Is Your Website Responsive? If Not,It Should Be. Here's Why !

Company Profile: [W2S Solutions](#) Digital Marketing team provides branding, User Experience design and app promotion. We focus on building designs that

increases user engagement and promotes call for action. Our responsive site design stands out from the crowd and fits all screen devices.

What Responsive Website Do for You?

One site Fits AI : A responsive website can provide a great user-experience across many devices and screen sizes.

A great experience: With a responsive website, your visitors can consume your content using the device they choose – at any time.

Cost effective: You only need to market, maintain and support one website that will work for all your customers, effectively cutting down on your operating costs.

Increase customer retention and loyalty: A responsive design helps to reduce bounce rate and page loading time thereby provides the perfect platform to build customer loyalty and strong reputation.

Easier Tracking: A single responsive site means that you no longer have to track user journeys, conversion paths, funnels and redirections between your sites.

Stay Ahead of Competition: Since users are using their mobile devices to search and make purchases online, you must be responsive to stay ahead of your competitors.

Better search rankings: The search giant's likes responsive websites. And since they can send lots of visitors your way, it's wise to pay attention to how it's looking.

Drives Conversion: High performing sites across devices lead to higher visitor engagement, retention and conversion.

Why We?

We help you with comprehensive, efficient and robust solutions that meet your unique requirements.

It's our responsibility to make your business as impressive and appealing as possible.

With our well-structured methodologies, highly qualified delivery model, and well defined quality assurance systems, we deliver business-critical solutions on-time, within budget, and with an unmatched level of performance.

We incorporate responsive in your new website

design scheme of things, but if you already have a website, we can modify it and make it responsive.

What we Do?

HTML5 / CSS3 / Responsive web development

PHP Web development.

WordPress web development with Parallax design

Web Application using .Net Framework

Jquery / AJAX

Adobe Tools to design a few elements.

How we Do?

Discover: Understanding the requirements for a responsive site.

Design: We will work with you through an iterative process to create rough wireframes, or UX sketches, for key views. Style considerations, Grid structures and layouts for the site considering different screen widths will be decided.

Develop: Building the site. The technical architecture

is built and tested for various devices.

**Deploy:** Release the new website to the public.

Portfolio
