

Marine Forecast for Southeast TX to West LA Coast

Issued: 1304 CST Monday, February 23, 2015

Discussion: A cold front will move southeastward across the Gulf of Mexico today. The front will stall late Monday across the far southern deepwater Texas and Louisiana leases. A wave of low pressure is then forecast to develop along this front late Tuesday and into Wednesday before exiting off to the east on Thursday. Winds will gradually veer to the east to southeast through this weekend as high pressure moves across the Southeastern U.S.

Note: All wind speeds are in **knots** 33 feet above sea-level. Wave heights are reported in **feet**

Valid: Monday, 23 February to Tuesday, 24 February				
Weather	Mostly cloudy with isolated showers.			
Time	Wind	Sea	Swell	Combined Waves
1200 CST	NE 19-24 G29	6-8 pd 6	E 2-4 pd 7	6-8 ocnl 11
