

GREAT OMEN

Fantastic story of our world by Saint-
Exupery(pseudinime)
june .24.2012.

In the year 1994 in southern Turkey, complex of circular temples was uncovered by German and Turkish scientists.

Oldest temple in the complex is around 12 000 year old and is oldest known man made construction in the world.

Temple predates so called Neolithic revolution, domestication of cattle and agriculture development that started our historical civilisation.

- Temples are made of T-shaped pillars, some of them 15 tons heavy and 5 meters high, arranged in circles, with walls.

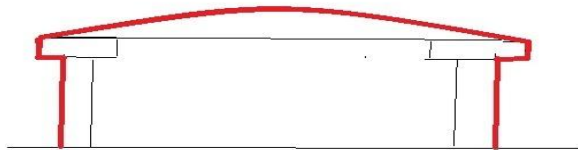

It was deliberately buried before start of our historical civilization

In 2012 Swedish team found mushroom shaped object in depth of 80 meter.

Its 60 meters circular object of unknown nature and origin.

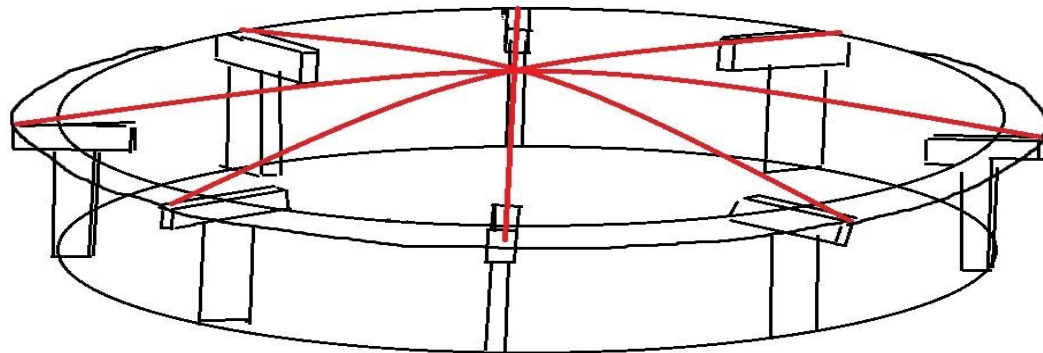

- In the light of this finding Gobekli tepe monument is reconsidered.
- Original shape of first of the temples in Gobekli Tepe(oldest is by the way most sophisticated)might have been mushroom as well.

Gobekli Tepe temple, Turkey 12 000 years old.

Decision to use T-shaped pillars resulted in Mushroom shape of the Temple.

- 
- 
- Because of this similarity, a connection between the two findings was assumed, and calipper analysis was made on the map.
 - Assumption is that it is some kind of a message, an "omen".
 - The key element of message obviously is circle.
 - So we take a compass and described circles over each of findings, with the radius of distance between two findings.

- 
- Even imprecise, since we don't know exact location of Baltic anomaly, this shows it could be a 3 or 4 component message from the past.
 - Third and fourth component of the message are possibly in Russia east of Ural mountains, and roughly in Spain .
 - Scientific community is called to investigate this theory and its claims
-
