MY BETTING HISTORY	15

INTRODUCTION

First of all **let me congratulate you** on being here.

That's the first step in becoming a winner. So well done. Now let's make you some profit...

The Every Day Profit system will give you the tools to independently pick winners that will turn your stake into clear profit.

It's time for you to join the elite group of sports investors, that don't hopelessly gamble and hope for the best.

Some people get too tempted by the possible big payouts and they end up losing chasing them.

Those type of people are what the bookmakers thrive off. LOSERS. You have to be clinical, calculated and quick if you want to become a WINNER.

The ability to keep the snarling wolf called greed from blowing down your house will make you a lot more money in the long run. Trust me.

The main rule of Every Day Profit betting system is:

DO STOP BETTING WHEN YOU HAVE MADE PROFIT

What people don't seem to see is the bigger picture. The secret to my success and to my system is that PROFIT is the ultimate key.

As long as you walk away with MORE money than you started with, you're a WINNER. Greed can lead to losing it ALL. So first things first, PROFIT triumphs all. As long as you're winning you should be happy. Consistent profit will have you booking holidays, buying new cars or clearing your debts. Hopelessly punting will lead you into more debt and sacrificing these luxuries.

Eager to get started? I bet you are, but please take the time to read through and understand the system properly before putting it into practice. **A little patience and time invested to read all the instructions carefully will pay dividends.**

EDP SYSTEM RULES

- We do bet on UK and Irish horse racing
- We do use Betfair exchange
- We do use staking plan
- Never hesitate or stray away from this strategy
- Do start betting from the very first race and never skip one, until you have made some profit
- Do stop betting when you have made profit

NOTE

High risk is a fundamental element of gambling, business and life, but so few people know how to handle it properly. The word risk means too many people stress, and possible loss. But risk also has a beneficial part, the chance of reaching a big win, of getting more than you have put in, where the benefit exceeds the downside.

Here are some general rules for betting success

- Never bet drunk (or under the weather in any way)
- Don't be swayed by so called experts
- Don't bet on emotion or on personal favourites. Do look for situations where others are being emotional.

EDP SYSTEM STRATEGY

Have you ever noticed, the laying horse racing services are not so popular like backing tipsters? What is the reason for it? Well horses do not comply to any rule book, they are just live, unpredictable animals and can easily let you and your money down. Only real way of making certain amount of income is to move away from the emotions of horse racing and take a logical approach.

Very rare I was watching live horse racing, most of time I stared into computer screen at what have I discovered:

The second and third from the top of a race card selection wins EVERY DAY!

The 2nd from the top of the race card selection wins at least 2 times throughout a day. I said, at least, because some days it wins up to 7-8 times. But, if we follow just with **2nd** from the top selection and bet every race we would finish day with a huge loss of money. It could win in the first race and before you catch the next **2nd** you'd loose all your profit you made before and much more.

The 3rd from the top of the race card selection finishes about 3-7 time during a day. The odds of the **3rd** from the top selection are greater rather on **2nd**. So, what shall we do? It is relevant to go with two selections, **2nd** and **3rd** and follow Every Day Profit rules.

DEFINITION OF 2ND & 3 RD SELECTIONS AT BETFAIR EXCHANGE MARKET

- We do use Betfair Exchange only due we place 2 win bets at one race card and it is available there. The selections are always the second and third in the list in the Betfair win market - regardless of price. You can chose to bet on either the current price that's available or on the Betfair starting price (BSP). As the system never requires each way bets or multiples, there's no need to bet in the place market or in the multiples section.
- You can see instantly who win the race, as the odds go blank (see Betfair Demo)

		 13		Lord Protector Richard Johnson
2nd from the top	➔	 6		Ballinahow Star Nick Scholfield
3rd from the top	➔	 11		Saroque Aidan Coleman
		 14		Bygones Sovereign Tom Bellamy
		 4		Chemistry Master Ryan Mahon
		 1		Hayjack Noel Fehily
		 8		Shannon Spirit Tom O'Brien
		 9		Henry King Jack Doyle
		 2		Watergate Bay Daryl Jacob
		 7		Xaarcet Mr M. Legg

BANKROLL

You`ve got to have 100 points as your starting bank. So, if your first stake is 10 there should be 1000 (£,\$, etc) available at your Betfair account.

STAKING PLAN

Example

First stake 20	starting bank 2000
First stake 50	starting bank 5000
First stake 80	starting bank 8000

Next bet you should increase your initial stake by +50% .

Example

- 1st stake 10+50% = 2nd stake 15
- 1st stake 20+50% = 2nd stake 30
- 1st stake 50+50% = 2nd stake 75
- 1st stake 80+50% = 2nd stake 120

Remember this difference (50%)

For the initial stake of 10 it is 5 only

For the initial stake of 20 it is 10 only

For the initial stake of 50 it is 25 only

For the initial stake of 80 it is 40 only

There after all your next stakes should be higher by this sum (50 % of initial stake)

Stakes on **BOTH** 2nd and 3rd from the top of a race card selection

1 st race	10 (5)	20 (10)	50 (25)	80 (40)
2 nd race	15	30	75	120
3 rd race	20	40	100	160
4 th race	25	50	125	200

etc if needed.

**WHEN ANY OF THE SELECTIONS WINS ONLY BET ON THE OTHER SELECTION
FOR THE NEXT 2 RACES.**

STRATEGY/EXAMPLES OF BETTING

EXAMPLE 1

2nd from the top selection

1 st race	stake	10 (20, 50, 80)	lost
2 nd race	stake	15 (30, 75, 120)	lost
3 rd race	stake	20 (40, 100, 160) 5/1	WIN bet
profit		100 (200,500,800)	
4 th race	no bet		
5 th race	no bet		

3rd from the top selection

stake	10 (20, 50, 80)	lost
stake	15 (30, 75, 120)	lost
stake	20 (40, 100, 160)	lost

stake	25 (50, 125, 200)	
stake	30 (75, 150, 240)	WIN 8/1bet
profit	240 (600, 1200, 1920)	

Totally spent

$2 \times 10 + 2 \times 15 + 20 + 25 =$	95	with initial stake of 10 for both selections
$2 \times 20 + 2 \times 30 + 40 + 50 =$	190	with initial stake of 20 for both selections
$2 \times 50 + 2 \times 75 + 100 + 125 =$	475	with initial stake of 50 for both selections
$2 \times 80 + 2 \times 120 + 160 + 200 =$	760	with initial stake of 80 for both selections

Profit

$100 + 240 = 340 - 95 =$	245	with initial stake of 10 for both selections
$200 + 600 = 800 - 190 =$	610	with initial stake of 20 for both selections
$500 + 1200 = 1700 - 475 =$	1225	with initial stake of 50 for both selections
$800 + 1920 = 2720 - 760 =$	1960	with initial stake of 80 for both selections

EXCEPTION:

We do place bet on 2nd from the top of the race card selection in a 3 runner race card even it won on the previous race

We place bets for both selections in a 4 runner race card even if one of them won on the previous race

DO BET JUST A FEW MINUTES BEFORE RACE OFF

- 1) Very often the race card selections get replaced and it could cost you fortune.
- 2) You've got to see the result of the race to place another bet, remember, we use staking plan.
- 3) Do skip next two races with selection that won, it is rare that it win next and sometimes I do lay them, but never miss a 3rd one and race cards with 3 runners (see EXCEPTION).
- 4) When you start betting again on selection that previously won use initial stake and staking plan.

EXAMPLE 2

2 nd from the top selection					3 rd from the top selection		
1 st	race	stake	20	lost	stake	20	lost
2 nd	race	stake	30	lost	stake	30	lost
3 rd	race	stake	40	lost	stake	40	lost
4 th	race	stake	50	WIN	stake	50	lost
5 th	race	no bet			stake	60	lost
6 th	race	no bet			stake	70	lost
7 th	race	stake	20	(INITIAL)	stake	80	lost
8 th	race	stake	30		stake	90	lost
9 th	race	stake	40	WIN	stake	100	lost
10 th	race	no bet			stake	110	WIN

DO STOP BETTING!

EXAMPLE 3

2nd from the top selection				3rd from the top selection			
1 st	race	stake	20	lost	stake	20	lost
2 nd	race	stake	30	lost	stake	30	lost
3 rd	race	stake	40	lost	stake	40	lost
4 th	race	stake	50	lost	stake	50	WIN
5 th	race	stake	60	lost	no bet		
6 th	race	stake	70	lost	stake	20	(INITIAL)
7 th	race	stake	80	lost	stake	30	WIN
8 th	race	stake	90	WIN	no bet		

DO STOP BETTING!

DO START BETTING WITH THE VERY FIRST RACE

Some days the first 2 races could give you more profit than betting all day.

EXAMPLE

1st race

2nd 100 WIN SP **WIN 199**

3rd 100 WIN SP (**Lose**) (100)

2nd race

3rd 150 WIN SP **WIN 580**

Sub total **profit 779**

STOP BETTING WHEN HAVE MADE 3 OR MORE POINTS PROFIT

This is **EDP** system so I would recommend you to stop betting when you have made **3 or more points** profit.. You could save your nerves, time and money.

1st race

2nd 100 WIN SP (**Lose**) 100

3rd 100 WIN SP **WIN 480**

sub total **profit 380**

STOP AND WALK AWAY

THE VERY FIRST RACE

If for example, you have made a small profit from The Very First Race:

EXAMPLE 2

1st race

2nd 100 WIN SP **WIN 204.**

3rd 100 WIN SP (**Lose**) 100

sub total **profit 104**

then you should carry on betting.

NEVER HESITATE OR STRAY AWAY WITH THIS STRATEGY

Never ever place a bet on any other selection even you are 100 % sure it will win. It is just a punters guessing and statistics state that this horse win the race. Once I picked a 240/1 winner, when the 1st from the top selection with odds of just 1.19 lost due jockey heavy fall. Don't forget they are not robots and nothing is guaranteed there. My stake was 125 and profit that day $240 \times 125 = 30\ 000!$ This happened in a 4 runners race card. I just blindly followed my system.

DO NOT BET DAY

Set up time between race cards 0:30 min
some meetings are abandoned

14:10 Ling
14:40 Ling
15:10 Ling
15:40 Ling
16:10 Ling
16:40 Ling
17:10 Ling

ALWAYS LOOK AT THE FIRST HOUR OF BETTING AT BETFAIR MARKET.

- As we normally profit in the first 1-1.5 hours of betting make sure you check the first hour race cards
- Some meetings are abandoned and race cards are half full

It is significantly reduce the chance of 3rd selection win the race when there are many non runners, particularly when there are **RACE CARDS WITH 8 OR LESS EXPECTED RUNNERS.**

- There will be some days when there the first races of the day will either have very large or very small numbers of runners.

Example

1 race	16 runners	race card
2 race	24 runners	race card
3 race	3 runners	race card
4 race	4 runners	race card
5 race	18 runners	race card
6 race	24 runners	race card
7 race	6 runners	race card
8 race	3 runners	race card

In this case, we would not bet.

- 2 or 3 races off at the same time for more then 2 times in a first hour of betting at Betfair market

2:00 Cork ; 2 :00 Hayd; 2:00 Yarm

2:40 Hunt; 2:40 Yarm.

3:40 Hayd ; 3:40 Yarm

DO BET DAY

Set up time between race cards 5 - 15 min

14:00 Curr
14:10 Ling
14:25 Winc
14:30 Curr
14:40 Ling
14:55 Winc
15:00 Curr
15:10 Ling
15:25 Winc
15:30 Curr
15:40 Ling
15:55 Winc
16:00 Curr

NOTE

- At days when races are only 5 min apart and there is not enough time to get the result of the previous race we do place bet at any way on the selection we go with or both regarding Rules and use staking plan

Example 1

2:00 2nd & 3rd (two stakes)

2:05 2nd & 3rd (two stakes 50 % higher, see staking plan)

Example 2

2:55 2nd only (a stake)

3:00 2nd only (a stake 50 % higher, see staking plan)

Remember! This should happen only if you haven't seen the result of the previous race or there is some delay because the race is 3 miles or more and takes longer than 5 minutes or because the race takes say 3 minutes to run and starts 3 minutes late.

- At days where 2 races off at the same time we do place similar stake (stakes) for 2 race cards.
- If there are only 2 race off at the same time in the first hour of betting it's ok.

Example

2:00 Ling

2nd 10

3rd 10

2:00 Cork

2nd 10

3rd 10

STOP LOSS POINT

- If after five races none of the selections have won, then take the loss and stop betting
- Do not bet for more than 2 and half hour

Do NOT quit during the losing runs!

Enjoy taking the risk either way because regardless of what the result, you will gain long term knowledge just by making the effort.

Most of us are very good at not taking silly risks, but we're extremely bad at taking wise risks. The most foolish mistake is to not take any risks at all.

The key to intelligent risk-taking is to look far enough forward. When considering financial and personal development, I do not just think a month forward or five years forward. I think across the period of my whole life-time. I ask myself, "What advantage might this give me over the period of the next several decades?" Over that timespan even small changes you might make this week can make large long-term advantages. Doing nothing is way, way more negative.

DO NOT INCREASE YOUR STAKE

- On the next day until you make your bank with 100 initial stakes.

If your bank was 1000 with initial stake 10 you can have 15 as initial bet only when your bank reaches $15 \times 100 = 1500$, $20 \times 100 = 2000$ with initial stake of 30×100 - your bank should be 3000 (£, \$ etc)

Do not be too greedy and it is better go slowly and gradually increase your bank, rather than lose your money. Some days you got to invest more than half of your starting bank before made any profit.

MY BETTING HISTORY

Look at my betting history.

This is a real existing punters community website.

I'm not allowed to advertise my nickname here, I have signed Terms&C before sign up there, but you can see all my bets and stakes. The site gives 1000 virtual money only to every punter and the minimum stake is 50. There was not possibility to place win bets on 2 selections like we do at Betfair exchange, which is a great possibility and I did it with e/w bet stake so profit could be much more if I could.

The site works like any bookmaker's website when profit (virtual at this site) comes on to your account.

Take attention there! I did increase my stakes only when my virtual bank reached needed level, which is 100 initial stakes.

So, I turned 1000 virtual money into 14839!

Nearly 1500 % profit in a just a month!

EDP system is really amazing and works well!

You can see there all, I have told you above:

a staking plan, 2 or just 1 bet at some race cards, remember, we skip next 2 races when 1 of selection won

(see **EXCEPTION**).

It is obvious from my betting history ,there is always BIG profit at the END of the betting day.

I would recomend you to stop at 3 or more points profit

TOMORROW IS ANOTHER DAY AND ANOTHER PROFIT!

Performance Summary 1 - 12 January 2013

Performance Summary					
Twelve Months Profit Sequence 					
January Level Stakes Profit (LSP)		26.07			
January Return On Investment (ROI)		31%			
January Strike Rate (SR)		26%
