Electronic weighbridge manufacturer, electronic weighbridge exporter, fully electronic weighbridge exporter, fully electronic weighbridge manufacturer, pit type and pit less weighbridge, rcc and modular weighbridge, mobile and mechanical, axle weighbridge, axle weigh pad, India, South Africa, Kenya, Bangladesh

Eagle Scales are manufacturer and exporter of Fully Electronic weighbridge, Electronic weighing scale, pit type, pit less, Mechanical, mobile, movable, portable, axle, unattended, modular, unmanned, Foundationless, road in motion, rail in motion, Road Transport, load cell, Movable Truck Scale, India

What is Eagle?

At the outset we would like to introduce ourselves as [EAGLE SCALE MANUFACTURING WORKS](#), which started operations in SINCE 1974 Industrial Weigh Bridge, Weighing Systems, Laboratory Balance, Small Scale & Platform Scale etc.

We have ISO 9001 – 2008 certified manufacturing Unit at Ahmedabad, Gujarat, India. We are manufacturing all types of [Weigh Bridges & Weighing scales](#) under the brand name “FLYING EAGLE” Since 1974. We also provide ISO certified products with OIML/ NTPE standards. All of our products are also having CE certification. ‘EAGLE’ is having its state-of-art manufacturing unit at Ahmedabad, Gujarat, India with full fledge manufacturing facility. ‘EAGLE’ is having capacity and enough man power to cater the manufacturing of weighbridge as per customer’s requirement. It is having the base of more than 12,000 satisfied clients in INDIA and Abroad.

All products offer a complete customized solutions with the basic individual requirements standardized. We offer the most advanced technology to the market at extremely

competitive prices. Our emphasis has been on application of **Load Cell technology** and Process Instrumentation to address various process problems which are so typical as well as rare for every industry. Our relentless efforts in this direction have earned us expertise in these areas.

Service Department is headed by the All India Technical Services Manager, supported by two Asst. Service Managers. There is team of Installation and Maintenance Engineers fully equipped to attend to any kind of problem. We are making sincere efforts to keep our services ON for 24 hours, 7 days a week, and 365 days a year.

All of our products offer an on-line documentation with easy computer compatibility. Also the software provided for the automation is programmed within wide range of packages to make it compatible with the current working system of the user organization. The back-end used gives an easy storage and manipulation of the database whereas the front-end provides attractive screens for Graphical User Interface to enter and control various parameters.
