

Invited by Dr. Anastacio Rufon of Batch 11, the resident members joined another circumcision drive held at Bacolod City National High School on April 12, 2014.

A number of medical students from the College of Medicine West Visayas State University who lived in Negros Occidental also participated in the said event.

A team of health care providers and military officers assisted in the surgical mission. Dr. Juvy Causing-Francisco of Batch 12 also donated some surgical and medical supplies that will be used in succeeding missions.

Together with the surgical mission, a medical mission was held in another location within the same school organized by the Bacolod Lion's Club.

The next surgical mission will be held on April 21, with more missions scheduled until April 26 in different localities across Negros Occidental. For interested medical students and doctors who want to join, please contact GLA Angeli Nicole Portigo at 09285024601 or JMA Argee Alonsabe at 09222900634 for
