

Lifeline

B6001

Optimizer and Trickle Charger

The Lifeline® fully automatic battery charger is designed for charging 6V and 12V electrolyte batteries, maintenance-free batteries, "Marine Deep Cycle", "AGM" and gel batteries for passenger cars, trucks, agricultural machinery, boats, lawn mowers, tractors, airplanes, motorcycles, recreation vehicles, SUVs, water sports vehicles, snow scooters, all-terrain vehicles, driving motors, etc.

The built-in electronic "Auto shut-off" function protects the battery from overcharging. Thanks to constant charging current and automatic switch to battery optimum charge maintaining mode using pulse recharging, the battery working life and power is extended. The device has been designed only for use in closed areas and for short-time use in open areas.
