After performances and travels throughout Brazil, Samuel had a dream to create a collaborative album, and so founded and created the Brasil Live Project, a musical expression of his own material inspired by a nation that changed his life. After a hard and long journey, this dream transpired and the album, which features participation and presentation with many of the country's greatest talents, was created. More than an album, Brasil Live Project reflects the unifying power of music and its ability to breakdown barriers in an ever-more segregated world.
