

MERCENARY AIR CORPS
ORGANISED AIR COMBAT

Introduction

MACW / ELME combined airwing is created by initiative of the outfit Mercenary Air Corps Woodman (MACW), a high skilled airborne outfit on Woodman. The MACW / ELME combined airwing aims to create a friendly mixed outfit environment. Our goal is to clear the skies of enemy planes and to support friendly ground troops with focussed bombardments, disable incoming enemy Galaxy drops and escort friendly Galaxy drops and/or ground units.

This combined airwing is a breeding ground and is primarily air-based; we are always looking for new Mosquito, Liberator and Galaxy pilots. So if you're looking for some diversity from the Infantry gameplay and make a fighting chance in the air, come join us!

What we offer

- A mixed-outfit airsquad full of pilots to fly with while maintaining your individuality and sense of outfit identity;
- Regular training to optimise our efficiency in the air (communication, usage loadouts, strategy, maneuvering, 1 on 1 dogfighting etc.);
 - Weekly airwing Ops night (every thursday 20.00 C.E.T.)
 - Fun and educational times with a bunch of cool people who share the love of flying;
- Airborne support for ground-based TR during alerts or in between them;
- Teamspeak 3 server channel for efficient communication (ts.eleb.eu -> channel= airwing)

What do we ask of you?

- Decent manners and a shred of common sense;
- Teamspeak 3 (working microphone optional but strongly recommended);
 - Able to work as a team, able to fly or ready to learn.

Sounds good! How do I Join?

Drop a comment below or come chat with us at our Teamspeak channel. You can also contact Philux, DrDogFighter or SatoTR ingame.
