MANANA A

Answering the call to service is not for everyone. Your compass only points forward, guided by a spirited will to give, and driven by undaunted dedication to protect at all costs. It takes a unique individual to put it all on the line so that another may have the freedom to choose. For you, it is not about the glory, it goes much deeper than that. Only you can understand the true meaning of failure is not an option. Anything less just won't cut it.

Benchmade recognizes the fact that we get to go home at night thanks to you, and those that have served before you. Most of us will never have walked in your shoes. That is why we dedicate our every effort to make the best tools we possibly can for you. Know that each is built with you in mind.

We will never forget.

NOTICE: PROCUREMENT OF AUTOMATIC KNIVES IS REGULATED BY LAW. NO EXCEPTIONS WILL BE MADE. IT IS THE PURCHASERS RESPONSIBILITY TO CHECK THE CURRENT LEGAL PERMISSIBILITY WITHIN YOUR STATE AND/OR LOCALITY.

Although automatic opening knives are not subject to prohibitive legislation in Oregon*, many states are not so fortunate. Federal law prohibits shipment of automatic knives across state lines, with the following exceptions: (1) to civilian or Armed Forces supply or procurement officers and employees of the Federal Government ordering, procuring, or purchasing such knives in connection with the activities of the Federal Government; (2) to supply or procurement officers of the National Guard, the Air National Guard, or militia of the State, Territory or the District of Columbia ordering, procuring, or purchasing such knives in connection with the activities of such organization; (3) to supply or procurement officers or employees of the municipal government of the District of Columbia or of the government of any State or Territory; (4) to manufacturers of such knives or bona fide dealers therein in connection with any shipment made pursuant of an order from any person designated in paragraphs (1), (2), and (3).

2010 PRODUCT MATRIX

Visit benchmade.com for up-to-date information on current product availability.

THE BENCHMADE DIFFERENCE

Professionals need to seek out reliable information on their knives through user testimonials, available technical data, and reputable product reviews. The demanding world in which you work presents many challenges, some predictable and some not. When it comes to your choice of cutting tools, make sure you're getting the best tool for the job by considering mechanism, materials and the manufacturing process.

It's not just a knife. It's a Benchmade.

Expect more.

Our edged tools combine innovation, high technology and a hand-crafted finish.

We stand behind our products and craftsmanship.

All Benchmade products are covered by our limited lifetime warranty and LifeSharp service.

The 3 M's set Benchmade apart.

MATERIALS: Premium blade steels and strong, durable handle materials are built to last.

MECHANISMS: Patented locking mechanisms like our AXIS® lock provide reliability and enhanced function.

MANUFACTURING: Ultra-modern laser cutters and CNC machining centers offer the precision and control usually reserved for the aerospace industry.

NSN/GSA PROCUREMENT

For those of you currently active in the armed forces or law enforcement sectors and interested in purchasing a Benchmade knife, here are the options available to you for procurement.

- Visit our Dealer Locator at BENCHMADE.COM and enter your zip code to find your nearest dealer.
- Purchase certain Benchmade knives through the National Stocking System. (See below)
- Benchmade knives are offered by General Services Administration Federal Supply Service. Visit GSAADVANTAGE.GOV.
- Email us at military@benchmade.com and you will be in direct contact with Benchmade's Fed/Gov Sales Department. Please be ready to email or fax your active military or law enforcement ID information to Benchmade and we will do our best to provide you with the tools you want, and most importantly deserve.

150BKSN Marc Lee "Glory" Knife

KILLIAN DESIGN - MADE IN THE U.S.A.

This knife honors the fearless actions and heroic behavior of Petty Officer Second Class Marc Alan Lee, the first Navy SEAL to be killed in Iraq since the war began in 2003.

- 154CM (58-61-HRC) stainless steel re-curve blade
- Machined G10 handle applied with coyote brown BK1
- Multi-function nylon soft sheath

Marc Lee was part of a dedicated Naval Special Warfare team fighting the insurgency in Iraq, supporting the U.S. in its efforts to bring peace and stability to that country. His valorous conduct, exemplary leadership, and extraordinary self-sacrifice for his fellow service members have earned him the highest respect and gratitude of his fellow SEALs, the Navy, and our nation. A portion of the proceeds from every knife sold will be donated to the Marc Lee Foundationvisit marcleefoundation.org for more details.

AUTOMOTIVE ESCAPE TOOLS

THE RESCUE TOOL THAT COULD SAVE YOUR LIFE.

Benchmade ERT 10105-YEL & 10105-BLK

SPECIAL SERVICES

There's more to Benchmade than just great knives. We also offer you the service and support to back up or enhance the performance of our knives. From the finest customer service in the industry to branded clothing and specialty items — it's all available for you to take advantage of. And if you find that something is missing or needs improvement, we want to hear about it.

benchmade® LIFESHARP *

We will gladly resharpen your Benchmade knife to a factory razor sharp edge (service does not apply to any serrated portion of the blade). Simply ship your knife to us. We'll not only sharpen it, we will also inspect the knife for any warrantied repairs and "tune" the knife for optimum performance. Ship the knife to the Benchmade address, postage paid and insured. Please enclose your return shipping address with \$5.00 to cover return shipping charges.

LASER MARKING

Commemorate an event or outfit the unit. Whatever the occasion, now you can have your logo or artwork laser-etched onto any Benchmade. Depending on the particular model, the mark can be placed either on the blade, or in some models, on the handles. If you are interested in this special service, simply call a Benchmade customer service representative at 800.800.7427 or visit www.benchmade.com/ lasermark. Basic set-up charges and quantity restrictions do apply.

LOCKING MECHANISMS

Seems simple enough. You open the knife, you close the knife. But it's the mechanics of motion that happens in the process of opening and closing which can make the difference between ordinary and extraordinary. Is the knife easy to actuate, can it be opened with one hand, is it ambidextrous, and will it be reliable when you need it most? These are all essential considerations when it comes to knife mechanics.

A patented Benchmade exclusive, AXIS has been turning heads and winning fans ever since its introduction. A 100-percent ambidextrous design, AXIS gets its function from a small, hardened steel bar which rides forward and back in a slot machined into both steel liners. The bar extends to both sides of the knife, spans the liners, and is positioned over the rear of the blade. It engages a ramped, tang portion of the knife blade when it is opened. Two omega style springs, one on each liner, give the locking bar its inertia to engage the knife tang. As a result, the tang is wedged solidly between a sizable stop pin and the AXIS bar itself.

MODIFIED LOCKING-LINER

The basic principle is an integral locking bar within the knife liner being stress bent, enabling it to spring into position behind the rear tang of the blade when the blade is opened. The locking bar wedges against the rear of the blade, locking it open until you physically push it clear and close the blade (locking-liners are made either right or left hand specific). And with a modified locking-liner you get a patented feature which helps to enhance the lock function. The function success and function failure of a locking-liner depends greatly on how well it is made and also the quality of the materials used. With Benchmade, you get both.

NAK-LOK[™]

Built from the framework of the locking-liner with some innovative updates. The lock engages using tensile strength, compared to the compression hold of more traditional locking-liners. With the Nak-Lok, the possibility of personal injury is greatly reduced with the opening finger never crossing the blades path.

MONOLOCK

The monolock mechanism is basically a locking-liner on steroids. The knife liner is one in the same as the knife handle, and thus it is designed and made to function as the locking mechanism. Subsequently, a thicker material is used to provide enough surface area to be a functional handle, and in turn creates a larger surface area to lock the blade with. If executed properly, the monolock design rates very highly in strength and function.

NITROUS™

Another patented Benchmade exclusive, the Nitrous boosts the blade with ease. As the blade is closed the two torsion arms which run the length of the handle liners are secured in place and make contact with the blade tang. As tensioned against the blade tang, the user rotates the blade open to a 30-degree angle, the torsion arms take over and continue the blade opening process on its own. The huge advantages to the Nitrous design over other similar concepts, is that the blade must be rotated open to beyond a 30-degree angle, which offers added user control.

BLADE STEELS & FINISHES

Benchmade uses a variety of modern materials specially selected for their superior performance characteristics. We strongly believe that if you're going to put this much effort into designing a custom quality cutting tool, then it only makes sense to build it with materials that compliment its form and enhance its function.

154CM

An American-made premium grade stainless steel originally developed for tough industrial applications. Known for its best all-around qualities, it offers great corrosion resistance with good toughness and edge quality.

S30V

An American-made and developed premium grade stainless steel created especially for knives. It is a powder-made steel with a uniform carbide distribution and clean steel properties. As a blade material, it offers excellent corrosion resistance and superb edge qualities.

CPM-M4

Special purpose, high-speed steel with a combination of high Carbon, Moly, Vanadium and Tungsten for excellent wear resistance and toughness. A powder-metal, non stainless steel.

D2

An air-hardened tool steel that offers good corrosion resistance and excellent wear resistance. A good choice for hard use applications.

440C

A high-chromium stainless steel with a terrific balance of good hardness and corrosion resistance. 440C takes a nice edge and is fairly easy to resharpen. An excellent value-priced steel for its performance.

M390

A high performance blade steel with superior cutting ability and wear resistance due to its high concentration of Vanadium and Chromium carbides. Its unique powder metallurgical process also promotes a uniform carbide distribution and clean steel properties, making M390 a popular steel used in surgical cutting instruments. As a blade material it offers excellent corrosion resistance due to its high concentration of Chromium.

N680

A Chromium-Molybdenum steel with the addition of Nitrogen. Excellent corrosion resistance properties, especially in salt water. Good hardenability and high obtainable hardness. High wear resistance and ability to preserve keenness.

N690

An Austrian made stainless steel, which is comparable to 440C in performance and value. Keen edge qualities with great corrosion resistance.

X15-TN

This French steel was developed for the aircraft industry for jet ball bearings, as well as the medical industry for scalpels. It has the ability to resist rust in the worst of conditions while maintaining ample edge retention. The capability behind this steel is in the way it is manufactured, resulting in the finest steel for use in harsh environments such as salt water. The edge on an X-15-TN blade is easier to maintain.

DAMASCUS

A specially forged, layered steel made up of a variety of steels. It offers remarkable toughness and edge quality. For finishing, the surface layers or lines are exposed through an acid etch which creates a very unique visual effect. Used in special applications due to its inherent high cost and artistic nature.

BK1® COATING

A matte black coating that provides excellent corrosion protection exceeds the ASTM-117 spec for saltwater, and possesses higher scratch resistance.

BP1 COATING

Black Pearl (BP) is a PVD (physical vapor deposition) coating made up of Titanium Carbo-Nitride (TiCN). It is a darker, near black, scratch-resistant coating with nice decorative qualities.

COMBOEDGE[®]

It denotes our partial serration on the plain edge blade configuration. Benchmade's serration pattern offers ideal cutting ability for fibrous materials such as webbing, straps, netting or rope.

HEAT-TREATMENT

Over the years we have developed a "special recipe" for heattreating our blade steels. This process maximizes the steel's molecular structure for a custom toughness and Benchmade superioar performance. All steels may be created equally, but that is where it stops when it comes to Benchmade.

HANDLES

CARBON FIBER

A contemporary, premium composite of thin strands of carbon tightly woven into various weave patterns, then set in resin, which is most commonly clear but can be color tinted. It offers great looks and is exceptionally strong for its minimal weight.

MICARTA

Layers of linen cloths soaked in resin and pressured together. Most commonly used on more stylish knives due to its rich color finish qualities.

6061 T-6 ALUMINUM

A nonferrous metal originally developed as a premium aircraft grade aluminum, it offers a solid handle form and function at a nominal weight. Most typically color anodized.

NORYL GTX®

A modern engineered plastic offering high-strength, low flex, and lightweight properties. Molded to form.

G10

An extremely durable makeup of layers of fiberglass soaked in resin, then highly compressed and baked. Impervious to moisture or liquid and physically stable under climate change. Most commonly black, but is available in various colors too

ZYTEL[®]

A lightweight glass-filled nylon engineered for strength and durability. Widely used throughout the auto industry in engine-related components. Molded to form.

KYDEX[®]

A mixture of acrylic and PVC which offers outstanding impact and chemical resistance as well as fire retardancy. Widely used in the auto and aerospace industry. Molded or thermo-formed.

DELRIN[®]

A lightweight and durable engineered polymer with low-wear properties. Used throughout the auto industry. Molded to form.

VALOX®

A reinforced resin with excellent stiffness, strength, and dimensional stability. Molded to form.

GRIVORY®

An amorphous nylon copolymer with exceptional dimensional stability.

ANODIZATION

An electrochemical process used for adding color to titanium surfaces. A combination of chemical bath and electrical voltage level generates the desired color. A similar process is used for aluminum with the addition of a chemical coloring bath.

SANTOPRENE®

A thermoplastic elastomer which is molded to specification. It offers excellent flexibility with high tear strength and fatigue resistance. Resistance to many harsh chemicals. These features contribute to improved performance in a range of tough jobs.

LINERS

6AL 4V-TITANIUM

Considered an exotic metal alloy (Titanium + 6% Aluminum + 4% Vanadium) with an excellent strength to weight ratio which offers exceptional performance in a knife. Titanium is corrosion resistant to natural elements as well as many industrial chemicals.

420J STAINLESS STEEL

A common knife grade with low carbon, high chromium content steel which offers excellent bend toughness and wear ability. It offers excellent corrosion resistant characteristics as well. Also used in handles.

SHEATHS

BALLISTICS NYLON

A heavy duty woven nylon fabric originally developed for use in bullet proof vests and body armor. Offers great lightweight sheath durability.

LEATHER

A natural material dating back to man's earliest beginnings in the knife world. It can be easily dyed and tooled for desired visual effect. Offers traditionally accepted levels of performance and design capability.

WARRANTY

LIMITED LIFETIME WARRANTY

Benchmade Knife Company, Inc. ("Benchmade") warrants to the original owner that this knife will be free from defects in materials and workmanship. Benchmade will, without charge, repair or replace, at Benchmade's option, any knife returned for Warranty work and found to be defective by Benchmade. The knife must be shipped by owner prepaid and insured freight, together with a description of the problem, and must be accompanied by the original bill of sale, your charge or credit card receipt or any satisfactory proof of the original date of purchase from a retail dealer. Any automatic knife returned for warranty service from outside of Oregon must also include a copy of the owner's active police or military identification, or be returned through the authorized Benchmade dealer from whom the knife was originally purchased.

NO EXCEPTIONS WILL BE MADE.

WHAT IS COVERED

This warranty covers replacement parts and labor.

WHAT IS NOT COVERED

This warranty does not cover normal wear, resharpening of the blade, damage caused by neglect, misuse or the failure to perform normal or necessary maintenance, disassembly of any knife by any person other than Benchmade's Warranty department, or shipping costs for returned knives.

Do not use your new knife as a screwdriver, prybar, chisel or punch. Do not throw your knife or use it for any purpose other than cutting. Do not disassemble your knife. Do not sharpen your knife on a power grinding wheel. Any of these acts will void your Warranty. MINIMUM CHARGE TO REASSEMBLE A KNIFE WHEN THE WARRANTY HAS BEEN VOIDED IS \$20 PLUS PARTS.

Repair or replacement as provided under this Warranty is the exclusive remedy of the consumer. Benchmade shall not be liable for any incidental, reliance, or consequential damages or breach of implied warranty on this product, including any damage to person or property. Benchmade's liability under any circumstances is limited to the purchase price. Some states do not allow exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

This knife has only one use, as a cutting tool. Benchmade's knives carry no warranty except as expressly contained herein. Benchmade disclaims all warranties of merchantability and fitness for a particular purpose other than for use as a cutting tool. There are no warranties which extend beyond the description contained herein.

Please review the warranty information and proper knife care instructions provided with each knife.

ORDERING OF AUTOMATIC KNIVES

Automatic knives are available for sale in Oregon state. All orders for automatic knives must be on departmental purchase order or letterhead with wording to the effect that the knives will be used as duty items. All orders for automatic knives must be faxed or mailed. We cannot accept phone orders for automatic knives. The sales of automatic knives is Federally regulated (refer to catalog inside cover for Federal Statutes), always check permissibility within your state or locality as non-Federal personnel may be precluded from ownership or use by State laws. NO EXCEPTIONS WILL BE MADE.

The purchase, use and ownership of knives is subject to a wide variety of local laws and regulations. It is impossible for Benchmade Knife Company to know or interpret all of these laws. It is the responsibility of the buyer to be aware of the laws which govern them in their specific area wherever that may be. We encourage the responsible ownership and use of knives as one of mankinds oldest tools. Be smart and be safe.

SHIPPING OF AUTOMATIC KNIVES

All AUTOMATIC knives shipped by Benchmade will be done via the following couriers, UPS, FedEx, etc. and CANNOT be shipped through the U.S. Postal Service. Also please note that all returns of automatic knives must be shipped via alternate couriers, UPS, FedEx, etc. This in accordance with the policies of the U.S. Postal Service.

ARE ASSIST OPEN KNIVES LEGAL?

The way that the Benchmade assist opener knives are designed and built, they are not considered an automatic or switchblade under Federal interpretations. The Optimiser® and new Nitrous™ assist mechanisms must be initiated with the user manually overcoming the pull of the torsion bar or, split liner systems to activate the assist function. This is done through the use manually or, physically having to engage the blade first before opening. And, as an added safety feature, the Benchmade assist openers must have their blades rotated open to an approximately 20 to 30-degree open angle BEFORE the assist engages. This eliminates the need and complication of a secondary safety mechanism.

Even though the Benchmade assist opener models are not classified as automatics or switchblades, it is still recommended that the user research and verify the legalities in their own specific areas. Knife laws and regulations are subject to local interpretations and may change frequently.

You may also contact the American Knife and Tool Institute (AKTI) for assistance or, you can choose to become a member and help to protect your knife freedoms. WWW.AKTI.ORG

Every effort is made to ensure the accuracy of the prices and information in this catalog. However, we reserve the right to rectify any and all errors prior to any sale transactions. This catalog is produced annually.

Prices shown are at suggested retail (U.S. currency). Actual purchase prices may vary. All pricing and product specifications are subject to possible change without prior notice. Cutting Edge Training, LLC, is the premier police training company in the US. Their "Tactical Duty Knife" courses were carefully designed to train the police officer, deputy, and agent how to reasonably and effectively employ the knife in those last-ditch situations where survival is doubtful.

Our knives, when used for defense purposes, are life-saving tools and Cutting Edge Training's program employs the most effective method of teaching officers how to use the knife effectively. The liability awareness and reduction aspects of this training are nothing less than outstanding and should be a required component of any force response course.

If you are interested in obtaining the finest training possible in the rational use of and defense against edged weapons for law enforcement and military, contact Benchmade customer service at 800.800.7427, or contact George Williams with Cutting Edge Training directly at 360.671.2007 or training@cuttingedgetraining.org.

Trainer handles are red in color for positive identification

These codes appear after the Benchmade model numbers. They identify particular feature variations within each model. (Example: Model 140SBK is a Model 140 knife which features partially serrated ComboEdge and BK1 black corrosion resistant coating on the blade).

(NO CODE) Plain edge/no blade coating

- S ComboEdge™ (partially serrated)/ no blade coating
- **BK** Plain edge black corrosion resistant coated blade
- SBK ComboEdge (partially serrated) black corrosion resistant coated blade
 - **B** Black anti-reflective, corrosion resistant coated blade
- SB ComboEdge (partially serrated)/ black anti-reflective coated blade
- **OD** Olive Drab color handle
- SN Sand Camouflage color handle
- **CF** Carbon Fiber Handle
- -RED Red color handle

- -SLV Silver color handle
- -BLU Blue color handle
- -YEL Yellow color handle
- -ORG Orange color handle
- -BLK Black color handle
- -PNK Pink color handle
 - BP BP1 Charcoal color, scratch resistant coating
 - W Soft sheath for rescue hook
- ADC Army Digital Camouflage color sheath
 - T Trainer blade with red handle
- TR Bali-song trainer with red handle
- D2 D2 Blade Steel
- **DM** Damascus Blade
- CP Clam pack
