

zodiac planets and their meaning

Planets in the Zodiac mean something different from what Astronomers explain them to be. Before telescopes were created, the ancient Greeks only counted five planets which had been visible to the naked eye Mercury, Mars, Venus, Jupiter and Saturn and actually excluded our planet. The definition was later expanded during the medieval era to include other planets, such as, the Sun and the Moon to make a total of 7 planets. Traditional astrologers believed that the planets represent the basic drive of each and every individual with the Sun, the Moon, Mars, Mercury and Venus deemed the "personal" planets with Jupiter and Saturn being perceived as the "social" planets.
