PSYCH 640 Week 4 Learning Team Concept Map of Memory System

Create a concept map using Microsoft® Word or another similar program.

Include the following in your concept map:

- Illustrate how the components of the memory system interrelate.
- Illustrate the implications of effectively and not effectively encoding information into long-term memory.
- Illustrate methods to enhance memory.

Include a 500- to 700-word descriptive summary of your concept map, explaining your criteria for the illustrated relationships using scholarly resources.

Click the Assignment Files tab to submit your assignment.
