5<sup>th</sup> of May 2016

Dear Sir or Madam,

I am contacting you because I would like to do a six-month internship, in a software development department, from September 2016 to February 2017. I am currently a French computer engineering student at the Université de Technologie de Compiègne in my third college year. I am really interested in Timetec Sports because I believe your company would provide me with an excellent opportunity to get experience in a New Zeland and to work in a sports-related field on a meaningful project. I am looking for an opportunity in either networking, artificial intelligence, data mining, mobile development, database, software or web development(back or front end).

I am flexible and collaborative and I also have many cross-cultural experiences. I am passionate about learning new languages and discovering new technologies. My experience in software development is based on many projects I have undertaken or which I am currently involved in, such as the development of a video streaming Android application in partnership with the laboratory Heudiasyc, and the modelling and implementation of a database, a game with embedded artificial intelligence and a scientific calculator. Accepting me in one of your teams could let me bring a new perspective and put my enthusiasm and my skills at your service.

Please find attached my CV containing additional information about my experience and skills. I would appreciate the opportunity to discuss with you and to provide further information for my application. Feel free to contact me.

Thank you for your time and consideration. I look forward to speaking with you about this exciting opportunity.

Yours sincerely

Vincent DÉHAYE
