VANDER

★★★
HOTEL

★★★★
HOTEL

Sort of rawness may be noticed in this interior. It is an intentional effect. A classic business room was a starting point for the VANDER design. It combines natural materials such as solid wood with simple, sort of masculine forms. All ornaments are redundant here – only elegance and concrete solutions matters.

Fully upholstered headboard made of profiled panels with different texture. There is a possibility to change the type and color of fabric on its particular components thus a great deal of design opportunities are available.

VANDER

We designed unique pillows and bedspreads especially for this system. The cushion and upper headboard element are quilted in the same way.

Bedside cabinets and coffee table are mobile (on wheels).

Desk and bedside cabinets are made of brushed and waxed wood.

A simple build-in wardrobe uses full height of the room. The mirror imitates another wardrobe door. The bottom cupboard contains a minibar and a drawer with glasses. On the top of it there is a lit place for a welcome tray. The bottom cabinet can be opened handle-less. All other doors have push to open and silent closing system.

ETNA

★★★
HOTEL

★★★★
HOTEL

Careful analysis of needs made for a business class hotel allowed us to create modern furniture that combine practical solutions with a fashionable austere elegance.

Solids and functions of the furniture bond together, creating a brand new facility, which perfectly fits into cramped spaces. This interpenetration effect is also used to choose colors and textures.

We have obtained more space in the room by concentration of elementary hotel furniture functions in a single piece of furniture (wardrobe + desk with a minibar cupboard + mirror + coat hanger)

There is a possibility to use a moisture- and stain-resistant work top made of Corian® under the welcome tray set with an electric kettle.

ETNA

Headboards thickness of 54mm allows to route the cables behind it thus the electric sockets and switches can be arranged anywhere on the headboard.

The division of a larger closet into two parts gives the guests in a double room a greater range of privacy and hygiene. Moreover the direction of hangers minimizes the depth of wardrobes and increases the width of the corridor.

In this design we used handy folding coat hangers.

Thin, hairpin type, metal legs are not only durable and stable, but make the furniture solid look light and modern.

Upholstered element made of artificial leather with a texture similar to a fabric. This material is highly durable, fire- and waterproof, easy to clean and maintain, it has a special protection against the development of fungi and microorganisms.

BOLD

★★★
HOTEL

★★★★
HOTEL

BOLD collection means elegance and modern classic, highlighted by framed furniture doors, wooden legs and crown moldings. The large, entirely quilted headboard complements the view perfectly.

High headboard covering the whole width of the bed is fully upholstered with an interesting quilting.

The first model of night table has a door and wooden, profiled legs

BOLD

Wardrobes with framed doors and a crown molding made of wood have an additional construction reinforcement and special adjusting legs. Thanks to this they are extremely stabile and firm.

4 hinges for each door.

Doors have a silent closing system.

An unusual division of furniture fronts gives an opportunity to instal a minibar.

The desk, night table and coffee table have taper legs made of wood.

We can make different kinds of quilting on the upholstered headboard.

Second model of night table has high and straight wooden legs, it can be made with a drawer or without it.

MAXX

★★★
HOTEL

★★★★
HOTEL

In this furniture system we mixed together several styles and used a lot of different high quality materials (black, high gloss board and contrasting wooden decor). The whole view is complemented by additional elements like stylish pouf, lamps and textiles. There is something which unites them in an impressive way. Especially in this project we used our knowledge and passion for creating furniture.

Headboards thickness of 46mm allows to route the cables behind it thus the electric sockets and switches can be arranged anywhere on the headboard.

The headboard has a large upholstery made of interesting and easy to maintain fabric.

MAXX

The wardrobes are partially opened. Chrome bars situated at the bottom act as a suitcase stand. Wardrobes have an additional construction reinforcement and special adjusting legs. Thanks to this they are very stabile and firm. 4 hinges for each door. Doors have a silent closing system.

We can make different kinds of quilting on the upholstered part of the headboard.

Night tables and coffee table have legs made of wood.

The front edges of the top and side boards are 5cm thick.

Innovative way of connecting the furniture elements make the furniture board look like a veneer.

LABUCHE

★★★
HOTEL

★★★★
HOTEL

Fashionable white color which is a main feature of the LABUCHE system creates a nice contrast with natural materials used in arranged room. Monochrome elements with white lamps and TV complement brilliantly the interior with wood, concrete or brick finishings. The unconventional location of the furniture forces an alternative logistics in a hotel room, which introduces a breath of fresh air in the arrangement.

Upholstered headboard does not have to be assembled on the wall. Thanks to this we can situate the bed in a non-standard location, i.e. in the middle of the room.

LABUCHE

Wooden stool is not only an additional seat in the room, but also serves as an excellent night table.

The doors for the cupboards have silent closing system.

The front edges of the top and side boards are 5cm thick.

Innovative way of connecting the furniture elements.

In wardrobes we used a sliding translucent veil instead of a regular door. The wardrobes have an additional construction reinforcement and special adjusting legs. Thanks to this they are very stabile and firm.

FLY

★★★
HOTEL

★★★★
HOTEL

Modern lines of the furniture and properly selected colors resolutely emphasize the order prevailed in the room. Hanging cupboards and safe handles allow the room-service to save time. Many hotel guests will definitely notice the neatness and practicality of this room.

Headboards thickness of 46mm allows to route the cables behind it thus the electric sockets and switches can be arranged anywhere on the headboard.

FLY

Build-in wardrobes with sliding doors. It is possible to add a mirror on the door. An additional equipment (i.e. ironing set) inside the wardrobe as an option.

Practical and safe embedded handles.

Carcasses and table tops are made of a thick board.

We can add an upholstered element to the headboard.

SLIM

★
HOTEL

★★
HOTEL

★★★
HOTEL

Modern furniture with simple lines in a very good price range is a great solution for customers who follow current design trends.

The furniture is used in both small quest houses and large hotel facilities due to its versatility and adaptability even to small or difficult room plans.

Headboards thickness of 46mm allows to route the cables behind it thus the electric sockets and switches can be arranged anywhere on the headboard.

SLIM

The wardrobes are partially opened. They have an additional construction reinforcement and special adjusting legs. Thanks to this they are very stabile and firm.

4 hinges for each door.

The cabinets and drawers can be opened handle-less.

Doors have a silent closing system.

The front edges of the top and side boards are 5cm thick.

Innovative way of connecting the furniture elements make the furniture board look like a veneer.

We can place a panel for the electricity on the desk.

We can add an upholstered element to the headboard. The client chooses the type of fabric and quilting.

The upholstered element can be made in one or two pieces.

VERONA

★
HOTEL

★★
HOTEL

★★★
HOTEL

Timeless design in interesting shapes with a combination of chipboard and wood. Solid baseboards and countertops lined with an additional board constitute the durability of the furniture. VERONA blends perfectly into the classic interiors.

Headboards thickness of 46mm allows to route the cables behind it thus the electric sockets and switches can be arranged anywhere on the headboard.

VERONA

The wardrobes have an additional construction reinforcement and special adjusting legs. Thanks to this they are very stabile and firm.
4 hinges for each door.
Doors have a silent closing system.

Countertops are lined with a staggered additional board, which acts as a construction reinforcement and refers to the classic headboard.

We can make the headboard in a royal version, i.e. the central part for the bed is higher than the side parts for the night cabinets, or in a standard version, i.e. the headboard have a constant height.

Decorative wooden cornice and pilasters on the headboard.

RONDO

★
HOTEL

★★
HOTEL

The units of this system have been designed without sharp or pointed corners and with a concern about ergonomics even in a fairly cramped interiors. The furniture create a pleasant atmosphere in the room thanks to a carefully selected proportions and adequate combination of shapes and materials.

18mm thick headboard is mounted to the wall. This unit does not reach to the floor but to the lower edge of the drawer in the nightstand.

RONDO

Panel for the mirror has rounded corners like the headboard.

Both sides and the back panel are higher than the worktop of the desk thus there is no risk of items falling off. The sides have safe, rounded corners. This is a perfect solution for children and elder people.

Wardrobes have an additional construction reinforcement and special adjusting legs. Thanks to this they are very stabile and firm.

4 hinges for each door.

Standard fittings.

KITCHENETTES

Our offer is addressed also to the owners of apartments and hotel rooms equipped with a kitchen.

Our kitchenettes are matched both in style and color to the rest of the furniture we provide. Consequently, the entire space of the room is coherent and functionally complete.

We design and manufacture our kitchenettes to fit perfectly into the rest of the interior. They are always adapted to the specific dimensions in a room, therefore they are practical and fully utilize the available space.

KITCHENETTES

There is a possibility of a roller-blind installation with a lock for an upper part of the kitchen.

There are many options to configure cabinets and drawers. A wide range of handles (in this case aluminum edge handle mounted on the top of the furniture doors). The doors can be equipped with a silent closing systems.

The panel above the worktop in addition to the visual effect protects the wall against dirt.

Under cabinet LED lighting.

The work top covered with a laminate protected against high temperature, water vapor, detergents and UV radiation furthermore it is resistant to stain, impact and scratches. Available in wide range of patterns and structures.

We use granite sinks with a hygienic certificate, resistant to staining, scratches and impact. The color of the faucet is matched to the color of the sink.
