

## How Canada is becoming "Little America", and Why We Must Put a Stop to It.

Over these past few decades, Canada has been more and more Americanized. The same thing happened with Britain and now it's happening with the States. They have heavy influences on our culture, government, and more. This is why we have to stop it:

Even the government is being affected. This is evident from our government's choices such as the choice to introduce Japanese internment camps, the prohibition, and much more. The government must put a stop to this before more stupid decisions are made. Canada has become virtually a puppet to the United States.

History has shown us that our neighbours to the south love to infiltrate other nation's governments to affect them. Who knows if this has been happening to Canada? I for one would not be surprised given the pro-American policies that have been approved as of late.

Canada used to be a smaller Britain, and now this? Haven't we learned our lessons the first time? Canadian independence was hard to fight for, now we have to deal with this? It even manifests in the little things. When you listen to the radio, switch to a Canadian station. Don't listen to the propaganda they blast over there.

The pro-American sentiment is so strong in their own country that they praise it like it's heaven on Earth. They are warmongering, and they will drag us into the mess they made. We should do everything we can to avoid becoming influenced by them. Only fools will fall for the same trap twice.
