Featured Speakers

**David Hornbrook D.D.S. –
“Creativity with Ceramics”**

Today’s ceramic systems are no longer limited by strength, marginal integrity, or necessary destruction of tooth structure. The new metal-free systems are more durable, more aesthetic, more

bondable more conservative and have better wear compatibility than metal restorations. This presentation will cover what’s available, when to use what, how to increase predictability, effective lab communication, reducing remakes, and a thorough understanding of the cementation systems that will optimize results.

John Chao D.D.S. – “Pinhole Surgical Technique: A Revolutionary Way to Treat Gingival Recession”

There has been the need for a simpler way to treat gingival recession without extensive flap surgery. Using this new technique, a pinhole is made by a

needle and the tissue is loosened and shifted down. The procedure is minimally invasive; with no open wounds. With nearby blood supply and collagen, it is difficult to tell anything was done by the following day. Learn about this revolutionary way to treat gingival recession from this highly sought after speaker.

**Jack Krauser D.M.D.
Steven Feit D.M.D. –
“Biomechanical Occlusal Dentistry Applied to All on Implant Rehabilitation”**

Success is dependent

upon implementing and executing the fundamentals in the best possible manner. There needs to be a system of how to approach any case and break it down from complex to simple components. This system leads to an accurate diagnosis and a biomechanically correct basis for treatment plan formulation. This course will demonstrate these steps and explain how to apply this system to any case, but more specifically to the all on implant styled case.

Jeff Shapiro D.M.D. – “Effective Integration of Digital Workflow into Clinical Practice”

The inclusion of digital technology in practice is providing better clinical outcomes both for the patient and for the practitioner. Digitally enabled

workflow is offering dentists the opportunity to experience their profession in new ways by providing a more sophisticated, predictable approach to treatment planning. This course will outline 2-D and 3-D technologies available to enable digital workflow, how to integrate them into your practice and how to combine them into producing a virtual digital patient.

**Howard S. Glazer D.D.S. –
“I Have It...You Need It!”**

This is a program about real dentistry for real people by a real dentist! See a potpourri of materials and techniques that will make your day at the office easier, more productive and fun!

Topics include Composites, Adhesives, Whitening, Oral Cancer Prevention, Minimally Invasive Materials & Techniques, Impression and Provisional Materials, Rotary Cutting Instruments, Lasers, Matrix Bands, Curing Lights, Artificial Dentine, Patient Communication Tools, Endodontic Instruments, Thermoplastics and Cements.

Robert Ritter D.M.D. – “The 3D’s of Dentistry- Recommendation Marketing, Digital Dentistry and Clinical Success in the Everyday Practice”

Dentistry is moving quickly in implementation of the newest

technologies available. Successful dentistry requires an integrated approach that looks at diagnosis and treatment planning as well as smile design, and single unit dentistry. An online presence including web site presence, social media and digital communication is vital. This fast paced, interactive and informative presentation will cover digital design and communication, digital planning and work flow, and digital marketing.

Wednesday October 26, 2016

3:00-5:00 pm Registration
6:30-8:00 pm Welcome Reception

Thursday October 27, 2016

7:30-8:30 am Breakfast and Registration EXHIBITS OPEN
8:30-8:45 am Welcome – Dr Dan Ward, Meeting Chair
8:45-10:00 am David Hornbrook DDS “Creativity with Ceramics”
10:00-10:30 am Break EXHIBITS OPEN
10:30am-Noon Jack Krauser DMD Steven Feit DMD “Biomechanical Occlusal Dentistry Applied to All on Implant Rehabilitation”
Noon-2:00 pm Lunch & Learn EXHIBITS OPEN
2:00-5:00 pm Hands-On Workshops (Pre-Registration Required)
(R-1) John Comisi DDS “The Reservoir Restorative Revolution: Bioactivity and its Place in Dentistry”
(R-2) Thomas Dudney DMD, Elliot Mechanic DDS, Brita Nadeau DDS “Interdisciplinary Treatment Planning”
(R-3) Scott Ganz DMD “Improving Dental Implant Diagnosis and Treatment Planning Through Optical Scanning, CBCT, and 3D Printing: New Paradigms for Today’s Digital Workflow”
(R-4) Joe Passaro DDS, Joe Woodell DDS “Treatment Planning Comprehensive Interdisciplinary Dentistry Using a Customized PowerPoint Template and Photographs”
7:00-9:30pm Gala Buffet Reception Induction Ceremony for New Members, Fellows, and ABAD (Everyone is welcome!)

Friday October 28, 2016

7:30-8:30 am Breakfast and Registration EXHIBITS OPEN
8:30-10:00 am Howard S Glazer DDS “I Have It...You Need It!”
10:00-10:30 am Break EXHIBITS OPEN
10:30am-Noon John Chao DDS “Pinhole Surgical Technique: A Revolutionary Way to Treat Gingival Recession”
Noon-2:00 pm Lunch EXHIBITS OPEN
1:00-6:00 pm Golf Tournament (Pre-Registration Required)
2:00-5:00 pm Hands-On Workshops (Pre-Registration Required)
(F-1) Fay Goldstep DDS “Regenerate, Bioactivate: Treating Patients in the 21st Century”
(F-2) David Little DDS “Implant Dentistry...Enhancing Restorative Outcomes Using the Latest Technology”

Saturday October 29, 2016

7:30-8:30 am Breakfast and Registration EXHIBITS OPEN
8:30-10:00 am Jeff Shapiro DMD “Effective Integration of Digital Workflow into Clinical Practice”
10:00-10:30 am Break EXHIBITS OPEN
10:30am-Noon Robert Ritter DMD “The 3D’s of Dentistry- Recommendation Marketing, Digital Dentistry and Clinical Success in the Everyday Practice”
Noon-2:00 pm Lunch & Learn EXHIBITS OPEN
2:00-5:00 pm Hands-On Workshop (Pre-Registration Required)
(S-1) Damon Adams DDS “Trends, Innovations, Controversies, & Clinical Tips”
(S-2) George Freedman DDS “Simplified Single Tooth Replacement: Stress-Free, Cement-Free Implant Restorations”
(S-3) Jack Griffin Jr DMD “Let’s Grow Teeth...Excellent Clinical Dentistry using Bioactive/Regenerative Materials”
7:00-8:00 pm Reception
7:45pm 40th Anniversary Commemorative Group Portrait (Accredited Members and Fellows)
8:00-12:00 pm 40th Anniversary Celebration Dinner Dance

AMERICAN SOCIETY FOR DENTAL AESTHETICS

40th Annual International Conference
October 26-29, 2016

Miami
TURNBERRY ISLE MIAMI

Conference Registration Form please print

Each participant must complete a separate registration form including contact information. Guest's names should be added to the attendee registration. Hotel registration is separate.

Name (Last) (First) (MI)
Address
City State Zip Country
Daytime Phone () Fax ()
E-mail Address AGD#
Name on Badge Special Needs
Guest Name (1) (2)

Guest Information: Guests must register to attend meals and social functions. Please include payment for your guests. If your guest is also in the dental profession, please register him/her as a dental professional so he/she will have access to courses.

Tuition: All fees are US Dollars. Refunds before October 1, 2016 include \$100 cancellation fee. No refunds after October 1, 2016.

Table with 4 columns: Conference Events, Registration Fee, Quantity, Total Amount. Rows include ASDA Member, Non-Member, Dental Team Member, Recent Graduate, Spouse/Guest, Hands-on Workshops, and Golf Tournament.

R-1 John Comisi D.D.S. – “The Reservoir Restorative Revolution: Bioactivity and its Place in Dentistry”

For years the dental profession has been struggling with providing effective long-term preventive and direct restorative solutions for our patients. The evidence is mounting that we may have been “barking up the wrong tree” in our efforts. There have been many “bioactive” materials introduced, and there is a real need for the dental care provider to understand why and how to use these materials, and why they are important in patient care now and in the future.

R-2 Thomas Dudney D.M.D., Elliot Mechanic D.D.S., Brita Nadeau D.D.S. – “Interdisciplinary Treatment Planning”

The restorative dentist serves as the quarterback when establishing a comprehensive dental treatment plan. Spectacular esthetic results can be achieved by allowing the patient’s face to dictate the treatment. This interactive workshop will allow participants to be involved in a study club like atmosphere. Topics include facially generated treatment planning, orthodontic case setup, patient and team member communication skills, altering tissue levels, implants, temporization and cutting treatment time from years to months.

R-3 Scott Ganz D.M.D. – “Improving Dental Implant Diagnosis and Treatment Planning Through Optical Scanning, CBCT, and 3D Printing: New Paradigms for Today’s Digital Workflow”

Digital technologies have greatly impacted the clinician’s ability to diagnosis, treatment plan, and execute treatment for our dental implant patients. The use of 3-D imaging and interactive treatment planning software provides the initial foundation for proper diagnosis. Intraoral or desktop optical scanners can help define with great accuracy the desired surgical, restorative, and aesthetic outcome. This workshop will help clinicians to understand the state-of-the-art concepts of today’s digital workflow.

R-4 Joe Passaro D.D.S., Joe Woodell D.D.S. – “Treatment Planning Comprehensive Interdisciplinary Dentistry Using a Customized PowerPoint Template and Photographs”

The Systematic Treatment Evaluation Protocol (STEP) protocol allows the desired two-dimensional position of a patient’s teeth to be determined using a customized PowerPoint template. This template is useful for the doctor to make decisions and communicate with the patient, the dental laboratory and the interdisciplinary team. Each participant will receive a STEP template with an Idealized Dentofacial Esthetic Analysis (IDEA) for their own use. A PC with PowerPoint 2010 or Mac with PowerPoint is required.

F-1 Fay Goldstep D.D.S. – “Regenerate, Bioactivate: Treating Patients in the 21st Century”

Today’s dental materials and technology can predictably regenerate and remineralize lost oral structures. Bioactive, minimally invasive dentistry is the proactive way to treat patients. Decay is detected, mapped and treated with bioactive materials that reduce restorative failure: glass ionomer cements, giomers, MTA, calcium aluminate hybrid cements. Diagnosis and treatment evaluation of periodontal disease includes genetics and inflammatory biomarkers. Lasers and other non invasive therapies can repair and heal.

F-2 David Little D.D.S. – “Implant Dentistry... Enhancing Restorative Outcomes Using the Latest Technology”

Patients are better informed about the choices available for replacing missing teeth and are more aware of the role that implant dentistry can have on enhancing the quality of their lives. Whether replacing a single tooth or an entire edentulous arch, technologies such as CBCT, planning software, and CAD-CAM allow us to virtually develop a restorative driven treatment plan that produces predictable results. Learn about the latest advances and practice techniques for implant placement and restoration.

S-1 Damon Adams D.D.S. – “Trends, Innovations, Controversies, and Clinical Tips”

New materials and technologies are reshaping the way in which we offer care to our patients, yet it is often difficult to know which to implement. A variety of clinical tips designed to assist the dentist and team in choosing the latest lab-fabricated all-ceramic dental materials and treatment protocols will be demonstrated. This engaging hands-on presentation will focus on current trends, controversies, and innovations.

S-2 George Freedman D.D.S. – “Simplified Single Tooth Replacement: Stress-Free, Cement-Free Implant Restorations”

Dental implant restoration can be predictable and profitable. Patient awareness and acceptance of implant treatment has grown tremendously. Unfortunately, the process and the cost of restoring the implant to esthetic function and form are confusing and costly. Learn a simplified step-by-step system for straightforward and hassle-free implant restorative treatment: diagnosis, surgical referral, post-surgical implant restoration, trouble-shooting and problem solving.

S-3 Jack Griffin Jr. D.M.D. – “Let’s Grow Teeth... Excellent Clinical Dentistry using Bioactive/Regenerative Materials”

Have you ever had a patient say that tooth was never a problem until you fixed it? This course deals with the elimination of sensitivity while providing an environment where tissues can heal. With newer regenerative/bioactive materials we can stimulate dentin healing and self-repair in our direct and indirect restorations while reducing sensitivity. Learn how and when to place these materials which promote oral health by decreasing plaque, reducing bacterial accumulation, or promoting regeneration of tissues.

AMERICAN SOCIETY FOR DENTAL AESTHETICS

40th Annual ASDA Conference: October 26-29, 2016 TURNBERRY ISLE MIAMI

PULPDENT®

19999 West Country Club Dr. Aventura, Florida, 33180 Resort phone: (305) 932-6200

Tucked away on 300 lush, tropical acres, between Miami and Ft. Lauderdale, Turnberry Isle is a Mediterranean-style oasis that exemplifies a culture of authenticity, spirited service and enriching experiences. Discover one of the "World's Best Resorts" by Travel +

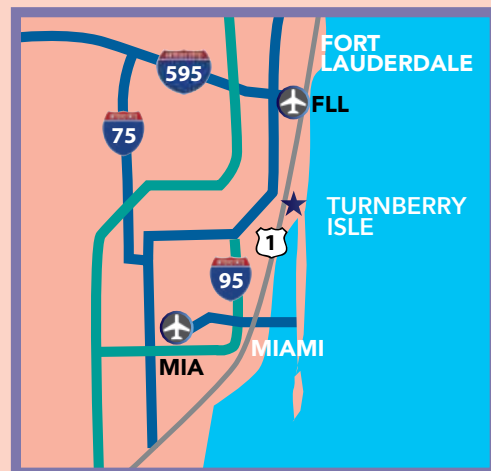

Leisure Magazine. Explore 36-holes of championship golf and the Cañas Tennis Center. Relax by the Cascata Pool or lounge at the Laguna Pool and journey down the 1,600-foot Lazy River. Rejuvenate at the Wellness Spa and Fitness Center. Let your palette celebrate our award-winning signature chefs at Michael Mina's Bourbon Steak or Italian-Mediterranean inspired CORSAIR by Scott Conant.

Shop the neighboring Aventura Mall or access the beach via the resort's complimentary shuttle. An Autograph Collection Hotel, Turnberry Isle Miami is a Forbes Travel Guide recommended hotel. With an unmatched location and a world-class golf course resort and spa, Turnberry Isle is a great place to enjoy yourself while learning and networking at our conference.

Hotel Reservations:

Please call toll free (888) 539-7894 in the US or call (305) 932-6200 to make your reservations at Turnberry Isle or visit ww.turnberryislemiami.com.

The ASDA Conference Room Rates* are \$289 (USD) per single/double occupancy Golf View rooms.

*Please note that these special convention rates are available only on October 24-30, 2016 and are based on availability.

Reservation requests must be received by October 3, 2016. All requests received after this date will be based on the prevailing room rate and space available. All reservation requests must be accompanied by a check for a one night deposit or a credit card number provided for guarantee. All guaranteed reservations will be charged one night if not canceled 2 days prior to arrival. A resort fee of \$24 per room per night will be charged. Hotel room rates are subject to applicable state and local taxes (currently 13%) in effect at the time of check-out.
