**“HAARP Downburst” is my slang phrase for:  
“Man made high pressure (descending air) in the jet stream,  
caused by precision microwave heating of the “D” layer  
in the ionosphere”. (Later, I will give a new name for this effect.)**

**HAARP Roll Clouds are caused by the horizontal spreading of the downburst.**

**As the descending air hits the more dense layers in the cloud tops, it spreads out radially, forming roll clouds at the leading edge.**

**It is like a rolling pin on a baker's table, but the air spins in the opposite direction from a rolling pin.**

**Roll clouds are common around collapsing thunderstorms, but NEVER occur multiple times, in a row, IF they are natural.**

**The dry air rings are most often seen on water vapor satellite images (but only if NOAA makes a mistake!)**

**Each “ring” in the roll cloud is a historical record of a single downburst of dry air, penetrating the jet stream, hitting the cloud tops, and spreading out, radially.**

**HAARP roll clouds persist for hours, and always move at a steady, even speed, just like single, natural roll clouds.**

**Here is a satellite video, taken in water vapor mode, showing the expanding dry air, roll cloud, of a HAARP downburst. The fact that the ring is darker, proves it contains dry air (white = humid, black = dry) Notice it moves steadily, and lasts for hours.**

**I had several other videos of other roll clouds, but a NOAA java script shuts down my browser, whenever I find good evidence (happens EVERY time!)**

**Yes, NOAA is definitely under classified military control! It is rare to find any HAARP related images, unless their photoshop contractors make a mistake. I have trained them well :-)**

**This poor guy, at the National Hurricane Center (NOAA), has to try to figure this stuff out, without being *allowed* to know about the classified military/Wall Street weather extortion program!**

**Hurricane “Blanca”, in June 2015, in the Pacific, was used by the US military, to test the software, which controls hurricane movement, using the ionospheric heaters (US Navy SBX-1, etc)**

**Now, let's look at a snapshot of a HAARP downburst, on top of Hurricane “Blanca”, on June 4th, 2015.**

**Hurricane Blanca  
June 4, 2015, 08:29:13 UTC**

**This is the eye, without color enhancement. The concentric roll clouds are clearly visible.**

**Hurricane Blanca**  
**June 4, 2015, 08:29:13 UTC**

**Concentric  
HAARP  
roll clouds**

**Concentric  
HAARP  
roll clouds**

**Hurricane Blanca  
June 4, 2015, 08:29:13 UTC**

Red color indicates 20 degrees C colder than green.

Concentric HAARP roll clouds

Hurricane Blanca  
June 4, 2015, 08:29:13 UTC

**Hurricane Blanca  
June 4, 2015, 08:29:13 UTC**

**What did this  
HAARP  
downburst  
do to the  
hurricane?**

VIIRS 2015-06-04 08:29:13 GMT,... - I05 (11um) BT

A satellite image of Hurricane Blanca, showing a well-defined eye and a dense, swirling cloud structure. The colors range from blue (lower cloud tops) to red and white (higher cloud tops). The hurricane is centered in the upper right quadrant of the image.

**Hurricane Blanca**  
**June 4, 2015, 08:29:13 UTC**

**Immediately after  
this HAARP downburst,  
the hurricane moved  
quickly to the north.**

VIIRS 2015-06-04 08:29:13 GMT,... - I05 (11um) BT

**This is the actual track Of Hurricane Blanca. Notice the hairpin turn at the bottom.**

Cabo San Lucas

Acapulco

**This is the actual track Of Hurricane Blanca. Notice the hairpin turn at the bottom.**

Cabo San Lucas

Acapulco

**This is the actual track Of Hurricane Blanca. Notice the hairpin turn at the bottom.**

**This is where, and when the HAARP downburst occurred!**

Cabo San Lucas

Acapulco

**Now, let's watch a video of Blanca,  
and how it shot to the north, just after  
the HAARP downburst.**

**Note the time of the concentric HAARP  
rings was June 4th, 08:29 UTC.**

**The time when the Hurricane turned to  
the north was June 4th, 2:00 PDT  
(This is the same time, since UTC is about  
eight hours ahead of Pacific time.)**

**The next video shows Blanca spinning very stably, until the HAARP downburst, at the end of the video.**

**The Hurricane's eye blows apart, like clay on a potter's wheel, after a lump of clay is thrown at the finished pot.**

**There was not enough natural wind shear, to blow the eye apart, like this.**

**Let's look at the actual track, that hurricane Joaquin took, in October, 2015 .**

**Notice the hairpin turn to the north, and how it was *DELIBERATELY* steered, to hit the Bahamas, and Bermuda, while avoiding Cuba, and all US coastal cities.**

**When it is steered, the track has small wiggles, compared to the natural track, which is smooth, with gradual turns.**

# HURRICANE JOAQUIN

SEPT. 27 - OCT. 7, 2015

**This is the actual track for Joaquin. notice the hairpin turn, and wiggles, near the Bahamas, And Bermuda.**

**Joaquin sat over the Bahamas for 48 hours, and did tremendous damage. This was a man made disaster.**

**Now, let's watch the projected track, of Hurricane Joaquin, and how the predicted track had to be revised, over and over, to fit the hidden Wall Street agenda.**

**This hurricane was *DELIBERATELY* steered, to hit the Bahamas, and Bermuda.**

# TROPICAL FORECAST MODELS

**It appears Bahamas, and Bermuda, didn't pay for Hurricane Weather Futures contracts, like US coastal cities do!**

**US coastal cities will never get hit by a hurricane, because the Wall Street banks would have to pay out nine times more, than they received for the original Hurricane protection contract!**

**Now, let's watch a satellite video, showing the effect of the man made high pressure, on Hurricane Joaquin, just before it hit the Bahamas.**

**Notice, there are two sets of HAARP downburst rings, which happen three Hours apart.**

**Next, an IR image shows the temperature of the cloud tops, just after the downburst on Joaquin.**

**Notice the green tongue of warm air, which shows up, after the HAARP downburst is gone.**

**This deep, dry air destroyed the thunderstorms on the south side, and strengthened the storms on the north side (which pushed the hurricane south).**

September 30, 2015, 12:45 UTC  
One hour after first set of HAARP downbursts

September 30, 2015, 12:45 UTC  
One hour after first set of HAARP downbursts

Warmer Air  
mixing here  
stops storms  
on south side

**Hurricanes are steered, by changing the symmetry of the “eye wall”, which contains concentric rings of powerful thunderstorms.**

**If dry air is pressed down far enough to kill the thunderstorms, the thunderstorms on the other side grow stronger in comparison.**

**This was the technique used to push Joaquin south into the Bahamas.**

**If the cold, dry air is pressed down, to form a thin layer, on top of a Hurricane, convection on that side is increased, and the eye of the Hurricane moves away from that side.**

**This was the technique used on Blanca, to push it to the north.**

**Another way to say it, is that the shear on top of a hurricane can be controlled by HAARP downburst technology. And, wind shear is the main factor, that steers a hurricane.**

**Without a HAARP downburst, both sides are balanced, so the storm is stationary.**

**With a shallow HAARP downburst, the storms are stronger on the left side, so the Hurricane's eye moves to the right. This happened with Blanca. (Convection is stronger with the cold, dry air, aloft.)**

**With a deep HAARP downburst, the storms on the left are shut down, causing the right side to be stronger. The lack of balanced forces creates movement to the left. This is how Joaquin was pushed into the Bahamas.**

**Skeptics will ask the question:**

**“How can a few million watts control a weather system, which contains the power of many atomic bombs?”**

**Answer: The ionosphere is a huge pool of stored energy. The US Navy has spent decades figuring out, how to tap that energy, to use it as a weather control weapon.**

**Most of the energy used to steer these storms comes from the ionosphere, not the SBX-1.**

**Dr Nick Begich says it best...**

**Our oceans are dying, because of Ozone holes, created by the HAARP downburst technology.**

**Each time a downburst is created (hundreds of times every day), the protective Ozone layer is destroyed, over that area. (please watch my video “Physics of Ionospheric Heaters, killing the Pacific”)**

**These holes allow DNA-destroying Ultraviolet, to reach the surface of the ocean, where it penetrates 30 feet, killing all plankton, which is the base of the food chain.**

**UV-B (the deadly type of UV) has increased 800%, since 2002, which accounts for the rapid death of amphibians, insects, plankton, fish, trees, etc.**

**Our oceans are dying rapidly, as a result of Wall Street bankers, corrupting our military, and extorting money from everyone.**

**Our biosphere will be dead, and mankind extinct, in less than 100 years, if this continues.**

**Where is federal, and international, law enforcement???**  
**Why can these criminals continue to operate???**

**Hundreds of times a day, the jet stream is modified by these weather weapons, making a new a hole in the Ozone Layer, each time.**

**No one knows how long these holes will last, or how harmful the vertical mixing of chemtrail aerosols into the Ozone Layer, will be.**

**The next slide shows the possible dead zones in the oceans, as a result of US military attacks on it's own citizens, and on planet Earth.**

**Possible ocean “dead zones”, from frequent Ionospheric Heater (HAARP) use, to alter the jet stream.**

## **Summary:**

**Full blown Hurricanes can now be controlled by steerable, megawatt microwave transmitters, run by the US Navy “Missile Defense Agency”.**

**The commanders, in charge of the military hardware are corrupt traitors, who have been co-opted by Wall Street bankers, by accepting partial ownership in weather trading LLC companies.**

**The oceans are being rapidly killed by this fraud and racketeering.**

**The SEC, FBI, Interpol, and the ICC, should be investigating, and arresting those in charge of these programs.**

To prevent disinfo shills from saying “the HAARP at Gakona was closed years ago”, I would like to offer a new name for this microwave weather weapon technology:

*High Altitude Atmospheric Regenerative  
Microwave Induced Toroid (of plasma)*

Or, **HAARMIT**

In the future, the term “HAARMIT Ozone hole”, “HAARMIT ring”, or “HAARMIT downburst”, will refer to this type of ionospheric heater technology, as described in this video, and the “Physics of Ionospheric Heaters, Killing the Pacific” video.

(The word Regenerative is used, to account for the energy contribution, from the ionosphere, itself.)

**The established activists are not likely to adopt the term *HAARMIT*, since acknowledging this technology may threaten their dominant roles, their future donations (or secret payments from the fossil fuel lobby.)**

**Sincere people need to move away from the “HAARP” word, and use a new one (suggestions are welcome!)**

**Just as Carl Sagan's discovery of “nuclear winter” in the 1980's, may have prevented nuclear war, I hope this video will wake up the scientific, and law enforcement communities, to prevent the deliberate killing of our oceans.**

## **What you can do:**

**Research any “LLC”, which invests in water, or weather futures, since a privately held corporation can secretly give out stock ownership, to US Military commanders.**

**Demand the SEC, FBI, Interpol, NATO, and ICC investigate these crimes. We, The People, MUST apply pressure to get the ball rolling.**

**International scientists must investigate increased UV, over the oceans. But, you can buy a UV-B meter, and publish a record of your own, local, UV levels**

## What you can do: (continued)

Now that you know about this, you have a ***responsibility*** to act. Whatever legal, and ethical, action is in your heart, get going, and find others to help you!

Beware of “fakes” who talk a good game, but never accomplish anything, except getting more donations.

(For many ideas on what you can do, watch my video “How to stop Chemtrails and Haarp”)

Thanks for watching, now do something!

***THE END***

The Admiral is going to be really pissed about this video!
