

I chose Health Information Management as my back up plan because I already have experience in the medical records field and it is my current profession. My first and only choice is Veterinary Technician, but if that for some reason does not work out, I will stay where I currently work. This is, however, a great option for anyone that wants to be in a secure, profitable, and interesting career that do not want to have direct patient contact. This career offers great job security, because everyone is going to need their records managed. A great bonus is that, for the most part, you can choose your schedule. In Chattanooga, there are multiple career opportunities including, but not limited to, Unum Insurance, Blue Cross Blue Shield, Erlanger, physician clinics, Veterinary clinics, and so much more. I would still have this as my back up plan because my current place of business is a great place to work, offers amazing benefits, and has many opportunities to advance my career. This is a great career to choose, I just feel that I am meant to help animals, anyway I can, and want to make that my career.
