

SYNERGY

COLLECTION

Exploring the symbiotic evolution between man and urban space, the collection responds to the energy and exhilaration found in the everyday city landscape. Focused around the streets of London, the collection captures ideas of modern urban social theory and invites celebration of this synergy between man and space.

Exquisitely hand crafted swathes of silver wrap fluidly around contours of the body, offset with the vibrant colour of inlayed gemstones, enhanced with a subtle light achieved through a sheer translucency. This fine collection has been awarded several industry awards for craftsmanship, innovation and design.

JESSICA NOBLE
