

THREAT MANAGEMENT

Maclear eGRC Suite™

An Efficient Standardized Investigation Process to Manage Threat

Overview

Maclear's Threat Management solution is specifically designed to address the organization level global security threats. With the capability to interface to any 3rd party system of record for threat and vulnerability data using custom APIs, the threat management solution notifies and enables responsible personnel to address emerging threats.

An organization of any size and function type can be susceptible to system attacks such as data thefts and security breaches. Maclear's Threat Management Solution consolidates the threat information, alerts and notifies instances of emerging threats and provides real-time dashboard reports.

Customized data-connectors bring vulnerability intelligence from vendors which can be mapped to devices as determined by the scans. These identified devices can be further mapped to patching information provided by third party companies and remediation assigned to responsible personnel via tasks.

Maclear's Threat Management solution delivers a single platform for system and enterprise security which is designed to be comprehensive yet easy - to - manage.

Vulnerabilities and patching information can be used to calculate the residual risk for a business process or unit while task records can be used to provide audit with assurance that monitoring and management of threats are under control.

Key Benefits

Integration

- Vulnerabilities and patch information is integrated in the system to assist risk management
- Tracks associated risks and actions

Risk value

- Aggregate risk values of vulnerabilities for a business process or unit

Mitigation

- Easily prioritize the scope of mitigation work based on severities

Module at a Glance

- ✓ Understanding, mitigating and addressing the global security threats to the organization
- ✓ Custom APIs help in managing the capability of the 3rd party system
- ✓ Bring in intelligence of vendors to map the vulnerabilities and scanned data
- ✓ Easily prioritize the scope of mitigation work based on severities of the threats
- ✓ Identify and categorize vulnerabilities for a business process or unit
- ✓ Mapped to patching information provided from third party companies

Applications

Vulnerability

- Uses data-connectors to bring in scanned data relating to vulnerabilities
- Ranks vulnerabilities using severity and CVS scores

Patch

- Connects to 3rd party providers of patch data
- Maps patches to the associated vulnerabilities

Tasks

- Assigns and monitors key actions to be completed in mitigating the vulnerabilities

High Impact and Low Cost Model

- SaaS based solution – Remote Access and No Hardware Costs
- WYSIWYG functionality- Drag and Drop features ensure that no prior coding knowledge is required for customization
- Easy learning curve- Intuitive user interface ensuring quick take up and minimal training requirement
- Enterprise level rapid implementation- Data importing in minutes via Import Utility and APIs

Reporting Dashboards and Access Management

- Customizable access management by User(s), Roles, Records and Section
- Dynamic and Real time reporting dashboards with advanced business intelligence, analytics and drill-down capability customized to each user's needs
- Effective for senior management for decision making

About Maclear

Maclear specializes in enterprise governance, risk and compliance (eGRC) solutions. Our core capabilities cover roadmap design, solutions scoping, design & implementation, training & awareness and solutions support. Our integrated holistic approach to eGRC helps drive efficiency, effectiveness and agility for our clients by minimizing risk and compliance threats, enabling process improvement, fostering collaboration and facilitating automation.

Our client base spans industries including banking, financial services, insurance, healthcare, retail, manufacturing, education and energy. As a fast-growing company, we have earned a reputation of delivering exceptional value to our clients through delivery of eGRC solutions and services at affordable prices.
