

# **PSY 350 Week 3 DQ 2 Consciousness and Sleep**

**Check this A+ tutorial guideline at**

**<http://www.assignmentcloud.com/psy-350-ash/psy-350-week-3-dq-2-consciousness-and-sleep>**

This week you were introduced to different but related topics, of sleep and consciousness. For this discussion, you will focus on a disorder of one of these topics.

**Option A:**

Identify a peer-reviewed, research study that was published within the last five years, and focuses on elucidating the cause or a new treatment for one of the disorders of consciousness covered this week. Be sure to include a discussion of theories surrounding this disorder and how this research interacts with current theories. Your initial post should be a minimum of 250 words.

**Option B:**

Identify a peer-reviewed, research study that was published within the last five years, and focuses on elucidating the cause or a new treatment for one of the disorders of sleep covered this week. Be sure to include a discussion of theories

surrounding this disorder and how this research interacts with current theories.  
Your initial post should be a minimum of 250 words.
