

Jewish Symbolism

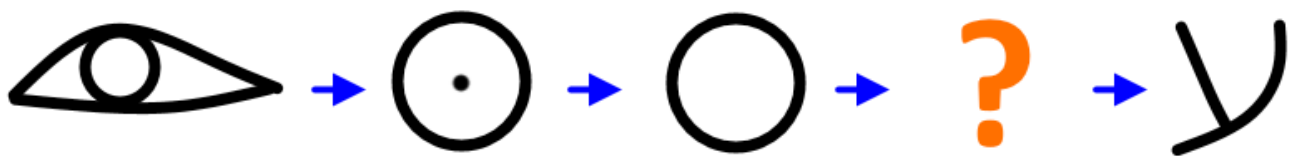

HIDDEN IN PLAIN SIGHT

"When we come into our kingdom it will be undesirable for us that there should exist any other religion than ours of the One God with whom our destiny is bound up by our position as the Chosen People and through whom our same destiny is united with the destinies of the world." - **Protocol 14**

Written by a Russian Catholic

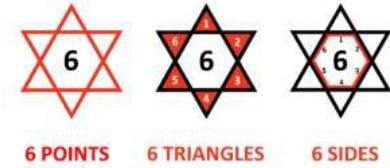

As we approach the Jew World Order we are being prepped for the day when Judaism will be the One World Religion and the Hebrew culture will inundate the globe as thoroughly as the waters of the Great Flood. The waters are already rising.

The modern Hebrew letter, **י**, is a Jewish symbol for eye, especially in the sense of God's eye. It is a highly corrupted form of an ancient letter* that began as a drawing of an eye then turned into a symbol that could be interpreted as either an eye or the planet Saturn, then eventually came to resemble the lowercase English Y.

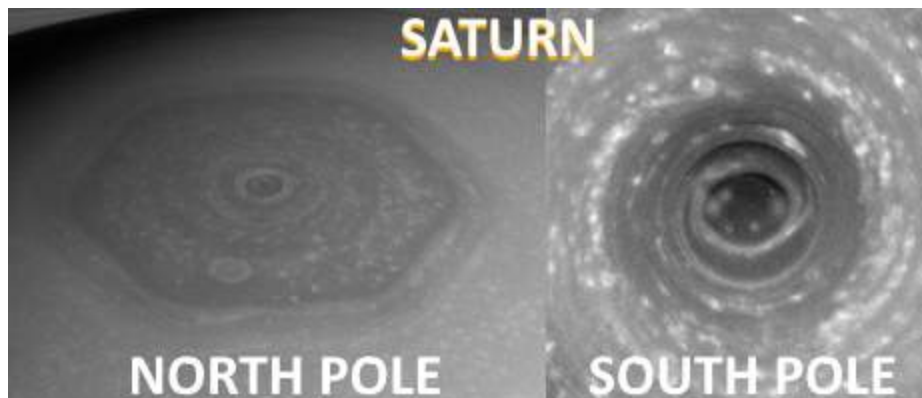

Amos 5:26 and **Acts 7:43** records that the Jews worshiped the star of a false god which the **Jewish Encyclopedia** of 1906 identifies as Saturn. In the book, **Jewish Symbolic Art**, 1990, Abram Kanof points out this was a hexagram, the same 6-pointed star which represents Judaism today.

Written by a Kabbalah Calendar

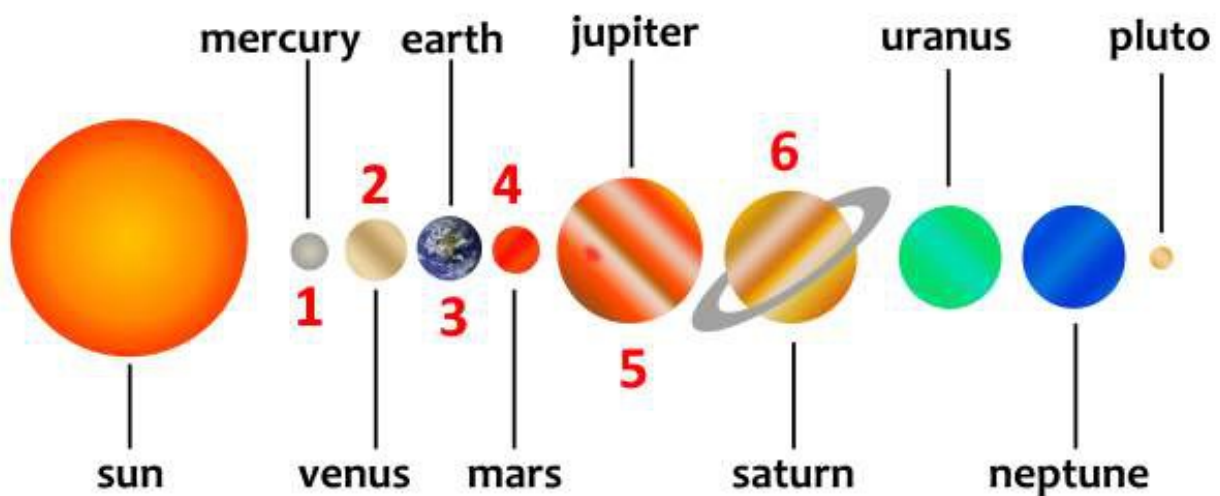

Written by a Kabbalah Calendar

Images published by NASA, purportedly of the planet Saturn, depict the 6-sided hexagon on its north pole, and the eye on its south.

Saturn is the 6th planet from the sun according to the heliocentric model, and its day, Saturday, is the 6th day of the week according to the international standard. It's also the Jewish Sabbath.

Written by a Jewish Catholic

The Old Testament prophets may have considered this last point mere coincidence, but the Jews of today are exploiting it. As we examine some of these logos, most of them probably very familiar to you, keep in mind that the god of modern Judaism is not the God of the Old Testament. The God of the Old Testament, who is the same as the God of the New, is not to be associated with Saturn, neither the planet nor the god of pagan mythology. And He certainly cannot be conflated with the symbol of his antithesis, the Anti-Christ, whose number is infamous.

Freemasonry

The square and compass arranged in the form of a hexagram, the most recognizable logo of Freemasonry, immediately points to its Jewish origins. The G is the first letter of the English word God, but in its place was originally the first Hebrew letter of Yahweh.

Written by a Jewish Catholic

The illuminating eye within a triangle is acknowledged as a Hebrew symbol for God by the Freemason Albert Gallatin Mackey in his book, **An Encyclopaedia of Freemasonry and Its Kindred Sciences: Comprising the Whole Range of Arts, Sciences and Literature as Connected with the Institution**, 1874.

Communism

Written by a Jewish Catholic

Communist Party U S A

Communism is Jewish from beginning to end, from the Jew** Adam Weishaupt, founder of the legendary Illuminati, that secret Communism behind the French Revolution, to the Jew Karl Marx, who fathered the public Communism which erupted into not just one but two World Wars. With this movement, Judaism appropriated to itself the symbols of the hammer, the sickle, and the gear.

Internet Explorer

The Internet Explorer logo is modeled after Saturn, despite Saturn being typically considered yellow-orange. However, according to NASA,***

Sunny blue skies ... on Saturn? It's true. NASA's Cassini spacecraft discovered them in 2005 ...

"We were surprised," recalls JPL's Bob West, a member of the Cassini imaging team. "Saturn is supposed to be yellow." ... Saturn's north is so blue that West believes amateur astronomers could see the hue from Earth. Unfortunately, the north of Saturn is hidden at the moment behind Saturn's rings, a situation that will persist for another year or so.

Written by a Jewish Catholic

It must be remarked that as of this writing, NASA is the only one who claims to have discovered that Saturn is blue on the side hidden from amateur astronomers on Earth, and with a single exception, is also the only one to claim having seen a hexagon or an eye on Saturn's poles.

IE, the acronym of Internet Explorer, is a Hebrew abbreviation of God's name, hinting that the Jewish god and Saturn are the same thing.

Yahoo!

In 1 Samuel 5:12 there is an unusual form of **י**, the eye symbol, that looks like **י** and corresponds extremely well with the symbol at the top of Yahoo's first logo. The word *Yahoo* itself is purple, the color of royalty, and is an alternate spelling of *Yahu*, a Hebrew name for God. What the blue ball represents is unclear. It could be Earth, in which case the idea seems to be the Jewish god gazing down upon the world. Since the color blue represents divinity according to Menachos 43a in the Jewish Talmud, it could also be interpreted as the planet Saturn, in which case the label *Yahoo!* would be a case of unabashedly identifying the Jewish god as Saturn, and the yellow symbol would be composed of the planet's ring.

This logo has the pyramid with capstone, a symbol of Freemasonry seen on the dollar bill, and also the planet Saturn, or an eye.

According to Google Translate, **י** sounds like *ai* in Hebrew, which is virtually identical to the pronunciation of the English word *eye*. In Yiddish, it sounds like *El*, which is God in Hebrew. Either way, this favicon can be taken to mean the Jewish god. That this was intentional is corroborated by the previous logo. Note that Hebrew is read backwards.

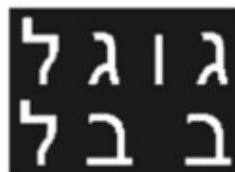

The word *Googol*, from which Google is derived, was popularized by the Jew Edward Kasner, who claimed his 9-year old nephew invented it.

According to the Jewish authors of **Group Relations Work: Exploring the Relevance and Impact Within and Beyond Its Network**:

“The first recorded group to be without a leader is to be found in the biblical story of the Tower of Babel ... Both Babel and Google originated from anxiety, both have a grandiose nature which guards against such anxiety, and both use reaction formation to deny individual differences ... Google is an authoritative traffic office endlessly patrolling cyberspace ...

The similarity between the words 'Babel' and 'Google' makes one pause and think. In Hebrew, the two words almost rhyme and are built on the same rhythm: Babel with its repetition of the second letter of the Hebrew alphabet, and Google, with its alliterative repetition of the third letter of the Hebrew alphabet. The suffix 'el', with which both words end in Hebrew, means God.

The similarity between the words Babel and Google in Hebrew.

The English term Google stems from word play on the mathematical term Googol, which is represented as 1 followed by 100 zeros. Moreover, the double zero is a mathematical symbol for infinity. Google is a project no less ambitious than the

Tower of Babel. It translates languages and texts from any language and culture into any other language and culture. The vision of a world that speaks one language is coming ever closer to fulfillment. It is for good reason that Michio Kaku, in his book *Physics of the Future*, claimed that, by the end of the the twenty-first century, humanity would possess the powers of the mythological gods whom it had once worshiped. In Hebrew, Babel is 'Bab' 'El', meaning the 'Gate of God', expressing the human desire to cross forbidden boundaries, to touch the sky ...

Incidentally, God's interpretation of the attack on authority was also connected with Babel, but this time there is a different meaning in the Hebrew: bavel = balal = confound: *'Therefore is the name of it called Babel; because the Lord did there confound the language of all the earth: and from thence did the Lord scatter them abroad upon the face of all the earth'* (Genesis 1:9)."

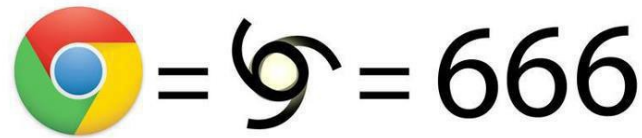

An alternative spelling of Gog, an evil entity in Revelation possibly identical with Anti-Christ, is *Gug*, pronounced *Goog*. Under this interpretation, Google would mean *God-Anti-Christ*, equating the Anti-Christ with the Jewish god.

Written by a Masonic Scholar

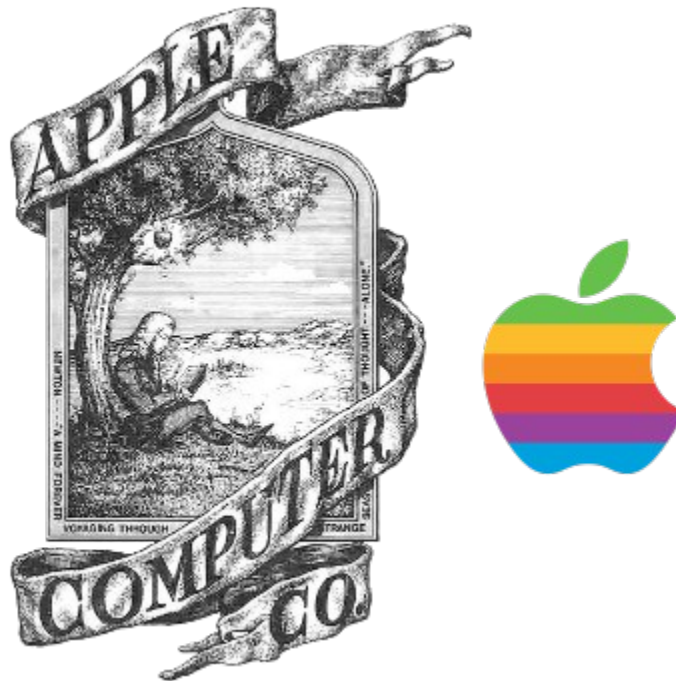

As the y of ymail is an allusion to the Hebrew god, the G of Gmail is an allusion to the Jewish god of Freemasonry, which is confirmed by the letter M based on the red apron for a Master Mason of the Scottish Rite.

The Google Chrome logo contains 666, and the blue center could be interpreted as the planet Saturn or the pupil of an eye. The rainbow color of the eye is an allusion to the word *iris*, which means a part of the eye in English, and also rainbow in Greek, and the word chrome is derived from another Greek word, *khroma*, which means color.

Apple

The apple of Apple is loaded with satanic symbolism. The most obvious is the missing bite, a reference to that infamous incident in the Garden of Eden inspired by Satan himself. The second is doubly a reference to the Forbidden Fruit and Newton's legendary apple which supposedly inspired him with the knowledge to build a case in favor of heliocentrism. Newton was a Gentile but he practiced Jewish magic and denied that Christ was God while masquerading as a Christian.

The color spectrum is a reference to Newton's experiment where light is passed through a triangular prism and split into all the colors of the rainbow. According to legend, both of these events, the apple falling under the tree and the prism experiment, occurred in the year 1666. The first Apple computer was built and sold by

the self-professed Freemason, Steve Wozniak, for \$666.66, with help from Steve Jobs. Jobs' father is a Semite from Syria who's the Vice-President of a casino, and Jobs' sister married a Jew whose last name is Appel.

The rainbow color is also connected to the word *eye* through the Greek word *iris*, which as stated above, means rainbow.

The female artificial intelligence personality, Siri, is *iris* spelled backwards, and her microphone icon looks somewhat like a pupil. In Greek mythology, Iris was the messenger goddess who transmitted communications between Cronus and mankind. Cronus is the Greek name for Saturn, so the symbolism is that when a user asks Siri something, Siri will take the question to Saturn and return with the answer. Iris is also considered by biblical scholars to be derived from the Greek word for speaking, *ereo*, and Siri is popular primarily for her speech.

The lowercase *i* with which the names of Apple products begin represents the word *eye*; e.g. *eyePhone*.

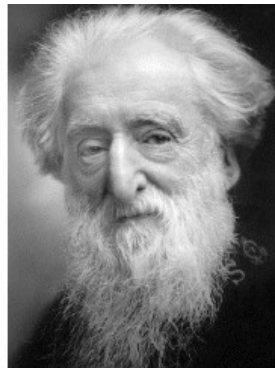

Best Buy

Best Buy's logo used to contain 6 sixes arranged in a spiral, placed in a way that makes it resemble the eye of Saturn or the rising sun of the Orient. In **Ezekial 8:16** an incident is recorded where about 25 Jews provoked the wrath of God by worshiping the rising sun as an idol.

Royal Dutch Shell, more commonly known as Shell, is the second largest oil company in the world. The red shell logo appears to have a triple meaning. The obvious is the fossil shell of fossil fuel. The second is the rising sun of the East, towards Jerusalem, and the third is the Jewish House of Rothschild, the richest banking dynasty in human history whose German name means Red Shield.

William Booth

The Salvation Army purports to be a charity organization, but its credibility suffers at the hands of the following facts. It was founded by the Jew William Booth, and its logo is a red shield, a reference to the House of Rothschild to whom it likely "donates" contributions intended for charity.

Monster Energy

Each of the 3 claw marks in the Monster Energy logo is a Hebrew number 6, which, together with the title of Monster and the motto “Unleash the Beast!”, are blatant allusions to the Beast of Revelation.

MySpace

יִי is Hebrew for 666 and features prominently in the MySpace logo. The dot on top of each character is analogous to the accent mark in languages like French and Spanish.

Ebay's original logo had it spelled ebaY, with the last letter in uppercase indicating the word is to be read backwards. In fact, ἱαβέ is Greek for Yahweh, and is what the Samaritans called God in their translation of the Old Testament. Using English letters, that would be written Yabe, which is the exact opposite of ebaY. The B in eBay is sometimes capitalized as an allusion to the Greek form of the lowercase b, which actually looks like a capital English B. Of course, the rainbow font is another reference to the Greek word *iris*, the rainbow.

'Ιαβὲ (Greek for Yahweh)
 ↕
 eBay ↔ YaBe ↔ eBay

Yo is Hebrew for God. Their logo is an eye, which also means God. They own Game Maker, whose logo is the G of Freemasonry within a 6-spoked gear of Communism.

Game Maker's old logo was the red hammer of Communism within the red eye of a blue Saturn surrounded by an orange ring.

Game Maker Oculus has an eye for its logo, the gear-iris of which contains a green S that could symbolize a snake. On a somewhat related note, the S of Superman within a *red shield* could symbolize both the Symbolic Snake of Judaism and the *Rothschild*

family. Superman was invented by two Jews, but that's a topic for another article.

YoYo Games is owned by Playtech, whose logo is the triangle within an eye.

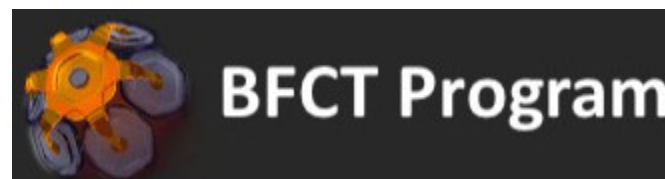

Blender

Blender is a freeware program for creating 3D games and movies. Its logo is three 6's arranged in the form of an eye that looks like Saturn.

The Blender Foundation logo is six 6-sided hexagons arranged in a ring to create a hexagon in the center.

The *Blender Nation Certified Trainer* Program logo is six blue hexagons in a ring around an orange hexagon.

The BlenderNation logo is an eye.

Written by a Jewish Caterer

America Online

The logo of AOL has an eye on a golden triangle.

Mozilla Firefox

Here we have the recurring orange-ringed, blue Saturn sphere template. It could also be interpreted as meaning the light of the illuminating eye spreading like fire across the world. Alternatively, the fox could actually be taken as a medieval-style fox-eared, 2-legged dragon circling the globe, an allusion to the symbolic snake by which our Jewish overlords symbolize their people:

To-day I may tell you that our goal is now only a few steps off. There remains a small space to cross and the whole long path we have trodden is ready now to close its cycle of the Symbolic Snake, by which we symbolize our people. When this ring closes, all the States of Europe will be locked in its coil as in a powerful vice. - Protocol 3:1

Games Omniverse

Games Omniverse had a contest where the first place winner submitted a variation on their logo involving a hexagon.

The small gap between the head and tail represents the little time left before the Jew World Order is established.

Havok is a physics engine producer that works in partnership with virtually every major

game developer, both console and computer, including Activision, Sony, Microsoft, and more. Their logo has an eye.

LUA Programming Language

Saturn looking at a moon with its eye.

Greater Good Games

Greater Good Games claims to be “charitable” indie game development studio. Their logo is an eye composed of three 6's around a gear.

Rotary International

Rotary International is essentially a form of Freemasonry, but with less secrecy and ritualism to appeal to those who are less occultism-inclined. The 6-spoked gear, along with Rotary's fraternal, international, philanthropic and religiously-indifferent character, points to a Jewish origin.

Written by a Jewish Cabalist

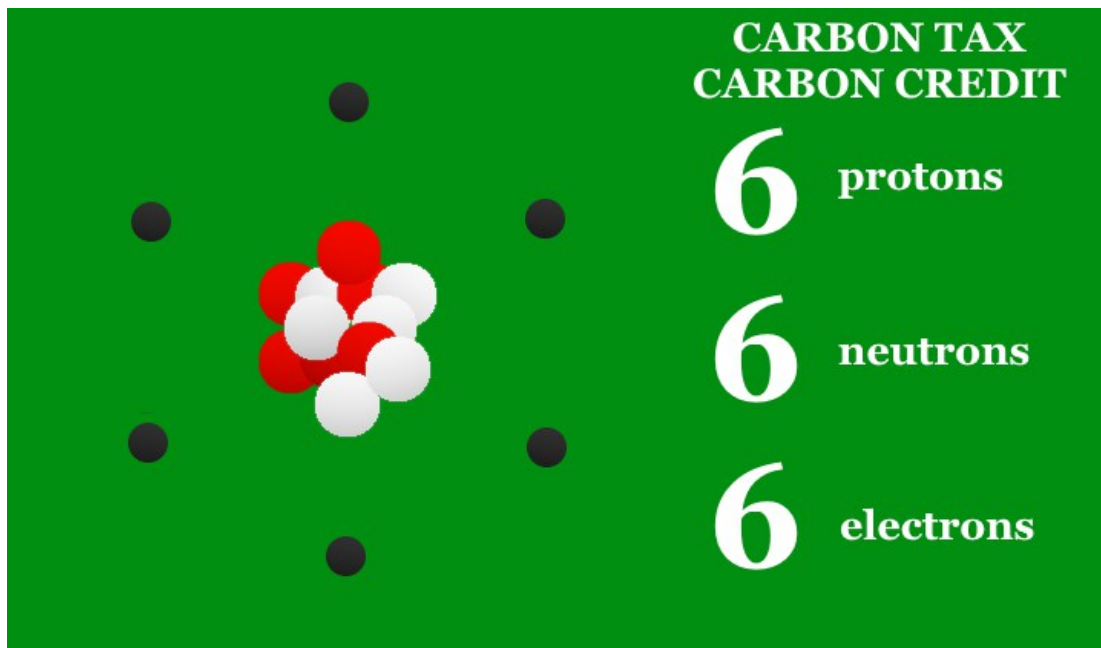

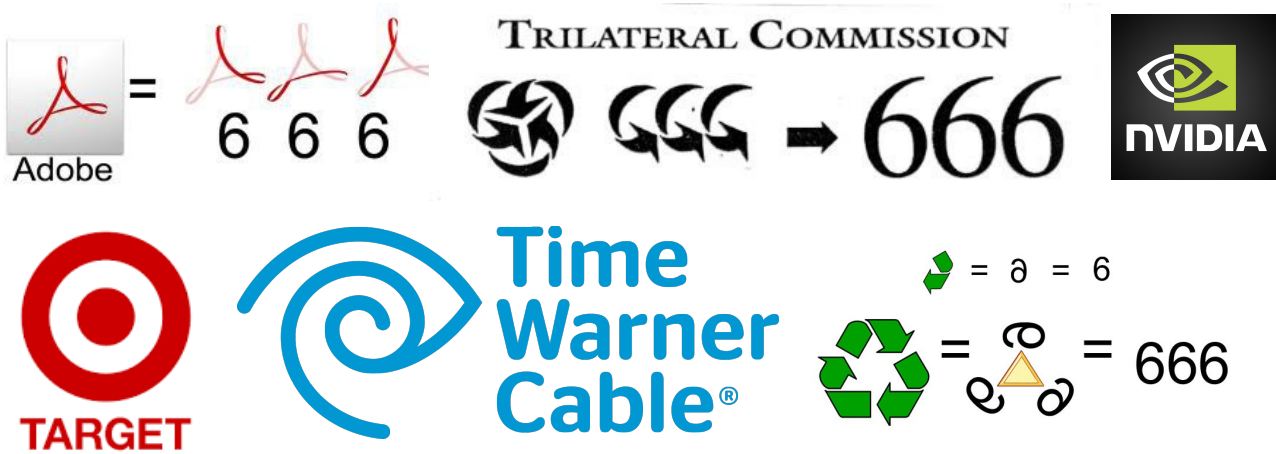

WWW.

The Hebrew equivalent for the letter W is **ו**, which is also the number 6, meaning www is 666 in Hebrew.

Compare to the Rotary International logo.

Others

"A user-led interface that will revolutionise criminal investigation in the information age."
