The game of blitzball is a graceful ballet of underwater maneuvers. It is also a sometimes brutal full-contact sport with ruthless players vying for any advantage. This has led to Blitzers becoming adept at ranged combat, using blitzballs as deadly weapons. They have even been known to use magic to enhance their balls, giving them spell-like properties that will affect their opponents.

Alignment: Any.  
Hit Die: d8.  
Class Skills: The Blitzer’s class skills (& the key ability for each skill) are Balance (Dex), Climb (Str), Concentration (Con), Craft (Int), Escape Artist (Dex), Intimidate (Cha), Jump (Str), Profession (Wis), Sense Motive (Wis), Sleight of Hand (Dex), Spot (Wis), Swim (Str), & Tumble (Dex).  
Skill Points at 1st Level: 4 + Intelligence modifier × 4.  
Skill Points at Each Additional Level: 4 + Intelligence modifier.  
MP per Level: 1d6+4.

Class Features
All of the following are class features of the blitzer. See level progression on Table 1-5: The Blitzer for more information.

Weapon & Armor Proficiency: you are proficient with all simple & martial weapons, & with light armor & shields (except tower shields); you are also automatically proficient with blitzballs.

Dark Attack (Sp): at 1st level, you can charge 1 ranged attack with a blinding magic; if this ranged attack hits, then your opponent is rendered Blind (see Status Effects: Blind, below) for the next 3 rounds; your opponent...
must make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist; charging your ranged weapon is a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round; this ability costs 5MP to use

Keen Blitzing (Ex): at 2nd level, your dedication to the sport of Blitzball affords you a +1 insight bonus to all Blitzball-related statistics (except HP & SP, see Blitzball, below); at 6th level, this bonus increases to +2; at 10th level, this bonus increases to +4; at 14th level, this bonus increases to +6; at 18th level, this bonus increases to +8

Silence Attack (Sp): at 3rd level, you can charge 1 ranged attack with a silencing magic; if this ranged attack hits, then your opponent is rendered Mute (see Status Effects: Mute, below) for the next 3 rounds; your opponent must make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist; charging your ranged weapon is
a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round; this ability costs 5MP to use

**Fast Movement (Ex):** at 4th level, you gain an enhancement bonus to your speed equal to +5’ per round; you lose this extra speed while in armor or carrying a medium or heavy load; this enhancement refers only to land movement & swim speed (which applies to the SP statistic, see Blitzball, below); any ability to ride, fly, or burrow is not enhanced by this bonus; at 8th level, this bonus increases to +10’ per round; at 12th level, this bonus increases to +20’ per round; at 16th level, this bonus increases to +30’ per round; at 20th level, this bonus increases to +40’ per round

**Aim (Su):** at 5th level, you can boost the accuracy of your party’s attacks; this ability grants all allies within 30’ (including yourself) a +2 competence bonus to attack rolls for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a *cursed* effect, or die (even if they are revived during the same encounter); this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use

**Sleep Attack (Sp):** at 7th level, you can charge 1 ranged attack with a sleeping magic; if this ranged attack hits, then your opponent is rendered unconscious (see **Status Effects: Sleep**, below) for the next 3 rounds; your opponent must make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist; charging your ranged weapon is a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round

**Sleep Buster (Sp):** at 9th level, you can spend an extra 5MP (10MP total) in order to increase the blinding power of Dark Attack so that your opponent is rendered Blind (see **Status Effects: Blind**, below) for the next round, & does not get a saving throw to resist; charging your ranged weapon is a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round

**Osmose (Su):** at 11th level, you can sap an enemy’s health & give it to yourself; on a successful touch attack, you transfer 1d4HP per HD from your opponent’s HP pool to your own; your opponent can make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 5MP to use

**Dark Attack (Sp):** at 13th level, you can sap an enemy’s magic & give it to yourself; on a successful touch attack, you transfer 2d6+8HP per HD (theirs) from your opponent’s MP pool to your own; your opponent can sap an enemy’s health & give it to yourself; on a successful touch attack, you transfer 2d6+8HP per HD (theirs) from your opponent’s MP pool to your own; your opponent can make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

**Dark Buster (Sp):** at 15th level, you can spend an extra 5MP (10MP total) in order to increase the narcotic power of Sleep Attack so that your opponent is rendered unconscious (see **Status Effects: Sleep**, below) for the next round, & does not get a saving throw to resist; charging your ranged weapon is a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round

**Sleep Motion (Ex):** at 20th level, this bonus increases to +10’ per round; at 24th level, this bonus increases to +20’ per round; at 28th level, this bonus increases to +30’ per round; at 32nd level, this bonus increases to +40’ per round

**Movement & Swim Speed (Ex):** at 3rd level, you gain an enhancement bonus to your movement & swim speed equal to +10’ per round; at 7th level, this bonus increases to +20’ per round; at 11th level, this bonus increases to +30’ per round; at 15th level, this bonus increases to +40’ per round

**Status Effects: Sleep**

You can combine these effects into a single curing strike; if this ranged attack hits, then your opponent is rendered Blind, Mute & unconscious (see **Status Effects**, below) for the next 3 rounds; your opponent must make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist each effect individually; charging your ranged weapon is a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round; this ability costs 12MP to use

**Status Effects: Mute**

You can combine these effects into a single curing strike; if this ranged attack hits, then your opponent is rendered Blind, Mute & unconscious (see **Status Effects**, below) for the next 3 rounds; your opponent must make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist each effect individually; charging your ranged weapon is a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round; this ability costs 12MP to use

**Status Effects: Blind**

You can combine these effects into a single curing strike; if this ranged attack hits, then your opponent is rendered Blind, Mute & unconscious (see **Status Effects**, below) for the next 3 rounds; your opponent must make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist each effect individually; charging your ranged weapon is a swift action that does not provoke attacks of opportunity (although the ranged attack does provoke as normal); a ranged weapon remains charged for 1 round; this ability costs 12MP to use

**Black Mage (“Lulu”)**

Practitioners of the eldritch arts don’t always become Summoners. Those who seek to harness magical power sometimes want to cast more destructive spells. For those who desire this kind of sorcery, there is the path of the Black Mage. Able to wield potent magics, Black Mages are greatly feared on the battlefield, blasting their enemies with elemental & concussive spells. Summoners have grown to respect the Black Mage’s talents, to the point where they sometimes employ Black Mages as guardians for a pilgrimage.

**Alignment:** Any.

**Hit Die:** d6.

**Class Skills:** The Black Mage’s class skills (& the key ability for each skill) are Appraise (Int), Concentration (Con), Craft (Int), Decipher Script (Int), Forgery (Int), Gather Information (Cha), Intimidate (Cha), Knowledge (all skills, taken individually) (Int), Listen (Wis), Move Silently (Dex), Profession (Wis), Search (Int), Sense Motive (Wis), Speak Language (Int), Spellcraft (Int), & Use Magical Device (Cha).

**Skill Points at 1st Level:** (2 + Intelligence modifier) × 4.

**Skill Points at Each Additional Level:** 2 + Intelligence modifier.

**MP per Level:** 2d6+8.

Class Features

All of the following are class features of the black mage. See level progression on Table 1-6: The Black Mage for more information.

**Weapon & Armor Proficiency**: you are proficient with the club, dagger, heavy crossbow, light crossbow, & quarterstaff, but not with any type of armor or shield; armor of any type interferes with a black mage’s gestures, which can cause your class features to fail (treat all spell-like class features as spells with somatic components for the purposes of spell failure rates); the only armor that a black mage can safely use are protective bangles

**Thunder (Sp)**: at 1st level, you can attack an enemy with electrical energy; this is a ranged touch attack that deals 1d4 points of electricity damage per class level to 1 opponent within 30’ on a successful hit; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Water (Sp)**: at 2nd level, you can attack an enemy with watery energy; this is a ranged touch attack that deals 1d4 points of water (force) damage per class level to 1 opponent within 30’ on a successful hit; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Blizzard (Sp)**: at 3rd level, you can attack an enemy with freezing energy; this is a ranged touch attack that deals 1d4 points of cold damage per class level to 1 opponent within 30’ on a successful hit; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Fire (Sp)**: at 4th level, you can attack an enemy with flaming energy; this is a ranged touch attack that deals 1d4 points of fire damage per class level to 1 opponent within 30’ on a successful hit; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use
Focus (Su): at 5th level, you can augment the magical power & defenses of your party; this ability grants all allies within 30’ (including yourself) +25% on all damaging & healing spells &/or spell-like abilities for the rest of the encounter; in addition, those party members affected by this gain Spell Resistance +2 for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a cursed effect, or die (even if they are revived during the same encounter); multiple focus effects do not stack; this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use.

BonusFeat: at 6th & 12th level, you gain a bonus feat; at each such opportunity, you can choose a spell feat (including a Universal Spell Feat, see below) or an item creation feat; you must still meet all prerequisites for a bonus
feat, including caster level minimums; these bonus feats are in addition to the feats that a character of any class gets from advancing levels

- **Thundara (Sp):** at 7th level, you can spend an extra 4MP (8MP total) in order to increase the damage of *Thunder* to 1d6+1 points of electricity damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

- **Watera (Sp):** at 8th level, you can spend an extra 4MP (8MP total) in order to increase the damage of *Water* to 1d6+1 points of water (force) damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

- **Blizzara (Sp):** at 9th level, you can spend an extra 4MP (8MP total) in order to increase the damage of *Blizzard* to 1d6+1 points of cold damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

- **Fira (Sp):** at 10th level, you can spend an extra 4MP (8MP total) in order to increase the damage of *Fire* to 1d6+1 points of fire damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

**Reflex (Su):** at 11th level, you can increase the evasion prowess of your party; this ability grants all allies within 30’ (including yourself) a +4 dodge bonus to AC for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a *cursed* effect, or die (even if they are revived during the same encounter); even though it is a dodge bonus, multiple *reflex* effects do not stack; this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use

- **Bio (Sp):** at 13th level, you can attack an enemy with toxic energy; this is a ranged touch attack that inflicts 1 opponent within 30’ with Poison (see Status Effects: *Poison*, below); your opponent remains poisoned for the rest of the encounter, unless it is negated; your opponent must make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 10MP to use

- **Demi (Sp):** at 14th level, you can attack your enemies with deadly energy; this ability reduces the current HP of all opponents within 30’ by 25%; your opponents can each make a Reflex save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 32MP to use

- **Death (Sp):** at 15th level, you can magically slay an enemy; this is a ranged touch attack that kills 1 opponent within 30’ (0HP or less, see Status Effects: *KO*, below); your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) to resist; this attack has no effect on the undead, such as creatures with Zombie status; this is a standard action that provokes attacks of opportunity; this ability costs 20MP to use

- **Thundaga (Sp):** at 16th level, you can spend an extra 8MP (16MP total) in order to increase the damage of *Thundera* to 1d8+2 points of electricity damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

- **Waterga (Sp):** at 17th level, you can spend an extra 8MP (16MP total) in order to increase the damage of *Watera* to 1d8+2 points of water (force) damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

- **Blizzaga (Sp):** at 18th level, you can spend an extra 8MP (16MP total) in order to increase the damage of *Blizzara* to 1d8+2 points of cold damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

- **Firaga (Sp):** at 19th level, you can spend an extra 8MP (16MP total) in order to increase the damage of *Fira* to 1d8+2 points of fire damage per class level; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

- **Flare (Sp):** at 20th level, you can attack an enemy with devastating energy; this is a ranged touch attack that deals 1d10+3 points of non-specified damage per class level to 1 opponent within 30’; your opponent can make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a full-round action that provokes attacks of opportunity; this ability costs 54MP to use

### Bandit (“Rikku”)

Avid seekers of wealth & fortune, Bandits are usually either gleeful rogues who commit their larceny with style & panache or cut-throat scoundrels who won’t hesitate to add murder to their litany of sins. Rarely accepted in civilized society for what they are, Bandits are often disguised as other classes, such as Pugilists, Blitzers, or Merchants. This has become so common that they are known for their talent at emulating other classes’ abilities.

**Alignment:** Any.

**Hit Die:** 6.

**Class Skills:** The Bandit’s class skills (& the key ability for each skill) are Balance (Dex), Bluff (Cha), Climb (Str), Craft (Int), Decipher Script (Int), Disable Device (Dex), Disguise (Cha), Escape Artist (Dex), Forgery (Int),...
Gather Information (Cha), Hide (Dex), Jump (Str), Knowledge (architecture) (Int), Knowledge (dungeoneering) (Int), Knowledge (local) (Int), Listen (Wis), Move Silently (Dex), Open Lock (Dex), Perform (Cha), Profession (Wis), Search (Int), Sense Motive (Wis), Sleight of Hand (Dex), Spot (Wis), Survival (Wis), Swim (Str), Tumble (Dex), & Use Rope (Dex).

**Skill Points at 1st Level:** \((8 + \text{Intelligence modifier}) \times 4\).
**Skill Points at Each Additional Level:** \(8 + \text{Intelligence modifier}\).
**MP per Level:** \(1d6 + 4\).

### Al Bhed Bandit Starting Package

- **Armor:** leather (+2 AC, max. dex. +6, 10% ASFC, 15lbs), 10gp p; targe (AKA buckler; +1 AC, armor check penalty -1, 5% ASFC, 5lbs), 15gp
- **Weapons:** claw (1d6, ×3, 3lbs, slashing), 14gp
- **Skill Selection:** pick a number of skills equal to \(8 + \text{Intelligence modifier}\)
- **Feat:** Improved Initiative
- **Gear:** backpack, waterskin, trail rations, bedroll, sack, flint & steel kit, thieves’ tools
- **Gold:** 4d4gp (10gp)

### Class Features

All of the following are class features of the bandit. See level progression on Table 1-7: The Bandit for more information.

**Weapon & Armor Proficiency:** you are proficient with all simple weapons, plus the hand crossbow, rapier, sap, shortbow, & short sword; you are proficient with light armor, but not with shields.

**Steal (Su):** at 1st level, you can rob your enemies while you fight them; during battle, you may make a touch attack upon an opponent; if you connect, you may attempt a Sleight of Hand check (DC10 + the opponent’s CR) to steal 1 item worn or carried by the opponent; you suffer no penalties for thievery performed in plain sight of your target; you cannot attack an opponent in the same round that you perform this maneuver; this is a swift action that does not provoke attacks of opportunity; this ability does not consume any MP to use.

**NOTE:** Some creatures carry rare items in addition to normal items; whenever a Bandit makes a successful steal attempt, roll d%; the rate for a rare steal is 1% × the stealer’s ECL, while the rest of the time they will take a normal item (see Creature entries, below, for normal/rare steals).

**Sneak Attack:** at 2nd level, if you can catch an opponent when he is unable to defend himself effectively from your attack, you can strike a vital spot for extra damage, just like a rogue; your attack deals extra damage any time your target would be denied a Dexterity bonus to AC (whether the target actually has a Dexterity bonus or not), or...
when you flank your target; this extra damage is 1d6 at 2nd level, & it increases by 1d6 every two bandit levels thereafter (up to 9d6, at 18th level); should you score a critical hit with a sneak attack, this extra damage is not multiplied; ranged attacks can count as sneak attacks only if the target is within 30°; with a sap (blackjack) or an unarmed strike, you can make a sneak attack that deals nonlethal damage instead of lethal damage; you cannot use a weapon that deals lethal damage to deal nonlethal damage in a sneak attack, not even with the usual -4 penalty; you can sneak attack only living creatures with discernible anatomies; Undead, Constructs, Oozes, Plants, & incorporeal creatures lack vital areas to attack; any creature that is immune to critical hits is not vulnerable to sneak attacks; you must be able to see the target well enough to pick out a vital spot & must be able to reach such a spot; you cannot sneak attack while striking a creature with concealment or striking the limbs of a creature whose vitals are beyond reach.
**Trap Sense (Ex):** At 3rd level, you gain an intuitive sense that alerts you to danger from traps, giving you a +2 bonus on Reflex saves made to avoid traps & a +2 dodge bonus to AC against attacks made by traps; these bonuses rise to +5 when you reach 13th level; trap sense bonuses gained from multiple classes stack

**Use (Su):** At 5th level, you can use any item that you can lift over your head (weight ≤ maximum heavy load) as an improvised weapon; any item that you hold is considered a weapon if you have proficiency with, & can be used as a melee or thrown ranged weapon (range increment 5’ minimum); improvised weapons deal damage appropriate to their size (1 point of damage minimum on a successful hit, minus hardness &/or DR); this ability does not consume any MP to use

**Class Feature:** at 7th & 17th level, you gain 1 class feature from another class; this feature must already be accessible to an ally who has been in your party (defined as creatures that you willingly adventure with, & that willingly adventure with you) ever since the last time you gained a bonus class feature (or 1st level, in the case of your first feature); you must have seen this feature performed at least once & made a successful Intelligence check afterward (DC10 + the HD of the ally performing the feature); this feature cannot be used if it depends on knowing another class feature first (such as Mug being dependent on Steal, or Firaga being dependent on Fire & Fira); an ability must be one that is normally gained at a class level equal to your own + 1 or lower; extraordinary, supernatural, & spell-like abilities can be acquired & used; this feature has the same restrictions & costs as the original class feature, & operates in all respects identically; skills, summoning abilities, skill ranks, feats, maneuvers, maneuvers readied & overrides cannot be gained in this manner

**Luck (Su):** at 9th level, you can increase the fortune of your party; this ability grants all allies within 30’ (including yourself) a +2 luck bonus on all attack rolls, damage rolls, saving throws, & AC for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a cursed effect, a jinx effect, or die (even if they are revived during the same encounter); multiple luck effects do not stack; this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use

**Spare Change (Su):** at 11th level, you can throw your coinage at your enemies; this attack is a ranged attack (10’ range increment) that can hit 1 opponent, dealing points of damage equal to 5% of the value of the GP you throw; the money you throw must have been in your possession for more than 24 hours for you to damage enemies with it, & all coins thrown magically disintegrate after dealing damage; your opponent can make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) for half damage; no more than 1,000GP can be thrown in a single round; this is a standard action that provokes attacks of opportunity; this ability does not consume any MP to use

**Mug (Sp):** at 15th level, you can spend an extra 10MP (10MP total) in order to make a melee attack upon an opponent during a Steal attempt (instead of the normal touch attack required for Steal attempts); if you connect, you may attempt a Sleight of Hand check (DC10 + the opponent’s CR) to steal 1 item worn or carried by the opponent; you suffer no penalties for thievery performed in plain sight of your target; this is a swift action that does not provoke attacks of opportunity

**NOTE:** Some creatures carry rare items in addition to normal items; whenever a Bandit makes a successful steal attempt, roll d%; the rate for a rare steal is 1% × the stealer’s ECL, while the rest of the time they will take a normal item (see Creature entries, below, for normal/rare steals).

**Bribe (Su):** at 19th level, you can pay enemies not to fight you; if you offer an opponent money, jewels, art, or other goods equal to 5,000gp × the opponent’s CR, then they will give you their single most valuable item & promptly flee, preventing further conflict; opponents need not be intelligent or value currency for this ability to function, but cannot be asleep, disabled, petrified, dead, or otherwise unable to act; your opponent can make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a full-round action that does not provoke attacks of opportunity; this ability does not consume any MP to use

**Skilled Saboteur (Ex):** at 20th level, you make quick work out of mechanisms & traps, disabling devices in ½ the normal time (see Disable Device, Player’s Handbook, page 72); a device that normally takes 1 round to disable now takes 1 standard action, allowing you to make a move action afterward

**NOTE:** Skilled Saboteur was not designed by me; it was featured in an article about dead class levels on the D&D website, as a 20th-level rogue’s class feature.

### NPC Classes

Although the Aristocrat, the Commoner, & the Expert are essentially the same as in the Dungeon Master’s Guide, the world of Spira has a few fundamental differences from most campaign settings, even in its NPC classes. The Warrior & the Adept classes are not present in their standard forms. Instead, the world of Spira has the Crusader, the Merchant, & the Priest NPC classes, as detailed below.

**NOTE:** Some of the material presented in this section is non-canonical, but is extrapolated from canonical information, & is designed to hopefully clarify the abilities of characters such as Lucil, O’aka, & Kinoc for use in the game.
Crusader ("Elma/Lucil")

The Crusaders as an organization began as the Crimson Blades, a militia founded & organized by Summoner Mi’ihen centuries ago. Originally separate from the Church of Yevon, they were brought under Yevon’s banner as the Crusaders within a few years of their creation. Although the Crusaders as a group have Pugilists, Ronin, Lancers & even a few Bandits as members, the majority of their forces are comprised of the Crusader class. A member of the Crusader class is a warrior dedicated to the defeat of Sin, & will usually serve in the role of infantry, command, or something akin to being a guardian for a Summoner.

**Alignment:** Any lawful.

**Hit Die:** d8.

**Class Skills:** The Crusader’s class skills (& the key ability for each skill) are Balance (Dex), Climb (Str), Handle Animal (Cha), Intimidate (Cha), Jump (Str), Knowledge (local) (Int), Listen (Wis), Profession (Wis), Ride (Dex), Sense Motive (Wis), Spot (Wis), & Use Rope (Dex).

**Skill Points at 1st Level:** (2 + Intelligence modifier) × 4.

**Skill Points at Each Additional Level:** 2 + Intelligence modifier.

**MP per Level:** 2d4.

**Hume Crusader Starting Package**

- **Armor:** chain shirt (+4AC, max. dex. +4, armor check penalty -2, 20% ASFC, 25lbs), 100gp
- **Weapons:** short sword (1d6, 19-20/x2, 2lbs, piercing), 10gp
- **Skill Selection:** pick a number of skills equal to 3 + Intelligence modifier
- **Feat:** Power Attack
- **BonusFeat:** Cleave
- **Gear:** backpack, waterskin, trail rations, bedroll, sack, hempen rope, crossbow bolt case, flint & steel kit, spell component pouch
- **Gold:** 3d4gp (7gp)

**Class Features**

- **Weapon & Armor Proficiency:** you are proficient with all simple & martial weapons, light armor, medium armor, & shields (except tower shields)
- **Mounted Combat:** at 1st level, you get Mounted Combat as a bonus feat
- **Mi’ihen’s Resolve (Ex):** at 5th level, you gain a +2 morale bonus to any 1 saving throw, usable once a day; at 10th level, you can use your Resolve bonus twice per day; at 15th level, you can use your Resolve bonus 3 times per day; at 20th level, you can use your Resolve bonus 4 times per day

### Merchant (“O’aka/Rin”)

Traders, dealers, & salesmen, these people are the linchpin of Spira’s economy. Since permanent stores are regularly destroyed by Sin’s rampages, the people of Spira often rely on travelling Merchants to sell supplies to them. Merchants make their living buying & selling goods, so they are usually sharp appraisers & shrewd negotiators. These skilled traders travel the world, plying their wares & searching for the next big score.

- **Alignment:** Any.
- **Hit Die:** d6.
- **Class Skills:** The Merchant’s class skills (& the key ability for each skill) are Appraise (Int), Bluff (Cha), Craft (Int), Diplomacy (Cha), Forgery (Int), Gather Information (Cha), Knowledge (local) (Int), Listen (Wis), Perform (Cha), Profession (Wis), Search (Int), Sense Motive (Wis), Sleight of Hand (Dex).

**Class Features**

All of the following are class features of the merchant NPC class. See level progression on Table 1-9: The Merchant for more information.

**Weapon & Armor Proficiency:** you are proficient with all simple & martial weapons, but not with any type of armor or shield

**Silver Tongue (Ex):** at 1st level, you can haggle with people to get a better deal on goods & services; on a successful Diplomacy Check (DC10 + the seller’s ranks in Sense Motive + the seller’s Wisdom modifier), you can deduct up to 2% per class level (maximum 40% deduction) from the price of any weapon, armor, item or service (be it mundane or magical); if the maximum initial cost exceeds 500gp × your class level, then you cannot apply your deduction

**Master Haggler (Ex):** at 4th level, your experience with negotiations has granted you a certain shrewdness when making deals with others; you can apply ½ your class level (maximum +10) as a competence bonus to Diplomacy checks that pertain directly to your business, such as when buying or selling goods &/or services

**Priest (“Jyscal/Kinoc”)**

The clergy of Yevon are a diverse group, as all-encompassing as the religion itself. Operating temples all over Spira, these Priests are novices in the magical arts, but have some talents at healing, protection & enchantment.

**Alignment:** Any non-evil.

**Hit Die:** d4.

**Class Skills:** The Priest’s class skills (& the key ability for each skill) are Appraise (Int), Concentration (Con), Craft (Int), Decipher Script (Int), Handle Animal (Cha), Heal (Wis), Knowledge (all skills taken individually) (Int), Listen (Wis), Perform (Cha), Profession (Wis), Sense Motive (Wis), Spellcraft (Int), & Spot (Wis).

**Skill Points at 1st Level:** (4 + Intelligence modifier) × 4.

**Skill Points at Each Additional Level:** 4 + Intelligence modifier.

**MP per Level:** 1d6+4.

**Guado Priest Starting Package**

- **Armor:** ring (+0AC, 0lbs), 17gp
- **Weapons:** light mace (1d6, 20/x2, 5 lbs, medium size, bludgeoning), 5gp
- **Skill Selection:** pick a number of skills equal to 4 + Intelligence modifier
• **Feat:** Toughness
• **Gear:** backpack, waterskin, trail rations, bedroll, sack, hemp rope, crossbow bolt case, flint & steel kit, spell component pouch
• **Gold:** 3d4gp (7gp)

### Class Features

All of the following are class features of the priest NPC class. See level progression on Table 1-10: The Priest for more information.

**Weapon & Armor Proficiency:** you are proficient with the club, dagger, heavy crossbow, light crossbow, & quarterstaff, but not with any type of armor or shield; armor of any type interferes with a priest’s gestures, which can cause your class features to fail (treat all spell-like class features as spells with somatic components for the purposes of spell failure rates)

**Aura (Ex):** at 1st level, a priest of a chaotic, evil, good, or lawful deity has a particularly powerful aura corresponding to the deity’s alignment (see the detect evil spell for details); priests who don’t worship a specific deity but choose the Chaos, Evil, Good, or Law domain have a similarly powerful aura of the corresponding alignment

**Turn/Rebuke Undead (Sp):** at 4th level, regardless of alignment, you can affect undead creatures by channeling the power of your faith through your holy (or unholy) symbol (see Turn or Rebuke Undead); a good priest (or a neutral priest who worships a good deity) can turn or destroy undead creatures; an evil priest (or a neutral priest who worships an evil deity) instead rebukes or commands such creatures; a neutral priest of a neutral deity must choose whether his turning ability turns or rebukes undead; once this choice is made, it cannot be reversed; you may attempt to turn undead a number of times per day equal to 3 + your Wisdom modifier; a priest with 5 or more ranks in Knowledge (religion) gets a +2 bonus on turning checks against undead; this ability costs 5MP to use

**Lay on Hands (Sp):** at 7th level, you can heal wounds (your own or others of those by touch, if you have a Wisdom score of 12 or higher; each day you can heal a total number of HP equal to your priest level × your Wisdom bonus; you may choose to divide your healing among multiple recipients, & you do not have to use it all at once; using Lay on Hands is a standard action that provokes attacks of opportunity; alternatively, you can use any or all of this healing power to deal damage to undead creatures; using Lay on Hands in this way requires a successful melee touch attack & does not provoke attacks of opportunity; you decide how many of your daily allotment of points to use as damage after successfully touching an undead creature; this ability costs 9MP to use

**Remove Disease (Sp):** at 10th level, you can produce a remove disease effect, as the spell, once per week; at 16th level, you can use this twice per week; this ability costs 14MP to use

**Smite Evil (Sp):** at 13th level, once per day, you may attempt to smite evil with one normal melee attack; you add your Wisdom bonus (if any) to your attack roll & deal 1 extra point of damage per priest level; if you accidentally
smite a creature that is not evil, the smite has no effect, but the ability is still used up for that day; at 19th level, you can use this twice per day; this ability costs 18MP to use

Chapter 4: Status Effects

These are special notes on the various conditions that can affect PCs & NPCs in a Final Fantasy X-based game. Some of these conditions replace the standard D&D definitions for status conditions.

Berserk: a creature with this attacks with their current weapon in hand (or unarmed) the nearest opponent in an encounter once each round, with a +2 morale bonus to each attack; the creature performs full attacks whenever possible; they cannot cast spells, use items, or use class features; they will not become lucid if hit by a physical or magical attack

Blind: a creature with this takes a -2 penalty to AC, loses Dexterity bonus to AC (if any), moves at ½ speed, takes a -4 penalty on Search checks & on most Strength- & Dexterity-based skill checks; all checks & activities that rely on vision (such as reading & Spot checks) automatically fail; 50% miss chance on all attacks

Confused: a creature with this has a 90% chance to attack any 1 random character in an encounter once each round with their current weapon in hand (or unarmed), including himself; the creature performs full attacks whenever possible; they will not cast spells or use class features, but may (remaining 10% chance) use a random item; they will become lucid if hit by a physical (but not magical) attack, even by themselves

Cursed: a creature with this cannot accrue or spend OP’s, & thus cannot perform overdrives; this also dispels most positive effects

Doomed: a creature with this must make a Fortitude save (DC10 + 1 for each previous successful save) each round or become automatically KOed (0HP or less)

Hasted: a creature with this has a +10 bonus to their Initiative, & can perform an extra attack action, move action or swift action each round

KO: AKA knock-out; creature’s health at 0HP; a creature with this cannot act in any way, & cannot be targeted by an attack or spell, but can be revived with a Phoenix Down or similar reviving magic, provided that they are not actually dead (-10HP)

Mute: a creature with this cannot speak or otherwise verbally communicate, & therefore cannot cast spells or use spell-like abilities that require a verbal component; unless it specifically states otherwise, all spell-like abilities for the classes above do require verbal components to cast

Petrified: a creature with this is turned to stone & cannot act in any way; a petrified creature resembles a statue, which has a hardness of 8 & HP dependent on its size (Fine 16, Diminutive 32, Tiny 64, Small 125, Medium 250, Large 500, Huge 1,000, Gargantuan 2,000, Colossal 4,000)

Regen: a creature with this gains Fast Healing; it regains HP equal to ½ its HD; this effect does not restore HP in excess of the creature’s maximum HP

Sleep: a creature with this is helpless & prone, but will awaken if hit by a physical (but not magical) attack

Slowed: a creature with this has a -10 penalty to their Initiative, can only move at ½ speed, & can only perform partial actions each round for the same amount of time

Zombie: a creature with this has their type changed to [Undead], but without any of the benefits of that type; is now damaged by healing spells & items, but is now immune to effects which render the creature KOed, such as death attacks

Chapter 5: Aeons

NOTE: Some of the material presented in this section is non-canonical, but is extrapolated from canonical information, & is designed to hopefully clarify the nature of Aeons for use in the game.

In the struggle to defeat Sin, desperate measures have often been entertained. Over the last thousand years, summoners have regularly given up their lives to bring about just a brief respite from the deadly chaos & destruction of Sin’s frequent rampages. But the most harrowing decision made by a person on Spira is volunteering to become an Aeon.

A person who wishes to become an Aeon is dedicating their very souls to combat the depredations of Sin. They give up everything that they are & submit to the will of the summoners so that they may aid in bringing about the Calm.

Aeons usually have no free will of their own, & spend much of their existence within a timeless transdimensional pocket, waiting to be unleashed as a living weapon in the war against Sin. While in this pocket dimension, an Aeon cannot be harmed, & can be contacted only by summoning it into the real world. Aeons are not normally capable of true speech, although an Aeon can choose to communicate with others by manifesting its spirit into the world as an incorporeal fayth (Concentration check once per minute to manifest; DC10); this can only be done when an Aeon is not being summoned.
Any summoner who has unlocked a particular Aeon can call upon it at any time to fight for them (see **Summoner: Summon**, above). To unlock an Aeon, a summoner must find its sarcophagus & pray over it for 1 hour & then make a Spellcraft check (DC = 10 + the Aeon’s HD). This deals 1d6 Constitution damage to the summoner, & renders them fatigued. A summoner can only unlock an Aeon with HD < the summoner’s class level + 10. Only 1 Aeon can be unlocked per class level.

## Aeon Reborn (ritual)

### Requirements
- **Class:** Summoner 11th level or Priest 15th level
- **Skills:** 15 ranks in Concentration, Knowledge (religion), & Spellcraft

### Ritual Benefits
During this ritual, the volunteer must lay still in a specially-prepared sarcophagus (50,000gp) while the ritual’s performer chants over it continuously for 8 hours. The chant requires a Concentration check (DC15) after each hour, as well as the expenditure of 20MP after each successful check; if a check is unsuccessful, then the ritual must continue for 1 additional hour to succeed; if 2 consecutive checks are unsuccessful, then the ritual fails. This ritual provokes attacks of opportunity.

Once the ritual is successfully completed (160MP total spent), the performer takes 2d6 Constitution damage & is exhausted. The volunteer is transformed into an Aeon, a bizarre creature that can be called to fight for a summoner. It loses nearly all aspects of its former life; its alignment becomes True Neutral, & it loses all class levels, hit dice, save bonuses, magic points, class abilities, skill ranks, feats, spells, & experience points; only the most basic memories remain. It even re-rolls its ability scores (or uses the elite array). For all intents & purposes, the volunteer is reborn into a 1st level character (Aeon monster class), only this time as an Outsider.

Class Features

All of the following are class features of the Aeon. See level progression on Table 1-11: The Aeon (Monster Class) for more information.

NOTE: The Aeon monster class allows for Aeons to take Aeon prestige classes at any time once they are eligible to do so. Aeon’s may freely multi-class between the Aeon monster class & the Aeon prestige class of their choice. They cannot multi-class into any other base class, prestige class, monster class, paragon class, or any other type of class. Aeons cannot choose to take more than 1 Aeon prestige class. Once they have completed the Aeon prestige classes of their choice, the Aeon can only progress by advancing in the Aeon monster class.

**Weapon & Armor Proficiency:** you are proficient with all simple & martial weapons, but not with any type of armor or shield

**Aeon Form:** at 1st level, you become an Aeon; your type becomes [Outsider] & your subtype becomes [Aeon]; as such, you gain Darkvision out to 60'; in addition, you do not need to eat or sleep (although they can do so if they wish); Lastly, your body & soul are fused into one unit, & therefore spells that restore souls to their bodies, such as *raise dead*, *reincarnate*, & *resurrection*, don’t work on you; it takes a different magical effect, such as *limited wish*, *wish*, *miracle*, or *true resurrection* to restore you to life

**Natural Armor:** at 3rd level, you gain a natural armor bonus to your AC equal to ½ your HD; in addition, you can add your Constitution bonus (if any) to this natural armor bonus; these bonuses do not apply against touch attacks, & you lose the bonuses when you wear any armor, or when you carry a shield

**Aeon Boost (Ex):** at 5th level, you can choose, as a swift action, to lower your defenses for 1 round; during that round, all damage sustained by you is multiplied by 1.5; because of this, all Overdrive Points (OP’s) accrued during that round are multiplied by 3

**Natural Weapon:** at 8th level, you gain a natural weapon; you may choose either a claw attack (slashing), stab attack (piercing), or slam attack (bludgeoning) upon gaining this feature; once your choice has been made, it cannot be changed; this natural weapon deals damage based on your size (Fine 1, Diminutive 1d2, Tiny 1d3, Small 1d4, Medium 1d6, Large 1d8, Huge 2d6, Gargantuan 2d8, Colossal 4d6; critical 20/x2); once you gain this natural weapon, you can no longer use manufactured weapons with your hands, as they have become unsuitable for the purpose of wielding them

**Aeon Shield (Ex):** at 11th level, you can choose, as a swift action, to raise your defenses for 1 round; during that round, all damage sustained by you is reduced by 75%; because of this, you cannot accrue Overdrive Points (OP’s) during that round

*These values are primarily taken from the SRD, & are used to increase the size by 1 category to the best of my ability.
Size Increase: at 14th level, your size permanently increases by one size category; for stat changes caused by size increases, consult Table 4-1: New Size Statistics; this ability does not change your speed; if insufficient room is available for the desired growth, you attain the maximum possible size & may make a Strength check (using your increased Strength) to burst any enclosures in the process; if the check fails, you are constrained without harm by increasing your size; no worn or carried equipment by you is enlarged by the effect; clothing & armor are destroyed by the transformation; magical effects that increase size stack with this ability, so the use of spells to increase size further are ineffective.

Immortality: at 17th level, you no longer take penalties to your ability scores for aging & cannot be magically aged; any such penalties that you have already taken, however, remain in place; bonuses no longer accrue either, but you do not die of old age when your time is up, & in fact your maximum age no longer exists as a meaningful statistic.

Lost Opportunities: at 20th level, opponents can no longer make attacks of opportunity against you; even if you are flat-footed or otherwise denied your Dexterity bonus to your AC, all attacks of opportunity made against you automatically fail; the only time that an attack of opportunity can be made successfully against you is when you are immobilized, helpless, or when you lose your natural armor bonus by wearing armor or using a shield.

NOTE: I purposefully designed the Aeon Monster Class to have a number of dead levels. This mostly offsets the many other benefits of the class (mainly from being an Outsider): full BAB, all good saves, high skill points, & maximum MP/level. This lack of class features should (in theory) balance with their high numerical advantages, so that an Aeon should only be about as powerful as a PC of equal HD.

Class Information

Hit Die: d8.

Class Skills: The Winged Fayth’s class skills (& the key ability for each skill) are Balance (Dex), Climb (Str), Intimidate (Cha), Jump (Str), Listen (Wis), Sense Motive (Wis), Spot (Wis), Survival (Wis), & Tumble (Dex).

Skill Points at Each Level: 4 + Intelligence modifier.

MP per Level: 1d6+4.

Class Features

All of the following are class features of the Winged Fayth. See level progression on Table 1-12: The Winged Fayth (Monster PrC) for more information.

Weapon & Armor Proficiency: You gain no proficiency with any weapon or armor.

Flight (Ex): at 1st level, your arms permanently transform into wings, granting you the power of flight; you gain a fly speed equal to your base land speed + 60’ (average maneuverability); as your wings cannot be used as arms, you lose the ability to use manufactured weapons; you also take a -10 penalty to some skills (Craft, Disable Device, Escape Artist, Forgery, Open Lock, Sleight of Hand, & Use Rope) or any other activity that uses your hands; any claw or slam attack natural weapon is also lost, but is replaced with a bite attack natural weapon with the same damage as your previous one.

Elemental Mage (Sp): at 2nd level, you gain some element-related spell-like abilities; you can now cast Blizzard (4MP), Fire (4MP), Thunder (4MP), & Water (4MP); you cast these like a Black Mage with a class level equal to your HD; you do not need any somatic components to cast these, but you must spend the MP cost to cast such abilities.

Hover (Ex): at 3rd level, you gain Hover as a bonus monster feat.

Mark of Status (Ex): at 4th level, you gain a resistance bonus equal to your HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above).

Sonic Wings (Ex): at 5th level, you can beat your wings with deadly force while hovering; all creatures within 30’ take sonic damage equal to 1d8 + your Strength modifier & a -5 Initiative penalty for the next round; if a creature makes a Reflex save (DC10 + ½ your class level + your Wisdom modifier), then they only take half damage & negate the Initiative penalty; this is a standard action that does not provoke attacks of opportunity.

Class Features

All of the following are class features of the Burning Fayth. See level progression on Table 1-13: The Burning Fayth (Monster PrC) for more information.

**Weapon & Armor Proficiency:** You gain no proficiency with any weapon or armor.

**Form of Flames (Ex):** at 1<sup>st</sup> level, you become a fiery being; you gain the [Fire] subtype, meaning that you have immunity to fire damage & vulnerability to cold damage, which means it takes half again as much (+50%) damage as normal from cold-based attacks, regardless of whether a saving throw is allowed, or if the save is a success or failure; also, any fire-based damage actually restores HP equal to the amount of damage that it would normally inflict.

**Fire Mage (Sp):** at 2<sup>nd</sup> level, you gain some fire-related spell-like abilities; you can now cast Fire (4MP), NulBlaze (2MP), & NulFrost (2MP); you cast these like a Black Mage with a class level equal to your HD; you do not need any somatic components to cast these, but you must spend the MP cost to cast such abilities.

**Size Increase:** at 3<sup>rd</sup> level, your size permanently increases by one size category; for stat changes caused by size increases, consult Table 4-1: New Size Statistics; this ability does not change your speed; if insufficient room is available for the desired growth, you attain the maximum possible size & may make a Strength check (using your increased Strength) to burst any enclosures in the process; if the check fails, you are constrained without harm by the materials enclosing you; you, therefore, cannot be crushed or otherwise harmed by increasing your size; no worn or carried equipment by you is enlarged by the effect; clothing & armor are destroyed by the transformation; magical effects that increase size stack with this ability, so the use of spells to increase size further are effective.

**Mark of Status (Ex):** at 4<sup>th</sup> level, you gain a resistance bonus equal to your HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above).

**Meteor Strike (Ex):** at 5<sup>th</sup> level, you can blast your enemies with concussive flames; this is a special ranged attack (your BAB + your Dexterity modifier + 5; no size modifier) on a single opponent within 30’ that deals 1d8 bludgeoning damage + 2d6 fire damage; Fortitude save (DC10 + ½ your class level + your Wisdom modifier) for half damage; this is a standard action that does not provoke attacks of opportunity.

**Weapon & Armor Proficiency:** You gain no proficiency with any weapon or armor.

**Form of Thunder (Ex):** at 1st level, you become an electric being: you gain the [Lightning] subtype, meaning that you have immunity to electricity damage & vulnerability to water (force) damage, which means it takes
half again as much (+50%) damage as normal from water-based attacks, regardless of whether a saving throw is allowed, or if the save is a success or failure; also, any electricity-based damage actually restores HP equal to the amount of damage that it would normally inflict.

**Lightning Mage (Sp):** at 2nd level, you gain some lightning-related spell-like abilities; you can now cast Thunder (4MP), Thundara (8MP), NulShock (2MP), & NulTide (2MP); you cast these like a Black Mage with a class level equal to your HD; you do not need any somatic components to cast these, but you must spend the MP cost to cast such abilities.

**Size Increase:** at 3rd level, your size permanently increases by one size category; for stat changes caused by size increases, consult Table 4-1: New Size Statistics; this ability does not change your speed; if insufficient room is available for the desired growth, you attain the maximum possible size & may make a Strength check (using your increased Strength) to burst any enclosures in the process; if the check fails, you are constrained without harm by the materials enclosing you; you, therefore, cannot be crushed or otherwise harmed by increasing your size; no worn or carried equipment by you is enlarged by the effect; clothing & armor are destroyed by the transformation; magical effects that increase size stack with this ability, so the use of spells to increase size further are effective.

**Mark of Status (Ex):** at 4th level, you gain a resistance bonus equal to your HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above).

**Aerospark (Ex):** at 5th level, you can blast your enemies with shocking energy; this is a special ranged attack (your BAB + your Dexterity modifier + 5; no size modifier) on a single opponent within 30' that deals 2d6 electricity damage & suffer a dispel effect (opponent loses all positive conditions such as ability boosts from spells or spell-like effects, haste effects, hastega effects, nul effects (including mighty guard), shell effects, protect effects, reflect effects, & regen effects); if a creature makes a Fortitude save (DC10 + ½ your class level + your Wisdom modifier), then they only take half damage & negate the dispel effect; this is a standard action that does not provoke attacks of opportunity.

### Class Features

All of the following are class features of the Freezing Fayth. See level progression on **Table 1-15: The Freezing Fayth (Monster PrC)** for more information.

**Weapon & Armor Proficiency:** You gain no proficiency with any weapon or armor.

**Form of Ice (Ex):** at 1st level, you become an icy being; you gain the [Cold] subtype, meaning that you have immunity to cold damage & vulnerability to fire damage, which means it takes half again as much (+50%) damage as normal from fire-based attacks, regardless of whether a saving throw is allowed, or if the save is a success or failure; also, any cold-based damage actually restores HP equal to the amount of damage that it would normally inflict.

**Cold Mage (Sp):** at 2nd level, you gain some cold-related spell-like abilities; you can now cast Blizzard (4MP), Blizzara (4MP), NulBlaze (2MP), & NulFrost (2MP); you cast these like a Black Mage with a class level equal to your HD; you do not need any somatic components to cast these, but you must spend the MP cost to cast such abilities.

**Frozen Flesh (Ex):** at 3rd level, your flesh becomes rimed with frost, granting you a natural armor bonus equal to $\frac{1}{4}$ of your HD; this bonus does not apply against touch attacks; in addition, any creature that touches you (either through an unarmed melee attack, a touch attack, a grapple, or some other direct physical contact) suffers 1d4 cold damage per round (no saving throw); you lose these bonuses when you wear any armor.

**Mark of Status (Ex):** at 4th level, you gain a resistance bonus equal to your HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see **Status Effects**, above).

**Heavenly Strike (Ex):** at 5th level, you can blast your enemies with a frozen touch; this is a special melee attack (your BAB + your Strength modifier + 5; no size modifier) on a single opponent within 30' that deals 2d6 cold damage + your Strength modifier & a -5 Initiative penalty for the next round; if a creature makes a Fortitude save (DC10 + $\frac{1}{2}$ your class level + your Wisdom modifier), then they only take half damage & negate the Initiative penalty; this is a standard action that does not provoke attacks of opportunity.

Class Features
All of the following are class features of the Dragon Fayth. See level progression on Table 1-16: The Dragon Fayth (Monster PrC) for more information.

Weapon & Armor Proficiency: You gain no proficiency with any weapon or armor.

Flight (Ex): at 1st level, you grow a pair of wings, granting you the power of flight; you gain a fly speed equal to your base land speed + 30’ (poor maneuverability); you retain the use of your arms, which you may still use as normal

Elemental Archmage (Sp): at 2nd level, you gain some element-related spell-like abilities; you can now cast Blizzard (4MP), Blizzara (8MP), Blizzaga (16MP), Fire (4MP), Fira (8MP), Firaga (16MP), Scan (1MP), Thunder (4MP), Thundara (8MP), Thundaga (16MP), Water (4MP), Watera (8MP), & Waterga (16MP); you cast these like a Lancer or a Black Mage with a class level equal to your HD; you do not need any somatic components to cast these, but you must spend the MP cost to cast such abilities

Size Increase: at 3rd level, your size permanently increases by one size category; for stat changes caused by size increases, consult Table 4-1: New Size Statistics; this ability does not change your speed; if insufficient room is
available for the desired growth, you attain the maximum possible size & may make a Strength check (using your increased Strength) to burst any enclosures in the process; if the check fails, you are constrained without harm by the materials enclosing you; you, therefore, cannot be crushed or otherwise harmed by increasing your size; no worn or carried equipment by you is enlarged by the effect; clothing & armor are destroyed by the transformation; magical effects that increase size stack with this ability, so the use of spells to increase size further are effective

Mark of Status (Ex): at 4th level, you gain a resistance bonus equal to your HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above)

Impulse (Ex): at 5th level, you can blast your enemies with a potent magical pulse; all opponents within 40’ take force damage equal to 3d8 + your Strength modifier (no saving throw); this is a standard action that does not provoke attacks of opportunity

Class Features

All of the following are class features of the Samurai Fayth. See level progression on Table 1-17: The Samurai Fayth (Monster PrC) for more information.

Weapon & Armor Proficiency: You gain proficiency with all simple & martial weapons, & with all armor (heavy, medium, & light), but not shields

Armed & Dangerous (Ex): at 1st level, you regain the ability to use manufactured weapons, as well as wear armor without losing your natural armor bonus; you still cannot use shields, though
**Daigoro (Ex):** At 1st level, you gain an animal companion in the form of Daigoro (dire wolf statistics); up to once per round, you can command Daigoro to make a special slam attack (+11 melee; 1d8+10 bludgeoning damage) to 1 opponent within 50’ of your companion; this is a standard action that does not provoke attacks of opportunity for either you or Daigoro.

**Kozuka (Ex):** At 2nd level, you can conjure daggers of magical energy to throw at your enemies; throwing a magical knife is a special ranged attack (your BAB + your Dexterity modifier + 10; no size modifier) on a single opponent that deals 2d8 force damage; this is a standard action that does not provoke attacks of opportunity.

**Size Increase:** At 3rd level, your size permanently increases by one size category; for stat changes caused by size increases, consult Table 4-1: New Size Statistics; this ability does not change your speed; if insufficient room is available for the desired growth, you attain the maximum possible size & may make a Strength check (using your increased Strength) to burst any enclosures in the process; if the check fails, you are constrained without harm by the materials enclosing you; you, therefore, cannot be crushed or otherwise harmed by increasing your size; no worn or carried equipment by you is enlarged by the effect; clothing & armor are destroyed by the transformation; magical effects that increase size stack with this ability, so the use of spells to increase size further are effective.

**Mark of Status (Ex):** At 4th level, you gain a resistance bonus equal to your HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above)

**Wakizashi (Ex):** At 5th level, you can slice your enemies with stunning speed; you can make melee attacks against 1d4-1 opponents (minimum 1) within 30’, using your full BAB & dealing maximized damage to all; this is a standard action that does not provoke attacks of opportunity.

**Free Summons (Ex):** At 5th level, you are free to act as you will when you are called by a summoner to battle; you are no longer compelled to act as your summoner wishes, although you must make a Will save (DC20 + the summoner’s class level) each round that you refuse to attack your summoner’s enemies at all; you can even negotiate the price of your services with your summoner; you still cannot dismiss yourself however, so you must wait for an encounter to end or for your summoner to dismiss you to return to your transdimensional pocket

MP per Level: 2d6+8.

Class Features
All of the following are class features of the Joined Fayth. See level progression on Table 1-19: The Joined Fayth (Monster PrC) for more information.

Weapon & Armor Proficiency: You gain no proficiency with any weapon or armor.

Initial Options: at 1st level, you gain a unique trait to distinguish you from your siblings; once you have chosen a trait, your choice cannot be changed; this trait can be chosen from the options below:

- **Size Increase:** your size permanently increases by one size category; for stat changes caused by size increases, consult Table 4-1: New Size Statistics; this ability does not change your speed; if insufficient room is available for the desired growth, you attain the maximum possible size & may make a Strength check (using your increased Strength) to burst any enclosures in the process; if the check fails, you are constrained without harm by the materials enclosing you; you, therefore, cannot be crushed or otherwise harmed by increasing your size; no worn or carried equipment by you is enlarged by the effect; clothing & armor are destroyed by the transformation; magical effects that increase size stack with this ability, so the use of spells to increase size further are ineffective

- **Synergy:** you can rely on the support of your sisters to bolster your attacks; you gain a morale bonus to your attack rolls equal to the Strength modifier of all siblings within 30'; this bonus can be used for a number of rounds per day equal to your Wisdom modifier (minimum 1 round)

- **Awesome Blow:** you gain Awesome Blow as a bonus monster feat, even if you do not meet the prerequisites to quality for it

Mage’s Alternatives (Sp): at 2nd level, you gain some spell-like abilities; you can now cast a number of “spells”, selected from one of 3 Mage Packages; once you have chosen a package, your choice cannot be changed; you cast these like a PC with a class level equal to your HD; you do not need any somatic components to cast these, but you must spend the MP cost to cast such abilities; the packages are listed below:

- **Mage Package #1:** Auto-Life (97MP), Blizzaga (16MP), Cure (4MP), Cura (10MP), Curaga (20MP), Drain (12MP), Firaga (16MP), Flare (54MP), Full-Life (60MP), Life (18MP), Osmose (0MP), Thundaga (16MP), Ultima (90MP), & Waterga (16MP)

- **Mage Package #2:** Cure (4MP), Cura (10MP), Curaga (20MP), Haste (8MP), Nul (2MP), Protect (10MP), Shell (12MP), & Reflect (14MP)

- **Mage Package #3:** Bio (10MP), Blizzara (8MP), Blizzaga (16MP), Death (20MP), Doublecast (0MP), Drain (12MP), Fira (8MP), Firaga (16MP), Flare (54MP), Lancet (0MP), Osmose (0MP), Thundara (8MP), Thundaga (16MP), Watera (8MP), & Waterga (16MP)

Freedom of Choice (Ex): at 3rd level, you gain some leeway when you are called by a summoner to battle; each round, you may take an action that your summoner chooses, or you can make a Will save (DC10 + the summoner’s class level) to act as you desire; you cannot refuse your summoner, however, if they request that you perform your overdrive, if any (as long as you & your siblings each have 100 OP); you also cannot dismiss yourself, so you must wait for an encounter to end or for your summoner to dismiss you to return to your transdimensional pocket

Mark of Status (Ex): at 4th level, you gain a resistance bonus equal to your HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above)

Final Decisions (Ex): at 5th level, you gain a special attack; this is a standard action that does not provoke attacks of opportunity; once you have chosen an attack, your choice cannot be changed; this attack can be chosen from the options below:

- **Camisade:** you can leap high into the air & strike a single opponent within 30’ from above; this is a special melee attack (your BAB + your Strength modifier + 5; no size modifier) that deals bludgeoning damage based on your size (Diminutive 1d3+1, Tiny 1d4+2, Small 1d6+3, Medium 1d8+4, Large 2d6+6, Huge 2d8+8, Gigantuan 4d6+12, Colossal 6d6+16); if a creature makes a Reflex save (DC10 + ½ your class level + your Wisdom modifier), then they only take half damage

- **Razzia:** you can slash 1 opponent with blades that grow from your arms; this is 2 standard melee attacks, both using your full BAB; each blade that hits deals maximized slashing damage (2d8 + your Strength modifier); if a creature makes a Fortitude save (DC10 + ½ your class level + your Wisdom modifier), then they only take half damage

- **Passado:** you can pelt 1 opponent with a barrage of stingers; this is 2d6+8 special ranged attacks, all using your full BAB; each stinger that hits deals maximized piercing damage (2d8); if a creature makes a Reflex save (DC10 + ½ your class level + your Wisdom modifier), then they only take half damage
Chapter 6: Magic

Overview

Magic in Spira is not like the magic found in a normal D&D world. For one, almost all creatures have some magical ability, even if they may have no real talent for wielding it. Each creature in Spira receives a certain number of MP as they gain HD, depending on the class or creature type with which they are gaining the HD; see Table 5-1: MP per HD by Creature Type, as well as Table 5-2: MP per HD by Class Level. A creature can spend their MP on any class features or abilities that require them. Creatures are not limited to the number of times that they may use MP-consuming class features or abilities, but they must spend the full MP cost each time that they want to use a feature with an MP cost. A creature cannot use a feature if they do not have enough MP to cover its cost. MP is restored to a creature by gaining a level (full restoration), getting a full night’s rest (full restoration), or using MP-restoring items.

Another major difference between magic in Spira & the magic systems of other campaign settings is the acquisition & use of spells. Unlike other campaign worlds, individual modular spells do not exist in the traditional sense. Instead, creatures in Spira acquire special abilities (extraordinary, supernatural, & spell-like) as they advance in class levels, most often as unique class features. Monsters tend to gain special abilities as they gain Hit Die.

Elements

The world of Spira has four opposing elements: Fire, Ice, Lightning, & Water. These elements shape the world of Spira & power most magic in some form or another. Many creatures have an innate affinity for one element or another. An attack (either from a magic item, a spell, or some other offensive ability) of one element does 50% more damage to a creature of the opposing element. A creature of a particular element is usually immune to damage caused by energy of the same element, & sometimes even absorb energy of their same element, healing HP equal to the amount of damage that the attack would normally deal (up to the creature’s normal maximum HP).

Fire (Red) ◄► Ice (White)
Lightning (Yellow) ◄► Water (Blue)

The Spiral of Death

The world of Spira is caught in a never-ending cycle of death & destruction, made all the more poignant by the brief periods of Calm in between the waves of havoc wreaked by Sin. This continuing cycle of life & death is made worse by the nature of death in Spira.

When an intelligent creature (Intelligence 3+) in Spira dies, its soul continues to exist on the Material Plane, powered by the pyreflies (see Creatures: Pyrefly, below). This spirit forms a physical shell much like the body it once had. In order for a being to rest in the afterlife of the Farplane (see Locations: Farplane, below), it must find its way there (Wisdom check, DC12) & make the choice to cross over. Some souls have a hard time gaining access to the Farplane, or feel that they have unfinished business, or they may even get lost along the way. If this happens, the spirit remains on Spira as an Unsent, & may over time become a fiend.

Unsent appear as they did in life, & those who encounter them may not know that they are actually dead. Perceiving an Unsent as such requires a successful Spot check (DC25) or a successful Knowledge: Religion check (DC25). Full-blooded Guado can use their Detect Undead ability to tell whether a person is alive or not.

Once per year, an Unsent must make a successful Will save or become Chaotic Evil. The Difficulty Class for this check equals the number of years spent as an Unsent divided by their Charisma bonus (minimum +1). Those that become Chaotic Evil immediately transform into fiends. A fiended undead is a creature with an equal Challenge Rating to the originals Unsent, but can be of nearly any type/subtype (no Construct, Fey, Giant, or Humanoid fiends have ever been reported, however). The specific creature is determined by the environment of where it was turned into a fiend; only fiends native to that environment will be created there (Cold subtype fiends created only in arctic areas, for instance).

The Sending

To prevent the souls of the dead from becoming fiends, those who work for the forces of goodness & light developed a ritual to help these souls find their way. This ritual is called the Sending, & it is commonly used by the Church of Yevon anytime a person dies as part of their last rites. Only those undead with the [Unsent] subtype (see Creatures: Subtypes, below) can be sent to the Farplane.

The Sending (ritual)

Requirements

• Class: Summoner 1st level or Priest 5th level
• Alignment: any non-evil
• Skills: 4 ranks in Knowledge (religion), Perform, & Spellcraft

Ritual Benefits

During the Sending, the sender must perform a ritual dance for 10 minutes within 60’ of the Unsent spirit (or spirits), sending the closest sendable undead first. The dance requires a single Perform check (DC14); if the check is unsuccessful, then the sending fails. The Sending is a supernatural ability that provokes attacks of opportunity. A sender can perform the Sending ritual a number of times per day equal to their Wisdom modifier (minimum 1).

The Sending is similar to a Turn Undead attempt, & so it follows similar rules to a turning check. After the ritual, the sender rolls a sending check to see how powerful an undead creature they can send. This is a Wisdom check (1d20 + the sender’s Wisdom modifier). Consult Table 4-2: Sending or Fiending Undead to find the Hit Dice of the most powerful undead the sender can affect, relative to their level. On a given sending attempt, the sender can send no undead creature whose Hit Dice exceed the result on this table. If their roll on Table 4-2 is high enough to let them send at least some of the undead within 60’, roll 2d6 + the sender’s total class level + their Wisdom modifier; this result is how many total Hit Dice of undead they can send. If the sender’s Wisdom score is average or low, it’s possible to roll fewer Hit Dice of undead sent than indicated on Table 4-2. A sent undead is instantly teleported to the Farplane, as if by a banishment spell. The Sending ritual costs the sender 1MP per undead sent.
NOTE: This ritual is not based on anything found within FFX or FFX-2. It is an apocryphal addition, written by the author for balance reasons. It was thought that it would only be fair if evil-aligned characters had the option to do something with the Unsent; sort of an anti-Sending. As with anything else presented here, if you don’t think that this is appropriate for your campaign, then by all means, do not use it.

Some evil beings do not want Spira to be free of Sin. Some creatures desire only destruction, & so revel in the spiral of death that Spira is caught in. Those that choose this path of darkness can perform a ritual that transforms an Unsent undead into a monster known as a fiend.

To do this, those who work for the forces of darkness & sin developed a ritual to force these souls to become Chaotic Evil. This ritual is called the Fiending, & it is commonly used by those who want Sin to destroy the world, leaving nothing but the undead & the fiends. Only those undead with the [Unsent] subtype (see Creatures: Subtypes, below) can be transformed to fiends.

The Fiending (ritual)

Requirements
- **Class:** Black Mage 1st level or Priest 5th level
- **Alignment:** any non-good
- **Skills:** 4 ranks in Knowledge (religion), Perform, & Spellcraft

Ritual Benefits
During the Fiending, the fiender must perform a ritual dance for 10 minutes within 60’ of the Unsent spirit (or spirits), sending the closest fiendable undead first. The dance requires a single Perform check (DC14); if the check is unsuccessful, then the fiending fails. The Fiending is a supernatural ability that provokes attacks of opportunity. A fiender can perform the Fiending ritual a number of times per day equal to their Wisdom modifier (minimum 1).

The Fiending is similar to a Turn Undead attempt, & so it follows similar rules to a turning check. After the ritual, the fiender rolls a fiending check to see how powerful an undead creature they can fiend. This is a Wisdom check (1d20 + the sender’s Wisdom modifier). Consult Table 4-2: Sending or Fiending Undead to find the Hit Dice of the most powerful undead the fiender can affect, relative to their level. On a given fiending attempt, the fiender can fiend no undead creature whose Hit Dice exceed the result on this table. If their roll on Table 4-2 is high enough to let them fiend at least some of the undead within 60’, roll 2d6 + the fiender’s total class level + their Wisdom modifier; this result is how many total Hit Dice of undead they can fiend. If the sender’s Wisdom score is average or low, it’s possible to roll fewer Hit Dice of undead fiended than indicated on Table 4-2. The Fiending ritual costs the fiender 1MP per undead fiended.

**Universal Spell Feats**

Characters acquire special abilities as they gain class levels. Another means of getting special abilities is to take Universal Spell Feats. Universal Spell Feats are a means of adding special abilities to one’s spellcasting repertoire, using powers that would be inaccessible any other way. They are considered metamagic feats, & are treated as such for the purpose of earning them.

Universal Spell Feats help to customize a spellcaster, differentiating them from their peers. They also help to replace the many feats that do not apply to classes who do not use spells in the conventional manner (such as most metamagic feats, Spell Focus, etc.), giving them an opportunity to harness a bit of magic for themselves.

**NOTE:** Only a few of the Universal Spell Feats listed below (Auto-Life, Copycat, Doublecast, Full-Life, & Ultima) could be normally acquired in Final Fantasy X. All of the others are non-canonical, & have been added as a way of expanding the options available to the characters. However, they are all based on abilities used by monsters within the game, & so they have a certain logic for existing. This is not a comprehensive monster abilities list by any means; this merely lists spell-like abilities that can be acquired by characters.

**Absorb** [Spell]

Your magical prowess has grown to the point that you can cast Absorb as a spell-like ability.

**Prerequisites:** Black Mage 1 or Summoner 1, base Reflex Save bonus +10

**Benefit:** You can use the Absorb spell-like ability. Below is the rule set for how to use this ability:

- **Absorb (Sp):** with a successful ranged touch attack, you can reduce the current HP of 1 opponent within 30’ by 50%, transferring ½ of those hit points from your opponent’s HP pool to your own (the remaining 25% is lost); your opponent can make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 128MP to use

**Auto-Life** [Spell]

Your magical prowess has grown to the point that you can cast Auto-Life as a spell-like ability.

**Prerequisites:** Life class feature, base Will Save bonus +9

**Benefit:** You can use the Auto-Life spell-like ability. Below is the rule set for how to use this ability:

- **Auto-Life (Sp):** you can cast a vibrant aura on 1 of your allies that will automatically raise them from the dead the next time that they are killed; this also negates KO status; the subject’s soul must be free & willing to return; if the subject’s soul is not willing to return, the spell does not work; therefore, a subject that wants to return receives no saving throw; a raised creature has a number of hit points equal to its current HD; any ability scores damaged to 0 are raised to 1; normal poisons & diseases are cured in the process of raising the subject, but magical diseases & curses are not undone; while the spell closes mortal wounds & repairs lethal
damage of most kinds, the body of the creature to be raised must be whole; otherwise, missing parts are still missing when the creature is brought back to life; none of the dead creature’s equipment or possessions are affected in any way by this spell; Constructs, Elementals, Outsiders, & Undead creatures cannot be raised; this ability cannot bring back a creature that has died of old age; this is a full-round action that does not provoke attacks of opportunity; this ability costs 97MP to use

**Banish** [Spell]

Your magical prowess has grown to the point that you can cast Banish as a spell-like ability.

**Prerequisites:** Summon class feature (3/day), base Will Save bonus +9

**Benefit:** You can use the Banish spell-like ability. Below is the rule set for how to use this ability:

- **Banish (Sp):** with a successful ranged touch attack, you can banish 1 Aeon within 30’ back to its transdimensional pocket for the rest of the encounter (it can only be called back out afterward); your opponent’s Aeon can make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 75MP to use

**Berserk** [Spell]

Your magical prowess has grown to the point that you can cast Berserk as a spell-like ability.

**Prerequisites:** Black Mage 1 or Summoner 1, base Will Save bonus +5

**Benefit:** You can use the Berserk spell-like ability. Below is the rule set for how to use this ability:

- **Berserk (Sp):** with a successful ranged touch attack, you can inflict Berserk status (see Status Conditions: Berserk, above) on 1 opponent within 30’; your opponent can make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 17MP to use

**Blind** [Spell]

Your magical prowess has grown to the point that you can cast Blind as a spell-like ability.

**Prerequisites:** Blitzer 1, base Reflex Save bonus +4

**Benefit:** You can use the Blind spell-like ability. Below is the rule set for how to use this ability:

- **Blind (Sp):** with a successful ranged touch attack, you can inflict Blind status (see Status Conditions: Blind, above) on 1 opponent within 30’; your opponent can make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 10MP to use

**Confuse** [Spell]

Your magical prowess has grown to the point that you can cast Confuse as a spell-like ability.

**Prerequisites:** Black Mage 1 or Summoner 1, base Will Save bonus +5

**Benefit:** You can use the Confuse spell-like ability. Below is the rule set for how to use this ability:

- **Confuse (Sp):** with a successful ranged touch attack, you can inflict Confused status (see Status Conditions: Confused, above) on 1 opponent within 30’; your opponent can make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 17MP to use

**Copycat** [Spell]

Your magical prowess has grown to the point that you can cast Copycat as a spell-like ability.

**Prerequisites:** Black Mage 1 or Summoner 1, base Will Save bonus +7

**Benefit:** You can use the Copycat spell-like ability. Below is the rule set for how to use this ability:

- **Copycat (Sp):** you can mimic 1 action of the last ally within 30’ to take a turn in the current encounter, even if you do not know how to perform that particular action; this ability cannot mimic summoning or overdrives; this is an action of equal duration to the one being mimicked, & it provokes attacks of opportunity (or not) in the same manner; this ability costs 28MP to use

**Curse** [Spell]

Your magical prowess has grown to the point that you can cast Curse as a spell-like ability.

**Prerequisites:** Black Mage 1 or Summoner 1, base Will Save bonus +7

**Benefit:** You can use the Curse spell-like ability. Below is the rule set for how to use this ability:

- **Curse (Sp):** with a successful ranged touch attack, you can inflict Cursed status (see Status Conditions: Cursed, above) on 1 opponent within 30’; your opponent can make a Will save (DC10 + ½ your class level + your Charisma modifier) to resist; this is a standard action that provokes attacks of opportunity; this ability costs 42MP to use

**Dispel-All** [Spell]

Your magical prowess has grown to the point that you can cast Dispel-All as a spell-like ability.
**Prerequisites:** Dispel class feature, base Will Save bonus +11

**Benefit:** You can use the Dispel-All spell-like ability. Below is the rule set for how to use this ability:

- **Dispel-All (Sp):** you can remove any positive status conditions (see Status Effects, above) from all opponents within 30’ (no saving throw); positive conditions include ability boosts from spells or spell-like effects, haste effects, hasteega effects, null effects (including mighty guard, shell effects, protect effects, reflect effects, & regen effects; this is a standard action that provokes attacks of opportunity; this ability costs 84MP to use

**Doublecast [Spell]**

Your magical prowess has grown to the point that you can cast Doublecast as a spell-like ability.

**Prerequisites:** Black Mage 1 or Summoner 1, base Will Save bonus +6

**Benefit:** You can use the Doublecast spell-like ability. Below is the rule set for how to use this ability:

- **Doublecast (Sp):** you can cast 2 spell-like abilities in the same round from the Black Mage’s or Summoner’s class feature list; this is a full-round action that does not provoke attacks of opportunity; you must be able to cast the abilities normally to double-cast them; this ability does not consume any MP to use by itself, but each ability’s MP cost must be paid

**Full-Life [Spell]**

Your magical prowess has grown to the point that you can cast Full-Life as a spell-like ability.

**Prerequisites:** Life class feature, base Will Save bonus +9

**Benefit:** You can use the Full-Life spell-like ability. Below is the rule set for how to use this ability:

- **Full-Life (Sp):** you can raise 1 of your allies from the dead; this also negates KO status; you can raise an ally that has been dead for no longer than one minute per caster level; in addition, the subject’s soul must be free & willing to return; if the subject’s soul is not willing to return, the spell does not work; therefore, a subject that wants to return receives no saving throw; a raised creature has a number of hit points equal to its maximum HP; any ability scores damaged to 0 are raised to their normal maximum amount; normal poisons & diseases are cured in the process of raising the subject, but magical diseases & curses are not undone; while the spell closes mortal wounds & repairs lethal damage of most kinds, the body of the creature to be raised must be whole; otherwise, missing parts are still missing when the creature is brought back to life; none of the dead creature’s equipment or possessions are affected in any way by this spell; Constructs, Elementals, Outsiders, & Undead creatures cannot be raised; this ability cannot bring back a creature that has died of old age; this is a full-round action that does not provoke attacks of opportunity; this ability costs 60MP to use

**Giga-Graviton [Spell, Epic]**

Your magical prowess has grown to the point that you can cast Giga-Graviton as a spell-like ability.

**Prerequisites:** Aeon Prestige Class 1, 300+ maximum MP

**Benefit:** You can use the Giga-Graviton spell-like ability. Below is the rule set for how to use this ability:

- **Giga-Graviton (Sp):** you can unleash a 100’ ray that instantly disintegrates all creatures within it (-20HP; no saving throw); this takes 1 minute (10 rounds) to activate, with 1 standard action that provokes attacks of opportunity each round to prepare the activation (although attacks of opportunity do not disrupt the preparations); this ability can be done once per day; this ability costs 300MP to use

**Gravija [Spell, Epic]**

Your magical prowess has grown to the point that you can cast Gravija as a spell-like ability.

**Prerequisites:** Gravity universal spell feat, base Will Save bonus +13

**Benefit:** You can use the Gravija spell-like ability. Below is the rule set for how to use this ability:

- **Gravija (Sp):** you can attack your enemies with deadly energy; this ability reduces the current HP of all opponents within 30’ by 75%; your opponents can each make a Reflex save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 256MP to use

**Gravity [Spell]**

Your magical prowess has grown to the point that you can cast Gravity as a spell-like ability.

**Prerequisites:** Demi class feature, base Will Save bonus +11

**Benefit:** You can use the Gravity spell-like ability. Below is the rule set for how to use this ability:

- **Gravity (Sp):** you can attack your enemies with deadly energy; this ability reduces the current HP of all opponents within 30’ by 50%; your opponents can each make a Reflex save (DC10 + ½ your class level + your Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 128MP to use

**Mega Death [Spell, Epic]**
Your magical prowess has grown to the point that you can cast Mega Death as a spell-like ability.

**Prerequisites:** Death class feature, base Will Save bonus +12

**Benefit:** You can use the Mega Death spell-like ability. Below is the rule set for how to use this ability:

- **Mega Death (Sp):** you can magically slay your enemies; this is a ranged touch attack that kills all opponents within 30' (0HP or less, see **Status Effects:** KO, below); your opponents can each make a Fortitude save (DC10 + ½ your class level + your Intelligence modifier) to resist; this attack has no effect on the undead, such as creatures with Zombie status; this is a full-round action that provokes attacks of opportunity; this ability costs 160MP to use

**Mortibsorption [Spell]**
Your magical prowess has grown to the point that you can cast Mortibsorption as a spell-like ability.

**Prerequisites:** Lancet class feature, base Will Save bonus +4

**Benefit:** You can use the Mortibsorption spell-like ability. Below is the rule set for how to use this ability:

- **Mortibsorption (Sp):** you can draw health from allies to sustain yourself; on a successful touch attack, you can transfer 1HP per HD from your ally’s HP pool to your own; your ally can make a Fortitude save (DC10 + ½ your class level + your Wisdom modifier) for half damage, if they wish, which reduces the amount of HP you gain accordingly; this is a standard action that provokes attacks of opportunity; this can only be used on allies within your party; this ability costs 10MP to use

**Multi-Blizzara [Spell]**
Your magical prowess has grown to the point that you can cast Multi-Blizzara as a spell-like ability.

**Prerequisites:** Blizzara class feature, base Will Save bonus +8

**Benefit:** You can use the Multi-Blizzara spell-like ability. Below is the rule set for how to use this ability:

**Equipment Abilities: Weapon Abilities**
These equipment abilities can be grafted onto a weapon. The “wielder” refers to the character currently using or possessing the weapon. Abilities are only active while the wielder actually wields the weapon; sheathing a weapon,
putting it down, or otherwise ceasing to brandish it negates its abilities until it is wielded again. Weapons can only hold 1-4 special abilities (these are known as ability “slots”).

NOTE: Under each weapon ability is 3 means to add such the ability to a weapon (designated #1, #2, & #3, respectively).

- Method #1 refers to the standard D&D way of adding abilities to magic item; IE the feats & spells needed to graft the ability, along with the required caster level.
- Method #2 refers to the typical way on Spira (a setting in which there are no spells, per se) of doing the same; IE the feats & class features needed to graft the ability.
- Method #3 refers to another Spiran way of doing the same; IE using a Spellcraft check (DC10 + (price bonus ×5)) to fuse the specific listed objects into the magic item, imbuing it with the desired property; failing the check by less than 5 allows the caster to reuse the objects in a later fusion attempt, while failing the check by more than 5 ruins the objects).

Any of the 3 methods is acceptable for accomplishing this, but it is recommended that only one these means be used within a particular campaign setting.

Chapter 7: Items

Alchemical Items & How to Make Them

Alchemical items are one-time-use magical substances, meant to confer a spell-like effect when used; this makes them similar to potions. The primary difference between the two is that potions are liquids which can only be ingested, whereas alchemical items are usually solids which can be ingested, inhaled or applied to the skin, depending on the nature of the item itself.

Another major difference is that alchemical items require a central ingredient to function, regardless of the spells involved; without this key ingredient, an alchemical item cannot be made. This ingredient does not always have any monetary value, but costly ingredients are factored into the price of the item. Although some ingredients are extremely rare &/or difficult to obtain, only ingredients with a well-defined market value are factored into the price of the item.

The creator of an alchemical item needs a level working surface & at least a few containers in which to mix substances, as well as a source of heat to cook the concoction. In addition, he needs ingredients. The costs for materials & ingredients are subsumed in the cost for crafting the item: (25GP × the level of the spell × the level of the caster) + the cost of the key ingredient, if any.

All ingredients & materials used to craft an alchemical item must be fresh & unused. The character must pay the full cost for crafting each item (economies of scale do not apply).

The user of the item is both the caster & the target. Spells with a range of personal cannot be made into potions.

The creator must have prepared the spell to be placed in the item (or must know the spell, in the case of a sorcerer or bard) & must provide any material component or focus the spell requires.

If casting the spell would reduce the caster’s XP total, the creator pays the XP cost upon beginning the crafting in addition to the XP cost for making the item itself. Material components are consumed when he begins working, but a focus is not (a focus used in crafting an alchemical item can be reused). The act of crafting triggers the prepared spell, making it unavailable for casting until the character has rested & regained spells (that is, that spell slot is expended from his currently prepared spells, just as if it had been cast). Crafting an alchemical item requires 1 day.

**Item Creation Feat Required:** Craft Alchemical Item.

---

**Craft Alchemical Item** [Item Creation]

**Prerequisite:** Caster level 3rd.

**Benefit:** You can create an alchemical item of any 9th level or lower spell that you know & that targets 1 or more creatures. Crafting an alchemical item takes 1 day. When you craft an alchemical item, you set the caster level, which must be sufficient to cast the spell in question & no higher than your own level. The base price of an alchemical item is 50GP × the level of the spell × the level of the caster. To craft an alchemical item, you must spend 1/25th of this base price in XP & use up raw materials costing 1/5 this base price.

When you craft an alchemical item, you make any choices that you would normally make when casting the spell. Whoever uses an alchemical item is the target of the spell. Any alchemical item that stores a spell with a costly material component or an XP cost also carries a commensurate cost. In addition to the costs derived from the base price, you must expend the material component or pay the XP when crafting the alchemical item.

---

**Craft Epic Alchemical Item** [Item Creation][Epic]

**Prerequisites:** Craft Alchemical Item, Knowledge (arcana) 24 ranks, Spellcraft 24 ranks.

**Benefit:** You can craft alchemical items that exceed the normal limits for such items.

Chapter 8: Overdrives

**NOTE:** The following section is an updated & revised version of the information presented in Final Fantasy Limit Breaks. It is recommended that you use the rules presented here as opposed to the older version, as significant improvements & clarifications have been made.

**Rules Overview**

Each PC (& select few eligible NPC’s) accrues Overdrive Points (OP’s) under certain conditions. Once they have accrued 100 OP’s, they can then spend them to power an Overdrive, which is a special ability (usually an attack) of amazing power. Unless otherwise noted, all Overdrives take 1 full-round action to execute, they ignore damage reduction (DR), they never provoke attacks of opportunity (AoO), & only allow saving throws if specifically noted. All such Overdrives cost 100 OP’s to use, & a PC cannot accrue more that 100 OP’s.

**Conditions**

Initially for PC’s, the default condition for accruing OP’s is **Stoic** (Gain 2 OP each round in which you are successfully dealt damage by an opponent; physical, magical, & psionic injuries count, while wounds received from traps, environments, etc. do not). Accrual conditions can only be changed when a character gains a level. The conditions under which one can accrue OP’s can be chosen from the following list:

- **Warrior:** Gain 2 OP each round in which you successfully deal damage to an opponent
- **Healer:** Gain 2 OP each round in which you successfully heal damage of an ally; healing oneself does not count
- **Comrade:** Gain 1 OP each round in which one of your allies are successfully dealt damage by an opponent; physical, magical, & psionic injuries count, while wounds received from traps, environments, etc. do not; you must designate no more than 5 allies that this applies toward; all other allies do not count; this list can only be changed if a designated ally leaves the party (no communication) for more than 24 hours
- **Slayer:** Gain 5 OP each round in which you successfully kill an opponent
- **Victor:** Gain 3 OP each round in which your party successfully kills an opponent; you must designate no more than 5 allies that this applies toward; all other allies do not count; this list can only be changed if a designated ally leaves the party (no communication) for more than 24 hours
- **Tactician:** Gain 4 OP each round in which you successfully bestow a negative condition on an opponent; negative conditions include the standard D&D set (blinded, confused, cowering, dazed, dazzled, deafened, energy drained, entangled, exhausted, fascinated, fatigued, frightened, nauseated, panicked, paralyzed, poisoned, shaken, sickened, stunned, turned or unconsciousness resulting from a sleep effect) & the FFX Status Effects set; no other conditions count
- **Hero:** Gain 5 OP each round in which you successfully kill an opponent using a *coup de grace* maneuver, or whenever you kill an opponent by dealing damage that is 5× (or more) your opponent’s current HP
- **Ally:** Gain 1 OP each time it is your turn in combat
- **Daredevil:** Gain 4 OP each time it is your turn in combat & your current HP is 10% or less than your maximum HP
- **Solo:** Gain 4 OP each time it is your turn in combat & you are the only active combatant on your side; all allies are either not present, dead, disabled, dying, petrified, sleeping, staggered, unconscious or otherwise helpless
• **Coward:** Gain 3 OP each time you successfully run from a combat situation; initiative must be rolled, your opponents must have made at least 1 attempt to attack, & you must succeed in completely evading the opponent; opponents who succeed in catching up with you & engaging you in combat later negate this.

• **Dancer:** Gain 4 OP each round in which you successfully evade an attack from an opponent; attacks that would normally hit you if your armor bonus were lower do not count toward this, nor do attacks that hit but fail to deal any damage (due to DR, SR, & the like).

• **Rook:** Gain 2 OP each round in which you successfully counteract a negative condition on yourself or an ally, or your negate damage from an element-based attack; negative conditions include the standard D&D set (blinded, confused, cowering, dazed, dazzled, deafened, energy drained, entangled, exhausted, fascinated, fatigued, frightened, nauseated, panicked, paralyzed, poisoned, shaken, sickened, stunned, turned or unconsciousness resulting from a sleep effect) & the FFX Status Effects set; no other conditions count.

• **Sufferer:** Gain 2 OP each round in which you acquire a negative condition dealt by an opponent; negative conditions include the standard D&D set (blinded, confused, cowering, dazed, dazzled, deafened, energy drained, entangled, exhausted, fascinated, fatigued, frightened, nauseated, panicked, paralyzed, poisoned, shaken, sickened, stunned, turned or unconsciousness resulting from a sleep effect) & the FFX Status Effects set; no other conditions count.

• **Victim:** Gain 4 OP each time it is your turn in combat & you possess a negative condition dealt by an opponent; negative conditions include the standard D&D set (blinded, confused, cowering, dazed, dazzled, deafened, energy drained, entangled, exhausted, fascinated, fatigued, frightened, nauseated, panicked, paralyzed, poisoned, shaken, sickened, stunned, turned or unconsciousness resulting from a sleep effect) & the FFX Status Effects set; no other conditions count.

• **Avenger:** Gain 6 OP each round in which an opponent successfully kills a member of your party; you must designate no more than 5 allies that this applies toward; all other allies do not count; this list can only be changed if a designated ally leaves the party (no communication) for more than 24 hours.

### Acquiring Overdrives
You may choose 1 Overdrive during initial character creation; additional Overdrives may be gained each time you gain a level in which you also gain a feat (3rd, 6th, 9th, 12th, 15th, 18th, etc), provided you have achieved all of the prerequisites. Your chosen Overdrives cannot be changed later (except when becoming an Aeon). Overdrives may be selected from among the following:

#### Attack Reels (Su)
You can randomly strike your enemies with extra attacks. Roll 3d4, then re-roll any 1 or 2 die, if you wish; if none of the numbers match, then you deal an automatic hit to 1 opponent within 30’ with a ranged weapon. If 2 of the numbers match, you deal a number of automatic hits to 1 opponent within 30’ equal to the matching number, all with the same ranged weapon.

- **Prerequisites:** Blitzer 4; must be able to perform Element Reels.

#### Auroch Reels (Su)
You can randomly strike your enemies with various effects. Roll 3d10, then re-roll any 1 or 2 die, if you wish; if none of the numbers match, then you deal an automatic critical to 1 opponent within 30’ with a ranged weapon. If 2 of the numbers match, you deal an automatic critical to 1 opponent within 30’ with a ranged weapon & consult the following list for the value that corresponds with the matching numbers:

- 1 = **Fire** (deal an additional 2d8 fire damage)
- 2 = **Ice** (deal an additional 2d8 cold damage)
- 3 = **Lightning** (deal an additional 2d8 electricity damage)
- 4 = **Water** (deal an additional 2d8 force damage)
- 5 = **Poison** (inflicts Poisoned status; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist)
- 6 = **Blind** (inflicts Blind status; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist)
- 7 = **Confusion** (inflicts Confused status; Will save (DC10 + ½ your class level + your Charisma modifier) to resist)
- 8 = **Petrify** (inflicts Petrified status; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist)
- 9 or 10 = **Auroch** (deal an additional 10d8 damage)

If all 3 of the numbers match, you deal an automatic critical to all opponents within 30’ with the same ranged weapon, & consult the above list for the value that corresponds with the matching numbers.
**Prerequisites:** Blitzer 15; must be able to perform *Element Reels, Attack Reels & Status Reels*; cannot gain additional Overdrives after acquiring this one.

**Banishing Blade (Ex)**
You can deal an automatic critical to 1 opponent with your blade. In addition, if you make a successful Dexterity check (DC18), & pour a bottle of liquor or wine onto the blade (a move-equivalent action), your opponent takes an automatic penalty on all attacks, AC, skill checks & saving throws for the rest of the encounter equal to ½ your class level.

**Prerequisites:** Ronin 9; must use a slashing weapon, & must have a bottle of liquor or wine on hand; must be able to perform *Dragon Fang & Shooting Star*.

**Blitz Ace (Su)**
You can perform up to 8 melee attacks in 1 round, followed by a ranged kick attack with the ball (1d8 + Strength bonus), with no penalty for multiple attacks; these must all be against 1 opponent within 30’. Each attack is an automatic hit.

**Prerequisites:** Pugilist 9; must have performed at least 80 Overdrives; must be able to perform *Spiral Cut, Slice & Dice, & Energy Rain*; cannot gain additional Overdrives after acquiring this one.

**Delta Attack (Su)**
You can combine your Overdrive with the Overdrives of 2 siblings to automatically hit all opponents within 50’ with the ultimate arcane attack, dealing 20d12 points of damage to each. In addition, any opponent hit by this attack must make a successful Fortitude save (DC40) or die.

**Prerequisites:** Joined Fayth 1; must have 2 siblings who have fully charged OP pools (100 OP’s); cannot have any other Overdrive.

**Diamond Dust (Su)**
You can automatically hit all opponents within 30’ with freezing ice shards, dealing 5d8 points of cold damage to each.

**Prerequisites:** Freezing Fayth 1; must have the ability to inflict cold damage via other special abilities; cannot have any other Overdrive.

**Dragon Fang (Ex)**
You can attack up to 4 opponents within 30’ with your sword in 1 round, with no penalty for multiple attacks; you cannot attack any 1 opponent more than once. Each attack is an automatic hit; in addition, each opponent struck with these attacks is dazed for 1 round (no saving throw allowed).

**Prerequisites:** Ronin 1.

**Element Reels (Su)**
You can randomly strike your enemies with elemental damage. Roll 3d4, then re-roll any 1 or 2 die, if you wish; if none of the numbers match, then you deal an automatic critical to 1 opponent within 30’ with a ranged weapon. If 2 of the numbers match, you deal an automatic critical to 1 opponent within 30’ with a ranged weapon & consult the following list for the value that corresponds with the matching numbers:

- 1 = **Fire** (deal an additional 2d8 fire damage)
- 2 = **Ice** (deal an additional 2d8 cold damage)
- 3 = **Lightning** (deal an additional 2d8 electricity damage)
- 4 = **Water** (deal an additional 2d8 force damage)

If all 3 of the numbers match, you deal an automatic critical to all opponents within 30’ with the same ranged weapon, & consult the above list for the value that corresponds with the matching numbers.

**Prerequisites:** Blitzer 1.

**Energy Blast (Su)**
You can automatically hit all opponents within 30’ with a blast of fierce energy, dealing 8d8 points of damage to each.

**Prerequisites:** Winged Fayth 5; must be able to perform *Energy Ray* (& no other Overdrives); BAB +14.

**Energy Rain (Su)**
You can unleash a torrent of destructive energy at your opponents; all opponents within 30’ take 1d8 fire damage & 1d8 electricity damage per level (Reflex DC25 for half damage).

**Prerequisites:** Pugilist 6; must have performed at least 30 Overdrives; must be able to perform *Spiral Cut, as well as Slice & Dice*.

**Energy Ray (Su)**
You can automatically hit all opponents within 30’ with a ray of fierce energy, dealing 4d8 points of damage to each (no saving throw); this is a full-round action that does not provoke attacks of opportunity.

**Prerequisites:** Winged Fayth 1.

**Fury (Su)**
You can hurl a storm of violent spells at your enemies. Choose one Evocation spell or spell-like ability that you know & roll a Spellcraft check (DC20); you can cast that spell once for every point that you beat the check by (minimum 1). All spells are cast in the same round, & do not have to be prepared beforehand; they also do not count against your number of spells per day. However, these spells all do half damage against opponents.

**Prerequisites:** Black Mage 1; cannot have any other Overdrive.

**Grand Summon (Su)**
You can summon 1 creature, either via a summon monster spell, a summon nature’s ally spell, or a summoning spell-like ability, & the summoned creature will have the following enhancements: +4 to all ability scores (hence a +2 to all ability-based bonuses), & a +4 natural armor bonus. These enhancements last for as long as the creature is summoned. If the summoned creature has a Overdrive of its own, it gains a 100 OP’s (on top of their current OP pool, up to 200 OP’s maximum) instead of receiving any of the above enhancements.

**Prerequisites:** Summoner 1; cannot have any other Overdrive.

**Hellfire (Su)**
You can automatically hit all opponents within 30’ with a catastrophic inferno that lifts them high into the air, dealing 4d6 points of fire damage & 3d6 points of falling damage to each (no saving throw); this is a full-round action that does not provoke attacks of opportunity.

**Prerequisites:** Blazing Fayth 1; cannot have any other Overdrive.

**Mega Flare (Su)**
You can automatically hit all opponents within 30’ with a devastating blast of magical power, dealing 10d8 points of damage to each (no saving throw); this is a full-round action that does not provoke attacks of opportunity.

**Prerequisites:** Dragon Fayth 1; cannot have any other Overdrive.

**Mix (Su)**
You can combine any 2 items (weapons, armor, coins, food, clothing, etc.) that you possess into a magical object. The effect of this object is determined at random, & the 2 constituent items are destroyed in the process. Roll 1d20 & consult the following list for possible effects:
- 1 = deals 1d4 damage to all opponents within 30’
- 2 = deals 1d8 damage to all opponents within 30’
- 3 = deals 1d12 damage to all opponents within 30’
- 4 = deals 1d20 damage to all opponents within 30’
- 5 = deals 1d% damage to all opponents within 30’
- 6 = deals 2d6 fire damage to all opponents within 30’
- 7 = deals 2d6 cold damage to all opponents within 30’
- 8 = deals 2d6 electricity damage to all opponents within 30’
- 9 = deals 2d6 acid damage to all opponents within 30’
- 10 = inflicts Poisoned status on all opponents within 30’; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist
- 11 = inflicts Blind status on all opponents within 30’; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist
- 12 = inflicts Confused status on all opponents within 30’; Will save (DC10 + ½ your class level + your Charisma modifier) to resist
- 13 = inflicts Petrified status on all opponents within 30’; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist
- 14 = inflicts KO status on all opponents within 30’; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist
- 15 = heal 1d8 points of damage to multiple allies within 30’ (up to 4, including yourself)
- 16 = heal 1d20 points of damage to multiple allies within 30’ (up to 4, including yourself)
- 17 = grants multiple allies within 30’ (up to 4, including yourself) 1d12 temporary hit points
- 18 = grants multiple allies within 30’ (up to 4, including yourself) a +4 natural armor bonus, which lasts for 24 hours
- 19 = grants multiple allies within 30’ (up to 4, including yourself) a +2 luck bonus to all saving throws for 24 hours
• 20 = deals 20d12 damage to all opponents within 30’ & multiple allies within 30’ (up to 4, including yourself)

Once you have determined the effect of combining 2 particular items, combining 2 identical items will always yield the same result (no rolling required). Combining items without spending 100 OP yield no such results.

**Prerequisites:** Bandit 1; cannot have any other Overdrive.

**Oblivion (Su)**
You can automatically hit all opponents within 30’ with an apocalyptic flurry of blows & explosive force, dealing 20d6 points of force damage to each (no saving throw). In addition, any opponent hit by this attack must make a successful Fortitude save (DC10 + ½ your class level + your Charisma modifier) or die; this is a full-round action that provokes attacks of opportunity.

**Prerequisites:** Suffering Fayth 1; cannot have any other Overdrive.

**Requiem (Su)**
You can unleash an utter apocalypse of magical energy; automatically hits all opponents within 30’, dealing 10d12 points of force damage. In addition, all creatures damaged by this attack must make a Fortitude save (DC10 + ½ your class level + your Charisma modifier) or die; any creature with a CR more than (your party’s average level +2) is unaffected.

**Prerequisites:** Summoner 5 or Black Mage 5; cannot have any other Overdrive.

**Ronso Rage (Ex or Su)**
You can perform a number of special abilities that you have successfully learned from studying an opponent. You can learn an ability from an enemy by taking a full-round action & making a successful Intelligence check (DC = 10 + opponent’s CR). Each time you fill up your OP pool, you can perform one of the abilities that you have learned, chosen from the list below:

- **Jump (Ex):** can leap high into the air & strike from above 1 opponent within 30’, dealing an automatic critical with your reach weapon; this is a standard action that does not provoke attacks of opportunity; already acquired
- **Flame Breath (Su):** you spew forth a jet of fire from your mouth; automatically hits all opponents within 30’, dealing 2d6 points of fire damage; Fortitude save (DC10 + ½ your class level + your Wisdom modifier) for half damage; acquired from Fire subtype monsters, CR2 or above
- **Seed Cannon (Su):** you spew forth a barrage of seed pellets from your mouth, automatically hitting 1 opponent within 30’; this attack deals 3d6 points of piercing damage; Fortitude save (DC10 + ½ your class level + your Wisdom modifier) for half damage; acquired from Plant type monsters, CR3 or above
- **Self Destruct (Su):** you explode in a powerful blast; automatically hits all opponents within 30’, dealing 4d6 points of slashing damage (no saving throw); you are reduced to 0HP; acquired from Elemental type monsters, CR4 or above
- **Thrust Kick (Ex):** you kick an enemy with devastating force; automatically hits 1 opponent within 30’, dealing critical damage; Fortitude save (DC10 + your class level) for half damage; in addition, if you make a successful Dexterity check (DC12 + your opponent’s Dexterity modifier), your opponent is knocked (1d6+4×10’) away in a random direction; an opponent that has been knocked away in this manner must make a successful Fortitude save (DC10 + ½ your class level + your Wisdom modifier) or die; acquired from Monstrous Humanoid type monsters, CR6 or above
- **Stone Breath (Su):** you spew forth a jet of chilling gas from your mouth; automatically inflicts Petrified on all opponents within 30’; Fortitude save (DC10 + ½ your class level + your Wisdom modifier) to resist; acquired from Magical Beast type monsters, CR8 or above
- **Aqua Breath (Su):** you spew forth a jet of water from your mouth; automatically hits all opponents within 30’, dealing (2d8 + your Strength modifier) points of water (force) damage; Fortitude save (DC10 + ½ your class level + your Wisdom modifier) for half damage; acquired from Water subtype monsters, CR10 or above
- **Doom (Su):** you cast a dreadful curse on an enemy; 1 opponent within 30’ automatically dies (-10HP) in 1d6+4 rounds (no saving throw); acquired from Undead type monsters, CR12 or above
- **White Wind (Su):** you bathe your party in healing light; you can fully restore all HP to all allies within 30’ (including yourself); you cannot heal an ally so that they have more HP than your maximum; cannot be used on opponents (even undead ones); acquired from Celestial subtype monsters, CR14 or above
- **Bad Breath (Su):** you spew forth a jet of strange gas from your mouth; automatically infects various negative conditions to all opponents within 30’, including the creature emits a 30’ cloud of foul gas; this attack is a full-round action that does not provoke attacks of opportunity; all creatures caught with the cloud are affected by the following status effects: Berserk, Blind, Confused, Mute, Poison, & Slowed; Fortitude save (DC10 + ½ your class level + your Wisdom modifier) to resist each effect separately; acquired from Plant type monsters, CR16 or above
• **Mighty Guard (Sp):** you create a complex aura of protection on your party; all allies within 30’ gain the following benefits: *Nul* (all energy types), *Protect*, & *Shell*; acquired from Dragon type monsters, CR18 or above

• **Nova (Su):** you unleash an apocalyptic explosion; automatically hits all opponents within 30’, dealing 20d12 points of non-specified damage (no saving throw); acquired from Outsider type monsters, CR20 or above

**Prerequisites:** Lancer 1; cannot have any other Overdrive.

---

**Shooting Star (Ex)**

You can deal an automatic critical to 1 opponent within 30’ with your sword. In addition, if you make a successful Dexterity check (DC18), your opponent is blown away (knocked prone & rolls 1d4×10’; flying creatures are blown back 2d6×10’ & take 2d6 points of non-lethal damage due to battering & buffeting). An opponent that has been blown away in this manner must make a successful Fortitude save (DC25) or die.

**Prerequisites:** Ronin 4; must use a slashing weapon; must be able to perform *Dragon Fang*.

---

**Slice & Dice (Ex)**

You can perform up to 6 melee attacks in 1 round, with no penalty for multiple attacks; these attacks automatically hit their targets, & may be split among any of your opponents within reach (30’ from your initial starting point).

**Prerequisites:** Pugilist 3; must use a slashing weapon; must have performed at least 10 Overdrives; must be able to perform *Spiral Cut*.

---

**Spiral Cut (Ex)**

You can perform 1 charge attack with no AC penalty that automatically deals maximized damage.

**Prerequisites:** Pugilist 1; must use a slashing weapon.

---

**Status Reels (Su)**

You can randomly strike your enemies with status effects. Roll 3d4, then re-roll any 1 or 2 die, if you wish; if none of the numbers match, then you deal an automatic critical to 1 opponent within 30’ with a ranged weapon. If 2 of the numbers match, you deal an automatic critical to 1 opponent within 30’ with a ranged weapon & consult the following list for the value that corresponds with the matching numbers:

- **1** = *Poison* (inflicts Poisoned status; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist)
- **2** = *Blind* (inflicts Blind status; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist)
- **3** = *Confusion* (inflicts Confused status; Will save (DC10 + ½ your class level + your Charisma modifier) to resist)
- **4** = *Petrify* (inflicts Petrified status; Fortitude save (DC10 + ½ your class level + your Charisma modifier) to resist)

If all 3 of the numbers match, you deal an automatic critical to all opponents within 30’ with the same ranged weapon, & consult the above list for the value that corresponds with the matching numbers.

**Prerequisites:** Blitzer 9; must be able to perform *Element Reels & Attack Reels*.

---

**Thor’s Hammer (Su)**

You can automatically hit all opponents within 30’ with a deadly lightning bolt, dealing 5d8 points of electricity damage to each.

**Prerequisites:** Shocking Fayth 1; cannot have any other Overdrive.

---

**Tornado (Su)**

You can summon a tornado with your blade, which lasts for 1d6+4 rounds. Tornado-force winds produce the following effects: 175-300mph winds; all ranged attacks are impossible (even with siege weapons), as are Listen checks; Large or smaller creatures are Blown Away, Huge creatures are Knocked Down, & Gargantuan or Colossal creatures are checked; Fortitude save DC30; all flames are extinguished; instead of being blown away, characters in close proximity to a tornado who fail their Fortitude saves are sucked toward the tornado; those who come in contact with the actual funnel cloud are picked up & whirled around for 1d10 rounds, taking 6d6 points of damage per round, before being violently expelled (falling damage may apply); while a tornado’s rotational speed can be as great as 300mph, the funnel itself moves forward at an average of 30mph (roughly 250’ per round); a tornado uproots trees, destroys buildings, & causes other similar forms of major destruction.

**Prerequisites:** Ronin 15; must use a slashing weapon; must be able to perform *Dragon Fang, Shooting Star & Banishing Blade*; cannot gain additional Overdrives after acquiring this one.

---

**Zanmato (Ex)**
You can use your chosen weapon to make a single melee attack at your highest attack bonus against any 1 opponent within 30’, severing the head of any creature it successfully strikes (no saving throw); some creatures, such as many Aberrations & all Oozes, have no heads; others, such as golems & Undead creatures other than vampires, are not affected by the loss of their heads; most other creatures, however, automatically die (-10HP) when their heads are cut off; this is a full-round action that does not provoke attacks of opportunity.

**Prerequisites:** Samurai Fayth 1; must use a slashing weapon; cannot have any other Overdrive.

---

**Chapter 9: Blitzball**

**Concept**

The game of Blitzball is set within a sphere of magical water 300’-400’ (60-80 squares) in diameter. Any creature gains the [Water] subtype while within the sphere. The sphere has subjective directional gravity, & no tides or currents to speak of, so the players can move freely in all 3 dimensions with no penalties. No spells, spell-like abilities, or supernatural abilities function within the sphere, as if the entire sphere was within an antimagic field; techniques & other extraordinary abilities can function within the sphere, however. There are large triangular goal zones (20’ tall) at opposing sides of the sphere. In the center of the sphere is a vertical line marking the division between one team’s side & the other’s, although this is a somewhat arbitrary designation, as there is no inherent penalty of benefit to crossing the line during play.

The objective of a blitzball game is to score by maneuvering the titular blitzball into the opposing team’s goal. The blitzball itself is a stuffed leather & wood sphere with many small bumps on its surface to improve grip by players. Blitzballs are always magically enhanced to ease movement through water & resist injury. The typical blitzball has the following stats: Diminutive size, 1’ diameter, 2 pounds, AC12, hardness 10, 120HP, Break DC35; it is considered a ranged weapon with a range increment of 400’. Each game lasts for 10 minutes, divided into 2 periods of 5 minutes (50 rounds) each.

Each team consists of 6 players: a Left Forward (LF), a Right Forward (RF), a Midfielder (MF), a Left Defense (LD), a Right Defense (RD), & a Goalkeeper (GL). The forwards’ job is to get the ball into the opposing team’s goal. The midfielder’s job is to pass the ball from the defense & the forwards. The defenses’ job is to hinder the opposing team’s scoring by intercepting the ball. The goalkeeper’s job is to prevent the ball from entering his goal.

**Statistics**

**Attack Power (AT)** is used by the defensive player during an encounter, & determines how much force the player will inflict on the ball-carrier. If the defender’s Attack Power is higher than the ball-carrier’s Endurance, then there is a very good chance that they will take the ball from the carrier. A high Attack Power is important for midfielders & defenses, who are keen stop carriers who are approaching their goal zone. Attack Power for a blitzball player is their BAB + Strength modifier + base Fortitude save.

**Blocking Power (BL)** is the ability of a player to block shots or passes. The higher the Blocking Power, the greater chance the player has of intercepting the pass/shot. Blocking Power is important for midfielders & especially
defenses, in order to block shots to the goal zone & passes to open players. Blocking Power for a blitzball player is
their BAB + Strength modifier + base Reflex save.

Catching Power (CA) is only used by the goalkeepers; it is used to determine if the goalkeeper can catch a
ball shot by an opposing player into the goal zone, & thereby prevent a goal being scored. A goalkeeper with a high
Catching Power has a greater chance of stopping incoming shots. Catching Power is important to goalkeepers, as it is
their primary role in the game. Catching Power for a blitzball player is their AC + Dexterity modifier + base Reflex
save.

Endurance (EN) is the amount of force a player can endure from opposing players when they have the ball.
The more Endurance a ball-carrier has the better chance they have of breaking through numerous tackles. Endurance is
important in midfielders & forwards, as it is needed to break through tackles in order to shoot on goal. Endurance for a
blitzball player is their AC + Constitution modifier + base Fortitude save.

Hit Points (HP) are what a player uses to perform an action or special technique. A player loses 1HP each
round that they carry the ball, except during blitz rounds (see Rules, below). A player regains 1d4 HP every round that
they are not the ball-carrier, up to their maximum HP. If a player’s HP ever drops to 0, then they will be unable to carry
the ball or participate in the match until it regained.

Passing Power (PA) determines how far a player can pass the ball. The higher the Passing Power, the better
the ball has of ending up in the receiver’s hands. Passes can be blocked by defensive players which have not
been broken through. A high Passing Power is important to all players, but especially in Midfield players, as it is their
primary role to move the ball around. Passing Power for a blitzball player is their BAB + Dexterity modifier + base
Reflex save.

Shooting Power (SH) is the power & accuracy of a shot toward the goal zone. The higher the Shooting
Power, the greater chance the ball-carrier has of scoring a goal. Shooting is the most important attribute of forwards, as
scoring is their primary role in the game. Shooting Power for a blitzball player is their BAB + Dexterity modifier + base
Fortitude save.

Speed (SP) is how quickly a player moves during the game (with & without the ball). Faster players will be
better able to get into good positions than slower players. Speed is moderately important for every player, with the
exception of the Goalkeeper. Speed for a blitzball player is 30’ + 5’ for every 10 ranks in Swim.

Rules

Play begins when the launched from the exact center of the sphere straight up along the center line. A
designated forward from each team attempts to get control of the ball; this is an opposed Initiative check, with the
highest roll gaining control.

While holding the ball, a player can pass to a teammate or shoot the ball toward the goal at any time. Passing
the ball to a teammate is a passing roll (PA + 1d10). As the ball travels to its intended recipient, it deducts 1 from the
passing roll for each 5’ that it travels to the teammate. Any eligible defenders can make a block attempt, which deducts
from the passing roll (see Blocking, below). If the result is still above 0 when the ball reaches the recipient’s square,
then the recipient catches the ball; if it is 0 or below, then the ball is fumbled, & is recovered by the nearest player to
the intended recipient, be they of either team.
Shooting the ball works rather similarly, using a shooting roll (SH + 1d10). As the ball travels to the goal zone, it deducts 1 from the shooting roll for each 5' that it travels to the goal. Any eligible defenders can make a block attempt, which deducts from the passing roll (see Blocking, below); in addition, the goalkeeper can also make a block attempt, which deducts from the shooting roll (see Catching, below). If the result is still above 0, then the ball enters the goal, scoring a point for the team; if it is 0 or below, then the ball is caught by the goalkeeper, & is passed to the nearest player of his team.

While a player has the ball, the players of the opposing team (with the exception of the goalkeeper) must try to intercept the ball. This is done by entering into a “blitz” with the ball-carrier. A blitz is a 1-round combat-like encounter. Players must get within 15’ of the ball-carrier to initiate a blitz, which occurs during the following round. All opposing players within 15’ of the ball-carrier by the beginning of the blitz round may take part in the encounter. After a blitz, there is a 1d4 round period of time in which another blitz cannot take place.

While in a blitz, confronted by the opposing team, the ball-carrier can attempt to break through the opponents to continue “dribbling”, to pass to a teammate, or to shoot for the goal. When breaking through opposing players during a blitz, a ball-carrier makes an endurance roll (EN + 1d10), & the result is then depleted by their attacks (see attacking roll, below). If the Endurance is still above 0 after an attack, then the ball remains with the ball-carrier & the attacker is eliminated from the blitz; if it is 0 or below, then the ball is taken by the attacker that reduced it to 0. A ball-carrier can choose to break through as many or as few of their opponent as they wish, but they cannot choose the order in which they face them; the closest opponents must be dealt with before the ones that are further away.

Defending players must try to stop the other team from scoring, & this is done by entering a blitz with the ball-carrier & attempting to intercept the ball, becoming ball-carriers themselves. While in a blitz, if the ball-carrier opts to break through a defender, that player can attempt to tackle the ball-carrier by making an attacking roll (AT + 1d10); this result is deducted from the results of the ball-carrier’s endurance roll.

If the ball-carrier decides instead to pass or shoot, the opposing players can attempt to intercept the ball. All opposing players in a blitz are allowed a block attempt, so long as they have sufficient HP, & were not already eliminated from the blitz in some way; they do not have to be actually positioned between the ball-carrier & their chosen target. A defender can attempt to intercept by making a blocking roll (BL + 1d10); this result is deducted from the results of the ball-carrier’s passing or shooting roll, as appropriate. If a defender reduces the ball-carrier’s roll to 0 or below, then that player successfully intercepts the ball, becoming the new ball-carrier.

When a ball is shot toward the goal zone, the goalkeeper must try to prevent a goal being scored. Instead of a block attempt, they can attempt to catch an incoming ball by making a catching roll (CA + 1d10); this result is deducted from the results of the ball-carrier’s shooting roll.

**Techniques**

Players can improve their skills in Blitzball by gaining levels (especially levels of Blitzer), but they can also learn special techniques that they can use during the game. To learn a technique, a player must select a player on another team to observe. While playing against that team, if the chosen opponent performs a technique that the player doesn’t already know, then the player can perform a special Profession check (DC varies, see below) as an immediate action. If the check is successful, then the technique is learned, & can be used as soon as the next period.
A player can use any technique that they know, although not all at the same time. Before a game, a player can equip any number of techniques equal to the number of feats they possess, up to a maximum of 5. Bonus feats gained by racial or class features do not count towards this total. A player can change the techniques that they have equipped during half-time, if they so choose, but techniques cannot be switched out while the player is in game-play. Below is a complete list of techniques & their effects. Unless it is otherwise noted, using a technique is an immediate action that does not provoke an attack of opportunity, & lasts 1 round. All techniques are considered extraordinary abilities (Ex):

- **Anti-Drain:** 50% chance to automatically prevent a Drain effect; DC25 to learn; 1HP cost to use
- **Anti-Drain 2:** 100% chance to automatically prevent a Drain effect; DC30 to learn; 5HP cost to use
- **Anti-Nap:** 50% chance to automatically prevent a Nap effect; DC25 to learn; 4HP cost to use
- **Anti-Nap 2:** 100% chance to automatically prevent a Nap effect; DC30 to learn; 21HP cost to use
- **Anti-Venom:** 50% chance to automatically prevent a Venom effect; DC25 to learn; 1HP cost to use
- **Anti-Venom 2:** 100% chance to automatically prevent a Venom effect; DC30 to learn; 5HP cost to use
- **Anti-Wither:** 50% chance to automatically prevent a Wither effect; DC25 to learn; 3HP cost to use
- **Anti-Wither 2:** 100% chance to automatically prevent a Drain effect; DC30 to learn; 20HP cost to use
- **Auroch's Spirit:** +10 to SH; also adds total combined SH of all original teammates still on player’s team to player’s SH; earned only as a prize in a high-level tournament after 75% of all other techniques are learned; 60HP cost to use
- **Brawler:** 60% chance to enter a blitz from 45’ away; learned only as a prize in a mid-level tournament after 50% of all other techniques are learned; 1HP cost to use
- **Drain Tackle:** during an attack roll, 40% chance to drain 3HP; DC25 to learn; no HP cost to use, but player must have 3HP or more
- **Drain Tackle 2:** during an attack roll, 70% chance to drain 15HP; DC30 to learn; no HP cost to use, but player must have 15HP or more
- **Drain Tackle 3:** during an attack roll, 100% chance to drain 50HP; DC35 to learn; no HP cost to use, but player must have 50HP or more
- **Elite Defense:** player can enter a blitz from 30’ away; learned only as a prize in a low-level tournament after 25% of all other techniques are learned; 1HP cost to use
- **Gamble:** after waking up from a Nap effect, 50% chance to randomize one of the player’s stats (stat -10 + 1d20); statistic chosen by rolling 1d8 & consulting Table 2-1: Blitzball Statistics; learned only as a prize in a low-level tournament after 25% of all other techniques are learned; 30HP cost to use
- **Golden Arm:** reduces deduction from PA & SH rolls by ½, so that it deducts 1 from the roll for each 10’ that it travels; learned only as a prize in a low-level tournament after 75% of all other techniques are learned; 3HP cost to use
- **Good Morning:** after waking up from a Nap effect, 50% chance to gain a +2 morale bonus to all stats for 1 minute; learned only as a prize in a low-level tournament after 25% of all other techniques are learned; 8HP cost to use
- **Grip Gloves:** player gains +5 to CA for 1 minute; DC25 to learn; 3HP cost to use
- **Hi-Risk:** 6 of the player’s statistics are reduced by ½, but the other 2 are increased by 2x; statistics chosen by rolling 1d8 & consulting Table 2-1: Blitzball Statistics; learned only as a prize in a low-level tournament after 25% of all other techniques are learned; 30HP cost to use
- **Invisible Shot:** +3 to SH; 60% chance to make the ball invisible (total concealment = 50% miss chance for goalkeeper); DC35 to learn; 22HP cost to use
- **Jecht Shot:** +5 to SH; also automatically eliminates up to 2 opponents in a blitz; learned only by acquiring the Jecht Ball (earned in a one-time DC25 Dexterity check, aboard the S.S. Winno); 12HP cost to use
- **Jecht Shot 2:** +10 to SH; also makes the ball invisible (total concealment = 50% miss chance for goalkeeper); also automatically eliminates up to 3 opponents in a blitz; learned only as a prize in a high-level tournament after 75% of all other techniques are learned; 100HP cost to use
- **Nap Pass:** +3 to PA; 30% chance to put blocking defender to sleep (immobile & helpless; can be awoken by being passed the ball) for 1d6+4 rounds; DC25 to learn; 4HP cost to use
- **Nap Pass 2:** +5 to PA; 60% chance to put blocking defender to sleep (immobile & helpless; can be awoken by being passed the ball) for 1d6+4 rounds; DC30 to learn; 4HP cost to use
- **Nap Pass 3:** +7 to PA; 100% chance to put blocking defender to sleep (immobile & helpless; can be awoken by being passed the ball) for 1d6+4 rounds; DC30 to learn; 4HP cost to use
- **Nap Shot:** +3 to SH; 40% chance to put blocking defender to sleep (immobile & helpless; can be awoken by being passed the ball) for 1d6+4 rounds; DC25 to learn; 4HP cost to use
- **Nap Shot 2:** +5 to SH; 70% chance to put blocking defender to sleep (immobile & helpless; can be awoken by being passed the ball) for 1d6+4 rounds; DC30 to learn; 4HP cost to use
- **Nap Shot 3:** +7 to SH; 100% chance to put blocking defender to sleep (immobile & helpless; can be awoken by being passed the ball) for 1d6+4 rounds; DC35 to learn; 35HP cost to use

Skill Points at Each Level: 4 + Intelligence modifier.
MP per Level: 2d4.

Class Features
All of the following are class features of the Besaid Auroch. See level progression on Table 2-2: The Besaid Auroch (Blitzball PrC) for more information.
Weapon & Armor Proficiency: You gain no proficiency with any armor, although you do gain proficiency with blitzballs if you did not have it before entering this class.
Ball Handler (Ex): at 1st level, your focus on Blitzball earns you a +2 insight bonus to Passing Power (PA) & Blocking Power (BL) for each Besaid Auroch level that you possess.
Athletic Vigor (Ex): at 3rd level, your training grants you a temporary HP bonus while you are in a blitzball game equal to your Besaid Auroch level times your base Will save.
Team Spirit (Ex): at 5th level, you gain a +2 morale bonus to all Blitzball-related statistics (except HP & SP) for every member of your team (not including you) that has at least one level of Besaid Auroch.

Repeat Offender (Ex): at 1st level, your focus on Blitzball earns you a +2 insight bonus to Attack Power (AT) & Shooting Power (SH) for each Guado Glory level that you possess.

Burst of Speed (Ex): at 3rd level, you can gain a boost to your speed for short periods. You can add a 5’ to your Speed (SP) for each Guado Glory level that you possess. This boost lasts for only 1 round, & it costs 20HP per use, but it can be used as often as you wish.

Technical Knockout (Ex): at 5th level, you can use more of your learned techniques in-game. At the beginning of each period, you can choose a number of extra techniques equal to your Wisdom modifier (minimum 1). You can “equip” these in addition to the techniques you can normally “equip” (which are equal to the number of feats that you possess, up to a maximum of 5).

Class Features

All of the following are class features of the Ronso Fang. See level progression on Table 2-6: The Ronso Fang (Blitzball PrC) for more information.

Weapon & Armor Proficiency: You gain no proficiency with any armor, although you do gain proficiency with blitzballs if you did not have it before entering this class.

Tackle Breaker (Ex): at 1st level, your focus on Blitzball earns you a +2 insight bonus to Endurance (EN) & Shooting Power (SH) for each Ronso Fang level that you possess.

Afterburner (Ex): at 3rd level, you can exchange your stamina for increased speed. You can double your Speed (SP) if you wish; doing so is a swift action that does not provoke attacks of opportunity. Once active, this ability remains for the rest of the period, & cannot be deactivated until the period ends. While this ability is active, you lose 2HP for every round that you carry the ball, except during blitz rounds.

Stunning Blow (Ex): at 5th level, you can knock your opponents senseless with your tackles. Whenever you successfully strip the ball from an opponent with a tackle, they must make a special Fortitude save (DC5 + your Attack Power) or be dazed for 1 round.

Kilika Beast (Blitzball PrC)

Requirements

- BAB: +4 or higher
- Skill: Swim 9 ranks
- Special: You must play for the Kilika Beasts blitzball team.
Fastest Route: Blitzer 6

Class Information

Hit Die: d8.

Class Skills: The Kilika Beast’s class skills (& the key ability for each skill) are Escape Artist (Dex), Intimidate (Cha), Profession (Wis), Sleight of Hand (Dex), Spot (Wis), & Swim (Str).

Skill Points at Each Level: 4 + Intelligence modifier.

MP per Level: 2d4.

Class Features

All of the following are class features of the Kilika Beast. See level progression on Table 2-7: The Kilika Beast (Blitzball PrC) for more information.

**Weapon & Armor Proficiency:** You gain no proficiency with any armor, although you do gain proficiency with blitzballs if you did not have it before entering this class.

**Balanced Defender (Ex):** at 1st level, your focus on Blitzball earns you a +2 insight bonus to Attack Power (AT) & Passing Power (PA) for each Kilika Beast level that you possess.

**Staying Power (Ex):** at 3rd level, you are able to carry the ball longer. You now only lose 1HP for every other round that you carry the ball, except during blitz rounds.

**Double Mark (Ex):** at 5th level, you can mark 2 of your opponents at the same time, learning techniques from each. Whenever either of your chosen opponents performs a technique that you don’t already know, then you can perform a special Profession check (DC varies) as an immediate action to learn it.

ENCUMBERANCE - 30½ lbs (medium load)

AEONS - Valefor (Hume Aeon 5/Winged Fayth 5)

CLASS FEATURES
• Weapon & Armor Proficiency: Yuna is proficient with all simple weapons; Yuna is not proficient with any type of armor or shield; armor of any type interferes with a summoner’s gestures, which can cause her class features to fail (treat all spell-like class features as spells with somatic components for the purposes of spell failure rates); the only armor that a summoner can safely use are protective rings

• Summon (Su): once per day, Yuna can call upon an Outsider with the [Aeon] subtype (see Aeons, above) to battle her enemies for her; the Aeon is instantly transported from the transdimensional pocket in which it normally resides to the nearest clear space within 30’ of her (if no such space exists, the summoning fails); she can (usually) command Aeons that she has summoned, but she must remain within 30’ of the Aeon at all times, & she must spend a standard action each round to maintain control of the Aeon (this does not provoke attacks of opportunity); an Aeon will remain on the battlefield until either the encounter ends, Yuna dismissed it, she fails to maintain control, or it is reduced to 0HP; Yuna can only summon Aeons that she has unlocked & that have at least 1HP; a summoned Aeon gets a fair share of the XP for encounters in which it participates; summoning is a full-round action that provokes attacks of opportunity; while her Aeon battles in her stead, all opponents must make a Will save (DC10 + ½ her class level + her Wisdom modifier) to target her for an attack; this ability does not consume any MP to use

• **Weapon & Armor Proficiency:** Kimahri is proficient with all simple & martial weapons, light armor, medium armor, & shields (except tower shields)
• **Weapon Focus:** Kimahri gets Weapon Focus as a bonus feat; this must be used for a polearm of some sort, such as a glaive, a guisarme, a halberd, a lance, a naginata, a poleaxe, a ranseur, or a long spear
• **Lancet (Su):** Kimahri can sap health & magic from his enemies; if he successfully hits an opponent with his pole arm, he transfers 10% of their current HP (minimum 1HP) & 10% of their current MP (minimum 1MP) to his own respective pools; in addition, this attack allows Kimahri to make an Intelligence check (DC = 10 + opponent’s CR) to learn one of his Ronso Rage abilities (if you don’t have Ronso Rage as your overdrive, then this merely adds 1OP to your overdrive pool); he cannot sap HP or MP in excess of his current maximum with this ability; his opponent must make a Fortitude save (DC10 + ½ his class level + his Wisdom modifier) for half damage; this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use

CLASS FEATURES

• +2 racial bonus on attack rolls against Constructs
• +2 racial bonus on all saving throws versus mechanical traps
• Weapon & Armor Proficiency: Rikku is proficient with all simple weapons, plus the hand crossbow, rapier, sap, shortbow, & short sword; she is proficient with light armor, but not with shields
• Steal (Su): Rikku can rob her enemies while she fights them; during battle, she may make a touch attack upon an opponent; if she connects, she may attempt a Sleight of Hand check (DC10 + the opponent’s CR) to steal 1 item worn or carried by the opponent; she suffers no penalties for thievery performed in plain sight of her target; Rikku cannot attack an opponent in the same round that she performs this maneuver; this is a swift action that does not provoke attacks of opportunity; this ability does not consume any MP to use

CLASS FEATURES
• Weapon & Armor Proficiency: Valefor is proficient with all simple & martial weapons, but not with any type of armor or shield
• Aeon Form: Valefor becomes an Aeon; her type becomes [Outsider] & her subtype becomes [Aeon]; as such, she gains Darkvision out to 60'; in addition, she does not need to eat or sleep (although she can do so if she wishes); lastly, her body & soul are fused into one unit, & therefore spells that restore souls to their bodies, such as *raise dead*, *reincarnate*, & *resurrection*, don’t work on her; it takes a different magical effect, such as *limited wish*, *wish*, *miracle*, or *true resurrection* to restore her to life
• Natural Armor: Valefor gains a natural armor bonus to her AC equal to ½ her HD; in addition, she can add her Constitution bonus (if any) to her AC; these bonuses do not apply against touch attacks, & she loses the bonuses when she wears any armor, or when she carries a shield
• Aeon Boost (Ex): Valefor can choose, as a swift action, to lower her defenses for 1 round; during that round, all damage sustained by her is multiplied by 1.5; because of this, all Overdrive Points (OP’s) accrued during that round are multiplied by 3
• Flight (Ex): Valefor’s arms permanently transform into wings, granting her the power of flight; she gains a fly speed equal to her base land speed + 60' (average maneuverability); as her wings cannot be used as arms, she loses the ability to use manufactured weapons; she also takes a -10 penalty to some skills (Craft, Disable Device, Escape Artist, Forgery, Open Lock, Sleight of Hand, & Use Rope) or any other activity that uses her hands; any claw or slam attack natural weapon is also lost, but is replaced with a bite attack natural weapon with the same damage as her previous one
• Elemental Mage (Sp): Valefor gains some element-related spell-like abilities; she can now cast Blizzard (4MP), Fire (4MP), Thunder (4MP), & Water (4MP); she casts these like a Black Mage with a class level equal to her HD; she does not need any somatic components to cast these, but she must spend the MP cost to cast such abilities
• Mark of Status (Ex): Valefor gains a resistance bonus equal to her HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see *Status Effects*)
• Sonic Wings (Ex): Valefor can beat her wings with deadly force while hovering; all creatures within 30’ take sonic damage equal to 1d8 + her Strength modifier & a -5 Initiative penalty for the next round; if a creature makes a Reflex save (DC10 + ½ your class level + her Wisdom modifier), then they only take half damage & negate the Initiative penalty; this is a standard action that does not provoke attacks of opportunity
• Energy Ray (Su): Valefor can automatically hit all opponents within 30’ with a ray of fierce energy, dealing 4d8 points of damage to each (no saving throw); this is a full-round action that does not provoke attacks of opportunity; this ability costs 100 OP to use

• Frozen Flesh (Ex): Shiva’s flesh becomes rimed with frost, granting her a natural armor bonus equal to 1/4th of her HD; the ice is harmlessly absorbed, & doesn’t do anything when a creature touches her (either through an unarmed melee attack, a touch attack, a grapple, or some other direct physical contact); she gains the bonuses when she wears any armor
• Mark of Status (Ex): Shiva gains a resistance bonus equal to her HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above)
• **Heavenly Strike (Ex):** Shiva can blast her enemies with a frozen touch; this is a special melee attack (her BAB + her Strength modifier + 5; no size modifier) on a single opponent within 30’ that deals 2d6 cold damage + her Strength modifier & a -5 Initiative penalty for the next round; if a creature makes a Fortitude save (DC10 + ½ her class level + her Wisdom modifier), then they only take half damage & negate the Initiative penalty; this is a standard action that does not provoke attacks of opportunity

• **Diamond Dust (Su):** Shiva can automatically hit all opponents within 30’ with freezing ice shards, dealing 5d8 points of cold damage to each; this ability costs 100 OP to use

### CLASS FEATURES
• **Weapon & Armor Proficiency:** Bahamut is proficient with all simple & martial weapons, but not with any type of armor or shield.

• **Aeon Form:** Bahamut becomes an Aeon; his type becomes [Outside r] & his subtype becomes [Aeon]; as such, he gains Darkvision out to 60'; in addition, he does not need to eat or sleep (although he can do so if he wishes); lastly, his body & soul are fused into one unit, & therefore spells that restore souls to their bodies, such as *raise dead*, *reincarnate*, & *resurrection*, don’t work on him; it takes a different magical effect, such as *limited wish*, *wish*, *miracle*, or *true resurrection* to restore him to life.

• **Natural Armor:** Bahamut gains a natural armor bonus to his AC equal to ½ his HD; in addition, he can add his Constitution bonus (if any) to his AC; these bonuses do not apply against touch attacks, & he loses the bonuses when he wears any armor, or when he carries a shield.

• **Aeon Boost (Ex):** Bahamut can choose, as a swift action, to lower his defenses for 1 round; during that round, all damage sustained by him is multiplied by 1.5; because of this, all Overdrive Points (OP’s) accrued during that round are multiplied by 3.

• **Natural Weapon:** Bahamut gains a natural weapon; he may choose either a claw attack (slashing) or slam attack (bludgeoning) upon gaining this feature; once his choice has been made, it cannot be changed; this natural weapon deals damage based on his size (Fine 1, Diminutive 1d2, Tiny 1d3, Small 1d4, Medium 1d6, Large 1d8, Huge 2d6, Gargantuan 2d8, Colossal 4d6; critical 20/t/×2); once he gains this natural weapon, he can no longer use manufactured weapons with his hands, as they have become unsuitable for the purpose of wielding them.

• **Aeon Shield (Ex):** Bahamut can choose, as a swift action, to raise his defenses for 1 round; during that round, all damage sustained by him is reduced by 75%; because of this, he cannot accrue Overdrive Points (OP’s) during that round.

• **Immortality:** Bahamut no longer takes penalties to his ability scores for aging & cannot be magically aged; any such penalties that he has already taken, however, remain in place; bonuses no longer accrue either, but he does not die of old age when his time is up, & in fact his maximum age no longer exists as a meaningful statistic.

• **Flight (Ex):** Bahamut grows a pair of wings, granting him the power of flight; he gains a fly speed equal to his base land speed + 30' (poor maneuverability); he retains the use of his arms, which he may still use as normal.

• **Elemental Archmage (Sp):** Bahamut gains some element-related spell-like abilities; he can now cast *Blizzard* (4MP), *Blizzara* (8MP), *Blizzaga* (16MP), *Fire* (4MP), *Fira* (8MP), *Firaga* (16MP), *Scan* (1MP), *Thunder* (4MP), *Thundara* (8MP), *Thundaga* (16MP), *Water* (4MP), *Watera* (8MP), & *Waterga* (16MP); he casts these like a Lancer or a Black Mage with a class level equal to his HD; he does not need any somatic components to cast these, but you must spend the MP cost to cast such abilities.

• **Mark of Status (Ex):** Bahamut gains a resistance bonus equal to his HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above).

• **Impulse (Ex):** Bahamut can blast his enemies with a potent magical pulse; all opponents within 40' take force damage equal to 3d8 + his Strength modifier (no saving throw); this is a standard action that does not provoke attacks of opportunity.

• **Mega Flare (Su):** Bahamut can automatically hit all opponents within 30' with a devastating blast of magical power, dealing 10d8 points of damage to each (no saving throw); this is a full-round action that does not provoke attacks of opportunity; this ability costs 100 OP to use.

CLASS FEATURES
- Weapon & Armor Proficiency: Yojimbo is proficient with all simple & martial weapons, & with all armor (heavy, medium, & light), but not shields
- Aeon Form: Yojimbo becomes an Aeon; his type becomes [Outside r] & his subtype becomes [Aeon]; as such, he gains Darkvision out to 60'; in addition, he does not need to eat or sleep (although he can do so if he wishes); lastly, his body & soul are fused into one unit, & therefore spells that restore souls to their bodies, such as raise dead, reincarnate, & resurrection, don’t work on him; it takes a different magical effect, such as limited wish, wish, miracle, or true resurrection to restore him to life

- Lost Opportunities (Ex): Yojimbo’s opponents can no longer make attacks of opportunity against him; even if he is flat-footed or otherwise denied his Dexterity bonus to his AC, all attacks of opportunity made against him automatically fail; the only time that an attack of opportunity can be made successfully against him is when he is immobilized, helpless, or when he loses his natural armor bonus by wearing armor or using a shield
- Armed & Dangerous: Yojimbo regains the ability to use manufactured weapons, as well as wear armor without losing his natural armor bonus; he still cannot use shields, though
- Daigoro (Ex): Yojimbo gains an animal companion in the form of Daigoro (dire wolf statistics); up to once per round, he can command Daigoro to make a special slam attack (+11 melee; 1d8+10 bludgeoning damage) to 1 opponent within 50’ of his companion; this is a standard action that does not provoke attacks of opportunity for either you or Daigoro
- Kozuka (Ex): Yojimbo can conjure daggers of magical energy to throw at his enemies; throwing a magical knife is a special ranged attack (his BAB + his Dexterity modifier + 10; no size modifier) on a single opponent that deals 2d8 force damage; this is a standard action that does not provoke attacks of opportunity
- Mark of Status (Ex): Yojimbo gains a resistance bonus equal to his HD to all saving throws to defend against acquiring a negative status effect (all except Hasted &/or Regen; see Status Effects, above)
- Wakizashi (Ex): Yojimbo can slice his enemies with stunning speed; he can make melee attacks against 1d4-1 opponents (minimum 1) within 30’, using his full BAB & dealing maximized damage to all; this is a standard action that does not provoke attacks of opportunity
- Free Summons (Ex): Yojimbo is free to act as he will when he is called by a summoner to battle; he is no longer compelled to act as his summoner wishes, although he must make a Will save (DC20 + the summoner’s class level) each round that he refuses to attack his summoner’s enemies at all; he can even
negotiate the price of his services with his summoner; he still cannot dismiss himself however, so he must wait for an encounter to end or for his summoner to dismiss him to return to his transdimensional pocket

- **Zannmato (Ex):** Yojimbo can use his chosen weapon to make a single melee attack at his highest attack bonus against any 1 opponent within 30', severing the head of any creature it successfully strikes (no saving throw); some creatures, such as many Aberrations & all Oozes, have no heads; others, such as golems & Undead creatures other than vampires, are not affected by the loss of their heads; most other creatures, however, automatically die (-10HP) when their heads are cut off; this is a full-round action that does not provoke attacks of opportunity; this ability costs 100 OP to use

**CLASS FEATURES**

- **Weapon & Armor Proficiency:** Sandy is proficient with all simple & martial weapons, but not with any type of armor or shield

- **Aeon Form:** Sandy becomes an Aeon; her type becomes [Outsider] & her subtype becomes [Aeon]; as such, she gains Darkvision out to 60'; in addition, she does not need to eat or sleep (although she can do so if she wishes); lastly, her body & soul are fused into one unit, & therefore spells that restore souls to their bodies, such as *raise dead, reincarnate, & resurrection*, don’t work on her; it takes a different magical effect, such as *limited wish, wish, miracle, or true resurrection* to restore her to life

- **Natural Armor:** Sandy gains a natural armor bonus to her AC equal to½ her HD; in addition, she can add her Constitution bonus (if any) to her AC; these bonuses do not apply against touch attacks, & she loses the bonuses when she wears any armor, or when she carries a shield

- **Aeon Boost (Ex):** Sandy can choose, as a swift action, to lower her defenses for 1 round; during that round, all damage sustained by her is multiplied by 1.5; because of this, all Overdrive Points (OP’s) accrued during that round are multiplied by 3

- **Natural Weapon:** Sandy gains a natural weapon; she may choose either a claw attack (slashing) or slam attack (bludgeoning) upon gaining this feature; once her choice has been made, it cannot be changed; this natural weapon deals damage based on her size (Fine 1, Diminutive 1d2, Tiny 1d3, Small 1d4, Medium 1d6, Large 1d8, Huge 2d6, Gargantuan 2d8, Colossal 4d6; critical 20/x2); once she gains this natural weapon, she can no longer use manufactured weapons with her hands, as they have become unsuitable for the purpose of wielding them

- **Aeon Shield (Ex):** Sandy can choose, as a swift action, to raise her defenses for 1 round; during that round, all damage sustained by her is reduced by 75%; because of this, she cannot accrue Overdrive Points (OP’s) during that round

- **Immortality:** Sandy no longer takes penalties to her ability scores for aging & cannot be magically aged; any such penalties that she has already taken, however, remain in place; bonuses no longer accrue either, but she does not die of old age when her time is up, & in fact her maximum age no longer exists as a meaningful statistic

- **Lost Opportunities (Ex):** Sandy’s opponents can no longer make attacks of opportunity against her; even if she is flat-footed or otherwise denied her Dexterity bonus to her AC, all attacks of opportunity made against her automatically fail; the only time that an attack of opportunity can be made successfully against her is when she is immobilized, helpless, or when she loses her natural armor bonus by wearing armor or using a shield

- **Synergy:** Sandy can rely on the support of her sisters to bolster her attacks; she gains a morale bonus to her attack rolls equal to the Strength modifiers of all siblings within 30'; this bonus can be used for a number of rounds per day equal to her Wisdom modifier (minimum 1 round)

- **Mage’s Alternatives (Sp):** Sandy gains some spell-like abilities; she can now cast a number of “spells”; she casts these like a PC with a class level equal to her HD; she does not need any somatic components to cast these, but she must spend the MP cost to cast such abilities:
  - **Mage Package #2:** Cure (4MP), Cura (10MP), Curaga (20MP), Haste (8MP), Nul (2MP), Protect (10MP), Shell (12MP), & Reflect (14MP)

- **Freedom of Choice (Ex):** Sandy can use some leeway when she is called by a summoner to battle; each round, she may take an action that her summoner chooses, or she can make a Will save (DC 10 + the summoner’s class level) to act as she desires; if the summoner requests that she perform her overdrive, any (as long as she & her siblings each have 100 OP); she also cannot dismiss herself, so she must wait for an encounter to end or for her summoner to dismiss her to return to her transdimensional pocket

- **Mark of Status (Ex):** Sandy gains a resistance bonus equal to her HD to all saving throws to defend against acquiring a negative status effect (all except Hastened &/or Regen; see *Status Effects*, above)

- **Razzia (Ex):** Sandy can slash 1 opponent with blades that grow from her arms; this is 2 standard melee attacks, both using her full BAB; each blade that hits deals maximized slashing damage (2d8 + her Strength modifier); if a creature makes a Fortitude save (DC 10 +½ her class level + her Wisdom modifier), then they only take half damage; this is a standard action that does not provoke attacks of opportunity

- **Delta Attack (Su):** Sandy can combine her Limit Break with the Limit Breaks of 2 siblings to automatically hit all opponents within 50’ with the ultimate arcane attack, dealing 20d12 points of damage to each. In addition, any opponent hit by this attack must make a successful Fortitude save (DC 40) or die; must have 2 siblings who have fully charged OP pools (100 OP’s each); this ability costs 100 OP to use

**Initial Options:** Cindy’s size permanently increases by one size category; for stat changes caused by size increases, consult Table 4-1: *New Size Statistics*; this ability does not change your speed; if insufficient room is available for the desired growth, you attain the maximum possible size & may make a Strength check (using your increased Strength) to burst any enclosures in the process; if the check fails, you are constrained without harm by the materials enclosing you; you, therefore, cannot be crushed or otherwise harmed by increasing your size; no worn or carried equipment by you is enlarged by the effect; clothing & armor are destroyed by the transformation; magical effects that increase size stack with this ability, so the use of spells to increase size further are effective

**Mage’s Alternatives (Sp):** Cindy gains some spell-like abilities; she can now cast a number of “spells”; she casts these like a PC with a class level equal to her HD; she does not need any somatic components to cast these, but she must spend the MP cost to cast such abilities:

**CLASS FEATURES**

**Weapon & Armor Proficiency:** Seymour is proficient with all simple weapons; you are not proficient with any type of armor or shield; armor of any type interferes with his gestures, which can cause his class features to fail (treat all spell-like class features as spells with somatic components for the purposes of spell failure rates); the only armor that he can safely use are protective bangles or rings

**Summon (Su):** once per day, Seymour can call upon an Outsider with the [Aeon] subtype (see Aeon, above) to battle his enemies for him; the Aeon is instantly transported from the transdimensional pocket in which it normally resides to the nearest clear space within 30’ of him (if no such space exists, the summoning fails); he can (usually) command Aeons that he has summoned, but he must remain within 30’ of the Aeon at all times, & he must spend a standard action each round to maintain control of the Aeon (this does not provoke attacks of opportunity); an Aeon will remain on the battlefield until either the encounter ends, Seymour dismissed it, he fails to maintain control, or it is reduced to 0HP. Seymour can only summon Aeons that he has unlocked & that have at least 1HP; a summoned Aeon gets a fair share of the XP for encounters in which it participates; summoning is a full-round action that provokes attacks of opportunity; while his Aeon battles in his stead, all opponents must make a Will save (DC10 + ½ his class level + his Wisdom modifier) to target him for an attack; this ability does not consume any MP to use

**Cure (Sp):** Seymour can channel positive energy that cures 1d8 points of damage + 1 point per caster level (maximum +5) of any 1 ally within 30’ (including himself); since undead are powered by negative energy, this spell deals damage to them instead of curing their wounds, although an undead creature can apply spell resistance, & can attempt a Will save (DC10 + ½ his class level + his Wisdom modifier) to take half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Esuna (Sp):** Seymour can remove most negative conditions from any 1 ally within 30’ (including himself); negative conditions include: Berserk, Blind, Confused, Mute, Petrified, Poison, Sleep, Slowed; this cannot remove Cursed, Doomed, Hasted, KO, or Zombie (see Status Effects, above); this is a standard action that provokes attacks of opportunity; this ability costs 5MP to use

**Nul (Sp):** Seymour can cast an aura of protection over of any 1 ally within 30’ (including himself) from one energy type (either acid, cold, electricity, fire, sonic, or water (force); choose 1 at the time of casting); this aura blocks the next energy-based attack of the chosen type that hits that ally, be it from a spell or a physical attack; the aura disappears after absorbing 1 attack, or after 1 minute per class level, whichever comes first; this is a standard action that provokes attacks of opportunity; this ability costs 2MP to use

**Thunder (Sp):** Seymour can attack an enemy with electrical energy; this is a ranged touch attack that deals 1d4 points of electricity damage per class level to 1 opponent within 30’ on a successful hit; his opponent can make a Fortitude save (DC10 + ½ his class level + his Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Blizzard (Sp):** Seymour can attack an enemy with freezing energy; this is a ranged touch attack that deals 1d4 points of cold damage per class level to 1 opponent within 30’ on a successful hit; his opponent can make a Fortitude save (DC10 + ½ his class level + his Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Fire (Sp):** Seymour can attack an enemy with flaming energy; this is a ranged touch attack that deals 1d4 points of fire damage per class level to 1 opponent within 30’ on a successful hit; his opponent can make a Fortitude save (DC10 + ½ his class level + his Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity; this ability costs 4MP to use

**Focus (Su):** Seymour can augment the magical power & defenses of his party; this ability grants all allies within 30’ (including himself) +25% on all damaging & healing spells &/or spell-like abilities for the rest of the encounter; in addition, those party members affected by this gain Spell Resistance +2 for the rest of the encounter; these effects are negated for an ally if they are successfully hit with a cursed effect, or die (even if they are revived during the same encounter); multiple focus effects do not stack; this is a standard action that does not provoke attacks of opportunity; this ability does not consume any MP to use

**Thundara (Sp):** Seymour can spend an extra 4MP (8MP total) in order to increase the damage of Thunder to 1d6+1 points of electricity damage per class level; his opponent can make a Fortitude save (DC10 + ½ his class level + his Intelligence modifier) for half damage; this is a standard action that provokes attacks of opportunity

**ENCUMBERANCE:** 25 lbs (light load)

**WEIGHT:**
- Robes, Ceremonial (500gp, 10lbs)
- Sack (1sp, ½ lb)
- Turbo Ether (6,000gp, 0 lbs)

**ARMOR:**
- Does not provoke attacks of opportunity; this ability does not consume any MP to use

**WEAPON & ARMOR PROFICIENCY:**
- Seymour is proficient with all simple weapons; you are not proficient with any type of armor or shield; armor of any type interferes with his gestures, which can cause his class features to fail (treat all spell-like class features as spells with somatic components for the purposes of spell failure rates); the only armor that he can safely use are protective bangles or rings

---

**STANDARD EQUIPMENT:**
- Turbo Ether (6,000gp, 0 lbs)
- Robes, Ceremonial (500gp, 10lbs)
• **Requiem (Su):** Seymour can unleash an utter apocalypse of magical energy; automatically hits all opponents within 30’, dealing 10d12 points of force damage. In addition, all creatures damaged by this attack must make a Fortitude save (DC10 + ½ his class level + his Charisma modifier) or die; any creature with a CR more than (his party’s average level +2) is unaffected; this ability costs 100 OP to use.

Chapter 12: Creatures

NOTE: This section replaces the monsters found within the Monster Manual (pages 8-267). Like the rest of this homebrewing project, the creatures detailed below were designed to translate the distinctive characteristics of the monsters & bosses found in Final Fantasy X into the D20 ruleset. I've attempted to conform to the standard D&D design rules, while still being true to the world of Spira, & this has presented some challenges. The most notable difference between the statistics for these monsters & how they appear in FFX is the lack of immunities in the monsters presented below. Due to the use of saving throws in D&D, as well as attacks of opportunity & other D20 game design elements, the monsters here are not immune to most of the PC's class features, as they are in the original game, nor do all monsters have the same elemental immunities. This means some monsters will play slightly differently than their video game counterparts. This is an unfortunate (but inevitable) consequence of translating these creatures to another game medium.

Creature Subtypes

Aeon Subtype

Aeons are the physical realization of the Fayth. The Fayth were once Humanoid or Monstrous Humanoid, but they volunteered to participate in the Aeon Reborn ritual, & therefore were transformed into powerful Outsiders. An Aeon does not normally speak when summoned, & only communicates in the form of an apparition of its former body. The Aeon’s physical remains are sealed within a massive magical sarcophagus at the time of the ritual. The sarcophagi are usually located deep within a Yevonite temple, & protected by a Cloister of Trials.

Aeon Traits

- An Aeon is of the Outsider type only
- An Aeon is of the True Neutral alignment only
- An Aeon is not proficient with armor or shields unless otherwise indicated
- Cocoon (Su): if reduced to 0HP or otherwise killed, an Aeon will instantly teleport back to its transdimensional pocket, where that space will automatically stabilize the Aeon; a “dead” Aeon will fully heal all injuries & remove all status effects while within this pocket, but the process takes 24 hours, & cannot be hastened by any means (during this time, an Aeon cannot be summoned)
- An Aeon cannot be dismissed, but can be banished, either by a successful banishment spell, or via the Banish spell-like ability
Fiend Subtype

Fiends are what remain of the Unsent who stay in the living world instead of departing to the Farplane. Those who die & chose to remain in Spira as an Unsent risk becoming insane over time. When this happens, the Unsent dissolve into swarms of Pyreflies, which reorganize into warped physical forms. These new creatures, known as Fiends, are a manifestation of the negative emotions of the erstwhile Unsent. Fiends are driven to attack living creatures, especially sentient Humanoids & Monstrous Humanoids, even though they are not driven by hunger or territory.

Fiend Traits

• A Fiend is of the Aberration, Animal, Dragon, Elemental, Magical Beast, Monstrous Humanoid, Ooze, Outsider, Plant, Undead, or Vermin types only
• A Fiend is of the Chaotic Evil alignment only
• A Fiend cannot be Sent or Fiended
• Only an Undead-type Fiend can be turned
• A Fiend does not need to eat or sleep, although it does need to breathe
• Dissolution (Su): if reduced to 0HP or otherwise killed, a Fiend will break up into a number of separate Pyreflies, depending on its size (Fine 1, Diminutive 2, Tiny 4, Small 8, Medium 16, Large 32, Huge 64, Gargantuan 128, Colossal 256), which can then be Sent (or re-Fiended) as normal

Lightning Subtype

As with the other three “classical” elements in the world of Spira (Fire, Ice, & Water), some creatures have a natural affinity for electrical energy, also known as Lightning. These beings sizzle with pure electricity coursing over their skin, & can even use its raw power to defend themselves in some fashion.

Lightning Traits

• A Lightning creature is of the Elemental, Ooze, or Outsider types only
• A Lightning creature has complete immunity to electricity damage
• A Lightning creature has vulnerability to water (force) damage, which means it takes half again as much (+50%) damage as normal from water-based attacks, regardless of whether a saving throw is allowed, or if the save is a success or failure
• A Lightning creature’s body crackles with electricity, & tiny sparks emit from it as it moves; as a result, a Lightning creature emits shadowy illumination to a radius of 5’, & therefore receives a -4 penalty to all Hide & Move Silently checks
• Discharge (Su): A Lightning creature’s body is constantly covered in periodic electrical emissions; as a result, any other creature that touches a Lightning creature’s body takes 1 point of electrical damage each round of contact; most melee weapons will not channel this damage to the wielder, but weapons that require personal contact with the creature (such as claws, spiked gloves, or spiked armor) will channel this electrical energy; Electrical Immunity & Damage Reduction both can negate this damage

Machina Subtype

Machina is the term used for any kind of powered machines in *Final Fantasy X*, specifically used here to refer to semi-autonomous robots, primarily built & used by the people of Bevelle a thousand years ago. Machina are now forbidden by the Church of Yevon, ostensibly due to their potential for destruction & unreliable control methods. Notable exceptions to this doctrine include the following devices that are technically either machina themselves, or are based on machina technology: airships (such as the Fahrenheit), the blitzball sphere pool in Luca, elevators in the Palace of St. Bevelle itself, guns (including the weapons of Yevonite soldiers), & recording spheres. The Al Bhed have been ostracized in Spiran society for their heretical rejection of Yevonite dogma, as well as their salvage & use of ancient machina.

Machina Traits

• A Machina is of the Construct type only
• A Machina can usually be disabled instantly (reduced to 0HP or less) by a successful Steal or Mug attempt; a Machina may make a Fortitude save (DC10 + opponent’s skill ranks in Disable Device) to resist
• A Machina usually has Damage Reduction/magic equal to their Hit Die × 2
• Haywire: over the centuries, many Machina have become faulty, acquiring hardware &/or software errors; each Machina is 10% likely to have gone berserk (see Status Effects: Berserk); berserk Machina cannot be calmed normally

Unsent Subtype

When an intelligent creature dies in Spira, the spirit of that being travels to the Farplane to begin its immortal existence. Most of the time (75%), these spirits need the help of a Summoner (or a high-level Priest), who performs a ritual called the Sending to help guide them to the afterlife. If a creature’s spirit is not sent, it will most likely remain in
Spira as an “Unsent” creature. Unsent can succumb to malice & envy over time, becoming Fiends (see above), although some are able to exist in Spira & retain their sanity for years, even centuries, although these are exceptional characters, & far from the general rule.

Unsent Traits

- An Unsent is of the Giant, Humanoid, or Monstrous Humanoid types only
- An Unsent cannot be turned, but can be Sent or Fiended
- An Unsent uses the BAB & saving throws scores that it would have if it were alive
- **Veneer of Life (Su):** Unsent beings can appear just as they did when they were alive; this ability can remain active for as long as the Unsent wishes, & can only be canceled by *dispel magic* (1 minute), *break enchantment* (1 hour), *greater dispel magic* (1 day), mordenkainen’s *disjunction* (1 week), or antimagic fields (while within range of one); activating or deactivating the ability is a swift action that does not provoke attacks of opportunity; perceiving an Unsent as such requires a successful Spot check (DC25) or a successful Knowledge: Religion check (DC25)
- Once per year, an Unsent must make a Will save (DC = # of years spent as an Unsent / Charisma bonus (minimum +1)); failure indicates that it becomes Chaotic Evil
- An Unsent devolves into a Fiend if they become Chaotic Evil

Non-Fiend Creatures

**Chocobo**
Large Animal
Hit Dice: 3d8+6 (19HP)
Initiative: +2
Speed: 60’ (12 squares)

- **Blizzard All (Sp):** this is a ranged touch attack that deals 12d4 points of cold damage to all opponents within 60’ on a successful hit; Fortitude save (DC17) for half damage; the save DC is Wisdom-based; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

- **Desperado (Sp):** remove many positive conditions from all opponents within 60’ (no saving throw); positive conditions that this negates include haste effects, null effects (but not mighty guard), shell effects, protect effects, reflect effects, & regen effects; this is a standard action that provokes attacks of opportunity; this ability costs 8MP to use

- **Fire All (Sp):** this is a ranged touch attack that deals 12d4 points of fire damage to all opponents within 60’ on a successful hit; Fortitude save (DC17) for half damage; the save DC is Wisdom-based; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

- **Thunder All (Sp):** this is a ranged touch attack that deals 12d4 points of electricity damage to all opponents within 60’ on a successful hit; Fortitude save (DC17) for half damage; the save DC is Wisdom-based; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

- **Water All (Sp):** this is a ranged touch attack that deals 12d4 points of water (force) damage to all opponents within 60’ on a successful hit; Fortitude save (DC17) for half damage; the save DC is Wisdom-based; this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use

- **Cura (Sp):** cures 3d8+10 points of damage of any 1 ally within 60’ (including itself); since undead (but not [Unsent]) are powered by negative energy, this spell deals damage to them instead of curing their wounds, although an undead creature can apply spell resistance, & can attempt a Will save (DC17) for half damage; the save DC is Wisdom-based; this is a standard action that provokes attacks of opportunity; this ability costs 10MP to use

- **Mortibsorption (Sp):** the creature draws health from allies to sustain itself; on a successful touch attack, it transfers 1HP per HD from an ally’s HP pool to its own; the ally can make a Fortitude save (DC17) for half damage, if they wish, which reduces the amount of HP gained accordingly; the save DC is Wisdom-based; this is a standard action that provokes attacks of opportunity; this can only be used on allies within your party; this ability costs 10MP to use

- **Cross Cleave (Su):** the creature creates a whirl of blades; all creatures within reach take 2d6+15 slashing damage & a -20 Initiative penalty for the next round; if a creature makes a Fortitude save (DC22), then they only take half damage & negate the Initiative penalty; the save DC is Dexterity-based; this is a full-round action that does not provoke attacks of opportunity

- **Mortisorption (Sp):** the creature draws health from allies to sustain itself; on a successful touch attack, it transfers 1HP per HD from an ally’s HP pool to its own; the ally can make a Fortitude save (DC18) for half damage, if they wish, which reduces the amount of HP gained accordingly; the save DC is Wisdom-based; this is a standard action that provokes attacks of opportunity; this can only be used on allies within your party; this ability costs 10MP to use

- **Total Annihilation (Su):** the creature creates an obliterating explosion; all creatures within 100’ take 1d8+15 non-specified damage (no saving throw); this damage ignores Damage Reduction; this is a full-round action that does not provoke attacks of opportunity

- **Full-Life (Sp):** raises 1 ally from the dead; this also negates KO status; raises an ally that has been dead for no longer than one minute per caster level; in addition, the subject’s soul must be free & willing to return; if the subject’s soul is not willing to return, the spell does not work; therefore, a subject that wants to return receives no saving throw; a raised creature has a number of hit points equal to its maximum HP; any ability scores damaged to 0 are raised to their normal maximum amount; normal poisons & diseases are cured in the process of raising the subject, but magical diseases & curses are not undone; while the spell closes mortal wounds & repairs lethal damage of most kinds, the body of the creature to be raised must be whole; otherwise, missing parts are still missing when the creature is brought back to life; none of the dead creature’s equipment or possessions are affected in any way by this spell; Constructs, Elementals, Outsiders, & Undead creatures cannot be raised; this ability cannot bring back a creature that has died of old age; this is a full-round action that does not provoke attacks of opportunity; this ability costs 60MP to use

- Counterattack (Ex): upon being hit by a successful physical attack, the creature gains 1 extra attack of opportunity against an opponent that successfully hit them, even if the attack wouldn’t normally allow an attack of opportunity
- Powerful Build (Ex): whenever the creature is subject to any size modifier, it is treated as 1 size larger if doing so is advantageous to it; it is also considered to be 1 size larger when determining whether a creature’s special attacks based on size (such as improved grab or swallow whole) can affect it; the creature can use weapons designed for a creature 1 size larger without penalty; however, its space & reach remain those of a creature of its actual size; the benefits of this racial trait stack with the effects of powers, abilities, & spells that change the subject’s size category

• **Reflect (Sp):** the creature can cast a magical reflecting aura on any 1 creature within 100’ (including itself); this aura reflects all spells (both helpful & harmful) that target that creature, causing the spell to bounce off & hit another random creature within 100’; area-effect spells still function properly on that creature, as do any spells that have already been reflected off of another creature; multiple *reflect* effects do not stack, but overlap; this effect lasts for the rest of the encounter; this effect is negated for an ally if they are successfully hit with a *curse* effect, a *dispel* effect, or die (even if they are revived during the same encounter); this is a standard action that provokes attacks of opportunity; this ability costs 14MP to use
• **Tail Sweep (Ex):** the creature can spin rapidly, sweeping its long tail around; all creatures standing on the ground within reach take 1d8+4 bludgeoning damage, as well as suffer a -20 Initiative penalty for the next round; if a creature makes a Reflex save (DC 34), then they only take half damage & negate the Initiative penalty; the save DC is Strength-based; this ability also negates any *haste* or *hastege* effects of all creatures that it hits; this is a full-round action that does not provoke attacks of opportunity; this ability can be used once every 1d4 rounds
• **Curaga (Sp):** cures 6d8+20 points of damage to itself; this is a standard action that provokes attacks of opportunity; this ability costs 20MP to use
• **Esuna (Sp):** removes most negative conditions from itself; negative conditions include: Berserk, Blind, Confused, Mute, Petrified, Poison, Sleep, Slowed; this cannot remove Curse, Doomed, Hasted, KO, or Zombie (see *Status Effects*, above); this is a standard action that provokes attacks of opportunity; this ability costs 5MP to use
• **Haste (Sp):** the creature grants itself a +10 bonus to its initiative for the rest of the encounter; in addition, it can perform an extra attack action, move action, or swift action each round for the rest of the encounter; these effects are negated if it is successfully hit with a *slow* effect, a *curse* effect, a *dispel* effect, or die (even if they are revived during the same encounter); multiple *haste* effects do not stack; this is a standard action that does not provoke attacks of opportunity (although subsequent hasted actions provoke attacks of opportunity as normal); this ability costs 8MP to use
• **Protect (Sp):** this ability grants any 1 ally within 100’ (including itself) Damage Reduction 8 for the rest of the encounter; multiple *protect* effects do not stack, but overlap; this effect is negated for an ally if they are successfully hit with a *curse* effect, a *dispel* effect, or die (even if they are revived during the same encounter); this is a standard action that provokes attacks of opportunity; this ability costs 12MP to use
• **Regen (Sp):** this ability grants Fast Healing 5 to itself; multiple *regen* effects do not stack, but overlap; this effect lasts for 1 minute (10 rounds); this effect is negated if the regenerating creature is successfully hit with a *curse* effect, a *dispel* effect, or dies (even if they are revived during the same encounter); this is a standard action that provokes attacks of opportunity; this ability costs 40MP to use

• Earthquake (Ex): the creature can leap into the air & crash to the ground, shaking the earth with it’s bulk; all creatures standing on the ground within 80’ must make a Fortitude save (DC32) or suffer a -5 Initiative
penalty for the next round; the save DC is Strength-based; this is a full-round action that does not provoke attacks of opportunity

- **Improved Grab (Ex):** to use this ability, the creature must hit with a Bite attack; it can then attempt to start a grapple as a free action without provoking an attack of opportunity; if it wins the grapple check, it establishes a hold & can Swallow Whole

- **Regurgitate (Ex):** the creature will spit out a swallowed creature after 1d4+1 rounds, dealing 1d6 falling damage; in addition, the spat creature must make a Fortitude save (DC32) or suffer a -20 Initiative penalty for the next round; the save DC is Strength-based; this is a standard action that does not provoke attacks of opportunity

- **Swallow Whole (Ex):** the creature can try to swallow a grabbed opponent of Large or smaller size by making a successful grapple check; once inside, the opponent takes 4d6+15 points of crushing damage plus 2d6 points of acid damage per round from the creature’s digestive juices; a swallowed creature can cut its way out by dealing 17 points of damage to the digestive tract (2AC); once the creature exits, muscular action closes the hole; another swallowed opponent must cut its own way out; the creature’s gullet can hold 1 Huge, 2 Large, 4 Medium, 8 Small, or 16 Tiny or smaller creatures

- **Counterattack (Ex):** upon being hit by a successful physical attack, the creature gains 1 extra attack of opportunity against an opponent that successfully hit them, even if the attack wouldn’t normally allow an attack of opportunity.

- **Powerful Build (Ex):** whenever the creature is subject to any size modifier, it is treated as 1 size larger if doing so is advantageous to it; it is also considered to be 1 size larger when determining whether a creature’s special attacks based on size (such as improved grab or swallow whole) can affect it; the creature can use weapons designed for a creature 1 size larger without penalty; however, its space & reach remain those of a creature of its actual size; the benefits of this racial trait stack with the effects of powers, abilities, & spells that change the subject’s size category.

- **Daigoro (Su):** Daigoro can make a special slam attack (+11 melee; 1d8+10 bludgeoning damage) to 1 opponent within 50’ of your companion; this is a standard action that does not provoke an attack opportunity for either Yojimbo or Daigoro
- **Kozuka (Su):** throwing a magical knife is a +31 ranged attack on a single opponent within 95’ that deals 2d8 force damage; this is a standard action that does not provoke attacks of opportunity
- **Wakizashi (Su):** +26 melee attacks (using the Katana) against all opponents within reach, dealing 21 points of slashing damage to all; this is a standard action that does not provoke attacks of opportunity
- **Zanmato (Su):** +27 melee attack (using the Katana) against any 1 opponent within reach, severing the head of any creature it successfully strikes (no saving throw); some creatures, such as many Aberrations & all Oozes, have no heads; others, such as golems & Undead creatures other than vampires, are not affected by the loss of their heads; most other creatures, however, automatically die (-10HP) when their heads are cut off; this is a full-round action that does not provoke attacks of opportunity; this ability costs 100OP to use
• **Aeon Boost (Ex):** Yojimbo can choose, as a swift action, to lower its defenses for 1 round; during that round, all damage sustained by the Aeon is multiplied by 1.5; because of this, all Overdrive Points (OP’s) accrued during that round are multiplied by 3

• **Aeon Shield (Ex):** Yojimbo can choose, as a swift action, to raise its defenses for 1 round; during that round, all damage sustained by the Aeon is reduced by 75%; because of this, the Aeon cannot accrue Overdrive Points (OP’s) during that round

  - inflicts Sleep status for 3 rounds on 1 opponent; Fortitude save (DC20) to resist; the save DC is Charisma-based

- **Osmose (Su):** this is a touch attack that transfers 1 opponent’s entire MP pool to the creature’s own; the opponent can make a Will save (DC20) for half damage; the save DC is Charisma-based; this is a standard action that provokes attacks of opportunity; this ability does not consume any MP to use

- **Power Heave (Su):** cures 3d6+20 points of damage to any ally within 70’ (including itself); since undead (but not [Unsent]) are powered by negative energy, this spell deals damage to them instead of curing their wounds, although an undead creature can apply spell resistance, & can attempt a Fortitude save (DC25) to take half damage; the save DC is Wisdom-based; this is a standard action that does not provoke attacks of opportunity

- **Resurgent Form (Ex):** if the creature’s hit points fall below -10, it will return to life in 1d4+2 rounds, regaining its full amount of HP in the process; the only way to permanently destroy the creature is to kill the being that is assigned to protect (see Organization); this an immediate action that does not provoke attacks of opportunity

## Appendix 1: Bonus Material

### The Arena (& Other Mega-Monsters)

**Arena Subtype**
Created via a mysterious arcane process, the creatures made in the Monster Arena are truly frightening abominations. If they were ever set loose upon Spira, they would undoubtedly have combined destructive power rivaling Sin itself. Fortunately for the denizens of Spira, the mad trainer/shopkeeper of the Monster Arena is not only able to create these monstrosities, but is also (somehow) able to contain them. Arena creatures are always epic monsters, able to destroy entire armies with frightening ease.

**Arena Traits**
- An Arena creature can be of any type or sub-type
- **Mindless:** no Intelligence score (+0 modifier), & immune to all mind-affecting effects (charms, compulsions, phantasms, patterns, & morale effects); in addition, mindless creatures are of the True Neutral alignment only, has only racial bonus skill ranks, & has only racial bonus feats
- Arena creatures have Damage Reduction/-- equal to ½ of their HD
- Arena creatures have Spell Resistance equal to their HD
- Arena creatures often have some kind of energy resistance/immunity
- Arena creatures are immune to all forms of ability damage, ability drain, disease, energy drain, non-lethal damage, poison, polymorphing, death effects, & sleep effects

- **Impulse (Su):** Dark Bahamut can blast enemies with a potent magical pulse; all creatures within 210’ take force damage equal to 12d6+48 (no saving throw); this is a standard action that does not provoke attacks of opportunity
- **Mega Flare (Su):** automatically hits all opponents within 210’ with a devastating blast of magical power, dealing 100d8 points of damage to each (no saving throw); this is a full-round action that does not provoke attacks of opportunity; this ability costs 100OP to use
- **Aeon Boost (Ex):** Dark Bahamut can choose, as a swift action, to lower its defenses for 1 round; during that round, all damage sustained by the Aeon is multiplied by 1.5; because of this, all Overdrive Points (OP’s) accrued during that round are multiplied by 3
- **Aeon Shield (Ex):** Dark Bahamut can choose, as a swift action, to raise its defenses for 1 round; during that round, all damage sustained by the Aeon is reduced by 75%; because of this, the Aeon cannot accrue Overdrive Points (OP’s) during that round
- **Dark Defenses (Su):** Dark Bahamut is immune to all polymorphing magic, all mind-affecting magic, ability drain, ability damage, death from massive damage, & all divination magic
- **Darkness Unleashed:** Dark Bahamut is free to act as he will, no longer being bound by the goal of destroying Sin; he cannot be called by a summoner to battle, & he is no longer compelled to act as a summoner wishes; his transdimensional pocket shrunk to nonexistence, forcing him onto the Material Plane, so he can no longer retreat back to it
- **Energy Immunity (Su):** Dark Bahamut is immune to all damage from cold, fire, lightning, & water (force) energy types
- **Immortality (Ex):** Dark Bahamut no longer takes penalties to his ability scores for aging & cannot be magically aged; any such penalties that he has already taken, however, remain in place; bonuses no longer accrue either, but he does not die of old age when his time is up, & in fact his maximum age no longer exists as a meaningful statistic
- **Status Immunity (Su):** Dark Bahamut is immune to all status effects (other than Hasted, KO, or Regen)

- Daigoro (Su): Daigoro can make a special slam attack (+55 melee; 5d8+50 bludgeoning damage) to 1 opponent within 80’ of your companion; this is a standard action that does not provoke an attack opportunity for either Yojimbo or Daigoro.

- Kozuka (Su): Throwing a magical knife is a +33 ranged attack on a single opponent within 255’ that deals 40d8 force damage; this is a standard action that does not provoke attacks of opportunity.

- Wakizashi (Su): +43 melee attacks (using the Odachi) against all opponents within reach, dealing 164 points of slashing damage to all; this is a standard action that does not provoke attacks of opportunity.

- Zannmato (Su): +43 melee attack (using the Odachi) against any 1 opponent within reach, severing the head of any creature it successfully strikes (no saving throw); some creatures, such as many Aberrations & all Oozes, have no heads; others, such as golems & Undead creatures other than vampires, are not affected by the loss of their heads; most other creatures, however, automatically die (-10HP) when their heads are cut off; this is a full-round action that does not provoke attacks of opportunity; this ability costs 100OP to use.

- Aeon Boost (Ex): Dark Yojimbo can choose, as a swift action, to lower its defenses for 1 round; during that round, all damage sustained by the Aeon is multiplied by 1.5; because of this, all Overdrive Points (OP’s) accrued during that round are multiplied by 3.

- Aeon Shield (Ex): Dark Yojimbo can choose, as a swift action, to raise its defenses for 1 round; during that round, all damage sustained by the Aeon is reduced by 75%; because of this, the Aeon cannot accrue Overdrive Points (OP’s) during that round.

- Dark Defenses (Su): Dark Yojimbo is immune to all polymorphing magic, all mind-affecting magic, ability drain, ability damage, death from massive damage, & all divination magic.

- Darkness Unleashed: Dark Yojimbo is free to act as he will, no longer being bound by the goal of destroying Sin; he cannot be called by a summoner to battle, & he is no longer compelled to act as a summoner wishes; his transdimensional pocket shrunk to nonexistence, forcing him onto the Material Plane, so he can no longer retreat back to it.

- Energy Absorption (Su): Whenever Dark Yojimbo is dealt cold, fire, lightning, or water (force) damage, he actually gains HP equal to the damage that he normally would have taken; he cannot gain HP in excess of his maximum HP.

- Immortality (Ex): Dark Yojimbo no longer takes penalties to his ability scores for aging & cannot be magically aged; any such penalties that he has already taken, however, remain in place; bonuses no longer accrue either, but he does not die of old age when his time is up, & in fact his maximum age no longer exists as a meaningful statistic.

- Lost Opportunities (Su): Dark Yojimbo’s opponents can no longer make attacks of opportunity against him; even if he is flat-footed or otherwise denied his Dexterity bonus to his AC, all attacks of opportunity made against him automatically fail; the only time that an attack of opportunity can be made successfully against him is when he is immobilized, helpless, or when he loses his natural armor bonus by wearing armor or using a shield.

- Status Immunity (Su): Dark Yojimbo is immune to all status effects (other than Hasted, KO, or Regen).

Magic Pool: 36d4 (90MP)
**Tera-Graviton (Sp):** unleashes a 100’ blast that instantly strikes all creatures within it, dealing damage to each creature equal to 75% of their current maximum HP (no saving throw); this is a full-round action that does not provoke attacks of opportunity; this ability costs 360MP to use; this blast inflicts the following status effects:

- Blind (10 minutes)
- Doomed
- Mute (10 minutes)
- Sleep (10 minutes)
- Slowed

**Negation (Su):** removes any status conditions from any creature struck by a melee attack (no saving throw); status conditions include *Armor Break, Berserk, Blind, Confuse, Haste, Hastega, Magic Break, Mental Break, Mute, Null, Petrified, Poison, Power Break, Protect, Provoke, Reflect, Regen, Shell, Sleep, Slow, Threaten,* & *Zombie*

**Slowga (Sp):** all opponents within 100’ gain a -10 penalty to their Initiative for 2d6+8 rounds; in addition, those affected can only move at ½ speed, & can only perform partial actions each round for the same amount of time; these effects are negated for an opponent if they are successfully hit with a *haste* effect or the effect expires; multiple *slowga* effects do not stack, but overlap; affected creatures must make a Fortitude save (DC28) to resist; the save DC is Wisdom-based; this is a standard action that does not provoke an attack opportunity; this ability costs 20MP to use

**Arcane Defense (Su):** the creature only takes 50% damage from spells, spell-like abilities, & other effects that deal non-specified damage, such as *Flare, Holy, Nova,* & *Ultima*

**Energy Absorption (Su):** whenever the creature is dealt cold, fire, lightning, or water (force) damage, it actually gains HP equal to the damage that it normally would have taken; in addition, the creature absorbs damage from positive & negative energy (which includes spell-like abilities, such as *holy*); the creature cannot gain HP in excess of its maximum HP

**Regeneration (Ex):** the creature regains 10 points of nonlethal damage per round; all damage dealt to the creature (except force energy damage) is treated as nonlethal damage; force energy deals normal damage to an arm; if an arm loses a part, the lost portion regrows in 1d6+4 rounds; it can reattach the severed member instantly by holding it to the stump

**Status Immunity (Su):** the creature is immune to all status effects (other than KO)

**Calamity (Su):** +29 special ranged attack (4d6+4); 100’ range; Reflex save (DC32) for half damage & avoid the status effects; the save DC is Dexterity-based; this is a standard action that does not provoke attacks of opportunity; this ability costs 74MP to use; opponents that fail their Reflex save are subject to the following effects:

- Blind (25 minutes)
- Cursed
- **Mute** (25 minutes)
- Poison
- Power Break: any Strength bonus to attacks is negated for 4d6+16 rounds
- Magic Break: all damage dealt by that opponent’s spells is reduced by ½ for 4d6+16 rounds; the opponent’s healing magic is only ½ as effective, as well; multiple break effects do not stack
- Armor Break: any armor bonus for natural or worn armor is negated for 4d6+16 rounds
- Mental Break: any SR is negated for 4d6+16 rounds

**Arcane Defense (Su):** the creature only takes 50% damage from spells, spell-like abilities, & other effects that deal non-specified damage, such as Flare, Holy, Nova, & Ultima

**Energy Absorption (Su):** whenever the creature is dealt cold, fire, lightning, or water (force) damage, it actually gains HP equal to the damage that it normally would have taken; in addition, the creature absorbs damage from positive & negative energy (which includes spell-like abilities, such as holy); the creature cannot gain HP in excess of its maximum HP

**Mighty Guard (Sp):** grants all allies within 100’ (including itself) the following benefits: *null* (all energy types), *protect*, & *shell*; this is a standard action that does not provoke an attack opportunity; this ability costs 10MP to use

**Regeneration (Ex):** the creature regains 10 points of nonlethal damage per round; all damage dealt to the creature (except force energy damage) is treated as nonlethal damage; force energy deals normal damage to an arm; if an arm loses a part, the lost portion regrows in 1d6+4 rounds; it can reattach the severed member instantly by holding it to the stump

**Status Immunity (Su):** the creature is immune to all status effects (other than KO)

**Class Features**

All of the following are class features of the Dark Fayth. See level progression on Table 1-20: The Dark Fayth (Epic Monster PrC) for more information.

**Weapon & Armor Proficiency:** You gain no proficiency with any weapon or armor.

**Darkness Unleashed:** at 1st level, you are free to act as you will, no longer being bound by the goal of destroying Sin; you cannot be called by a summoner to battle, & you are no longer compelled to act as a summoner wishes; your transdimensional pocket shrinks to nonexistence, forcing you onto the Material Plane, so you can no longer retreat back to it; since qualifying for this prestige class involves killing your Summoner, you alignment probably changes from True Neutral (most likely to an Evil alignment, unless your Summoner was Evil)

**Spell Resistance (Su):** at 3rd level, you gain Spell Resistance equal to your Hit Die × 2

**Damage Reduction (Ex):** at 3rd level, you gain Damage Reduction/epic equal to your Hit Die

**Dark Defenses (Ex):** at 5th level, you become immune to all polymorphing magic, all mind-affecting magic, ability drain, ability damage, death from massive damage, & all divination magic

**Energy Immunity (Ex):** at 7th level, you are immune to all damage from cold, fire, lightning, & water (force) energy types

**Status Immunity (Ex):** at 9th level, you are immune to all status effects (other than Hasted, KO, or Regen)

**Energy Absorption (Ex):** at 11th level, whenever you are dealt cold, fire, lightning, or water (force) damage, you actually gain HP equal to the damage that you normally would have taken; you cannot gain HP in excess of your maximum HP; this ability replaces Energy Immunity

**Mega-Graviton (Sp):** at 13th level, you can unleash a 200’ blast that instantly strikes all creatures within it, dealing damage to each creature equal to 50% of their current maximum HP (no saving throw); this is a full-round action that does not provoke attacks of opportunity; this ability costs 240MP to use; this blast inflicts the following status effects:

- **Blind** (10 minutes)
- **Doomed**
- **Mute** (10 minutes)
- **Sleep** (10 minutes)
- **Slowed**
The Church of Yevon

Yevon (Greater God, Lawful Good)

All across Spira, most people worship the one true god, Yevon. His teachings have united the peoples of Spira for over a thousand years, helping them to cope with the havoc of Sin. His teachings state that Spirans must atone for the misdeeds of their ancestors, & that only by doing so will they be rid of Sin forever & experience the peace of the Eternal Calm. The Church of Yevon bans the use of machina, & the persecution of those who do use such unholy devices. Yevonites also pray often, giving thanks to Yevon for the temporary Calms; they also sing the Hymn of the Fayth, a holy song of Yevon sung to soothe the souls of the dead as they pass into the Farplane.

The truth is, though, that the idea of Yevon as a god is lie. A thousand years ago, a Summoner named Yu Yevon lived in Zanarkand, which was losing a war with Bevelle. Rather than risk destruction of his beloved city, Yu Yevon had all the surviving citizens turn themselves into Fayth & began a massive group summoning of the city, one that never slept. In order to protect himself, he gathered a multitude of pyreflies & transformed them into an armor which became the monster known as Sin.

Yu Yevon gave this creature a set of very simple instructions: destroy any machina or settlement which grew larger than a small village in order to bring technical evolution to a halt, & retaliate to all hostility with extreme prejudice. However, the strain on summoning both Sin & maintaining his beloved Dream Zanarkand proved too much, even for his abilities. His humanity soon faded & Sin was left as a force relying solely on instinct & to comply with the instructions given to it upon creation. Sin’s first act as such was to destroy the real Zanarkand. The armies of Bevelle saw this destruction & retreated, bringing the first news of the great beast.

Shortly before creating Sin, Yu Yevon informed his daughter, Yuna, of his plan & gave her a means of calming the creature. Yuna passed this knowledge on to the leaders of Bevelle, thus beginning the teachings of Yevon & the endless spiral of death that surrounds Spira. Every time a Summoner destroyed Sin, the Aeon used for the Final Summoning would be possessed by Yu Yevon & used to rebuild Sin. Yu Yevon continued to use this process to renew Sin time & time again.

- **Portfolio:** Atonement, Death, Lies, Rebirth, Secrets
- **Domains:** Destruction, Healing, Law, Trickery
- **Cleric Training:** Training to become a priest or a summoner of Yevon is conducted at one of several Yevonite temples scattered across Spira. Potential priest & summoners are typically chosen from a very early age, as one cannot wait for Sin to claim them. Elder priests take time to mentor each acolyte, so that they are all well-versed in Yevon’s sacred teachings & the church’s doctrine. To complete their training, acolytes must pass though the Cloister of Trials, a series of puzzle-locked rooms that test an applicant’s resolve, ingenuity, & faith.
- **Quests:** The Church of Yevon sometimes sends newly ordained clergy to retrieve sacred or otherwise important items from areas devastated by Sin, if they have not been destroyed. They also send priests to assist those injured by Sin’s attacks, as well perform the Sending for those who cannot be saved. The most important quest commissioned by the church, though, is that of the Pilgrimage. All summoners are expected to attempt a quest to attain the Final Aeon, & use it to destroy Sin. Many fail, or quit, as the journey is rarely an easy one. Priests of Yevon sometimes accompany a summoner as one of their guardians on the Pilgrimage.
- **Prayers:** A prayer to Yevon is typically a simple one. Little time is wasted on flowery language or circuitous phrasing. This worship often centers around Sin, & pleas for the Calm. Commonly heard prayers include “May Yevon protect us”, “Thank Yevon for the Calm”, “Yevon, please hear us, & deliver us from Sin”, & “Praise be to Yevon.” The Hymn of the Fayth is the most frequently-used prayer, & is sometimes sung during secular moments, such as while working or as a lullaby. Below are the lyrics:
  - **Japanese:** Inore yo, Ebon-ju, Yume mi yo, inoriko. Hatena ku, sakaetamae.
Pray to Yu Yevon, & dream, Fayth. Forever & ever, grant us prosperity.

- **Temples:** Yevon has several temples scattered across Spira, mostly in current or former centers of civilization. The outer design of a Yevonite temple can vary greatly, but the inner chambers usually follow a similar design scheme. The first room is the largest one, a central hall that is filled with statues of prominent High Summoners, prayer mats, & symbols of Yevon. Side doors lead to priests’ living quarters, private meditation rooms, & other facilities. The inner chambers are usually locked, as they are devoted to one of the Cloister of Trials. The cloister is always the only way to reach the innermost room, where the sarcophagus of the temple’s patron Aeon is stored. The temples of Yevon are listed below:
  - Baaj (temple in ruins)
  - Besaid
  - Bevelle (capital city temple)
  - Djose (semi-hidden temple)
  - Kilika
  - Macalania
  - Remiem (lost temple)

- **Rites:** The Yevonites have few defined ceremonies. In centuries past, more rites existed, but they were gradually dropped as Sin’s wrath took its toll on the people of Spira. The clergy of Yevon still officiate over weddings, trials, blitzball games, & other relatively-minor social events. The only major rite that they have remaining is the Sending ritual, which is performed by summoners (or priests) to usher the souls of the dead into the Farplane, so that they can leave the world of the living & find eternal rest.

- **Herald & Allies:** Yevon seldom has reason to employ a herald. On the rare occasions when Yevon does call upon a herald (usually to declare a Calm has begun, after a summoner defeats Sin), it’s usually a 20th-level summoner, & is often a Guado, although Hume & Ronso heralds are not unheard of. Allies are invariably Aeons of some sort.

- **Relics:** The seven legendary weapons, the Final Aeon.

- **Symbol:** The Angelic Eye (*Yevonite Script, Letter A*).

- **Favored Weapon:** Quarterstaff.

**Overview**

The game of *Final Fantasy X* is an RPG, much like any other. You battle enemies, & if you defeat them, then you gain points that you can use to improve your abilities. But this system is a bit different than the leveling system found in RPG’s such as *Dungeons & Dragons*. The mechanics of *FFX* do not have discrete levels of achievement that you reach after gaining so many experience points (XP). Instead, the PC’s gain spheres, which are small magical items that allow the characters to activate nodes on a chart known as the Sphere Grid. Each node on the Sphere Grid has a different small permanent boost to a PC’s statistics, & so by moving about the Sphere Grid unlocking nodes, the PC’s can gain power. This system has nothing like the levels seen in D&D, which are more like pre-made bundled packages filled with small permanent stat boosts.

**The Sphere Grid**

To use this new alternative to leveling, the entire advancement system of the D20 system can be discarded &/or ignored. Monsters, traps, & other obstacles no longer grant Experience Points to the characters that defeat them. Anytime that an XP reward would normally be given to a character, a magical sphere is created instead. This sphere can be used to activate nodes on the Sphere Grid (see *Table 6-1: Sphere Grid*). These spheres cannot be created via any other means. Even the most powerful magic (such as a *wish* or *miracle* spell) cannot create these concentrations of magical power. Indeed, each of these spheres represents a nexus of metaphysical energy, a distilled manifestation of the fundamental power in the universe. In the world of Spira, this is usually seen either as a gift from the fayth for defeating a fiend, or a crystallized remnant left behind by the pyreflies when a fiend is defeated.

**Acquiring Spheres**

When a party faces off against monsters or traps, they earn different types of spheres when they defeat those obstacles, depending on the challenge of the obstacles in question. If the CR of the obstacle is less than the party’s average HD -1, then no spheres are produced; obstacles with a CR of less than 1 are rounded down to CR0. If the CR of the obstacle is between the party’s average HD -1 & the party’s average HD +2, then random spheres will be produced from *Table 6-2: Standard Drops*. If the CR of the obstacle is greater than the party’s average HD +2, then random spheres will be produced from *Table 6-3: Elite Drops*. For either of these tables, it is recommended that the victor roll 1d20 to determine the results. Alternatively, the DM may allow the use of 2d10 as a viable variant; keep in mind that using this variant leads to slightly more spheres produced, but mostly of only average quality (IE fewer Key Spheres).

Character Creation & Using Spheres

When a new character is created using this system, their race, class, alignment, & equipment are selected; all other character statistics are assumed to be 0. They then get the first 7 nodes of their class’s column activated for free, placing their position on the Sphere Grid at row #7 of their class’s column; this is assumed to be the character’s total life experience up to this point. After that, the character will need to activate nodes that they can access using the appropriate spheres. To activate a node, a character needs to move to a node directly adjacent to their current position & spend a sphere that corresponds to that node. Nodes that are vertically-adjacent can be activated, but horizontally- & diagonally-adjacent nodes cannot; characters can only move vertically along their own class’s column (unless, of course, they use Key Spheres, as seen below). Characters can move back over previously-activated nodes by spending another sphere of the appropriate type, but an already-activated node will not grant a bonus more than once for that character. Characters can move over empty nodes without spending spheres, but they cannot do so if they are spending spheres at the same time (& therefore must wait until they gain another sphere from an obstacle), & they gain no statistical benefit from doing so (unless they turn that empty node in another kind of node prior to activating it, see Sphere Grid Items below).

Converting to the Grid & Creating Higher-Level Characters

So far, we’ve assumed that the Sphere Grid would be used only for characters that start out at 1st level. But what if you want to create a character that’s higher than 1st level? Or what if you already have a higher-level character, you want to switch over to using the Sphere Grid? As with anything involving variant rules (or rules in general), DM discretion is advised.

Well, the first one is easy. To create character that’s higher than 1st level, simply give the character lots of free activated nodes. Activate as many as necessary in the class columns of your choice. Remember to also give them equipment & treasure according to the WBL chart; you can use the character’s HD as an equivalent to class levels. Once that is done, just place the character’s position on the Sphere Grid at their last activated node, & they are ready to enter play.

The second question is a bit more difficult. Converting to the Sphere Grid using a higher-level character is probably best done by determining their proper place on the Sphere Grid & assuming that all previous nodes in their class column(s) have been activated. To find an already-existing character’s proper place on the grid, go to their class column. Now, go down the column, counting the nodes that add HP as you go. Once you’ve counted a number of HP nodes equal to your character’s HD+1, stop & go back to the node directly above it. That’s your character’s position on the Sphere Grid. To get a ballpark estimate of where this should be, multiply your character’s level by 7; the resulting number should approximate the row of your starting position on the grid.

Implications of the Grid

This system allows for strategic acquisition of abilities, enabling players to optimize their characters according to their tastes. Keep in mind that while this progression system tends to facilitate faster advancement than the standard XP system, it also tends to impede progress with inherent chokepoints. Players can only progress by activating adjacent nodes, & they can only do that by spending the corresponding spheres. As the acquisition of spheres is largely random, this can (& often does) lead to characters unable to advance (at least in the direction that they want to go) until they have a sphere of the correct type. This is an intentional consequence of the system, designed to promote strategy & keep out of control progression in check.

It is not recommended that DMs assist/hinder characters by fudging the dice rolls on Tables 6-2 or 6-3, as doing so could easily lead to overly-rapid/stagnant progression. This system also encourages DMs to pit the PCs against level-appropriate enemies (that is, opponents whose CR is roughly equal to the party’s average HD). This is because if the CR is too low, then the PCs won’t get any spheres as a reward, & if the CR is too high, then the PCs won’t get enough useful spheres to justify the danger.

Some mechanical effects, such as WBL & certain class features, depend on a character’s class level. In these cases, it is possible to use the number of Hit Die that a character has as a substitute for the number of levels that a character is supposed to have. Since characters using the XP system would always have 1HD per class level, it is preferable to refer to a character’s HD to determine their ECL, so that effects that depend on levels can continue to function normally.

Example of Use

Let us use a PC named Tidus as an example of how the Sphere Grid can be used in an actual game. The character’s player wants to make a new PC for a campaign that is just starting. He decides on making a Hume Pugilist named Tidus. After selecting his starting equipment & alignment, he is ready to calculate his statistics. Consulting the rules above for using the Sphere Grid, he gets the first 7 nodes of the Pugilist column activated for free. This has 2 implications: he has the exact same statistics as a Pugilist that was made via standard character creation methods, & his position on the Sphere Grid is determined to be Pugilist #7. He is then ready to begin play as a 1st-level character.

Tidus’s party consists of himself, a Summoner, a Black Mage, & a Lancer. They are all 1st-level PCs. They soon get into a skirmish with 4 Sinscales (#1 type; CR¼). After they defeat the litany of Sinscales, they roll 4 times of
Table 6-2, once for each Sinscale that they killed. Together, the party rolls a 2, an 8, a 12, & a 17; this gives them 1 Feature Sphere, 2 Saving Spheres, & a Level 1 Key Sphere. Tidus needs a Power Sphere to activate the next node in his class column (Pugilist #8, HP +1d8+Con), so he cannot use any of these spheres to progress.

Later, Tidus’s party encounters a Condor, a Dingo, & a Water Flan. After they defeat these opponents, they again roll on Table 6-2, once for each fiend that they killed. This time, the party rolls a 7, a 15, & a 16; this gives them 2 Attack Spheres & 3 Power Spheres. Now, Tidus can activate the next node in his class column & continue his progression. If the rest of his party permits it, he can even use one of the Saving Spheres that they got from the first battle to activate the next node after that (Pugilist #9, Reflex +1), advancing even further.

### Sphere Grid Items
- **Ability Distiller**: forces an enemy to drop Ability Spheres
- **Ability Sphere**: activates an Ability Score,Feat, or Skill node on Sphere Grid (colored magenta on the grid)
- **Attack Distiller**: forces an enemy to drop Attack Spheres
- **Attack Sphere**: activates a BAB node on Sphere Grid (colored yellow on the grid)
- **BAB Sphere**: turns an empty node on the Sphere Grid into a BAB node (+1)
- **Black Magic Sphere**: activates a Black Magic node already activated by ally (colored purple on the grid)
- **Feat Sphere**: turns an empty node on the Sphere Grid into a Misc feat node (+1)
- **Feature Distiller**: forces an enemy to drop Feature Spheres
- **Feature Sphere**: activates a Class Feature node on Sphere Grid, such as a Black Magic node, a White Magic node, or some other node with a Class Feature on it (colored red on the grid)
- **Friend Sphere**: teleports you to any ally’s current location on the Sphere Grid
- **HP Sphere**: turns an empty node on the Sphere Grid into an HP node (+4)
- **Level 1 Key Sphere**: allows 1 lateral movement between Nodes #1-#35
- **Level 2 Key Sphere**: allows 1 lateral movement between Nodes #36-#70
- **Level 3 Key Sphere**: allows 1 lateral movement between Nodes #71-#105
- **Level 4 Key Sphere**: allows 1 lateral movement between Nodes #106-#140
- **Mana Distiller**: forces an enemy to drop Mana Spheres
- **Mana Sphere**: activates an MP node on the Sphere Grid (colored blue on the grid)
- **MP Sphere**: turns an empty node on the Sphere Grid into an MP node (+15)
- **Power Distiller**: forces an enemy to drop Power Spheres
- **Power Sphere**: activates an HP node on Sphere Grid (colored orange on the grid)
- **Return Sphere**: returns you to any previously activated node on the Sphere Grid
- **Saving Distiller**: forces an enemy to drop Saving Spheres
- **Saving Sphere**: activates a Fortitude, Reflex, or Will node on Sphere Grid (colored cyan on the grid)
- **Score Sphere**: turns an empty node on the Sphere Grid into an Ability Score node (+1)
- **Skill Sphere**: turns an empty node on the Sphere Grid into a Skill Point node (+4)
- **Teleport Sphere**: teleports you to any activated node on the Sphere Grid, even if it was not activated by you
- **Warp Sphere**: teleports you to any node on the Sphere Grid, even if not activated
- **White Magic Sphere**: activates a White Magic node already activated by ally (colored green on the grid)

### Variant Ranges

The classes of *Final Fantasy X*, as they are presented here, have a finite range for their class features (usually about 30’). However, this range is impractically short at higher levels, not to mention boringly static. So this is a variant designed to remedy this. The monster statistics for *FFX d20* all use this variant, so as to better fit their CR level.

Use the tables below to determine the ranges for all of a character’s long-range (i.e. non-personal, non-touch-based) abilities. **Table 7-1** is for the base range; for creatures with class levels, use their HD instead of their CR. **Table 7-2** is a range modifier, based on size. If a creature’s size changes for some reason, their ability ranges should be changed accordingly. A creature’s ranged attacks cannot have a range of less than 10’.

## Spiran Equipment

The world of Spira has mostly the same weapons & forms of armor as those found on other worlds. There are swords, lances, & spears, as well as chainmail, helmets, & armor plating. However, the people of Spira have developed some unique gear not found elsewhere. This equipment is detailed below, & the statistics for each can be found in Table 8-1: Spiran Weapons as well as Table 8-2: Spiran Armor.

### Battle Doll

Battle dolls are magically-enhanced clockwork automatons originally developed by the Al Bhed. They are usually less than a foot tall, & they automatically return to their wielder after an attack, as if they had the Returning special ability applied to them. These dolls come in several varieties, usually shaped to look like some mythical Spiran creature, such as a cactuar, a moogle, or a cait sith. They are exotic weapons for anyone except the Al Bhed. They are favored by casters, who like to stay out of the thick of combat.

### Blitzball

A blitzball is a weaponized version of the titular game piece in the sport of Blitzball. It is usually a leather-covered orb (1" diameter), stuffed with hay or straw, & reinforced with various materials for increased durability & attack power. Most real blitzballs are covering in smooth bumps for improved hydrodynamic movement & grip, although the weapon version does not always have these. Blitzballs bounce off of their targets, so a character that is proficient with them can catch their ball after a successful hit. The chance of catching the ball is 75% within the first range increment, 50% within the second range increment, & 25% within the third range increment. Blitzballs are exotic weapons for anyone except Blitzers or characters who have levels in a Blitzball-related prestige class.

### Claw

A claw is a special kind of bracer that has one or more long blades affixed to the end. These blades extend 3"-12" beyond the wielder’s hand. Claws do not offer any armor protection, but the wielder of one cannot be disarmed. A creature wearing a claw can still use both hands to perform other actions, such as carrying items, opening locks, or casting spells. Donning or removing a claw takes 5 full rounds. They do not usually come in pairs. They are the favored weapons among bandits for their hands-free ease of use.

### Bangle

A bangle is a small charm that is hung from somewhere on a creature’s person. It can be worn on one’s ear (like an earring), on one’s clothing (like a brooch), or on another piece of jewelry. Bangles can be made of wood, stone,
or bone, but they are most commonly made of metal. They are always less than 1” in all dimensions. Like protective rings, bangles offer no armor class bonuses in & of themselves. However, they can be magically enhanced to provide protection to their wearers, like any normal form of armor. They are favored by caster, due to the fact that they have no chance of interfering with their spells.

Bracer

Also known as armguards or armlets, bracers are sheaths that are worn on the forearms of a creature to keep them safe from certain injuries. They are commonly made of leather, metal, or both. They were originally worn by archers to protect their arm from the bowstring to the arrow’s fletching. Bracers are usually about 1’ long, & they commonly have heavier protection for the upper side of the forearm than they do for the lower side. Some extend further up the arm to guard the elbow, & some extend lower to defend the wrist or even the back of the hand, although these variants are not very common. Bracers almost always come in pairs.

Ring, Protective

A protective ring is a metal band worn around the finger which is decorated with defensive runes. Like bangles, protective rings offer no armor class bonuses in & of themselves. However, they can be magically enhanced to provide protection to their wearers, like any normal form of armor. They are favored by caster, due to the fact that they have no chance of interfering with their spells.

Metamagic in Spira

In the world of Spira, magic works rather differently than in other fantasy worlds. Almost all classes are capable of performing feats of magic, & these magical abilities use magic points (MP). This radical shift in the way that magic works means that metamagic is largely inapplicable to Spiran “spells”. To address this issue, & to provide support for classes that primarily use magical effects (such as the Summoner & the Black Mage), here is a list of retooled metamagic feats for use in Final Fantasy X d20. Spiran classes should use these versions instead of the metamagic feats presented in Chapter 5 of the Player’s Handbook.

These metamagic feats apply to all spell-like class features, which are marked with a (Sp). These feats cannot be used to augment class features that are extraordinary (Ex) or supernatural (Su). Essentially, a metamagic feat can be applied to any class feature that requires magic points to be used. Some classes have more spell-like features than others, & therefore some classes will find metamagic feats more useful than others.

Empower Spell [Metamagic]
Benefit: All variable, numeric effects of an empowered spell are increased by one-half. Saving throws & opposed rolls are not affected, nor are spells without random variables. An empowered spell uses up magic points equal to the original MP cost × 3.

Enlarge Spell [Metamagic]
Benefit: You can double the range of a spell. An enlarged spell uses up magic points equal to the original MP cost × 2. Spells whose ranges are not defined by distance do not have increased ranges.

Extend Spell [Metamagic]
Benefit: An extended spell & its effects last twice as long as normal. A spell without a duration measured in rounds is not affected by this feat. An extended spell uses up magic points equal to the original MP cost × 2.

Heighten Spell [Metamagic]
Benefit: A heightened spell is cast as if the caster’s class level were one level higher than normal. Unlike other metamagic feats, Heighten Spell actually increases the effective class level of the spell’s caster. All effects dependent on class level (such as saving throw DCs & damage/healing output) are calculated according to the heightened level. The heightened spell uses up magic points equal to the original MP cost × 1.5.

Maximize Spell [Metamagic]
Benefit: All variable, numeric effects of a spell modified by this feat are maximized. Saving throws & opposed rolls are not affected, nor are spells without random variables. A maximized spell uses up magic points equal to the original MP cost × 4. An empowered, maximized spell gains the separate benefits of each feat: the maximum result plus one-half the normally rolled result.

Quicken Spell [Metamagic]
Benefit: Casting a quickened spell is a swift action. You can perform another action, even casting another spell, in the same round as you cast a quickened spell. You may cast only one quickened spell per round. A spell whose casting time is more than 1 full round action cannot be quickened. A quickened spell uses up magic points equal to the original MP cost × 5. Casting a quickened spell doesn’t provoke an attack of opportunity.

Silent Spell [Metamagic]
Benefit: A silent spell can be cast with no verbal components. Spells without verbal components are not affected. A silent spell uses up magic points equal to the original MP cost × 2. A caster that is afflicted with the Mute status (see Status Effects) can still cast a silent spell.

Still Spell [Metamagic]
Benefit: A stillled spell can be cast with no somatic components. Spells without somatic components are not affected. A stillled spell uses up magic points equal to the original MP cost × 2. A caster that is afflicted with the Petrified status (see Status Effects) can still cast a stillled spell.

Widen Spell [Metamagic]
Benefit: You can alter a burst, emanation, line, or spread shaped spell to increase its area. Any numeric measurements of the spell’s area are doubled. A widened spell uses up magic points equal to the original MP cost × 4. Spells that do not have an area of one of these four sorts are not affected by this feat.
