

About us

Name : Clement

Age : 21

About me : I was born in Reunion Island from a french mother from Normandy and a french creol father from Reunion Island. I grew up on this small island but had the opportunity to travel to several places : South Africa, Australia, Norway and now New Zealand !

I recently graduated from business school and thought that I needed time to explore the world and myself by stepping out of the box. I always had an interest in alternative lifestyles, gardening and farm animals caring and I chose New Zealand in order to make this experience happen.

Name : Anar

Age : 23

About me : I was born in Paris but lived most of my life in Madagascar which is my parents' place of birth. I studied Marketing in Montpellier(France) for 5 years and travelled to Spain, Switzerland, London and rural cities in France.

Wwoofing in New Zeleand was the opportunity to experience a different lifestyle and find myself facing situations I never experienced before. This trip also allows me to improve my english while having a good time.

 **From Kazel and Gareth**

"Long term Wwoofers who really made a big difference!"

30th July 2016

Clement and Anar have stayed with us for more than three months and during that time they have worked hard, learning new skills such as butchery, fencing and small machinery. They have completed large projects including spreading mulch around our avocado orchard and laying out weed mat, as well as planting garlic and trees. They are independent and capable. We entrusted them with sole care of our property and animals while we were away for two weeks and they took excellent care of it. We have found them to be reliable and supportive. Our son Elijah is especially grateful for the help with the firewood.
