

Worksite management, simplified.

Lightship is a management tool for industry – a map interface that shows the location and status of your people, assets and sensors. Take action in one click.

Communicate

In one click, contact 1 or 100s of workers on any communication device.

Manage

Quickly search for workers who have the necessary skills and equipment, assign them a task and monitor their progress.

Protect

Pre-plan incident responses and use historical review to evaluate past responses.

Monitor

Make better, faster decisions when you receive custom alerts from any sensor or use Lightship analytics and reports to optimize your people and assets.
