

Notes

- Black - Mainserver Leagues
Brown - Other server Leagues
Red - Frost Leagues
Green - Real-game League
Grey - Unknown/other type
Blue and Gold - Other notes
- This is judged on what type of League they were originally.
- Leagues which have changed type have their original Champion/leader in square brackets ([]) to denote the change in League and have a separate entry, if they switch types several times, each is only listed once with the first one being first, second being second, and third being third.
- Square brackets ([]) signify dead Leagues
- Dashed red lines indicate a merge of Leagues
- If this is the PDF version of the genealogy, you can click on some of the League names to go to their respective websites
- A League coming off another League signifies that the original founder of the new League was part of the old League last.
