

What to Look for in a Forge of Empires Hack Tool

Forge of Empires is one of the most widely played online strategy games today. If you're among those that love the game but having a hard time progressing and generating currency, you should download a Forge of Empires hack. But how do you choose which tool to get considering the fact that there are so many out there? If you're confused, here's a guide to help you find the best one.

Currency Generator

There are many [Forge of Empires cheats](#) and they have many features, but if there's one feature it must have it is a currency generator for gold and diamond. Gold is the primary currency in the game so it's the one you will mostly use. However it is better if you get a tool that can also produce unlimited amounts of diamond currency. Diamond is premium stuff and you'll find it useful in expansion packs and for buying different items.

The other thing you need to consider is ease of use. After all you're already spending a lot of time strategizing and don't have time to learn how this or that hacking tool works. The bottom line is, it doesn't matter how powerful the tool is if it's hard to figure out.

Is the Tool Safe to Use?

This is something that you really need to think about. While many hacking tools for the game exist, some of them are buggy and don't protect you from server bans, and unless the tool has an integrated proxy you will get banned from using the cheat. This isn't something that new gamers think of, but ban protection is something you really need to take into account. Also you should make sure the tool is compatible with your operating system.

Safety issues aside the hacking tool should also have an auto update feature. It's true you can update it manually but the process can be tedious and complicated. With an automated update you don't need to know [how to hack Forge of Empires](#) to keep the software up to date. In case you are wondering why it is vital to update your hacking tool, it is because the game is upgraded often too.

If you want to know more about Forge of Empires hack 2013 you can go to <http://roejan.com/forge-of-empires-hack/>. This website has a download link to a tool you can use to safely hack the game and without getting caught or banned.
