Tips on how to Rip DVD for Google Nexus 3?

Step 1: demand a DVD converter

To play DVD on Nexus 3, you will need a DVD converter. Firstly, please download and install Blaze Video Magic (or Video Converter for Mac). On this powerful converter, it is possible to convert DVD movies and just about all video formats including DivX, XviD, MOV, rm, rmvb,

MPEG, VOB, DVD, WMV, AVI, FLV movie formats to 3GP, WMV, or MP4 ready for your cellphone. Additionally, it supports converting videos like YouTube, Google Video, MetaCafe and Japanese Nico Video to your mobile phone directly. What you need to do is simply to paste the Link to your selected online video for the program.

Step 2: Add DVD movies

Launch Blaze Video Magic and press **Open DVD** button to load DVD disc; or head over to menu **File > Open DVD Folder** to identify a DVD backup folder through your hard disk.

Step 3: Select video format for Nexus 3

Choose output profile "**Android os MPEG-4 Movie (*.mp4)**" inside profile drop-down list. And the suitable panel, you may want to change other options, like Video Codec, Video Bitrate, Audio Codec, Audio Bitrate, Audio Channel, Disable Audio, etc. Or only convert certain segment through the source DVD by defining the Start Some time and Stop Time. For further configuration details, such as select chapters, choose audio language, set specific length for output file, etc.

Step 4: Rip DVD for Nexus 3

Press **Encode** button, then Blaze Video Magic will start encoding your DVD movie into desired output format.

Step 5: Find output file

Once encoding is completed, head to left panel, click on the corresponding format label. Plus the center window, right click the converted file and select **Open File Location**, then you can check this video from the output folder from your hard disk.
