**DO YOU WANT TO PREVENT PREGNANCY
AFTER UNPROTECTED SEX?**

**You have
120 hours
to rectify it**

use

**POSTPILL works before pregnancy
happens by delaying ovulation**

POSTPILL
the #AFTERSEX pill

The emergency contraceptive pill regimen recommended by W.H.O is 1 dose of Levonorgestrel 1.5mg taken within 5 days (120 hours) of unprotected sexual intercourse

Based on reports from nine studies including 10,500 women, W.H.O found that this regimen is 52-94% effective in preventing pregnancy and is more effective when used immediately/soon after unprotected sex.

 **Implanon NXT®**
68 mg etonogestrel
contraceptive implant

**IMPLANON NXT® is a small (4cm) thin flexible, progestin only
contraceptive implant that provides**

3 years of continuous pregnancy protection.

FEATURES OF IMPLANON NXT

- ❖ All-in-one applicator design: Implant + inserter
- ❖ Easy to use, one hand action For fast insertion time
- ❖ Full retraction of the needle into the applicator after insertion
- ❖ Secure-The implant cannot fall out of the inserter
- ❖ Smart applicator ensures sub-dermal insertion
- ❖ No need for sterile blades/scapula
- ❖ Radiopaque implant offers x-ray visibility for ease of removal
- ❖ Contains Etonogestrel 68mg

BENEFITS TO CLIENTS

- ❖ It can prevent pregnancy for up to 3 years
- ❖ It is safe and 99.9% effective
- ❖ It avoids the stress of keeping up with a daily, weekly or monthly routine contraceptive
- ❖ It starts working as soon as it is inserted
- ❖ Releases low doses of hormones and quickly leaves the body when implant is removed
- ❖ Its action is quickly reversible, so you can get pregnant soon after it is removed
- ❖ It is suitable for women who desire long term contraception

lydia™ **Copper Y** **NEW**

INTRAUTERINE
CONTRACEPTIVE
DEVICE

**NO DRUGS,
NO HORMONES**

5 YEARS

FEATURES OF LYDIA COPPER Y

- ✦ Ideal for less experienced health care providers
- ✦ Flexible Y-shape offers perfect fundal placement
- ✦ Only requires 1/3rd dilation of the cervix during insertion compared to copper T
- ✦ Copper Y is gentle during insertion and removal
- ✦ Long term protection of up to 5 years
- ✦ High efficacy of more than 99%
- ✦ Safe for women who should not use hormones.
- ✦ Marked insertion tube adds convenience and accuracy for the provider
- ✦ Tamper proof film-film pouch protects the copper from oxidation

W.H.O states that IUD is the most effective form of emergency contraception with over 99% efficacy.

<http://www.who.int/mediacentre/factsheets/fs244/en/>

BENEFITS TO CLIENTS

- ✦ Less painful during insertion
- ✦ Procedure is faster
- ✦ Does not contain hormones and so, no hormonal side effects
- ✦ It starts working the same day it is inserted
- ✦ It is safe for breastfeeding mothers
- ✦ It does not require constant follow up at the clinic
- ✦ It can be removed whenever the woman wants
- ✦ There's quick return to fertility once removed.
- ✦ Does not interact with any medicines
- ✦ Does not interfere or interrupt sex, so offers the couple complete intimacy
- ✦ Nylon suture is softer and more comfortable
- ✦ Lydia IUDs can be used as an emergency contraception if inserted within 5 days of unprotected sex.

"Two years ago, I got trained to insert IUDs and Implants, but afterwards I mostly recommended implants to my patients because I found it very difficult loading the IUD and it used to make me look clumsy. When I heard about Lydia Safe Load and Lydia Sleek from the DKT Medical Representative who came to my clinic, I said "Ehn ehnl!! So there's technology like this", a quick way to load the IUD and even a ready-to-insert IUD, so I have been missing!". Now, I'm more confident and I recommend both Implants and Lydia IUDs to my patients and I even showed all my nurses how easy it is."

Matron Okafor
Private hospital, Egbeda, Lagos

"We have 5 children already and my husband was still pushing for sex. It's not as if I didn't want to do oh, but I was so afraid I would get pregnant again because I used to catch *belle* quickly. I used to have different styles for rejecting him and my husband started to fight with me, he even said he believes I'm cheating because I do shout 'blood of Jesus' as if I am having bad dreams if he tries to touch me while I am sleeping. Luckily I met a DKT BEE that came to my area and she gave me SAYANA PRESS. Now, I'm the one disturbing my husband for sex; he doesn't know what I did, but he's so happy with me."

Mrs. Agu, 36 years
House wife

"I have heard of condoms breaking before, but I never believed it could happen to me. My boyfriend always brings the condoms and that day he said it was one free condom he collected from somewhere a long time ago. Only God knows what would have happened to me if I had not heard of POSTPILL. I used it immediately and now I even buy my own FIESTA condoms and keep in my room just in case. I cannot allow someone use fake or expired condoms with me and get me pregnant when I'm not ready."

Victoria, 24 years old
Banker Kogi

"I am a doctor, but I also had this belief that all hormonal contraceptives cause women to gain weight. But when I heard of SAYANA PRESS and that it has a lower dose than DEPO PROVERA and the DKT medical representative reminded me that diet is the main cause of weight gain or loss, I bravely recommended it to a client who told me she was watching her weight and I should not give her anything that will make her gain weight. Anyway, after 3 months, she came back to me for her next SAYANA PRESS shot and she was so excited and satisfied. I was impressed too and even started using SAYANA PRESS for myself."
