VITAMIN D₃

Vitamin D, the 'Sunshine Vitamin' - an important factor in good health. It is an essential vitamin, especially throughout the colder, darker seasons of the year.

Best known for its roles in preventing rickets and maintaining proper levels of calcium in the blood. The 'Sunshine Vitamin' is generally acquired by the body in two ways - exposure to the sun's ultraviolet (UV) rays and dietary intake.

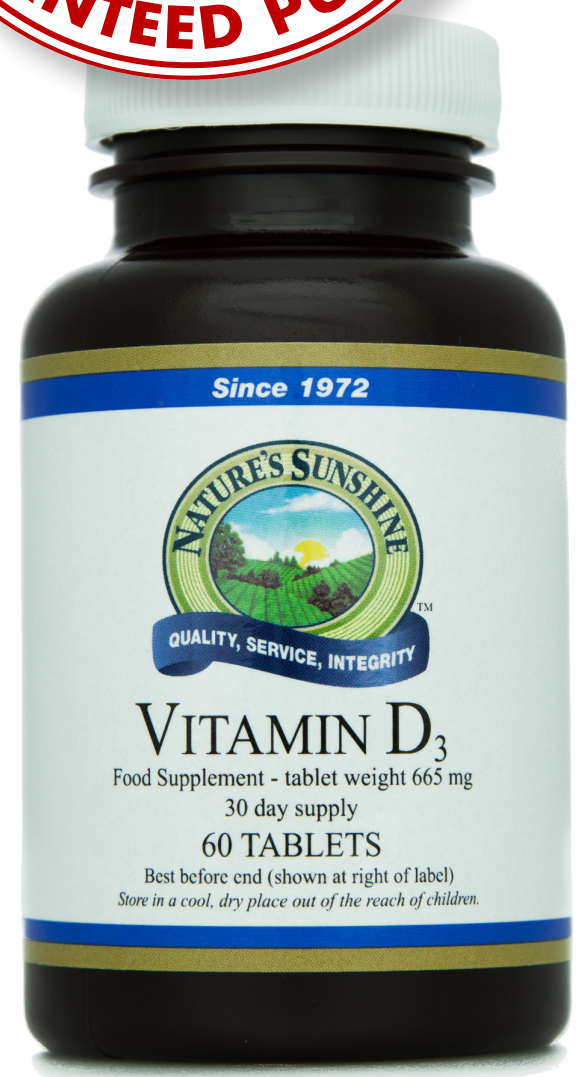

Vitamin D contributes to:

- Development and maintenance of bones and teeth
- Absorption and use of calcium and phosphorus
- Maintenance of normal muscle function
- Normal function of the immune system

Nature's Sunshine's Vitamin D₃ is expertly formulated, and manufactured to the highest standards using only the finest quality ingredients.

Each tablet contains 50mcg of Vitamin D₃ which is 1000% of the EC RDA.
