

Thoughts of Tomorrow

Electrolytic cell used in cold fusion.

Hoffmann Institute is a private think tank engaged in research to improve the human condition. Sampling of some of our current endeavors include:

- Investigating alternative energy sources
- Studying social conditions around the world
- Evaluating ecological protection issues
- Observing nascent political trends of the 21st century
- Examining potential new food resources
- Cataloguing and preserving archaeological discoveries of historical significance
- Researching alternative scientific explanations for unusual events

For the Advancement of Man

In 1917, the Institute for the Advancement of Man was established on Third Avenue in the Lower East Side of New York City by Dr. Itohiro Nakami. Originally focusing on political lobbying on behalf of charitable causes, the Institute added scientific research to its menu (and changed its name) when Tomas F. Hoffmann graciously donated resources necessary to keep the young organization afloat.

Tomas F. Hoffmann

Since that time, the Hoffmann Institute has been instrumental in researching social and economic trends, alternative energy sources, ecological protection issues, and many other topics crucial to humanity's continued well-being. Much of the organization's funding is provided in the form of fundraisers or public and private grants.

Today, the Institute is led by Dr. Itohiro Nakami III, grandson of the Institute's founder. We currently have branch offices in several major cities around the globe, including our New York City headquarters, Barcelona, Chicago, Flagstaff, Washington D.C., Cairo, Edo and Jakarta.

The Power of Ideas

The Hoffmann Institute is looking for gifted individuals to join our cause. Our salaries are competitive and we have one of the best benefits packages in the industry. Here are a few samples of our open positions:

Computer Tech. Applicant must be trained with all current hardware and software, and familiar with cutting-edge server technology.

Facilities Coordinator. Applicant must be trained in modern accounting methods and should have strong organizational skills.

Assistant Archivist. Applicant must have strong organizational and analytical skills. Bilingual applicants preferred.

Personnel Manager. Applicant must have 5+ years experience managing an international Personnel Department.

Biochemist. Applicant must be versed in modern methods of DNA and chemical analysis. Applicants with 5+ years experience in government or private labs preferred.

Field Researcher. Applicant should have graduate degree in social science program and 5+ years experience in field anthropological or archaeological studies. Fluency in multiple languages required.

In addition to the listed qualifications, all applicants are required to undergo a thorough medical examination, a polygraph interview and an extensive background investigation.

Here's what we think makes a good member of the Hoffmann team:

- A sense of curiosity
- A flair for creativity
- Familiarity (or training) in one or more fields of scientific inquiry
- A strong sense of duty and loyalty
- A mind open to possibilities outside the normal
- Strong Team Skills

We at the Hoffmann Institute are committed to new ideas, to discovery and to the future. Imagine your place in an environment shaped by the power of ideas. If you're interested in joining the cause, and you think you've got what it takes, visit our web page at www.hoffmanninstitute.org for more information.

We appreciate any feedback you wish to provide about the Institute's mission. Also, if you have seen or experienced something unusual which you believe bears investigation, let us know!
