Non dry applications.

The food contact compliance for these applications was determined as recorded in the European Regulation 1935/2004. All tests are performed for room temperature applications* and are only valid for applications at this temperature.

The PP75 film was tested with the following simulants:

Simulant	Description	Tested

Dual Use Substances (Food additives) and/or SML-restrictions for PP75 film

PM REF N/CAS	SML in mg / kg food	Dual-use
95360	5	No
39090	1.2	No
38820	0.6	No
24550 & 89040	25 expressed as zinc	No
86240	NA	Yes

In the theoretical situation that the total amount of all the substances present in the film should migrate to the packed product (worst case scenario) the specific migration limits for these substances are not exceeded. Calculations are based on 6 dm² film which is according to Regulation (EU) 10/2011 the standard quantity to pack 1 kg food and on 100 µm film.
