

Chapter One. Introduction. The Problematic Relationship Between Anthropology and Archaeology on African Indigenous Healing

Outlining bias against material understandings of healing in African anthropology.....	8
Anthropologies sublimation of medicinal materiality and practice.....	10
Existing limits to archaeological investigation of medicine.....	12
Purpose of the research project.....	18
Theoretical framework.....	22
Succinct definition of archaeological ethnography.....	22
Archaeological ethnography as a theoretical space for fieldwork and analysis.....	23
The research context.....	25
From the village to the city: Ghana's rural migrants.....	25
Madina: The local area and people.....	26
The <i>zongo</i> as a West African urban phenomenon.....	29
Becoming Muslim, becoming Hausa.....	30
Research Methods.....	34
Theoretical frameworks structuring research design.....	34
Ethnographic approach.....	38
Trans-disciplinary practices.....	41
Analysis.....	42
Thesis structure outline.....	43

Chapter Two. Intellectual Context

Development of academic interest in African medicine.....	5
Early anthropology and African healing: Problems and limitations.....	6
Pre-colonial and colonial attitudes towards African medicine.....	7
Colonial legislation against indigenous practitioners.....	8
The roots of anthropologies of medicines in Africa.....	14
British social anthropology, structural functionalism and medico-religious practice in Africa.....	16
Early anthropologies of medicine in Ghana.....	18
Cultural anthropology, 'cultural logic' and emergence of medical anthropology.....	22
Contributions, limitations and themes of medical anthropology.....	27
Summarising the continuing silence on the materiality of healing in Africa.....	30
Archaeological studies of African medicine.....	32
Neglect of indigenous knowledge systems in African archaeology.....	33
The political dimension of archaeologies in Africa.....	36
Diaspora studies of African & African-American medicine.....	38
The recent wave of archaeological studies of African healing and medicine.....	44
Conclusion: A new direction in archaeologies of African medicine?.....	51

Chapter Three. Theoretical Frameworks

Introduction. Theoretical frameworks within which to move beyond identified limitations.....	6
Analogy.....	7
The dilemma of analogy.....	8
Theorising a better practice in use of analogy.....	11
The implications of ethnographic analogy in Africa.....	13
Ethnoarchaeology: Research strategy not theory.....	16
Ethnoarchaeology and the processual/post-processual split.....	18
Ethnoarchaeological research in sub-Saharan Africa.....	20
Post-processual moves beyond ethnoarchaeology.....	22
‘The Material-Culture Turn’ in anthropology.....	25
Ethnoarchaeology and the material turn.....	27
Contextual archaeology and post-processual discourse.....	29
Collapsing divisions through new theoretical approaches.....	31
Archaeological ethnography as theoretical framework.....	32
Defining the term ‘archaeological ethnography’.....	34
Trends in the (re)emergence of archaeological ethnography.....	34
Archaeological ethnography as theoretical and dialogical ‘space’.....	37
The key properties of archaeological ethnography.....	39
Archaeological ethnography in practice.....	41
Conclusion: Valorising ‘alternate archaeologies’.....	45

Chapter Four. Principles, Concepts, and Practices in Medina’s Heterogeneous Medical Culture

Introduction.....	6
Heterogeneity and syncretism in a <i>zongo</i> medical culture.....	7
Medicine of the ‘other’: The principle of healing from afar.....	10
The range of indigenous specialists in Medina <i>zongo</i> and their practices.....	12
Healers of the <i>zongo</i> : Herbalists and spiritualists.....	14
Medicine and well-being.....	16
Hausaised beliefs concerning body and soul, sickness and well-being.....	18
Healthful living and perceptions of causation.....	20
Islamic principles framing medicine in Medina.....	22
Indigenous principles framing medicine in Medina.....	25
<i>Lafia</i> : ‘Well-being’ and its transmission from healer to client.....	25
<i>Karfie</i> : Materiality, practice, and belief comprising ‘strong’ medicines.....	30
Key themes underlying the production of medicines with <i>karfie</i>	32
Beliefs in practice: Beyond medicinal substance.....	34
Distinctions between substance-based and spiritualist medicine: Visible and invisible causation.....	35
Perceptions of causation.....	37
Diagnosis, <i>gani</i> (‘spiritual seeing’), and divination.....	40
“Seeing” the ailment: Skilled practice in herbalist and spiritualist therapeutics.....	47
“When you deal with spirits you must always do so with open eyes.”.....	49
Comparison between ‘substance-based’ and ‘spiritual’ knowledge: Visibility & invisibility.....	51
“The right hand helps the left hand.” The inseparability of substance-based and spiritual knowledge.....	52

Chapter Five. Biographies of Practice: Contextualising Key Actors in Madina's Indigenous Medical Culture

Introduction.....	6
'Key actors': Sources and sounding boards.....	8
Case 1: Abdallah Ibrahim Salifu	11
"Siblings from the same parent." Plurality in a spiritualist's practice.....	15
Inheritance of knowledge: Temporal transference and retention of healing practices	21
Case 2: 'Baba' Yahaya Osmanu.....	25
"The spirits don't die." Baba Yahaya's inheritance.....	27
The grandfather's story.....	29
<i>Tambaya</i> ('to ask') and the centrality of consultation to practice.....	32
Case 3: Chief Adamu Zakaria	36
"The head and the legs..." Learning and experience in indigenous medicine.....	38
Case 4: Mallam Abdul Baki Mohammed.....	42
Travels across West Africa and regional differences in medicine.....	45
Islamic patterns of 'inclusive inheritance'.....	48
Case 5: The cousins, Yussif Issah Sandah and Ali Jibreel Sandah	51
The mosque and the forest: Syncretism between Islamic diagnosis and indigenous cures.....	56
Conclusion	59

Chapter Six. Workspaces, Material Assemblages, and Performances amongst Indigenous Practitioners in Madina

Introduction.....	8
Homes as bodies: Indigenous conceptions of Inner and Outer spatiality.....	10
Chief Adamu: Openly consulting domestic herbalist.....	14
Home as the centre of medicine production for domestic herbalists.....	17
The consulting platform (<i>dusi</i>)	18
Signifying a herbalist's role: Adamu's plants as material and symbolic resource.....	22
Abdallah: Itinerant <i>mai-junya</i>.....	27
Abdallah's therapeutic space.....	30
Abdallah's <i>dusi</i> : Tools of a <i>mai-junya</i>	35
Privacy and spiritual activities.....	39
Baba: Spirit mediator, witch finder.....	41
Baba's <i>ciki</i> , his Inner Core of practice.....	47
Protective devices: <i>Gilmen-daji</i> , 'the black crosses'	51
Omar the bone-setter.....	56
Omar's workspace.....	57
Tools of a <i>mad'ori</i>	61
Performance of a treatment process	66
Baki: Islamic <i>mallam</i> and future reader.....	70
<i>Itachi-rairai</i> , 'the Wood of the Sand'	73
Baki's bookshelf.....	76
'Speaking out of Shadow': Silhouetting in consultation performances.....	77
Yussif and Ali's compound	80
Reinterpreting Hausa medico-religious spaces in the past.....	84
Conclusion.....	88

Chapter Seven. Herbal Medicines amongst Indigenous Practitioners in Madina

Introduction. Context and approach to West African herbal medicines	8
The place of indigenous herbalism in West Africa	9
Materials and methods	13
Description of the study area	13
Herbalism in Madina and botanical research methods	16
Results and analysis	18
Medicinal plant diversity: The herbal substances of Madina	18
Purposes of herbal medicines	26
Significance of plant parts utilised	30
Preparation process and techniques	38
Routes of administration	48
Discussion and interpretation	51
Taboos, prohibitions, and archaeological implications	51
Curatorship of medico-religious species as archaeological indicator	53
Respect and secrecy: Pillars of indigenous herbalist practice and identity	55
Conclusion	58

Chapter Eight. Spiritual Therapies

Introduction	6
Symbolism and ritual in interpretations of indigenous medicine	7
A quantitative overview of spiritual medicine practices in Madina	11
Spirit entities in Madina	15
<i>Aljannu</i> , the 'dwarf spirits'	17
<i>Maita</i> , 'witchcraft'	19
Case study. Countering witches: Diagnosis and fighting like with like	20
Tools of the <i>Mallami</i>: Prophetic medicine and the Word of God as healing	23
<i>Tasbaa</i> prayer beads and attachment of beliefs to spiritual tools	28
The <i>allo</i> writing board and <i>rubutu</i> drinking medicine	31
Case study. <i>Rubutu</i> as 'medicine symbolic of Allah's power [to heal]'	35
The concept of <i>riguna na tsarki</i> ('holy robes') or spiritual identity in Islamic ritual performance	38
Merging beliefs: Syncretism between Islamic and indigenous cosmologies materialised in medicinal practices	44
Case study. The <i>tonnikari</i> or 'writing stone' as a material example of syncretism in Madina's medical culture	47
Tools of the <i>mai-junya</i>: Indigenous substance-based spiritual therapies	51
Inherited ritual knowledge, taboos, and requirements of the spirits	52
Medicinal substance-based beliefs in Madina's indigenous cosmologies	56
<i>Koria</i> , 'the spirit of the plant'	58
<i>Koria</i> belief in practice: Acquisition prohibitions and ritual performances	59
Skins, bones, beaks, claws, and horns	62
Animals in the medicine market and the medicine pot	67
Faunal medicines prepared via physical crafting and ritual empowerment	72
Perspectives on materiality, essence, and vitality	76
<i>Sambo</i>, the 'bad medicine'	78
Intrusive medicines: "The Binding and the Tying and the Piercing"	79
Case study. The <i>kalo</i> of 'Baba' Yahaya, "The combination makes it work."	83
Conclusion	87

Chapter Nine. Archaeological Implications

Introduction.....	4
Broadening historic perspectives on Gold Coast indigenous medicine	5
Relating indigenous medical culture in costal Ghana, past and present.....	6
Broadening interpretive perspectives on the Katamansu archaeological medicine shrine assemblage.....	9
Reflections on the Katamansu shrine from Madina's contemporary perspective..	18
Analytical protocols.....	21
<i>Petrography and provenance of rocks</i>	<i>22</i>
<i>Petrographic study of archaeological pot sherds</i>	<i>23</i>
<i>Archaeometallurgical study of iron objects.....</i>	<i>23</i>
<i>Medicinal earth samples – clays and soils.....</i>	<i>24</i>
<i>Organic geochemical analysis of medicine pots.....</i>	<i>25</i>
<i>Human and faunal remains.....</i>	<i>25</i>
<i>Palaeobotanical remains.....</i>	<i>26</i>
Analytical protocols conclusion.....	27
The Healer's Tools archaeological implications as an original contribution to research	29
Conclusion	31
