CARE, HANDLING & WARRANTY INFORMATION

10 YEAR NON PRO-RATED LIMITED WARRANTY ON SLEEP SETS

The warranty period is for ten years from the date of purchase and applies to defects in material or workmanship only in your Sears-O-Pedic mattress and/or foundation or boxspring (foundation or boxspring referred to as "foundation") Sears Canada Inc. will, at its option, repair or replace your mattress or foundation under the following conditions:

Items covered during normal wear:

MATTRESS:

- coils or wires that are loose or broken
- coils or wires that protrude or rip through the fabric
- body impressions greater than 2"
- sagging greater than 2"

FOUNDATION:

- splits in wood frame
- squeaks, rattles or noises not caused by or related to frame or headboard
- loose or broken foundation wire
- unstapling of modules

Items not covered:

- body impressions less than 2"
- sagging less than 2"
- comfort or firmness
- bent borderwire due to mishandling
- mattress handles
- sagging due to lack of centre support bedframe
- edge sagging unless otherwise specified
- replacement of both mattress and foundation if only one is defective
- covering fabric on mattress or foundation
- corner guards
- sleep set height
- sheet fit
- misuse, abuse or improper care.
- Centre Crowning in Queen and King size sleep sets with split foundations.

Note:

- **ALL warranty claims must be accompanied by the ORIGINAL bill of sale.**
- Staining or soiling of mattress or foundation will void this warranty.
- If only a mattress is purchased the warranty term will be 5 years.
- Warranty is void if sleep set is purchased for Commercial use.
- Repair or replacement does not extend this warranty or begin a new warranty.

HOW DO I CARE FOR MY NEW SLEEP SET?

1. BODY IMPRESSIONS are a natural occurrence

The resilient materials used in this mattress are designed to conform to your body's individual contours. This is not a structural or manufacturing defect. Centre crowning is a natural occurrence in queen and king size sets with split foundations.

2. FOUNDATION Use a matching Sears-O-Pedic

Do not use a foundation other than a matching one purchased with this mattress. It is the foundation that supports the entire mattress and a structurally inferior foundation can cause the mattress to collapse.

3. FRAME SUPPORT A centre support is required

Double and queen size sets require the use of a bedframe with a horizontal or vertical metal centre support.

4. MOVING Do not bend the mattress

Do not bend, fold or stand your inner-spring mattress as internal damage may result. Do not stand or jump on the mattress. It is not built for that kind of weight concentration. By carrying a mattress on it's side, it is less likely to get damaged. Should your mattress have handles, note that handles are to be used for positioning only. They are not designed for carrying or lifting.

FULL CYCLE ROTATION / TURNING INSTRUCTIONS

Body indentations are a normal occurrence in your new mattress and indicate that the upholstery layers are conforming to your body's individual contours. To help minimize body impressions, please turn your mattress every two weeks in the first three months; then once every two months thereafter. To ensure that your mattress is rotated properly, please follow the full cycle rotation below.

WARNING: DO NOT ATTEMPT TO TURN MATTRESS BY YOURSELF

This may cause personal injury or damage to your mattress. Handles should be used only to position the mattress. They may pull out if used to support the full weight of the mattress.

ROTATION 1

ROTATION 2

ROTATION 3

NON-FLIP MATTRESS CARE

This design of mattress does not have to be turned or flipped to maintain warranty protection. However, in an effort to fully maximize the comfort performance of the product, we suggest rotating the mattress every 2 months (as shown in "Rotation 1") to assist in equalizing the body impressions that will occur in a high-quality new mattress.

DO'S AND DON'TS OF BEDDING CARE

Do turn your mattress on a regular basis.

Do use a quilted protector pad to avoid stains; soilage will negate the warranty.

Do replace the foundation when purchasing a new mattress. An old foundation may not provide adequate support.

Do use an appropriate bed frame with centre support.

Do expect body impressions. These are normal and indicate your comfort layers are conforming to your body.

Do Not put a board between your mattress and foundation.

Do Not bend your mattress under any circumstances as this may damage your innerspring.

Do Not remove the law tag at the end of your mattress.

Do Not use dry cleaning fluid of any type on your mattress. These chemicals will damage some of the construction materials.

A Final Check:

1) Will your new sleep set fit in the door or stairway? Measure first.

2) Is the height of your sleep set acceptable for your headboard, night stand and other bedroom furniture?

3) Is a low profile frame or foundation required?

60 NIGHT COMFORT GUARANTEE

At Sears we recognize the importance of a good night's sleep. To help you accomplish this we recommend you take a minimum of 30 nights as an adjustment period for your body to get used to the comfort and support of your new sleep set. If after 30 nights and within 60 nights of your delivery you feel that your bed is not as comfortable as you expected, please let us know and we will be happy to arrange one selection exchange for you.
