

PURE ELEMENTS NEVER DIE

PAVATI

THE ONLY 100% ALUMINUM TOWBOAT
AL 21 - AL 24 - AL 26

THE ONLY ALL ALUMINUM V-DRIVE TOW BOAT. PERIOD.

In 2009 the world's leading custom aluminum manufacturer set out to create the first 100% aluminum wake surf boat. In 2012 the project succeeded, with the unveiling of the AL-24 prototype. Since then Pavati has become one of the most widely discussed brands in the wake surfing and boarding industry.

In the two years following our original prototype we have invested more time and energy than would seem possible, refining every part of our masterpiece to be the best it can be. Now at last, it is our privilege to present to you and the world a breathtaking revolution: The all new 2016 Pavati AL Series wake boats.

ALUMINUM ^{1 3}

Indestructible

Aluminum is one of only 117 pure elements on earth. Of all the substances known to man, only chemical elements last forever. Other substances, like fiberglass, are simply composites of various chemical elements. That means it has built-in weaknesses, and over time it will break down (rot) back to its respective elements. Only the elements will survive the test of time.

Fully Versatile

Most boats have limitations on where you can take them, and what you can do with them when you get there. But with its immunity to corrosion and decay, a Pavati boat handles saltwater the same way it handles freshwater: effortlessly.

Lower Cost of Ownership

Pavati boats are stronger than fiberglass, but they are significantly lighter. At only 80% of the dry weight of their fiberglass counterparts, Pavati wake boats cost less to transport – both on and off the water.

H2O TOUCH
by GARMIN

H2O TOUCH 12" DIGITAL COMMAND CENTER

The industry's largest digital touch screen controls every aspect of the AL Series wake boats, sporting features such as Bluetooth, Wi-Fi, keyless start, pinch to zoom and multi-touch controls, Sirius XM radio and integrated maps of the entire United States built right into the navigation screen.

View your helm controls from your iPad, smartphone or tablet using the free "Garmin Helm" app. Auto guidance technology allows you to pinpoint a place on the water on the map and it will decide which is the safest route to take. Save all your favorite routes on an SD card. Comes pre-loaded with Bluechart G2 Coastal Maps and can be upgraded with the latest maps of your favorite bodies of water.

FULL LENGTH SURF LOUNGE™

Full length Surf Lounge™ with industry first rear-transom access hatch with extra storage for boards & equipment.

TRUE 12" GARMIN TOUCH SCREEN

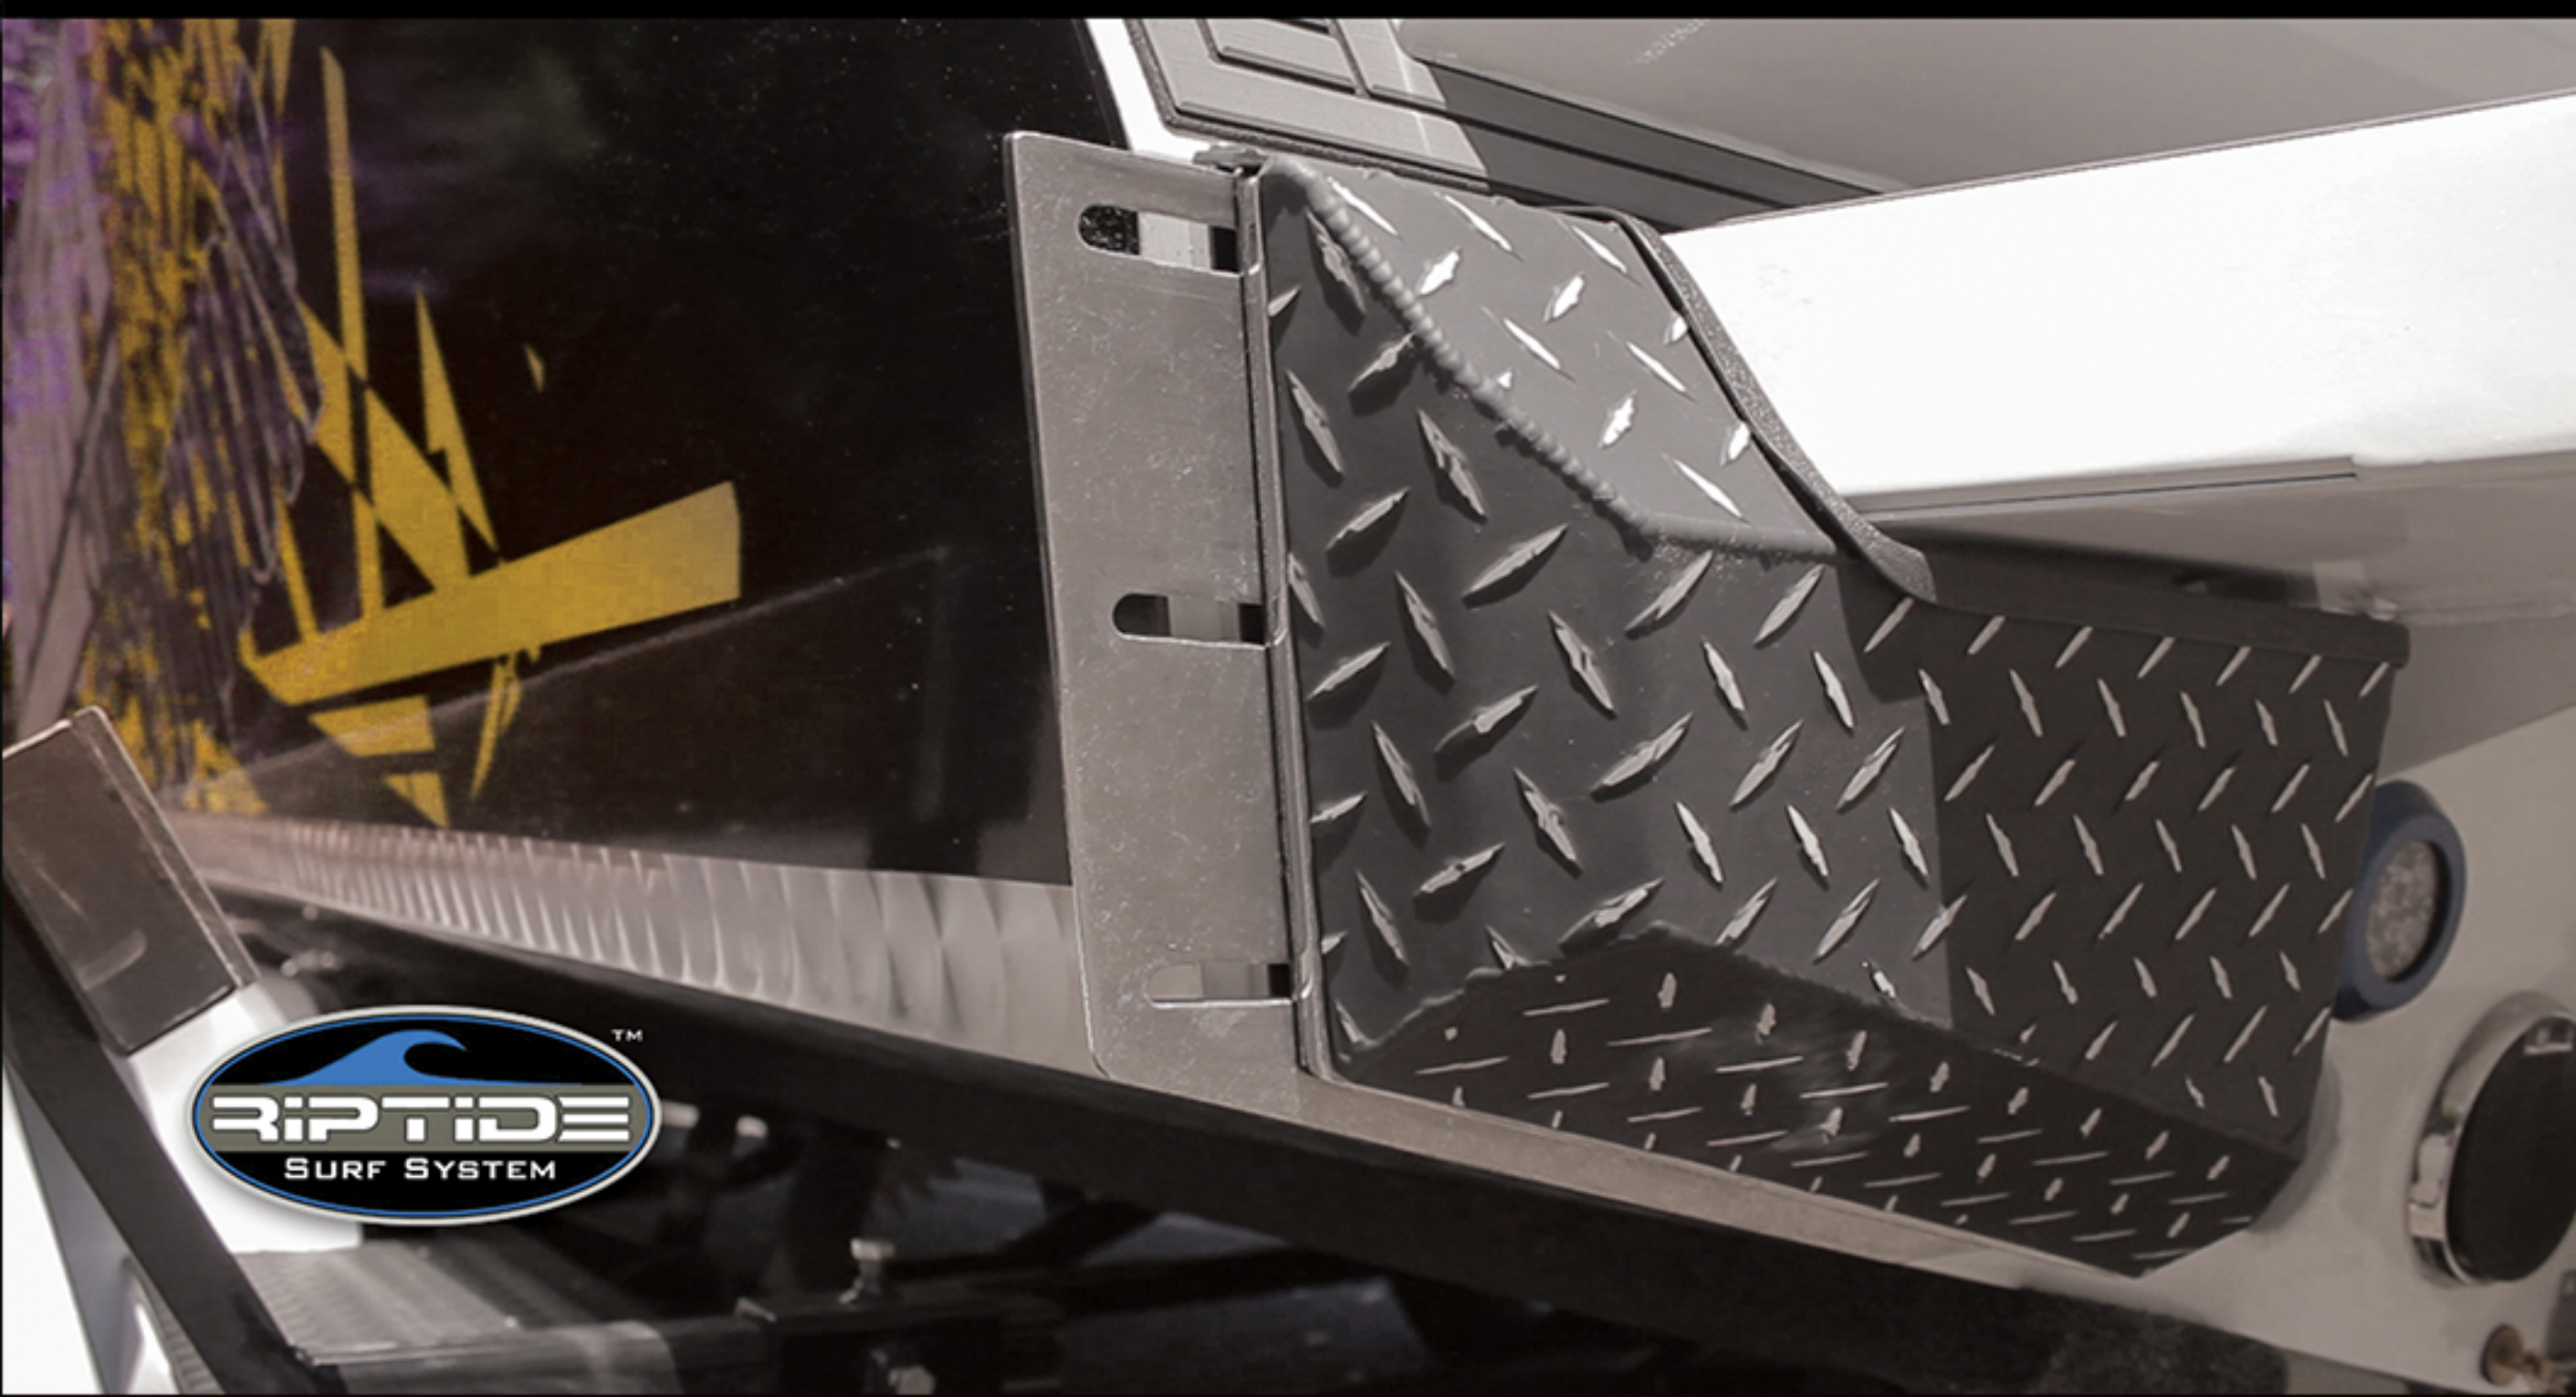

FULLY WELDED, COLLAPSIBLE, NO-FLEX TOWER

FULLY INTEGRATED CRUISE CONTROL

YOUR WAVES. YOUR WAY.

PERFORMANCE

Everything about the AL Series is designed for surfing. From our new Rip Tide Surf to the carefully engineered ballast, you have complete control over your wave. For the casual surfer, all it takes is the flip of a button and you're making insane waves. For the surfer who wants to tweak every little detail of the wave, we give you complete control. Whether you're a novice or a pro, the AL Series is designed to maximize your surfing experience.

**Rip Tide Surf System™**

The Rip Tide Surf System is a proprietary system that we invented for the AL-24S (Surf Edition). With solid aluminum plates that move out from the stern on demand, the Rip Tide works together with the massive 4,000 lbs ballast to create the best surfing wave possible, every time. Switch from goofy to regular in seconds - the fastest surf system in the industry.

GO BIG OR GO HOME

A great surfing experience begins with a great engine. Powered by Indmar's Built Ford Tough® Raptor engines, we've selected only the strongest and highest-torque engines for the AL Series in order to create the largest wave possible. No matter if it's fresh water or salt water, with our standard enclosed cooling system, a maximum output of 575 lbs-ft. of torque and a 5 year warranty, you will never have want for a bigger wave...only a bigger surfboard.

Diesel option coming soon.

125 Watts RMS Ea.

SPL Marine Subwoofer

12 inch Woofer Dual 2 Ohm
2000 Watts Peak Ea.
1000 Watts RMS Ea.

HEARING IS BELIEVING

Boasting Wetsounds Revolution™ Series sound system, the AL Series carries the most innovative sound system in all of marine audio. Unlike most conventional designs, this system provides remarkable volume and amazing full range sound quality on axis and off axis at long distances. Extensive acoustic testing has confirmed these speakers ability to project volume at 80 feet and beyond without any loss of detail or information. So whether you're surfing 30' behind the boat or boarding 80 feet behind the boat, you'll never miss a beat.

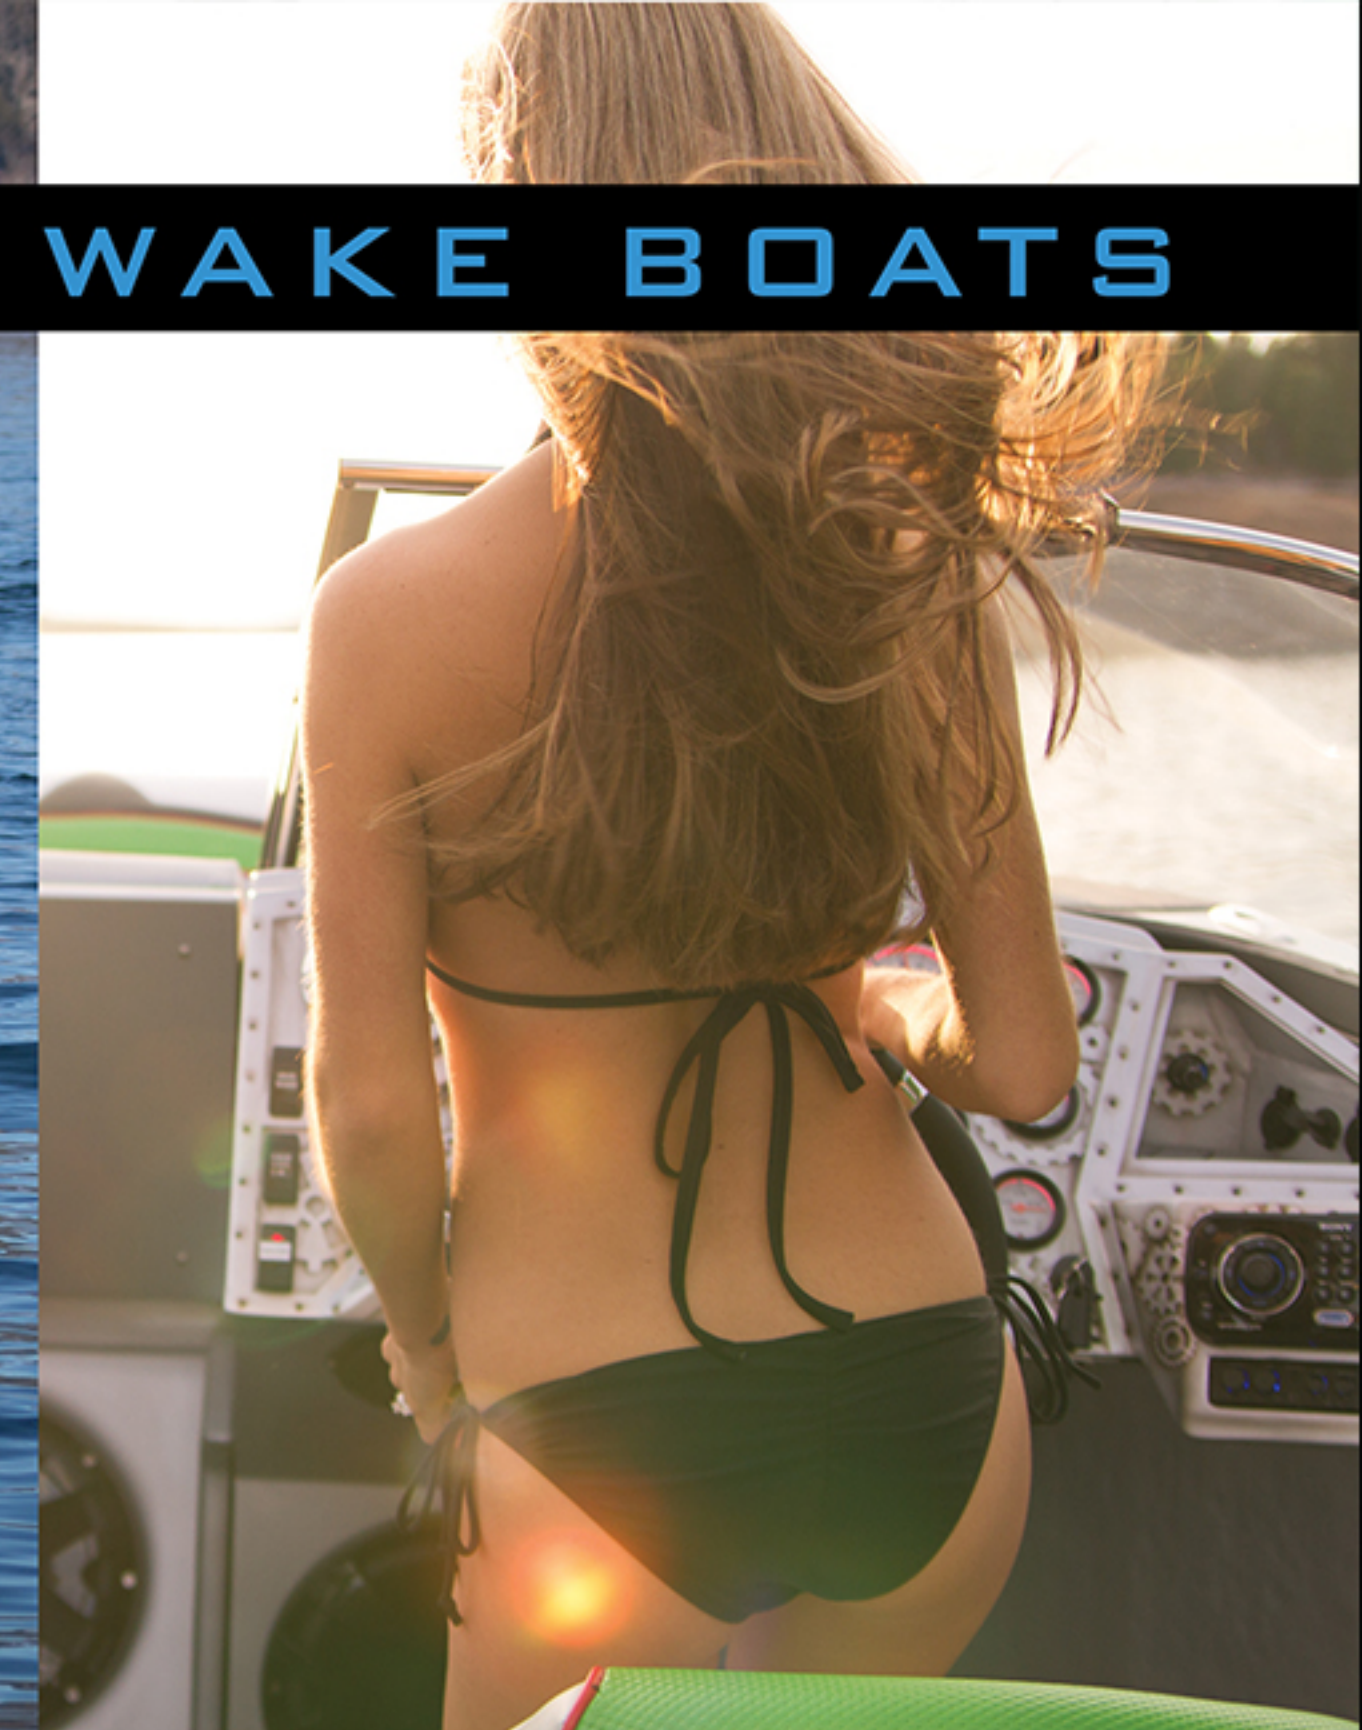

THE MOST STORAGE. PERIOD.

When you pack up the boat for a day on the water, storage is always a challenge. Fiberglass boats don't make it any easier, with limited storage space because of necessary structure support. Aluminum is stronger, and therefore requires less structural support throughout the boat. The result: more storage. With built-in floor coolers, wake board and surf board storage lockers, secure storage drawers, swiveling tower mounted board racks and built-in garbage and recycle bins – you can finally have a party without worrying about where to put the trash.

SURF LOUNGE

Details are never overlooked by the design team here at Pavati. The full length Surf Lounge seats up to 4 passengers...providing waterproof stereo controls, foldable arm rests, cup holders, easy engine access and 2 huge, carpeted pass-through storage compartments plenty big enough for sacks, boards, you name it.

Customization options for aluminum are truly limitless. The gel coats used on fiberglass boats limit your options to only a few colors, but our unique ability to use automotive paint gives you full control of color options. You can also choose between shaved or painted diamond plate on the bow, and even completely design your own vinyl wrap.
