Фотодрук

для шаф купе.

NB!

У каталозі надані зменшені зображення. Оригінали фотографій з високою роздільною здатністю зберігаються на підприємстві, що проводить друк. Більшість фотографій придбані на провідних фотостоках, що є гарантією високої якості. Покупець вибирає зображення з друкованого каталогу, або копії на диску.

Щоб уникнути суперечок, зауважимо про поняття масштабу зображення: обираючи зображення по каталогу, покупець повинен розуміти, що зображення з каталогу приблизно у 40 разів менше, ніж в реальному розмірі.

На маленькому зображенні в каталозі неможливо розгледіти багато деталей оригінального зображення, яке буде нанесене, наприклад: ворсинки на тканині, фокусування фото, зірочки на небі і т.д. В електронному макеті, як правило, можна помітити практично всі елементи реального зображення.

ПРО КОЛІР

Перш за все, слід враховувати, що монітор світиться зсередини, а в разі відбитка ми маємо справу з відбитим світлом. В силу відмінності фізичних процесів формування зображення, домогтися їх однакового відображення на моніторі і плівці досить складно.

Слід враховувати, що звичайне прозоре скло теж додає відтінок, причому при різному освітленні можливі різні відтінки. Друкується каталог способом офсетного друку на папері, а для шаф-купе використовується широкоформатний друк на плівці. Через різницю матеріалів і способу друку один і той же колір має різний відтінок.

ПРИЙМАННЯ ПРОДУКЦІЇ І ВИРІШЕННЯ СУПЕРЕЧОК

Видимими дефектами вважаються різні сторонні вclusions, пухирці повітря, ворсини, пилюка і т.д., які помітні поглядом з відстані 1м протягом 10 – 12 секунд при нормальному денному або штучному освітленні.

Дефекти, які виявляються лише при розгляданні напросвіт і не будуть видимими при експлуатації виробу такими не вважаються і як брак не приймаються.

Якщо виріб буде експлуатуватися із застосуванням підсвічування з задньої сторони (зсередини), Замовник повинен обумовлювати це при оформленні замовлення як додаткову вимогу до якості.

Колір або відтінок зображень, представлених у каталозі наведений для прикладу і може відрізнятися від дійсного.
