Picks up dirt, grease & moisture

Leaving the surface clean & dry

Terry Microfiber Cloths

Microfiber Cloths - 16" x 16" & 12" x 12

Terry **300 gsm & 230 gsm**, 80/20 Blend

Product Code: AP-1616

Product Code: AP-1212

Colors Available:

Black, Pink, Blue, Green, Yellow, Red, Gray,
Purple, Orange, Navy Blue & White

Please specify the **Product Code, Size & Color** When Ordering

Order Quantity is Per Dozen Cloths.

Our Microfiber cloths are produced in an 80% poly/20% nylon blend. The durability of these terry microfiber cloths is incredible and they will hold up to 300-500 launderings depending on the use conditions of the cloths. Our cloths have a plush surface pile which makes them the best cloths for dusting, general cleaning and absorbency. For green cleaning comparisons microfiber cloths are more energy efficient to process, more bacteria resistant, 10-50 times more durable than cotton blended products and perform perfectly with only water, no chemicals needed.

Terry Microfiber Cloths

Microfiber Cloths - 12" x 12" Terry **300 gsm**, 80/20 Blend

Product Code: AP-1212

Microfiber Cloths

Microfiber Cloths - 16" x 16" Slick Glass Cloths

Product Code: 1616-SLG-Blue

Colors Available:

Blue

Please specify the **Product Code** When Ordering

Order Quantity is Per Dozen Cloths.

We offer our microfiber glass cleaning cloth developed and used by millions of people for glass cleaning applications. These cloths leave glass perfectly spotless, speck less and streak free. Many people use terry microfiber cloths to clean glass and find they leave tiny specs of microfiber filament that have broken off onto the glass due to surface friction. This tightly woven microfiber yarn that looks and feels like silk will eliminate these fiber specs. Use with water only, no chemicals needed. This cloth is available in Blue and is a 16" x 16" size cloth.

Microfiber Pads - 18" & 24" Hospital Wet/Dry Velcro Pad

Product Code for 18" Pads: 18HOSPW
Product Code for 24" Pads: 24HOSPW

Colors Available:
Blue, Green, Yellow, Red

Please specify the **Product Code & Color** When Ordering

We offer these twisted loop pile microfiber wet/dry cleaning pads which are produced with an 80% poly/20% nylon microfiber blend. They will hold up to hundreds of launderings. The pad contains a center sponge for increased water storage and the twisted loop pile surface yarn reduces surface friction making it easier to use. Available in four colors of color coded binding for systems designed to reduce cross contamination.

High quality Velcro top for a secure hold to the pad holder.

Micro-Fiber Flexible Fluffy Duster

Flexible Fluffy Duster 7" x 21"

Product Code: MF-FLDSTR 7X21

Colors Available:
Blue

Please specify the **Product Code** When Ordering

Our Flexible Fluffy Duster features microfiber material that's an 80/20 blend of polyester and polyamide. The microfiber material is attached to a flexible wire spine. The positively charged microfibers act as a magnet to attract and hold negatively charged dust particles. The hand grip is female threaded, It's a one piece duster that is not machine washable, however it can be rinsed out and used over and over again.

Microfiber Hand Mitts

Product Code: MF-YLMITT

Colors Available:
Blue, Green, Yellow

Please specify the **Product Code & Color** When Ordering

P.M. Specialty Services offers two types of high quality microfiber hand mitts to choose from.

Both of these hand mitt types can be used to clean any type of surface and make cleaning easier and faster because the hand mitts pick up and hold soil to be carried away rather than pushing it around. Both types of mitts are machine washable. The microfiber terry mitts are produced with the same material as our 300gsm microfiber terry cloths. The terry mitts are available in 3 popular colors. Our orange mitt is produced from a high quality chenille microfiber fabric with extended lengths for deep cleaning odd shaped surfaces.

Microfiber Wet Mops

Conventional Style Wet Mops

Product Code: TWM-Medium 1.25" Band

Product Code: TWM-Large 1.25" Band

Product Code: TWM-Medium 5" Band

Product Code: TWM-Large 5" Band

Colors Available:

White, Blue, Green, Orange

Please specify the **Product Code & Color** When Ordering

Our industrial microfiber looped-end wet mops are produced with a woven terry type of microfiber fabric that is sewn into approximately 1" tubes and then into the wet mop. 80% poly/20% nylon blend of microfiber filament. These mops will hold up to 8 times their weight in water and are sold in two sizes. Microfiber wet mops are energy efficient to process, bacteria resistant and do not need to be used with any chemicals to provide excellent cleaning of any type of flooring. This type of mop was originally developed for anti-slip flooring because the woven fabrics will not lint and anti-slip flooring shreds traditional blended types of mops. These mops are offered in 4 colors for color coding systems.

Microfiber Mop Frame 9”

Aluminum Frame Product Code: WM9FR

Our 9” Microfiber Mop Frame is an aluminum mop frame with a unique shape that allows it to easily be pushed into corners. The mop frame features two rows of hook and loop Velcro ® type material that firmly grips our microfiber mops. The frame also features high impact hardware that attaches to our Medium Duty Telescoping Handle. The hardware allows the frame to swivel 360 degrees or lock in place to prevent swiveling.

Microfiber Wall Mop Pads 9”

Product Code: WMPD

*P.M. Specialty Services Microfiber Wall Pads are great for cleaning walls, ceilings, restrooms, or any other hard to reach area. **These microfiber mop pads are preferred by housekeeping professionals for cleaning hotel guest rooms.** They can also be used in healthcare applications in patient rooms that are crowded with furniture and equipment. The smaller size of the microfiber wall wash mop pad makes them ideal for cleaning areas like walls and ceilings which put the user in awkward positions. A larger pad would be much harder to move across a wall or ceiling since the microfibers actually grab the surface it's cleaning. This makes the microfiber wall wash mop pad great for disinfecting an entire patient room in a hospital.*

Ribbed Microfiber Bar Mops

250 gsm 17" x 20" bar mops

Product Code: RMBM-17x20

NEVER use it around heat such as on grills or as a pot holder.

Ribbed Microfiber Bar Mops are great for restaurant, bar and kitchen use. These ribbed bar towels work well for scrubbing as well as drying. These towels have a green center stripe for quick identification. They feature overlock stitching on the border to prevent fraying and to make them last hundreds of washings when cared for properly.

Microfiber Carpet Cleaning Bonnets

**Product Code:
MCSLDR-Blue**

**Product Code:
MCASSN-Gray**

Sizes Available:
13" • 15" • 17" • 19" • 21"

Please specify the **Product Code & Size** When Ordering

We offers two high performing microfiber carpet cleaning bonnets produced from the same fabrics as our top performing microfiber wet/dry cleaning pads. Our Micro-Slider bonnet for less abrasion and the gray Micro- assassin bonnet with scrubbing strips for more abrasion. Both styles include a center sponge to increase absorption capacity. These carpet cleaning bonnets are produced with an 80% poly/20% nylon microfiber yarn they will not shed or lint, like traditional cotton and rayon blended bonnets. These carpet bonnets will also hide soil re-deposition so that they look newer longer. They are machine washable. Both styles mount easily to any standard low speed rotary floor machine.

Microfiber Gray Scrubbing Wet Pad

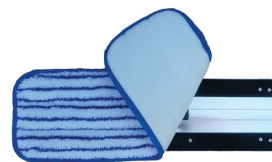

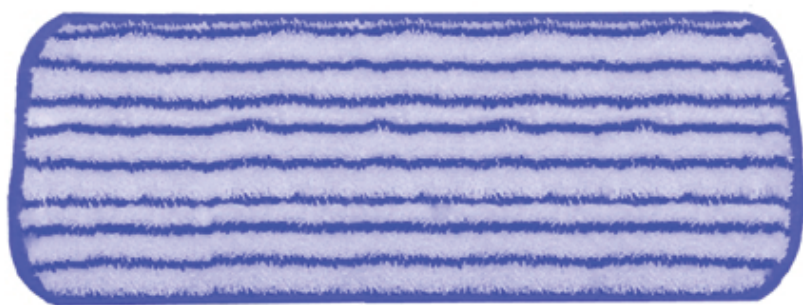

Product Code: MFSCPAD-18 or MFSCPAD-24

Please specify the **Product Code** When Ordering

Our gray twisted loop pile microfiber wet mopping pad which contains polypropylene bristle lines to increase surface abrasion without increasing surface tension. The surface abrasion allows for better wet mopping without increasing surface tension and allows for less fatigue in use. These pads contain a high quality Velcro top for a secure hold to the pad holder. Gray color hides stains allowing the pad to look new throughout its life. These pads are durable and designed to hold up to hundreds of launderings.

Floor Finish Applicator Pad

Product Code: MFFA-18 or MFFA-24

Please specify the **Product Code** When Ordering

We offer high quality microfiber finishing wax applicator pads designed to lay floor finish smooth and evenly without the fatigue associated with conventional floor finish mops. They are a low profile pad that allows edging along base boards. Smoothness of these pads makes every finishing job easy, fast and clean. These pads are produced with a soft polyester fiber and will not lint. These pads are durable and designed to hold up to hundreds of launderings. High quality Velcro top is designed for a secure hold to the pad holder.

Aluminum Hardware For Microfiber Velcro Pads-All Sizes

360° Rotating Arm

Product Code:

HDBF-18 or HDBF-24 or HDBF-36 or HDBF-48

Please specify the **Product Code** When Ordering

Aluminum Microfiber Hardware Extension Handle 70"

Product Code: HDH-70

Our durable extruded aluminum flat frame bases and a strong extension handle to use with the microfiber Hook & Loop cleaning pads. 39" long when collapsed and approximately 70" long when extended. Our handle utilizes a twist to lock/unlock method. Aluminum bases are approximately 5" wide. The Velcro is double secured with both glue and rivets making it more reliable. Handles attach easily to bases using a plastic universal twist on coupler. 16" units are used with 18" pads to allow for overhang. 24", 36", and 48" units achieve overhang with longer pads than the actual size.

WASHING MICROFIBER

Microfiber towels, mops and dusters can last hundreds of washings when cared for properly.

There are two very important things to remember about caring for microfiber:

1. **Keep them away from heat**, this means don't dry them in your dryer under high heat.
 2. **Don't use fabric softeners or detergents with fabric softeners.**
- To ensure the long life of your microfiber please follow these guidelines.

Machine Washing Microfiber:

Wash in warm or hot water with mild detergent. Do not use fabric softener, it will clog the open spaces in the microfiber that do the cleaning rendering the towel or mop useless.

Microfiber tends to grab a hold of lint in the wash just like it grabs dirt and dust when you're using it to clean. With this in mind be careful of what you wash microfiber with. Avoid washing it with anything made of cotton especially terry cloth towels, socks etc.

Ideally you should wash microfiber only with other microfiber, but if you need to mix loads wash it with other non-linting synthetic materials.

Hand Washing Microfiber:

Wash in hot water with mild detergent, use a soft bristled brush if necessary. Rinse thoroughly.

Drying Microfiber:

Air drying microfiber will make it last the longest. Microfiber dries relatively quickly. If you choose to dry your microfiber in a dryer do so on low heat or no heat and only dry with other microfiber products to prevent the mops or towels from picking up lint.

Microfiber will grab a hold of any lint given off by other items in your dryer if they are dried with anything else that lint's.

Commercial Laundering Instructions for Microfiber:

The following are the instructions and wash formula that will assure maximum performance and longevity.

Detergent: High solvent for heavy soil. No Alkaline. Dose determined by product specifications for poundage. No bleach, no fabric softener.

Commercial Drying Options:

Option 1: Tumble dry: Maximum temperature 140°. NOTE: Air Dry is preferred to double life.

Option 2 (Mops only): Inject disinfectant during final rinse and do not dry. Bag mops with twist tie, then transport. Disinfectant residual will reduce mildew growth prior to use.

Option 3 (Mops only): Do not dry mops, instead, place damp mops in buckets and dose with your chemical product. Within 1/2 hour all mops will be saturated and ready for use.
