

REDUCE YOUR DISPOSAL VOLUME

reclaimWESTSM can help reduce your disposal volume:

- » Heavy Brine with a TDS up to 225,000 ppm has recoverable water
- » Recover the water for operational or beneficial reuse:
 - Operationally for future fracs or other operational needs
 - For release back into the environment (with proper permitting)
- » Discharge water through natural or mobile evaporation

SOCIAL BENEFITS

- » Reduced truck traffic and noise while reusing natural resources
- » Minimize infrastructure repair costs

IMPROVE THE HEALTH OF YOUR DISPOSAL WELL

reclaimWESTSM can help improve the health of your disposal well:

- » Increased fluid weight reduces injection pressure
- » Reduced volume allows for increased production
- » Reduced need for biocide and scale inhibitors
- » Low Turbidity mitigates plugging risks

FLUID WEIGHT VS.
DISPOSAL INJECTION PRESSURE

SOCIAL BENEFITS

- » Reduced truck traffic and noise while reusing natural resources
- » Minimize infrastructure repair costs

REDUCE YOUR COMPLETION COST

reclaimWESTSM can reduce your completion cost and maximize production:

- » Use the fresh water for your next frac
- » Reducing the TDS in your slick water frac fluid can lead to a 30% chemical savings
- » Chemical performance will increase and includes:
 - Friction Reducer
 - High TDS water challenges the emulsion of FRs, hindering the inversion and causing a loss of efficiency
 - Scale inhibitors
 - Reduction of hardness = less scale inhibitor required
 - Viscosifiers
 - Cross-Linkers and Gels
 - Elimination of colloidal particles removes fluid's friction induction
 - Biocide
 - All fluid treated through reclaimWESTSM is sterile
- » Reduced water sourcing costs

REDUCE YOUR DRILLING COST

reclaimWESTSM can reduce your drilling cost:

- » Concentrated Brine produced through reclaimWESTSM is a clean make-up fluid
- » This make-up fluid is bacteria free
- » The make-up fluid may have resale value or use within other operations such as workovers

SOCIAL BENEFITS

- » Reduced truck traffic and noise while reusing natural resources
- » Minimize infrastructure repair costs
