

the cordless black decker

Mowing your frontyard with a cordless mower provides a chance for embracing earth-friendly ways, if you were looking for one. You don't need petrol for cutting the grass with the 36V, 19-inch Black & Decker SPCM1936 cordless mower, which touts a design that's at the top end of efficiency. This cordless lawn mower by Black & Decker has enough power to mow up to 1/3 acre of jome-site, depending on conditions, and can be set to your own mowing pace, with the variable speeds. The blade has been re-designed so as to cut better and for longer with an improved runtime. The Black & Decker SPCM1936 has a rust-resistant polymer cutting deck, which is light and makes for hassle-free cleaning. You can choose to mulch the cuttings, bag them or discharge them at the rear by just pressing a button.

You can mow when you want without upsetting the neighbors with the [SPCM1936](#) cordless lawn mower. Turn a key, press the start button and you're ready to mow, with the noise level way below that of gasoline lawn mowers. The cutting height can be set fast by pulling a single lever, which moves all four wheels at once. As it can be folded away and stored using minimal space, this mower has the advantage over traditional mowers if you don't have a spacious garage or shed. Then there's the air pollution caused by gasoline lawn mowers, the emissions of which, in conjunction with all other lawn equipment using gas, has been reported by the EPA as exceeding 1 million tons.

There are no damaging emissions from using the SPCM1936 cordless lawn mower in the least. You remove the rechargeable battery by simply lifting it out, and can speedily replace it with another one, if necessary, as when mowing a bigger lawn. The 36V battery charger basically plugs into the nearest accessible household outlet. It can save you money on your energy bill, because it is Energy Star-qualified for energy efficiency.

[engines for lawn mowers](#) What is nice about the Black & Decker SPCM1936 is its ergonomic design and its light weight. The cordless lawn mower is easy on the ears and and as far as driving it goes, anyone should find it easy. The self-propelled function is easy to use, as well as the height adjustment. The cordless mower is a snap to clean, and cuts the grass from an average size yard extremely well. Once you've unpacked it, your cordless lawn mower could be ready for its first mow in just little as five minutes. It is almost totally set up when it comes in the package,

and the battery merely takes several minutes to be fully charged.

[kawasaki small engines](#) The disadvantages of the SPCM1936 cordless mower are a definite lack of power, and there are certain situations where the self propulsion doesn't go slow enough, and also the mower takes a little while to get up to full speed. The cutting function bale is possibly a little under-sprung, which could explain why occasionally the blade keeps on going after you've let go of the throttle. The charging port is clumsily positioned, so that to plug in the charging cord you must bend over. These issues all might be annoyances, but they are actually small for a lawn mower that is so good for the environment.
