excited by the unfamiliar and driven by design.

I am an energetic, passionate and driven design professional. Interested in all things creative. With a background in product design and experience with user centric design I believe there is much to be learnt from understanding the different visual languages and mediums in which people choose to express themselves.

In today's highly connected societies there's a lot of white noise and I'm determined to be a part of that evolving process that sees design play an important role in ensuring a coherent and concise conversation can be heard.

As I've matured as a designer I've identified that my naturally friendly, inquisitive and highly empathic nature mixed with a passion for creative problem solving and putting smiles on faces, makes UX the design discipline I feel I was destined for.
