ANYUTA

3D PRINTED SCALE MODELS

Dear customer,

We thank you for buying our products and we appreciate your interest on our 1/24 scale WWII Wehrmacht Fahrrade M30 reconnaissance duty bicycle model kit, one of our most wanted 3d printed products in plastic material.

In case you 'll notice slight traces of oil on the kit parts surface when you got the item, it is absolutely normal. This oil is actually left after the 3D printing process was finished and the kit parts been removed from the printer tray to be washed into an ultrasonic oil bath and later an ultrasonic water bath and might escaped the clean inspection and dry by hand procedure. It can be cleaned easily by washing parts with water & dishwasher soap. Use an old toothbrush gently & then allow to dry. Keep in mind that items are only 0.3mm to 0.5mm thin and they are very fragile.

Feel free to ask any help or info during your model building process. You allready got the assembling instructions in your hands, but we 'd like you to know that Anyuta 3D will be always next to you for anything you might need in order to build a realistic scale model for your showcase.

Regards,

Anyuta 3D print creations & scale models

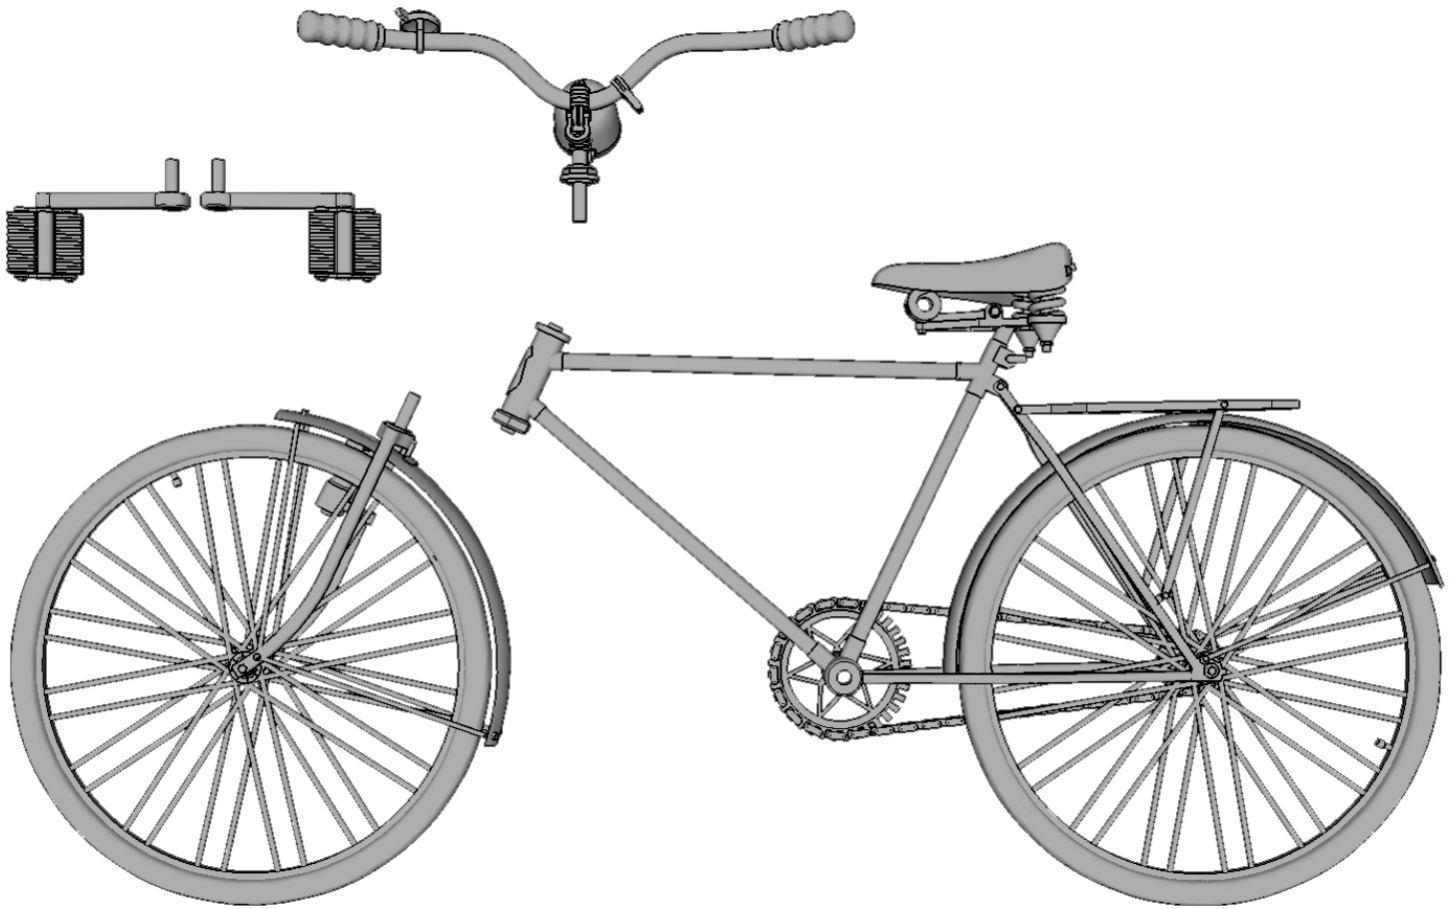
Fahrrade M30 duty bicycle

1/24 scale 3d printed model kit by anyuta creations

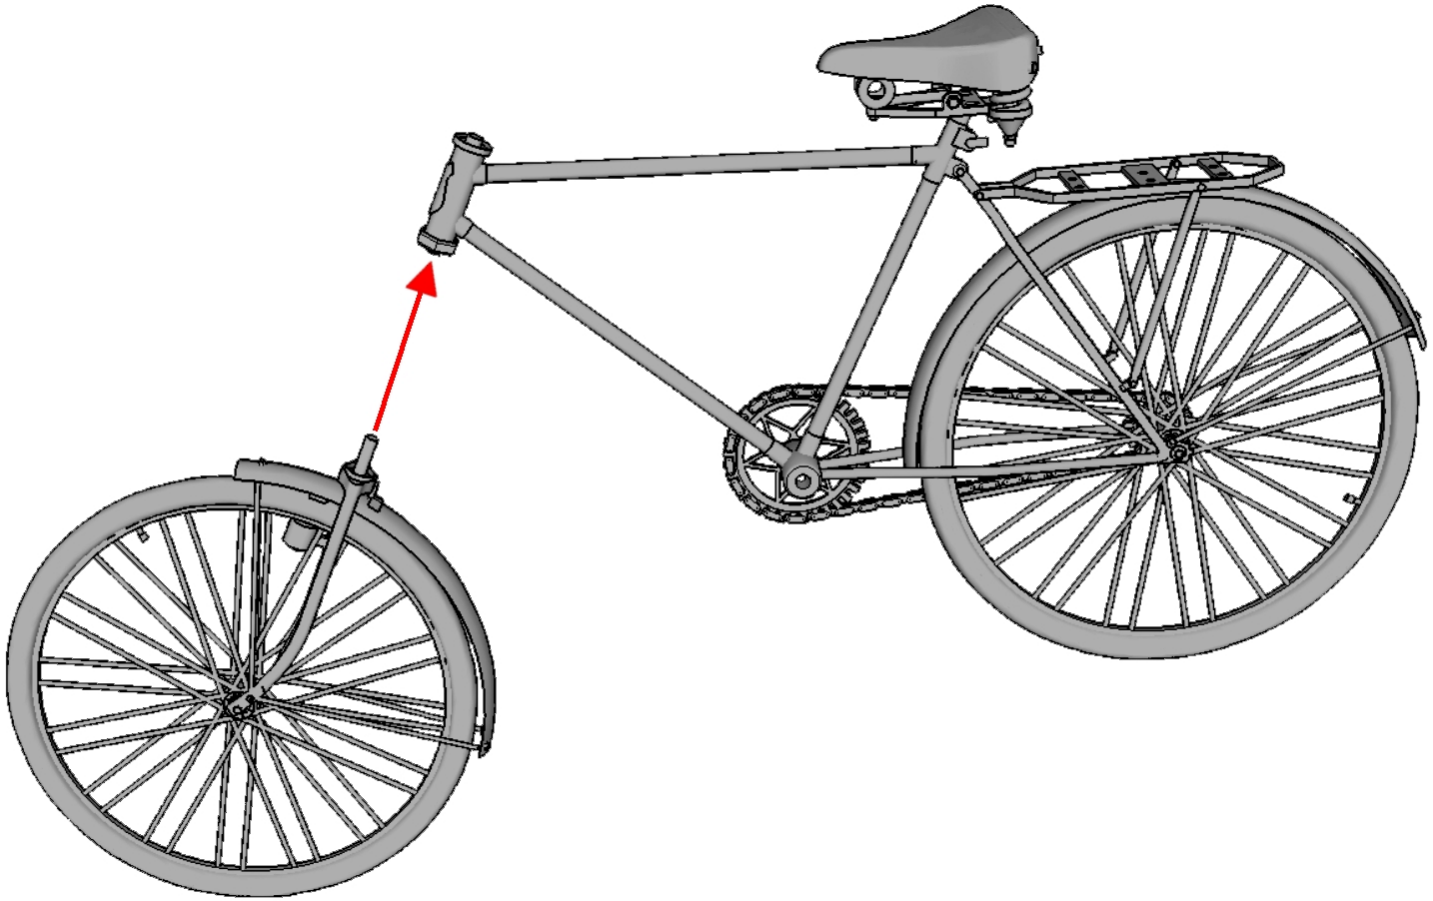
The German Army bicycles (Wehrmacht Truppenfahrrades) were widely used during WWII operations. Germans used more than 3 million military bicycles during the War. Almost all WWII European Armies used identical bicycles.

step-by-step model kit building instructions

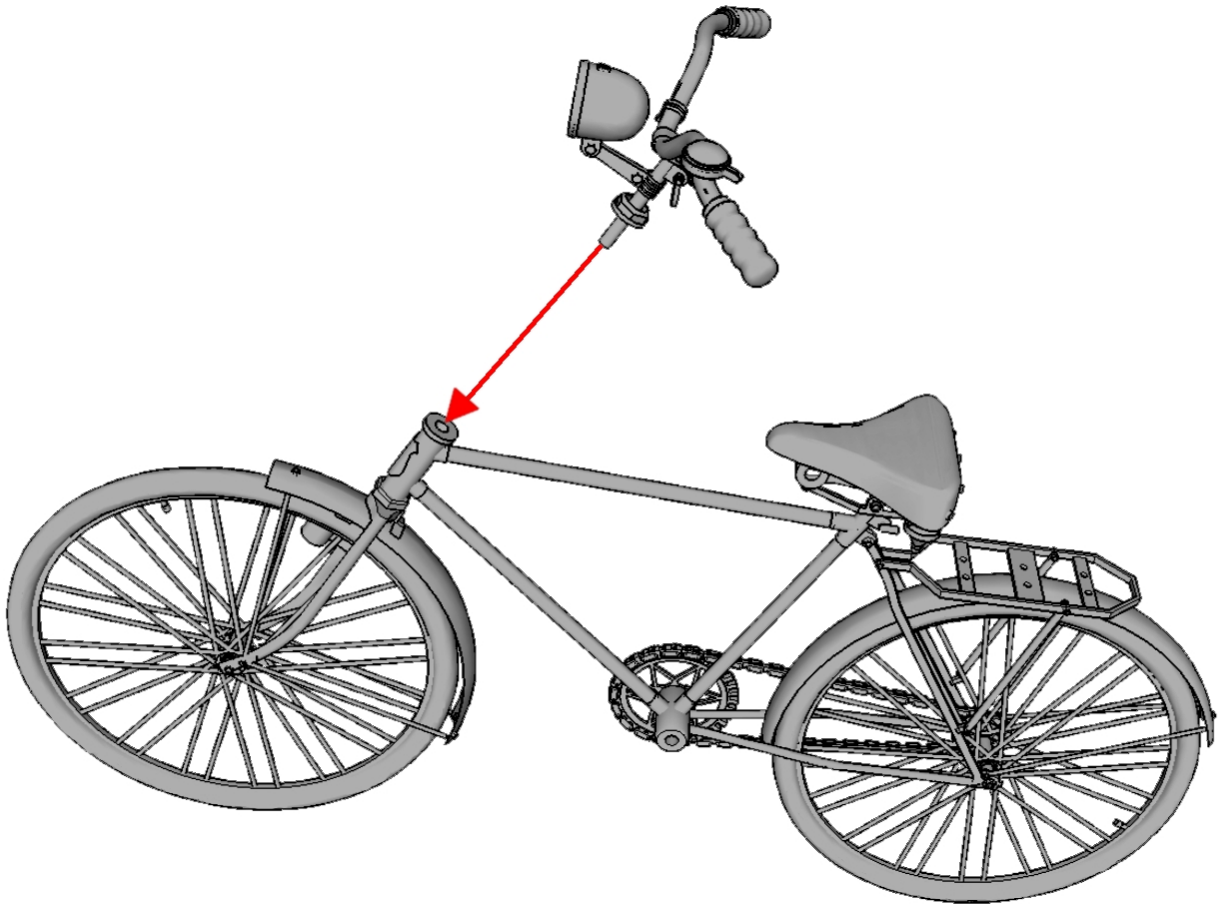
This is a German made Fahrrade M30 duty bicycle unassembled model kit produced under 1/24 scale for aviation or military diorama enthousiasts & scale modeler builders. This kit contains all necessary parts for assembling ONE model under 1/24 scale. All parts are 3D printed with Frosted Ultra Detail matte translucent plastic material, which is highly recomended for best results on detail. Additional diorama accessories (eg. Fuel drums & jerrycans, fire extinguisher, wheel chokes etc) are not included into this model kit and should be purchased separately by "Anyuta 3D print creations" products catalog. Please follow the step-by-step model kit building instructions. Due to parts complexity, the kit is appropriate for experienced modelers. For additional info, building instructions & directions, contact with us and we 'll be happy to help.



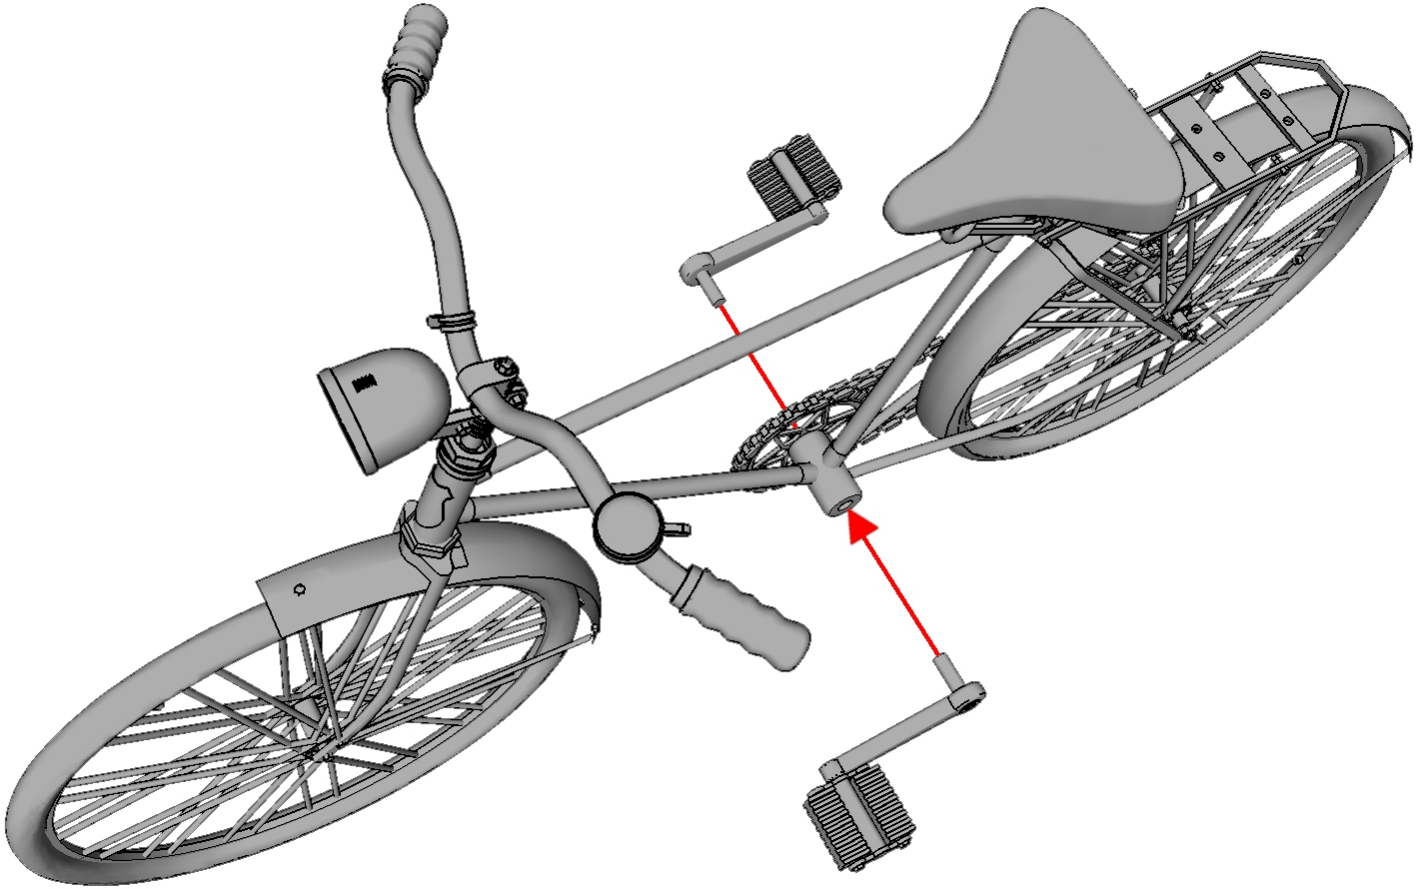
The bicycle scale model kit contains 5 parts only, 3D printed with Frosted Detail matte translucent plastic material. Please check & identify each part closely before proceeding to building process. Cyanoacrylate glue is recommended for best results.



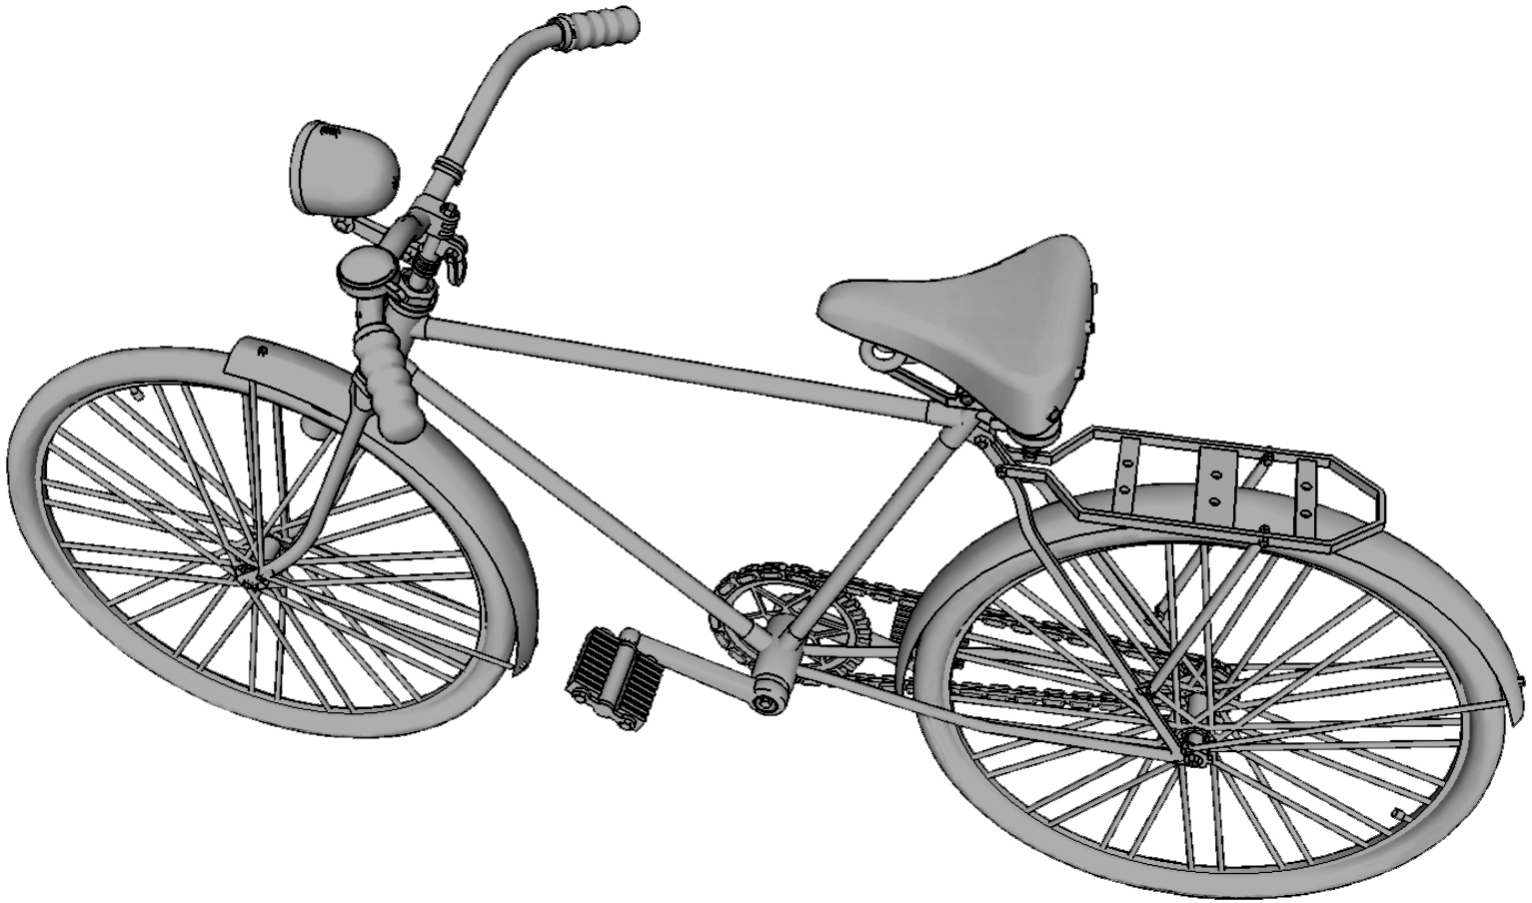
Insert pin into slot as shown on above picture and attach front wheel on main frame. The front wheel part can be instaled tilted. Use extra caution while installing part & avoid violent moves to prevent plastic parts fracture. Secure in place with superglue



Insert pin into slot as shown on above picture and attach the steering bar on main frame. Notice that if the front wheel part is placed tilted to left or right, the steering bar should be also positioned accordingly. Use superglue to secure in place



Insert each pin properly into slot as shown on above picture and attach the petals on bicycle's main frame. Notice that petals can be set at any angle, but should be positioned accordingly to face opposite. Use cyanoacrylate superglue & secure parts



This is how the built bicycle scale model should look like when all 5 parts correctly installed. Use extra caution while installing each model part & avoid violent moves to prevent plastic material fracture. Use of cyanoacrylate superglue is recommended

Additional 1/24 scale models & diorama scene accessories such as fuel canisters, oil drums, wheel chokes, maintenance ladders, fire extinguishers, hydraulic hoists etc (not included into this kit) are available for sale by “anyuta 3d printed scale models”
