

# Cyber for Defence Practitioners

## ABOUT THIS COURSE

The aim of this course is to assist students in rapidly developing an understanding of what cyber is and how it can be managed across defence. It will introduce the concept of cyber power, evaluating the cyber threats and opportunities likely to face operators, engineers, procurement staff, industry and partners. The course covers cyber as the 5th domain, from consideration in procurement lifecycles through to practical technical aspects and the operational defence context. Instructors illustrate fundamental principles of cyber, explore today's key cyber challenges and discuss future developments.

### COURSE TYPE & FORMAT

2-Day course, introductory level, taught classroom style.

### WHO SHOULD ATTEND

This course is intended for Procurement Executives, Project & Requirements Managers, Policy Authors, Operators, Engineers, Academics & Industry Suppliers, IT Staff.

## WHY ATTEND

At the end of the course you will be able to:

- Understand cyber as the 5th domain, cyber power and its relation to info ops, info assurance and electronic warfare
- Explain cyber threats, challenges and concerns for defence
- Understand common attack types and attack vectors, technical mitigations & cyber defence posture
- Opportunities presented in cyberspace

## PRE-REQUISITES

There is no prerequisite for this course.
