### Panoramic Characteristic of Historic Buildings

1. Very old in style, old in colour
2. Low humidity and precipitation
3. Cold winter wind
4. Exposed outer space
5. Adjacent buildings
6. Flat and compact style
7. General floor height like natural ground level
8. Inward adjoined buildings
9. Compact neighbourhood

Traditional Courtyard House can be used to illustrate layout of the houses.

Windows & door → smaller than in built to provide protection or shield from outside heat.

### Physical

Layout

buildings  
Typeology

Different materials can be used to construct the building with brick, cob and faience as a texture of the building harmonized with the traditional features of the old fabric.

The Iranian Cultural Heritage Organization and Neighborhood Council will work about preservation of the historical materials.

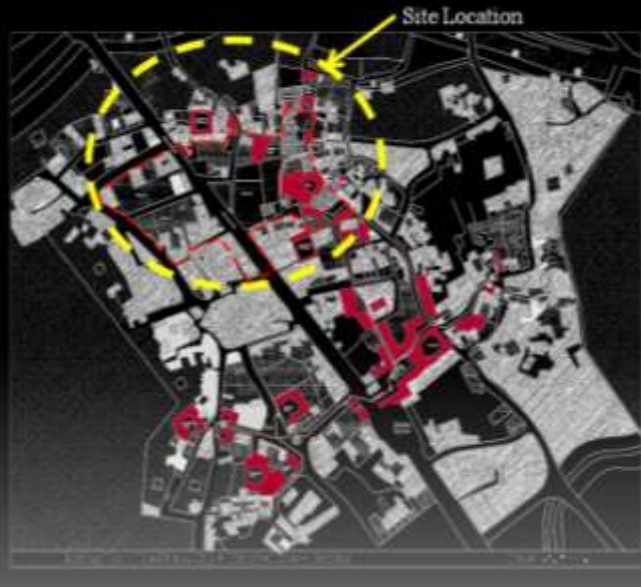

Comprehensive Plan and Historical Sites;

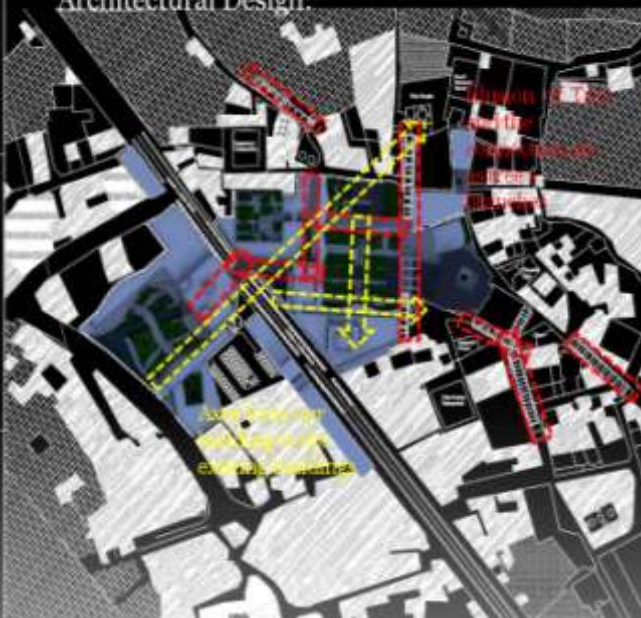

# Natanz Cultural Educational & Tourism Centre

Urban Design:

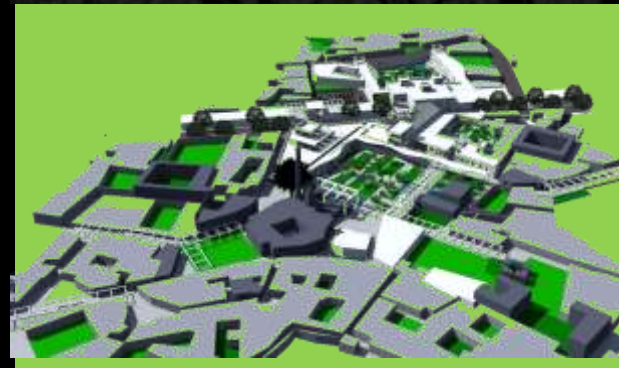

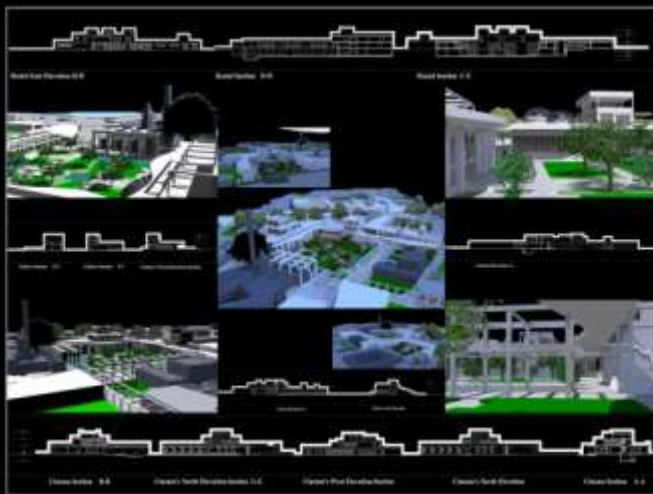

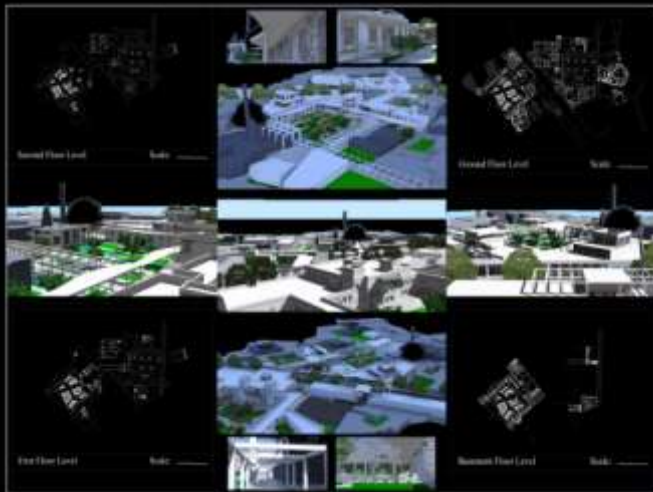

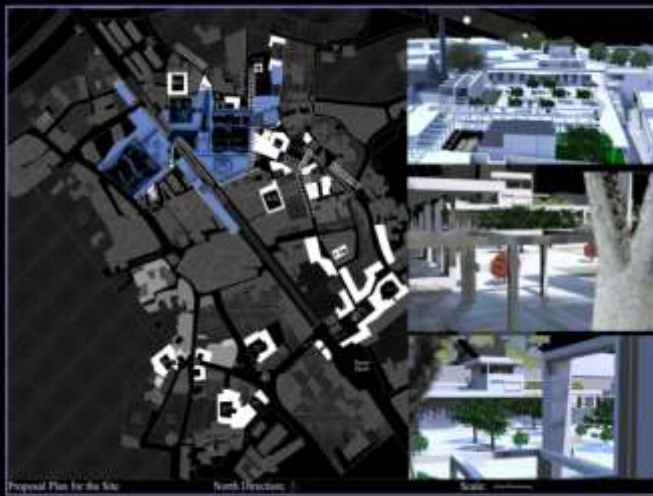

Architectural Design:

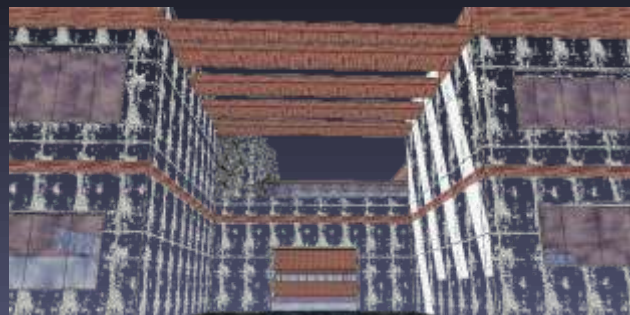

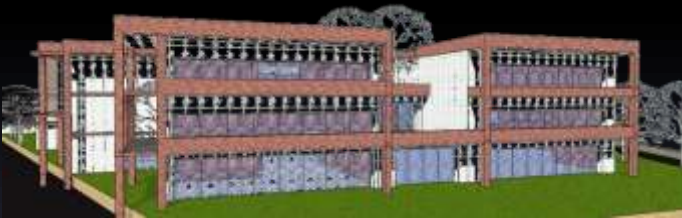

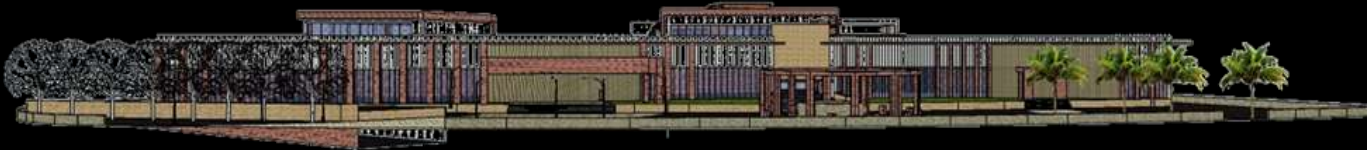

This project was an urban planning, urban design and architectural project, which I have done with the assistance of Natanz Municipality. The allocation, function and design of the project has been decided in respect to the needs and land use plan of the Natanz City. This project consists of a cinema, library, workshop, museum, gallery, a hostel and recreational facilities in the historical fabric of Natanz city. concept of the project is Persian Garden and its elements.
