

Organizer Activity (Local, National, Global)

- Students will be split into groups of 4-5.
- Each group of 4-5 will be given a piece of chart paper and markers as well as a natural hazard (e.g., earthquakes, hurricanes, landslides, etc.).

In each group students will be expected to complete 4 tasks:

1. Describe the characteristics of the natural hazard and some of the potential impacts the natural hazard may have on human activities.
2. Categorize the potential impact of the natural hazard as local, national, or global (may fit into more than 1 category).
3. Justify why you have chosen to categorize the natural hazard in local, national, or global (or more than one if applicable)
4. Groups will present their chart paper to the class. The chart paper will then be posted on the walls of the classroom for the remainder of the unit.
