## SKILLS

HTML5 | CSS3 | Twitter Bootstrap | Google Materialize CSS | Javascript | JQuery | Command Line | Git | GitHub | Responsive Design | APIs | JSON | Node.js | Express.js | Firebase | MYSQL | AJAX | Skilled Presenter | Database Theory | Social Coding Best Practices | Heroku | MongoDB | AM Charts | Google Charts API | Animate CSS |

---

## EXPERIENCE

**Jun-Jul 2016**      **Backend Developer**      **New Brunswick, NJ**

### *Meet-You-There Web & Mobile Application*

- Created a bulletin templating site alongside three other developers that creates unique meet-up sites for users' universities, allowing them to find and create events at their own schools.
- In charge of backend functionality using the MEAN stack.
- <http://meet-you-there.herokuapp.com/> ▪ <https://github.com/mamclaughlin/RU-Going>

**Apr-May 2016**      **UI/UX Developer**      **New Brunswick, NJ**

### *A Penny Saved Web & Mobile Application*

- Worked alongside three developers to create a web and mobile application meant to help users track eating expenses and make better financial decisions by providing intuitive trend visualizations.
- In charge of all UI/UX design and backend API integration with a focus on graphical data representations. Created with: Google Materialize CSS, HTML5, JavaScript, JQuery, AM Charts, JSON, MongoDB, Node.js and Express.js.
