

ALBUM REVIEW

THE NEIGHBORHOOD / I LOVE YOU / 2013 [INDI ROCK, INDI POP, TRIP HOP]

THE NEIGHBOURHOOD MUSIC STYLE

Who is the NBHD?", you ask. The answer is, "Young, but famous". What are they famous for? Individual look and music style. Unique, metallic and cold but soft tunes. Simultaneously complex and simple sound. These inconsistent things are connected together, making the deep and grey gulf, named indi rock.

Three singles were officially announced in the "I love you" album, it can be said without any exaggerating that every track is a single. Album is excellent and has many black mood sides. Although, some slips should be made here, if you you're easy-going and simple music freak, for example, pop or house music, this is obviously not for you. Songs are complex and simple simultaneously. Somebody would ask, "How can it be possible?". Answer is here: high-quality music with complicated sounding and delicate music, these elements make an ideal and simple composition: constant . We can see such album here.

What is the picture forming in the mind during the listening? Mixture of grey, black and white colors, one of them dominates from time to time in the mind, relaxing melancholy in the pure form.

Grey album cover, obviously it was chosen not by chance, but don't judge the book by its cover! This fact can be considered as thought-over step. Grotesque, melancholy mixed with lyrics which are full of sense. About sense. The same lyrics can be felt in different ways, depending on situation and mood, but all the same, there was a feeling of some kind of black or grey inflection again and again. Depressive and dark but at the same time relaxing tunes, you will be momentary inspired with grey sound of the Neighbourhood. Feel

AFRAID

It seems that all tracks were produced so perfectly that some defects certainly must be there but there is no this thing here. This album makes all things to be crazy about it. "I love you" is a result of awesome work, combination of several genres which gives us absolutely new music genre and break the rules. Trip hop plus indie rock and we get pop music in the final. Former underground music has become popular in a flash.

To finish with, it should be noticed that album gives bright emotions and sexuality in spite of talking about melancholy and black color. Melancholy can be pleasant. This album is the best proof.
