- Products can display the USDA organic seal

Natural

- Products produced without artificial colors, flavors, or preservatives

Created, flavored and colored by nature,

Wild Harvest natural and organic products are free from all that is artificial

ORGANIFY YOUR WORLD

wild things to do:

Wild Harvest® Organic & Natural products are created to bring you and your family wholesome and nutritious foods with environmental responsibility. We work with farmers and manufacturers who share our values and our commitment to environmental stewardship of our planet and the well-being of the consumer.

#1 leave the toxins, take the taste
Soil fed with organic matter produces healthy plants that make nourishing, nutrient-rich food. Naturally, flavor would follow!

#2 save the planet
Organic foods help sustain small and safeguard the environment, protect the earth's soil, and preserve water quality.

#3 protect the next generation
Growing bodies are susceptible to pollutants. We'll keep unpronounceable ingredients out of our food and away from your family.

#4 order a safe plate: hold the 'cides
Organic Farming means moving away from synthetic pesticides and herbicides and toward natural farming practices more compatible with sustainable agriculture and land stewardship.
