

e cigarette starter kit is

Safe Cigs is a business constructed due to the fact that I chose to stop cigarette smoking after using E Cigarettes for a month, I was surprised by this innovation and figured I can help people stop smoking and make a little cash at the exact same time.

E cigarettes starter kits are a simple device that enables you to take in nicotine (if you so wish) without needing to breathe in the smoke and tar that you relate to regular smoking cigarettes, if you do not desire nicotine in the e liquids then you don't need to have it, you simply inhale the vapour.

[E Cigs](#) or E cigarettes been available in numerous different shapes, sizes and colours, E Liquids been available in countless different flavours.

When I decided I wished to stop smoking I thought of nicotine patches, nicotine gum and all the other smoking cessation items nevertheless I soon found out it had not been actually the nicotine that was the issue it was something to do with my hands every half hour or so, you see when my cigarette smoker buddies went outside for a smoke I stayed in, missing the conversation but likewise missing out on the smoking sensation ie. the inhaling, I didn't seem to be bothered about the nicotine.

I had seen E Cigarette starter kits promoted mainly in corner stores but never actually gave it much considered them, New Year came round and as regular I decided to quit smoking cigarettes yet again nevertheless this time I was offered an E Cigarette starter kit as a present so I thought I 'd provide it a shot.

The impacts were amazing, I did not miss out on cigarettes at all, this consisted of the expense of them, everytime we went outside for a smoke I switched my [E Cigarette](#) on and away I went, 10 mins later we returned in and lugged on drinking and socialising.

I awakened the following day with no yearnings whatsoever and this has actually been the very same considering that I began on the E Cigarettes.

There is a lot of speculation regarding whether these E Cigarettes or great for you or not, my opinion is and I'm no expert is that if your not inhaling burning tobacco and all the other ingredients into your lungs every 30 mins approximately and you do not utilize the nicotine varieties then it's a victory victory situation.

The US FDA has concluded that there is no evidence to reveal that E Cigarettes are damaging to your health, the worlds significant cigarette makers have actually now begun a relocate to E Cigarettes, do you think they would do this if they were dangerous, after all they offer cigarettes in there millions, which the FDA have concluded are harmful to you.

There are thousands and thousands of people selling these E Cigarettes around the world every

minute of the day and there are thousands and thousands of people stopping smoking cigarettes every minute of the day, not surprising that the big companies are investing millions into E Cigs, the evidence is in the pudding as they state, they it on your own, E Cigarettes begin at around or \$25 for an E Cigarette starter kit.
