

This is the actual Food Search and Add Menu (in German language). Underlined you have the possibility to add your saved meals and recipes, that is great! And I love, that you can add your recent meals again!

But I think it would be even better, if you replace the „recipes“ button by an „Favorites“ button.

Maybe like this.

I imagine, that you can find all your saved Meals (no recent stuff) and your saved recipe servings in here. (It would be helpful if there are different icons for meals or recipes).

And (!)

You find here your self-created Foods

And (!)

You can mark Foods from public Database as „Favorite“ and find the items in here.

Concerning to this Feature Request, it would be helpful to dis- or enable the favorite Function directly in **every** „Food adding Menu“. As you see here.

Additionally it would be helpful to have an overview of all Favorites under Settings. Like this:
